# U.S. Coins

Featuring: The Padula Collection

September 7-8 & 10, 2017 | Long Beach

## Signature® Floor Sessions 1-4

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103B  
300 E. Ocean Avenue • Long Beach, CA 90802

### Session 1

Thursday, September 7 • 1:00 PM PT • Lots 3001-3599

### Session 2 - PREMIER SESSION

Thursday, September 7 • 6:00 PM PT • Lots 3701-4132

### Session 3 - PADULA COLLECTION (see separate catalog)

Friday, September 8 • 10:00 AM PT • Lots 4133-4511

### Session 4

Friday, September 8 • 6:00 PM PT • Lots 4601-5230

## Signature® Internet Session 5

(HERITAGELive!®, Internet, Fax, & Mail only Session)

### Session 5

Sunday, September 10 • 2:00 PM CT • Lots 7001-8718

## LOT SETTLEMENT AND PICK-UP

Friday, September 8 • 10:00 AM – 1:00 PM PT

Saturday, September 9 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

### Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

## BIDDING METHODS

### HERITAGE Live!<sup>®1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. [HA.com/1259](http://HA.com/1259)

### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Direct Client Service Line: 866-835-3243

Dear Bidder,

The Long Beach Expo is at the forefront of the numismatic world September 7-9, and Heritage is proud to serve once again as Official Auctioneer for this important event. U.S. coins are featured in four Signature® Floor Sessions on Thursday and Friday, followed by our popular online session on Sunday, September 10. The high-value Premier Session is Thursday evening at 6 pm Pacific Time.

We have a diverse group of Featured Collections that headline this year's Expo. A separate catalog is devoted to [THE PADULA FAMILY FOUNDATION COLLECTION](#), which we will present on Friday morning of the show starting promptly at 10 am PT. Please see the special catalog to view this collection of early date large cents and read about the philanthropic mission it supports.

Three other Featured Collections deserve your attention as well:

## THE MORGAN HILL COLLECTION

Our consignor's parents were immigrants from Japan, settling in the then-small farming community of Morgan Hill. Many of the city's farmers were from Japan as well, and 90% of them grew strawberries. As a youth, our consignor worked the strawberry fields seven days a week from age five until he was 25. A successful business career followed, as well as an abiding interest in rare U.S. coins – especially gold. The Morgan Hill Collection is a tribute to that small town where he grew up. While the collection has a small presence of silver and a few other U.S. type coins, federal gold in all its denominations from 1849 through the 1920s is its primary focus, including 28 pieces that appear as Premier Session lots.

## THE TERRY BRAND ESTATE, PART IV

It is our pleasure to offer additional selections from the Terry Brand estate. Once again, 1794 Flowing Hair half dollars make up the entirety of the consignment, including an astounding 21 examples in the Premier Session and four more 1794 halves in Session 1. As always, there will be no shortage of bidders when these first-year half dollars cross the block. We note an O-103 graded VF20 NGC, two very scarce O-107 pieces – one certified Fine 12 by NGC, the other Fine 15 NGC – and an O-101a graded XF45 by NGC.

## THE MEHartGold.com REFERENCE COLLECTION

Western souvenir gold tokens have proven popular with exnumia collectors, especially the varieties sold at the 1904 Louisiana Purchase, the 1905 Lewis and Clark, and the 1915 Panama-Pacific expositions. Best-known within the series are the types that form the M.E. Hart's Coins of the Golden West set. The MEHartGold.com Reference Collection is complete by type. More importantly, it includes most of the known die varieties including such formidable rarities as the 1849 Arizona gold dollar. The Reference Collection is presented in its entirety as part of the online Signature® Session on Sunday, September 10. We encourage interested collectors to visit the MEHartGold.com website for additional information about

Western souvenir gold, and not miss this chance to bid on many high-grade, rare varieties – the perfect opportunity to upgrade and complete a specialized collection.

For those who cannot attend the Long Beach Expo in person, Heritage makes it simple to place your bids either before or during the auction. Our live telephone bidding and interactive online bids through HERITAGE Live!® are second to none in the auction industry. Real-time mobile or computer bidding from anywhere in the world is equally dependable. Our well-trained staff is always happy to accept your bids via e-mail, fax, or regular mail before the auction, and to answer any questions you may have.

Good luck with your bids and please accept our sincere thanks for your participation. We hope to greet you in Long Beach!

Sincerely,

A handwritten signature in blue ink, appearing to read "Greg", with a stylized flourish extending from the end.

Greg Rohan  
President

A handwritten signature in blue ink, appearing to read "Todd", with a stylized flourish extending from the end.

Todd Imhof  
Executive Vice-President

# MyRECOMMENDATIONS

## Online Suggestion Tool

THE LAST PIECE OF THE PUZZLE? HERITAGE HAS IT.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations visit Heritage's US Coin pages now at [HA.com/Coin](http://HA.com/Coin).

# SESSION ONE

## COLONIALS

- 3001** 1652 Oak Tree Threepence, No IN on Obverse, Noe-27, W-300, Salmon 5-Aii, R.5 — Damaged — NGC Details. VF. Aside from some small punctures between A and T in MASATHUSETS, the surfaces of this Oak Tree three pence are lightly abraded, with pleasing lavender-gray toning. The tree, date, and denomination remain bold, and most peripheral lettering is still legible.

### 1652 Oak Tree Sixpence, AU Details Noe-12, IN on Obverse

- 3002** 1652 Oak Tree Sixpence, IN on Obverse — Damage — PCGS Genuine. AU Details. Noe-12, W-400, Salmon 2a-B, R.5. The first S in MASATHVSETS is engraved backwards on Noe-12. This AU-level coin shows a shallow kink in the planchet at 10 o'clock relative to the obverse, with a couple of minor hits in the center at the date. The coin is otherwise characteristic of Massachusetts silver struck on a rocker press. This piece is sharply detailed and well-centered with all legends more or less on the flan. Both sides have nearly complete border beads. Listed on page 41 of the 2018 *Guide Book*.

- 3003** 1652 Oak Tree Shilling, IN at Bottom — Graffiti — PCGS Genuine. VF Details. Noe-12, W-510, Salmon 9a-Fii, High R.6. 70.6 gn. The cud on the lower right tree branch is weak from wear but discernible. The legends and the date are bold. A slight curve in the planchet is a common characteristic of silver pieces struck on a rocker press during this period. The planchet is chipped at IN, obscuring part of the the letters. Otherwise, all legends are fully on the flan and the strike is well-centered. There are several scratches on each side, including the numbers 176 crudely etched into the field above the date.

### 1652 Pine Tree Shilling, VF30 Small Planchet, Noe-26, Salmon 9-E

- 3004** 1652 Pine Tree Shilling, Small Planchet, VF30 PCGS. CAC. Noe-26, W-900, Salmon 9-E, R.5. 66.20 grains. Although well-centered, this marvelous Pine Tree shilling is struck on a small planchet that is slightly truncated at the left obverse, cutting off SAT in MASATHVSETS. A void in the same area of the obverse obscures AN in ENGLAND. Otherwise, detail is good over evenly worn and generally smooth battleship-gray surfaces. Diagnostics for the rare Noe-26 variety include VS spaced close and a extra metal on (X)I(I). NGC ID# 2ARZ, PCGS# 24

### (1670-75) St. Patrick Farthing, VF35 'Stars' in Legend, Breen-213 Variety

- 3005** (1670-75) St. Patrick Farthing, Breen-213, W-11500, VF35 PCGS. A linear series of dots (Breen calls them stars) of diminishing size follows Rex on the obverse and Plebs on the reverse, and the "sea beasts" are evident below the king, identifying the unusual Breen-213 variety. The remains of a brass splasher can be seen in the lighter color of the crown, set against the medium brown, slightly granular surfaces of this Choice VF specimen. The devices show some grade-consistent wear, but no large or distracting abrasions are present. Listed on page 43 of the 2018 *Guide Book*. NGC ID# AUAR, PCGS# 42

### (1694) Elephant Token, VF30 Hodder 2-D, Rare LON DON Reverse

- 3006** (1694) London Elephant Token, LON DON, Hodder 2-D, W-12060, High R.6, VF30 NGC. LON DON reverse, one of the rare varieties of the Elephant token. This midgrade example displays remarkably smooth medium brown surfaces and problem-free rims. Most of the dentils are present around the obverse, but few are seen along the reverse border. The central shield is weak as usual. A very eye-appealing piece for the grade. Listed on page 48 of the 2018 *Guide Book*. NGC ID# 2U3E, PCGS# 67

- 3007** 1788 Massachusetts Cent, Period, Ryder 1-D, W-6190, R.3, AU55 NGC. A sharply detailed representative with light chestnut-brown surfaces that exhibit a few traces of green verdigris on each side. Trivial lines of planchet lamination are noted on the reverse. NGC ID# 2WNJ, PCGS# 311

- 3008** 1788 New Jersey Copper, Running Fox, Fine 15 PCGS. Maris "78-DD," W-5535, R.2. The late die state with a heavy diagonal die break stretching along the back of the horse's neck. The "running fox" is weak but evident near the reverse border. This piece shows generally smooth surfaces with deep chocolate-brown patina. The rims are a trifle weak in spots but the central devices are bold. Population: 6 in 15, 36 finer (7/17). NGC ID# AUKE, PCGS# 524

## PROOF COLONIAL

- 3009** 1794 Talbot, Allum & Lee Cent PR64 Brown PCGS. Fuld-4, W-8590, R.1. Small ampersand. A fully struck proof with deeply reflective fields. Both sides display original mint-green, violet, gold, and amber-brown hues such that no true brown color is noticeable, despite the Brown designation. An exceedingly eye-appealing proof. NGC ID# 2B5Y, PCGS# 90634

## COLONIALS

### 1795 Talbot, Allum & Lee Mule, MS64 Brown W-8725, Blofield Cavalry Reverse

- 3010** 1795 Talbot, Allum & Lee Mule, Blofield Cavalry Reverse, Breen-1051, W-8725, High R.4, MS64 Brown PCGS Secure. There is no true brown color on this near-Gem 1795 Blofield Cavalry mule, as each side displays an array of burgundy, auburn, plum, and copper-orange hues. The strike is bold and the fields are faintly reflective. No distracting marks are seen. Eye appeal is outstanding. This popular muling displays cavalry weapons and instruments on the reverse with a standard Talbot, Allum & Lee obverse. Population: 4 in 64 (2 in 64+) Brown, 4 finer (7/17). PCGS# 969

### 1783 Washington & Independence Cent, AU58 Baker-4B, Small Military Bust, Engrailed Edge

- 3011** 1783 Washington & Independence Cent, Small Military Bust, Engrailed Edge, AU58 PCGS. Baker-4B, Vlack 1-A, W-10150, Musante GW-109, R.3. Copper, 28 mm, engrailed edge. Prominent die cracks appear on the obverse on this variety. This near-Mint example has glossy chocolate-brown surfaces with olive tinting near the borders. A trace of high-point friction is evident on the devices. The rims are problem-free, and only a few tiny marks appear in the fields under a loupe. Listed on page 81 of the 2018 *Guide Book*. NGC ID# 2B6N, PCGS# 673

- 3012** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge PR65 Brown PCGS. Baker-3C. The well-made 19th century restrike by British coin dealer W.J. Taylor, based on the conditionally rare Baker-2. The Small 3 in the date distinguishes the Taylor restrike from the W.S. Lincoln restrike (Baker-3). The present fully struck golden-brown Gem exhibits beautiful ocean-blue, lilac-red, and forest-green undertones when it is rotated beneath a light. A magnificent example of the variety. Population: 10 in 65 Brown, 10 finer (7/17). Ex: *Long Beach Signature* (Heritage, 2/2008), lot 2982. NGC ID# 2B6T, PCGS# 682

- 3013** 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge, PR66 Red and Brown PCGS. Baker-3, Vlack-17-L, W-10360, Musante GW-1067, R.1. 28 mm. A fully struck, reflective example with rich burgundy interiors that cede to copper-red and pink border regions. No marks are seen and only a few microscopic flecks are discernible under a loupe. Eye appeal is outstanding. These restrikes are believed to have been made circa 1860. Listed on page 82 of the 2018 *Guide Book*. Population: 6 in 66 Red and Brown, 1 finer (7/17). NGC ID# 2B6T, PCGS# 686

- 3014** 1791 Washington Small Eagle Cent XF45 NGC. Baker-16, W-10630, Musante GW-17, R.3. Copper. 30 mm. UNITED STATES OF AMERICA edge. The coin is relatively problem-free save for a few insignificant bumps around the rim. The surfaces display smooth chocolate-brown patina. A loupe reveals microscopic bits of greenish verdigris clinging to the edges of some relief elements. The central devices are boldly defined. NGC ID# 2B73, PCGS# 705

### (1792) Washington Born Virginia Cent, VF20 Baker-60, General Inscription Reverse

- 3015** (1792) Washington Born Virginia Cent, Inscribed Reverse, VF20 NGC. Baker-60, W-10730, Musante GW-33, R.5. Copper, 31 mm, plain edge. The surfaces are uniformly smooth with deep burgundy-brown patina. Portions of the rims are weak, and the central area of the reverse legend is worn but still readable. The Washington portrait is boldly defined, retaining all major details. An eye-appealing example of this scarce issue. Listed on page 84 of the 2018 *Guide Book*. NGC ID# 2B79, PCGS# 723

### 1799-Dated Washington Funeral Urn Medal, VG10 Silver, Plain Edge, Baker-166A

- 3016** (1800) Washington Funeral Urn Medal, Silver, VG10 NGC. Baker-166A, Fuld 1-B, Musante GW-70. 29.3 mm. Struck in silver, with a plain edge. Holed at 12 o'clock. Considerable wear shows on the lightly abraded lavender-gray surfaces of this historic funeral medal, but the date and all lettering remain legible and some interior design detail remains intact on the major devices.

## HALF CENTS

- 3017** 1793 C-2, B-2, R.3 — Environmental Damage — NGC Details. VG. An affordable 1793 type coin with readable legends and date and well-defined central devices. Both sides are granular with deep brown patina, and the obverse has numerous hairline scratches that show up under a loupe but are hidden within the uniform corrosion. Our EAC grade AG3.

- 3018 1793 C-4, B-4, Low R.3 — Environmental Damage — PCGS Genuine. VG Details.** Die State indeterminate. Both sides are heavily corroded, and the reverse has several vertical planchet grooves. The central devices, date, and LIBERTY are clear, but portions of the reverse peripheral legends are obscured by granularity. Our EAC grade AG3.
- 3019 1804 Spiked Chin, C-8, B-7, R.1, AU58 NGC. CAC.** Lovely tan, olive, and chocolate-brown surfaces exhibit strong details with inconsequential field marks on each side. This is the most plentiful Spiked Chin variety, an excellent candidate for a *Guide Book* collection. Our EAC grade XF45. NGC ID# 222G, PCGS# 35167 Base PCGS# 1075
- 3020 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS.** Manley Die State 1.0. The lightly marked chocolate and olive-brown surfaces of this MS62 specimen show a few hints of original red on the reverse. The design elements are well-detailed, but dentilation is weak. Our EAC grade AU50. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093
- 3021 1808/7 C-2, B-2, R.3, VF20 PCGS.** Manley Die State 1. Scattered light porosity and moderate wear on the obverse are grade-consistent for this medium-brown C-2 example. Scarce any finer, we note weakness at OF in the reverse legend but no large marks nor any untoward abrasions to interfere with the appeal of this Draped Bust overdate. Our EAC grade VG10. NGC ID# 222L, PCGS# 35212 Base PCGS# 1110
- 3022 1808/7 C-2, B-2, R.3 — Obverse Scratched — NGC Details. XF.** Manley Die State 3.0 with a rim break on TY and right. This is a rare die state as are all later states. Cleaned and retoned with pinkish-orange color beneath bluish-brown toning. Both sides exhibit scattered marks with faint scratches on the obverse. Our EAC grade Fine 15.
- 3023 1809 Small o Inside 0, C-4, B-1, R.3 — Reverse Double Struck — XF45 PCGS.** Manley Die State 1.0. A popular Guide Book variety — Cohen's "circle with the zero" variety — here with multiple Mint errors, too. The reverse is boldly double struck, the second strike off-center, and the obverse shows the semicircular indent of a planchet cutter error. Choice walnut-brown surfaces are well-defined for a great look at the interesting errors. Our EAC grade VF35.
- 3024 1811 Close Date, C-2, B-2, Low R.3, Fine 12 PCGS.** A few scattered marks appear on the olive-brown surfaces with traces of greenish verdigris that is hidden in the devices and lettering. Our EAC grade VG8. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135
- 3025 1828 13 Stars, C-3, B-2, R.1, MS64 Red and Brown NGC.** Manley Die State 3.0. This is a well-struck near-Gem with satiny, luminous fields and unmarked surfaces. Copper-orange, violet, olive-green, steel-blue hues appear in irregular patterns around each side. The stars are well-struck but not quite full. Our EAC grade AU55. Census: 44 in 64 Red and Brown, 12 finer (7/17). NGC ID# 222V, PCGS# 35262 Base PCGS# 1148
- 3026 1829 C-1, B-1, R.1, MS64 Brown PCGS.** Manley Die State 2.0. The pleasing olive-brown surfaces of this attractive Choice specimen show only minor signs of contact, with traces of original mint luster shining through the patina. The design elements are sharply detailed, but dentilation is weak in places. Our EAC grade MS60. NGC ID# 222X, PCGS# 35267 Base PCGS# 1153
- 3027 1849 Large Date, C-1, B-4, R.2, MS64 Brown PCGS. CAC.** This prooflike and sharply struck representative has a chocolate-brown obverse and an olive-green reverse. Marks are limited to a couple of tiny imperfections on Liberty's cheek. Our EAC grade MS60. NGC ID# 26Y5, PCGS# 35318 Base PCGS# 1218

## LARGE CENTS

### 1793 Chain Cent, VG10 Details America, S-4, B-5

- 3028 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Corroded, Re-Engraved Date — ANACS. VG10 Details.** 13.18 gm. The dark chocolate and olive-brown surfaces of this first-year cent are heavily corroded and the date has been re-engraved, but LIBERTY and the reverse legends remain legible and the central reverse devices are sharp. According to Dr. Hall, the R in LIBERTY was corrected from a B. Our EAC grade Good 4.
- 3029 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Corroded, Damaged — ANACS. Fine 12 Details.** The mahogany brown surfaces of this early cent are heavily corroded on both sides, but the central design elements are surprisingly sharp. The date and all letters in the legends are effected by the corrosion, but most remain legible at selected angles. Our EAC grade AG3. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347
- 3030 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Scratches — NGC Details. VG.** An early die state with no evidence of the reverse die cracks through RICA, this piece has chocolate-brown surfaces that are generally smooth except for minor scratches that are mostly blended with the surrounding surface. Our EAC grade AG3.
- 3031 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, PCGS Genuine.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has Fine details with moderate corrosion in the fields. The coin retains a light brown patina and is well-defined on the central devices. The fraction is weak. Our EAC grade VG7.
- 3032 1794 Head of 1794, S-63, B-37, R.2, VF30 PCGS.** Fallen 4. Breen Die State I. The devices are bold and the legends are clear. Each side displays medium chocolate-brown patina with mild granularity overall. A few old marks are noted below ONE on the reverse, and there is a faint rim bump above the U in UNITED. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35651 Base PCGS# 901374
- 3033 1794 Head of 1794, S-63, B-37, R.2, VF30 PCGS.** The slightly glossy chocolate and steel-brown surfaces of this attractive VF30 example are lightly abraded, and the major design elements retain much interior detail. The date and all lettering remain bold. A well blended scratch parallels the top edge of the cap. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35651 Base PCGS# 901374
- 3034 1796 Reverse of 1794, S-107, B-13, R.5 — Environmental Damage — PCGS Genuine. Fine Details.** Breen Die State I, no die break above (LIBERTY)Y. Moderately well-detailed with all devices and legends discernible. Both sides are deep chocolate-brown with heavy but uniform granularity. The scarcity of the variety will make this coin appeal to the large cent specialist. Our EAC grade Good 5.
- 3035 1797 Reverse of 1795, Grippled Edge, S-120b, B-2b, R.2, VF20 PCGS.** Breen Die State VI, the latest state recorded, with a die crack from the rim to the low curl and on through the date. Smooth olive and chocolate-brown surfaces exhibit a minor planchet defect at the left branch of the wreath. Our EAC grade Fine 12. NGC ID# 223Y, PCGS# 35900 Base PCGS# 1416

- 3036 1798 Second Hair Style, S-166, B-32, R.1, PCGS Genuine.** Breen Die State IV. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has AU details with rim damage. The interior surfaces are generally smooth with reddish-brown color, although there are a few small pits on Liberty's portrait. The strike is sharp. Our EAC grade VF25.

**1798 S-178, B-26 Cent, Good Details**

**Reverse of 1795**

**Terminal Die State**

- 3037 1798 Reverse of 1795, S-178, B-26, High R.5 — Environmental Damage — PCGS Genuine. Good Details.** Breen Die State IV with parallel cracks through the date. Although a glass reveals microscopic granularity, this outstanding olive-brown piece has better surface quality than most survivors. A small stain appears as a bluish loop on the reverse. None of the imperfections on this piece result in a point deduction. The sharpness is VG8 on the obverse and AG3 on the reverse. Our EAC grade Good 5.

- 3038 1800/79 Style Two Hair, S-192, B-6, R.4 — Environmental Damage — PCGS Genuine. XF Detail.** Breen Die State I, not yet cracked through the fraction. The detail is solidly within the XF grade level, although uniform granularity prevents a numeric grade from PCGS. A few small pits of corrosion are also noted under a loupe. The coloration is pleasing chocolate-brown. The overdate feature is clear. Our EAC grade VF20.

- 3039 1800/79 Style Two Hair, S-192, B-6, R.4 — Burnished — NGC Details. XF.** Breen Die State III, the branch crack to the R in AMERICA is nearly imperceptible due to the burnished surfaces. This golden-brown cent is full XF40 or finer sharpness, with obviously burnished fields that now exhibit an unnaturally high gloss. Our EAC grade Fine 15.  
*Ex: Walter Reed; Ron Cooper; Col. Steven Ellsworth; Greg Hannigan; Adam Mervis Collection (Heritage, 1/2014), lot 2707.*

- 3040 1801 S-224, B-13, R.1, XF40 PCGS.** Breen Die State I, clashed. The surfaces are uniformly deep chocolate-brown and yield good detail on the design elements. Scattered tiny marks are seen under a loupe on the obverse, but the reverse appears more smooth in the fields. The strike is even and well-centered. Our EAC grade VF30. NGC ID# 224D, PCGS# 36254 Base PCGS# 1458

**1804 Draped Bust Cent, AU Details**

**S-266b, Middle Die State**

- 3041 1804 S-266b, B-1, R.2 — Environmental Damage — PCGS Genuine. AU Details.** Breen Die State III. From a middle state of the dies, this coin shows the prominent die break on the obverse rim above the letters RTY in LIBERTY, but the reverse die break above MERIC has not developed into a rim cud. The sharply detailed design elements show just a trace of actual wear on the high points, but the lightly abraded surfaces show evidence of light corrosion and an odd steel-gray and maroon patina. Our EAC grade Fine 15.

**1805 Draped Bust Cent, AU58**

**Popular S-269 Variety**

- 3042 1805 S-269, B-3, R.1, AU58 PCGS.** Breen Die State IV. From a late state of the dies, this attractive near-Mint specimen shows dramatic clash marks at the hair ribbon and before the face and throat. There is a bulge in the lower obverse field at 7 o'clock and a die crack through the bottom of the numerals 180 in the date. The glossy brown surfaces are minimally abraded and only a trace of wear is evident on the sharply detailed design elements. An old scrape on Liberty's cheek is blended into its surroundings and is nearly invisible. The overall presentation is most impressive with frosty tan luster at the peripheries. Our EAC grade XF40. NGC ID# 224K, PCGS# 36433 Base PCGS# 1510

- 3043 1806 S-270, B-1, R.1 — Burnished — NGC Details. AU.** Breen Die State IV. Reddish-brown surfaces display luminous, slightly glossy patina without any individually significant distractions other than a small corrosion pit near the back of Liberty's hair by the ribbon. A loupe shows a few faint hairline scratches on the portrait. A well-struck example with nearly complete border dentils on the obverse. Our EAC grade VF20.

- 3044 1806 S-270, B-1, R.1 — Environmental Damage — PCGS Genuine. AU Details.** Breen Die State IV. Most of each side is smooth with chocolate-brown color and excellent design sharpness. A patch of granularity over the LIB in LIBERTY and several small pits on the reverse prevent a numeric grade from PCGS. This remains a visually pleasing type coin for the budget-conscious collector. Our EAC grade VF25.

- 3045 1814 Plain 4, S-295, B-2, R.1, VF35 PCGS.** This late die state 1814 Plain 4 cent exhibits pleasing olive-brown surfaces with trivial marks in the obverse and reverse fields. A few scattered marks are also noted on Liberty's cheek. Our EAC grade VF20. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

**3046 1820 Large Date, N-13, R.1, MS64+ Red and Brown NGC.** Die State B, circumnavigating obverse die crack. The C in CENT leans noticeably to the right on this Large Date variety. The present coin is beautifully preserved and well-struck, showing original copper-red luster with subtle burgundy intrusions that make up the Brown aspect of the Red and Brown grade. A tiny mark in the left obverse field is all that prevents a Gem grade from NGC. Our EAC grade MS63. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

**3047 1837 Plain Cords, Medium Letters, N-13, R.2, MS66 Brown NGC.** Die State A, crisp dies. The circumnavigating reverse die crack is present. The N in UNITED is recut on this variety. Luminous mint luster displays primarily burgundy color with occasional glimpses of copper-red. There are no mentionable contact marks. Eye appeal is outstanding. Our EAC grade MS63. NGC ID# 225U, PCGS# 37165 Base PCGS# 1735

**3048 1839 Petite Head of 1840, N-8, R.1, MS63 Brown PCGS.** This Select Mint State piece has highly lustrous olive-brown surfaces with splashes of orange mint color on each side. A few minor marks, especially on the obverse, limit the grade. Our EAC grade AU50. NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

**3049 1852 N-15, R.3, MS66 Brown NGC.** Sharply lustrous with attractive olive-gold and reddish-tan toning, this Premium Gem N-15 cent is well-preserved. The diagnostic die chips are present — one on Liberty's jawline, the other on the base of N in CENT. Two short, thick vertical lines near Y in LIBERTY add to the attribution. Struck from a middle die state with light flowlines and die wear. We note a solitary small carbon near 5 o'clock on the obverse rim. Our EAC grade MS62. PCGS# 147266 Base PCGS# 1898

**3050 1855 Upright 55, N-4, R.1, MS65 Red and Brown PCGS.** Grellman Die State a. Two die lumps on Liberty's jaw left of the ear are the most prominent diagnostic for this relatively common variety. A well-struck, unabraded specimen with tremendous mint luster and a small splash of carbon on the top of the first 5 in the date; another is on the lower portion of E in ONE on the central reverse. Neither is overly distracting. Our EAC grade MS62. NGC ID# 226M, PCGS# 46953 Base PCGS# 1908

### 1856 N-10 Cent, MS65 Red The So-Called 12 Star Variety

**3051 1855 Slanted 55, N-10, R.1, MS65 Red NGC.** Grellman Die State b, with star 6 clogged and only partially visible, resulting in the 12-Star description that is sometimes applied to this die state. This sharply defined cent is a lovely Gem with brilliant and frosty orange luster on both sides. Our EAC grade MS65. Census for all 1855 varieties: 37 in 65 Red, 6 finer (7/17). NGC ID# 226M, PCGS# 46975 Base PCGS# 1912

**3052 1856 Slanted 5, N-21, R.2, MS66 Brown PCGS.** Hints of orange mint color appear on the reverse of this lovely olive-brown Premium Gem that exhibits nearly flawless surfaces. Our EAC grade MS60. NGC ID# 226N, PCGS# 406226 Base PCGS# 1922

### FLYING EAGLE CENTS

**3053 1857 MS64 PCGS.** This Choice type coin is exceptional from the technical perspective, since it is virtually void of contact or carbon. The eagle is sharp but portions of the obverse legends are lightly brought up, and a couple of shallow strike-throughs accompany the O in OF. NGC ID# 226P, PCGS# 2016

**3054 1857 MS64 NGC.** This satiny near-Gem is sharply struck and displays original tan-gold and peach coloration. No distracting abrasions are seen. The 1857 Flying Eagle cent in this grade is a popular type coin. NGC ID# 226P, PCGS# 2016

**3055 1857 MS64 NGC.** Surprisingly bright mint frost and an uncommonly strong strike for this year combine to make this a compelling type coin. Light speckled reddish patina is seen in the fields on each side. NGC ID# 226P, PCGS# 2016

### INDIAN CENTS

**3056 1859 MS64 PCGS. CAC.** The one-year Laurel Wreath type coin is available in MS64, although this CAC-approved example still manages to surpass its peers in eye appeal. The strike is bold and the surfaces satiny. Peach, lavender, rose, and gold hues intermingle across each side. NGC ID# 227E, PCGS# 2052

**3057 1860 MS65 PCGS. CAC.** This satiny Gem is remarkably sharp and unabraded, boasting smooth tan-gold surfaces and a clean cheek on Liberty. The 1860 copper-nickel cent is available in this grade but scarce finer, where PCGS has seen only 58 submissions (7/17). NGC ID# 227F, PCGS# 2058

**3058 1861 MS65+ PCGS. CAC.** The 1861 Indian Head cent is seldom found in this quality with clean surfaces that radiate shimmering luster and bronze-gold color. Four diamonds on the band and strong feathertips are indicative of the bold impression. NGC ID# 227G, PCGS# 2061

**3059 1864 L On Ribbon MS65 Red and Brown NGC. CAC. Snow-17, Repunched 8.** Repunching is visible at the lower-right outside edge of the 8 in the date, and within the loops. This piece is technically equal to the Larry Steve coin that Rick Snow lists at the top of the Condition Census for the variety. The strike is full, and vibrant copper-orange mint luster shows delicate chestnut-brown overtones. A few tiny specks on the obverse differentiate this coin from the Steve Collection example. Housed in a prior generation holder. NGC ID# 227M, PCGS# 2080

**3060 1869 MS64 Red and Brown PCGS. CAC.** A scarcer date in the early years of Indian cent production. The surfaces still retain a significant presence of original mint red with only slight mellowing. Sharply defined in all areas. NGC ID# 227T, PCGS# 2095

**3061 1869 MS65 Red and Brown NGC. Snow-2, Repunched Date.** Although not listed in the *Cherry-pickers'* reference, Snow-2 is an interesting and scarce die variety with a lightly repunched date visible on all four numerals with a loupe. The faint presence of three misplaced numerals is also noted by Rick Snow in the dentils. This coin is sharply struck with copper-orange, violet, and burgundy-brown hues over each side. No distractions are seen. NGC ID# 227T, PCGS# 2095

**3062 1869 MS66 Red and Brown NGC.** The 18 in the date are lightly recut. This Premium Gem displays sharp detail and unabraded satin surfaces. Copper-orange and olive-gold hues are the dominate shades on each side. No numerically finer coins are certified by either leading service. Census: 4 in 66 Brown, 33 in 66 Red and Brown, 2 in 66 Red, 0 finer (7/17). NGC ID# 227T, PCGS# 2095

**3063 1872 MS64 Brown PCGS. CAC.** The mintage was notably low in 1872 with only 4.04 million pieces produced. This piece has a distinctive woodgrain texture with occasional streaks of mint red still showing. Fully detailed on the obverse, but lacking high-point definition on the reverse. Population: 51 in 64 (1 in 64+) Brown, 14 finer. CAC: 12 in 64, 10 finer (8/17). NGC ID# 227W, PCGS# 2103

**3064 1872 — Struck Through Obverse and Reverse — MS63 Red and Brown PCGS.** Bright mint red and yellow colors are only slightly subdued. The surfaces show numerous depressions from some type of debris that clung to both the obverse and reverse die. Alternately, debris could have adhered to both sides of the planchet. However, no trace remains of the debris, just the voids left behind. An interesting error. NGC ID# 227W, PCGS# 2104

**3065 1872 MS65 Red and Brown NGC.** Copper-orange, plum, and steel-blue hues decorate the Gem satin surfaces of this Red and Brown 1872 cent. The coin is moderately well-struck and shows no obvious abrasions. The 1872 cent is scarce in this grade and rare finer. Census: 75 in 65 Red and Brown, 8 finer (7/17). NGC ID# 227W, PCGS# 2104

**3066 1873 Open 3 MS64 Red and Brown NGC.** This near-Gem Open 3 Indian cent displays mainly copper-orange luster with only slight evidence of chestnut-brown overtones. The strike is bold and neither side shows significant abrasions. A small fleck appears near the R in AMERICA. NGC ID# 227Y, PCGS# 2107

**3067 1877 VF30 NGC.** The shallow N in ONE confirms the authenticity of this circulation strike key-date coin. The surfaces exhibit smooth chocolate-brown color and are problem-free. Eye appeal is outstanding for the grade. The BE in LIBERTY are weak, the remainder is bold. NGC ID# 2284, PCGS# 2127

**3068 1877 VF30 PCGS.** Shallow N. A smoothly worn, chocolate-brown representative the series key date. Surviving examples are scarce in all grades, suggesting that most of the original mintage — up to 75%, according to some estimates — was melted. We note some light pinscratches in the left obverse field and within the wreath on the reverse. NGC ID# 2284, PCGS# 2127

**3069 1877 AU50 NGC.** Shallow N. A walnut-brown example of the famously scarce 1877 cent. The official mintage of 852,500 pieces is the lowest Philadelphia production of the series. All legends are sharp and no marks are consequential. Ideal for a high-quality circulated set. NGC ID# 2284, PCGS# 2127

#### 1877 Indian Head Cent, MS62 Brown

**3070 1877 MS62 Brown PCGS.** No other issue in the Indian Head cent series had a mintage below 4 million coins before the 1877, which claims a famously meager production of 852,500. Collectors began to take notice of its relative scarcity by the early 1880s, and the date was virtually unseen in circulation by 1915. This MS62 Brown representative avoided circulation entirely. Lightly abraded surfaces are well-detailed with rich mahogany-brown patina. NGC ID# 2284, PCGS# 2127

**3071 1884 MS65 Red NGC.** Blazing cartwheel mint luster accentuates vibrant copper-red color across the sharply struck surfaces of this Gem cent. A glass reveals some widely distributed tiny flecks but no large carbon spots, and several faint obverse die cracks. Excellent eye appeal, housed in an old pre-barcode NGC holder. Census: 24 in 65 Red, 6 finer (7/17). NGC ID# 228B, PCGS# 2150

**3072 1894 MS65 Red PCGS Secure. CAC.** The original orange-red surfaces of this delightful Gem show vibrant mint luster and a few highlights of lavender. The design elements are well-detailed and no mentionable distractions are evident. Population: 88 in 65 (5 in 65+) Red, 36 finer. CAC: 19 in 65, 11 finer (7/17). NGC ID# 228N, PCGS# 2189

**3073 1909-S MS64 Red and Brown PCGS.** Various walnut and chestnut-brown toning appears over otherwise golden mint luster on this near-Gem Red and Brown 1909-S Indian cent. The top three headdress feathers show better definition than usual. A few tiny specks do not detract. NGC ID# 2298, PCGS# 2239

**3074 1909-S MS65 Red and Brown PCGS.** With the lowest mintage of any regular issue small cent, the 1909-S Indian cent remains underrated in its series-ending role. This lovely Red and Brown Gem displays brick-red undertones with ample blue overtones throughout both sides. Housed in a first-generation “rattler” holder. PCGS reports just six numerically finer examples in Red and Brown. NGC ID# 2298, PCGS# 2239

## PROOF INDIAN CENTS

### 1861 Copper-Nickel Cent, PR64

**3075 1861 PR64 PCGS.** Struck during the first year of the Civil War, before proof mintages were sharply reduced, this attractive Choice specimen offers sharply detailed design elements and deeply reflective copper-red fields with few signs of contact. Population: 71 in 64 (1 in 64+), 31 finer (7/17). NGC ID# 229B, PCGS# 2256

**3076 1862 PR64 PCGS.** Peach and lavender accents appear in the reflective tan-gold fields of this near-Gem proof copper-nickel type coin. The design elements are fully struck. A strike-through in the left obverse field is mint-made. Under a loupe, several tiny specks are seen. NGC ID# 229C, PCGS# 2259

**3077 1862 PR65 PCGS. CAC.** This is a sharp Gem proof with faint field-motif contrast. Subtle peach and lavender overtones complement the tan-gold surfaces and reflective patina. A single tiny mark on Liberty's cheek denies a finer grade. Population: 85 in 65, 26 finer. CAC: 13 in 65, 11 finer (7/17). NGC ID# 229C, PCGS# 2259

**3078 1863 PR65 Cameo NGC.** The Mint struck an estimated 800 to 1,000 Indian Head cent proofs in 1863. Probably fewer were sold and undoubtedly even fewer survive, particularly with Cameo contrast. The fields are deeply reflective, set against frosty motifs throughout this amber-gold Gem. Census: 10 in 65 Cameo, 9 finer (7/17). NGC ID# 26SX, PCGS# 82262

**3079 1877 PR30 NGC. Snow-PR1.** An evenly worn chocolate-brown example of this key-date Indian cent issue, showing moderate wear and a few light contact marks. The BE in LIBERTY are weak. The N in ONE is bold, indicating that this is a circulated proof. The date placement and minor die polishing on the right branch of the wreath confirm the Snow-PR1 attribution. NGC ID# 229W, PCGS# 2318

**3080 1878 PR66 Red and Brown PCGS.** Delicate violet and olive hues appear in the fields of this otherwise copper-orange and gold Premium Gem proof. The strike is full, and the fields display deep mirroring without distractions. The 1878 proof is scarce this fine in any color category. Population: 10 in 66 Red and Brown, 0 finer; 8 in 66 Red, 1 finer; 7 in 66 Red Cameo, 0 finer (8/17). NGC ID# 229X, PCGS# 2322

**3081 1880 PR66+ Red and Brown PCGS.** This reflective 1880 proof cent shows a full strike and modest cameo contrast. Lemon-gold and copper-orange hues push this coin heavily toward the red end of the Red and Brown color designation. No distractions are seen. Population: 42 in 66 (8 in 66+) Red and Brown, 7 finer (7/17). NGC ID# 229Z, PCGS# 2328

- 3082 1886 Type One PR66+ Red and Brown PCGS.** The lowest headress feather points between the IC in AMERICA on the Type One hub type. This reflective proof displays copper-orange, gold, and olive hues that offer a well-balanced red-and-brown look. The strike is full. Population: 45 in 66 (4 in 66+) Red and Brown, 3 finer (7/17). NGC ID# 22A7, PCGS# 2346
- 3083 1887 PR66+ Red and Brown PCGS.** Plum, lavender, gold, and sea-green hues make up the "Red and Brown" patina of this high-end Premium Gem proof. The strike is sharp, and neither side exhibits distracting abrasions. Population: 12 in 66 (1 in 66+) Red and Brown, 2 finer (7/17). NGC ID# 22A9, PCGS# 2349
- 3084 1892 PR66 Red and Brown PCGS. CAC.** A lovely patina of purple accents over deep-orange coloration is perfectly balanced from front-to-back on this mirrored proof cent. Sharply struck and glossy with the look of aged copper, the surfaces show virtually no distractions or spots. Population: 33 in 66 (2 in 66+) Red and Brown, 22 finer including all color designations. CAC: 5 in 66, 1 finer (7/17). NGC ID# 22AE, PCGS# 2364
- 3085 1899 PR66 Red NGC.** This Premium Gem proof type coin is sharp and deeply reflective with rich copper-orange coloration. No carbon spotting is seen. The 1899 proof cent is scarce this fine. Census: 7 in 66 Brown, 1 finer; 21 in 66 Red and Brown (1 in 66 ★), 5 finer; 11 in 66 Red, 2 finer; 0 in 66 Red Cameo, 1 finer (7/17). NGC ID# 22AM, PCGS# 2386
- 3086 1903 PR66 Red and Brown PCGS.** Glimmers of cherry-red and peach accent the copper-orange surfaces of this Premium Gem Red and Brown proof. No distractions are observed. The coloration leans heavily toward the red tonal range. Population: 29 in 66 (3 in 66+) Red and Brown, 4 finer (7/17). NGC ID# 22AS, PCGS# 2397

## LINCOLN CENTS

- 3087 1909-S VDB MS63 Brown PCGS.** Lustrous golden-tan color glows beneath intermittent umber-brown accents on this appealing Select Uncirculated example. The low mintage of 484,000 pieces combines with huge collector demand for this first-year San Francisco Lincoln cent with the designer's initials sharply impressed on the reverse. NGC ID# BYKW, PCGS# 2426
- 3088 1909-S VDB MS64 Brown ANACS.** This satiny near-Gem displays walnut-brown surfaces with hints of olive and gold throughout. Thoroughly lustrous fields are devoid of distractions, and the design elements are boldly rendered. An eye-appealing coin for the Brown color category. NGC ID# BYKW, PCGS# 2426
- 3089 1909-S VDB MS65 Brown NGC.** Beautiful steel-blue and burgundy hues decorate the walnut-brown surfaces of this thoroughly lustrous Gem 1909-S VDB cent. The strike is sharp, and there are simply no visual negatives for a Brown-category Lincoln cent. Census: 95 in 65 (1 in 65 ★) Brown, 16 finer (7/17). NGC ID# BYKW, PCGS# 2426
- 3090 1909-S VDB MS63 Red and Brown NGC.** The eye appeal of this piece far surpasses expectations for the MS63 numeric level, although a loupe reveals a few faint slide marks on the portrait that limit the grade. Luminous copper-gold and amber surfaces show delicate wisps of chestnut-brown toning. There are no distractions. NGC ID# 22B2, PCGS# 2427
- 3091 1909-S VDB MS65 Red and Brown PCGS.** Struck from worn dies with metal flowlines toward the rims, but still sharp on the central devices. This Gem 1909-S VDB Lincoln cent leans heavily toward the Red color category with rich, satiny copper-orange surfaces, although hints of chestnut toning here and there earn a more conservative Red and Brown grade from PCGS. NGC ID# 22B2, PCGS# 2427

- 3092 1909-S/S S Over Horizontal S, FS-1502, MS65 Red PCGS.** Far scarcer than the regular issue S-mint cent, and definitely a challenge in high grades. This is a beautiful example that shows bright orange-red color with the distinctive tinge of yellow that is common to S-mint cents. One spot is noted within the curve of the C in AMERICA. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

### 1912-D Cent, Bold MS66 Red None Graded Higher

- 3093 1912-D MS66 Red PCGS.** As its mintage suggests, the 1912-D is more available than the 1912-S but significantly scarcer than the 1912-P. Premium Gems with original mint red color are conditionally rare and among the finest coins at both PCGS and NGC. This deep cherry-red cent displays lovely accents of blue. Strike definition is crisp throughout. A satiny example worthy of inclusion in a fine Lincoln set. Population: 29 in 66 (3 in 66+) Red, 0 finer (7/17). NGC ID# 22BB, PCGS# 2455

### 1912-D Cent, MS66 Red Among the Finest Certified

- 3094 1912-D MS66 Red PCGS.** This Premium Gem Red coin is among the finest Red 1912-D Lincoln cents known, and it is conditionally rare as such. The design elements are intricately defined, and satiny luster has a subtle mattelike texture. The copper-pink surfaces are without distractions. Population: 29 in 66 (3 in 66+) Red, 0 finer (7/17). NGC ID# 22BB, PCGS# 2455
- 3095 1913-D MS65+ Red PCGS.** A Plus-graded Gem representative of this early series issue, with sharply detailed design elements and lustrous original red surfaces that show few signs of contact. The overall presentation is most attractive. NGC ID# 22BE, PCGS# 2464

**1913-S Cent, MS65 Red**  
**Essentially Impossible to Upgrade**

**3096 1913-S MS65 Red PCGS.** The outer areas are somewhat soft, particularly on LI, IN, and the left reverse rim. Light copper-orange colors each side, showing minor chatter in the fields. A die crack runs through the right wheat stalk. San Francisco Lincoln cent production reached 6.1 million coins in 1913, yet Gems are rare and anything finer is almost unique. Population: 56 in 65 (2 in 65+) Red, 2 finer (7/17). NGC ID# 22BF, PCGS# 2467

**3097 1914-D — Obverse Improperly Cleaned — NGC Details. Unc.** The untrained eye will not be able to see the evidence of a very light, nondestructive cleaning on the obverse of this reddish-brown 1914-D cent, although NGC denies the coin a numeric grade. The strike is sharp, and the satiny surfaces are pleasing to the eye. A few small flecks do not detract.

**3098 1914-D MS62 Brown NGC.** This olive-gold and green-brown Mint State coin displays a sharp strike and relatively unmarked surfaces. Each side has a slightly glossy hue with satiny mint luster. Eye appeal is outstanding for the grade. NGC ID# 84BX, PCGS# 2471

**3099 1915-S MS65 Red and Brown PCGS. CAC.** Regardless of color designation, the 1915-S cent is a scarce date in Gem or better condition. This CAC-approved Red and Brown piece displays primarily copper-orange luster but with a few faint chestnut overtones. The mattelike luster and bold strike complete the eye appeal. Population: 34 in 65 Red and Brown, 1 finer. CAC: 8 in 65, 0 finer (7/17). NGC ID# 22BM, PCGS# 2484

**3100 1916-D MS65 Red PCGS.** This piece is satiny and well-preserved with uniform copper-orange luster. Struck from heavily eroded dies, the peripheral legends and wheat ears are indistinctly defined but still legible. Finer 1916-D cents are rarely seen. Population: 33 in 65 Brown, 1 finer; 53 in 65 Red and Brown, 0 finer; 68 in 65 (3 in 65+) Red, 20 finer (7/17). NGC ID# 22BP, PCGS# 2491

**3101 1917-D MS65 Red PCGS.** The 1917-D is not known for a good strike, prompting the Bowers reference to call it "average to wretched." Thankfully, this Red Gem cent is sharply struck and certainly above average in that regard. Flame-orange surfaces display an overall dusting of greenish-gold patina that adds natural appeal. A few scattered carbon flecks and tiny marks do not diminish the lustrous visual allure. Population: 50 in 65 (2 in 65+) Red, 6 finer (7/17). NGC ID# 22BT, PCGS# 2500

**3102 1920-D MS65 Red PCGS.** The lower obverse and upper reverse show strike deficiency, but detail is crisp elsewhere. A mark on the jaw and light chatter above ONE explain the grade, preventing this amber-gold Gem from reaching the top echelon of known 1920-D survivors. PCGS has only seen six finer submissions (8/17). NGC ID# 22C4, PCGS# 2527

**3103 1920-D MS65 Red PCGS.** With a mintage in excess of 49 million, the 1920-D should be easier to find than it is in high grades. Unlike many examples, this piece was struck from a relatively new obverse die and thus shows sharp definition on that side. Deep cherry-red color is seen throughout with a few flyspecks of carbon present. NGC ID# 22C4, PCGS# 2527

**3104 1921-S MS64 Red PCGS.** Dusky copper-orange luster is original, and there are no heavy abrasions on this near-Gem. A loupe reveals a few trivial specks on the reverse and some strike weakness on the central part of UNITED STATES OF AMERICA. Finer Red coins are decidedly rare. Population: 97 in 64 (2 in 64+) Red, 17 finer (7/17). NGC ID# 22C7, PCGS# 2536

**3105 1922-D Weak D MS64 Red and Brown NGC. CAC.** The D is decidedly weak but remains partly visible, and the other obverse motifs are characteristically incomplete. The reverse, usually found softly struck, displays relatively strong definition, especially on the upper wheat stalks. Each side is a warm, amber-brown with coppery accents. NGC ID# 22C8, PCGS# 3111 Base PCGS# 2538

**1922 No D Lincoln Cent, AU50**  
**Die Pair 2, Strong Reverse**

**3106 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. The 1922 Lincoln cents were all struck at the Denver Mint, but the D mintmark was effaced by polishing (to a greater or lesser degree) on some dies, resulting in the No D and Weak D *Guide Book* varieties for the date. This impressive AU specimen is from Die Pair 2, with the Strong Reverse, the only universally recognized No D die pair. The well-detailed design elements of this coin show only light wear and the pleasing olive-brown surfaces are lightly abraded. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Lincoln Cent, AU50**  
**Strong Reverse, FS-401**

**3107 1922 No D, Strong Reverse, FS-401, AU50 PCGS Secure. CAC.** Die Pair 2. Lincoln cents were only struck at the Denver Mint in 1922, but excessive die wear effaced the mintmark on three obverse dies, resulting in the sought-after No D variety. This lightly worn and lightly abraded specimen is from Die Pair 2, with a heavily polished obverse and a strongly detailed fresh reverse die. Die Pair 2 coins are by far the most desirable of the No D varieties. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**3108 1924-S MS64 Red and Brown PCGS. CAC.** Subtle olive and chestnut overtones prevent a full Red designation on this near-Gem 1924-S cent, although substantial copper-orange luster remains. The surfaces are satiny and problem-free. Struck from worn dies with softness on the devices and metal flowlines in the fields. PCGS lists four finer Brown coins, 31 finer Red and Brown, and 10 finer Red — all in MS65 (7/17). NGC ID# 22CE, PCGS# 2556

**3109 1928 MS67+ Red PCGS.** A delightful Plus-graded Superb Gem, with impeccably preserved original red surfaces and blazing mint luster on both sides. The design elements are sharply rendered and eye appeal is terrific. Population: 75 in 67 (13 in 67+) Red, 0 finer (7/17). NGC ID# 22CR, PCGS# 2587

**1934 Lincoln Cent, MS68 Red  
Among the Few Finest Graded**

**3110 1934 MS68 Red PCGS.** The nation was coming out of the darkest days of the Depression when this Superb Gem 1934 Lincoln cent was struck, one of the few finest survivors of the large production exceeding 219 million coins. The emphasis was on quantity not quality, though, and while even Gems are common, high-end Superb Gems such as this piece are rare. The fine-grained surfaces show not the slightest wrinkle in the fabric, and light red color complements an excellent strike and impeccable preservation. An essential for a fine Registry Set. Population: 18 in 68 Red, 0 finer (7/17). NGC ID# 22D9, PCGS# 2635

**3111 1936-D MS67+ Red PCGS. CAC.** Little searching is required for those looking to obtain a nice MS67 Red example of the 1936-D. Such coins are very scarce but fairly accessible. Plus-designated Superb Gems, however, are another animal and represent the top-graded coins at PCGS. This copper-orange Denver cent displays lavender hues near the rims and exceptionally clean surfaces. Lincoln's beard and the O in ONE are typically struck, but detail elsewhere is pinpoint-sharp. This is one of only 25 MS67+ Red coins at PCGS with none finer (8/17). NGC ID# 22DF, PCGS# 2653

**3112 1938-D MS67+ Red PCGS. CAC.** This high-end Registry coin is fully struck, devoid of carbon, and unabraded. Satiny copper-orange surfaces display beautiful luster and preservation. Only a single finer coin is reported by PCGS, graded MS68 Red (7/17). NGC ID# 22DM, PCGS# 2671

**3113 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS. CAC.** An attractive Gem specimen of this popular *Cherry-pickers* variety, with strong doubling on the motto, LIBERTY, and the date. The design elements are well-detailed and the well-preserved original red surfaces show a light finger print on the reverse. NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

**3114 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS. CAC.** This "old school" doubled die is always popular with collectors. Doubling shows on the letters in LIBERTY and IN GOD WE TRUST, and the 4 in the date. The original red surfaces of this well-detailed Gem show no mentionable contact marks, but a fingerprint is evident below LIBERTY. NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

**3115 1948-D MS67+ Red PCGS. CAC.** This sharp Superb Gem displays vibrant, frosty mint luster with faint metal flowlines near the borders that accentuate the cartwheel effect. No carbon spotting is seen. Copper-orange surfaces show hints of peach and gold throughout. This Plus-designated CAC coin is tied for the finest certified. Population: 79 in 67 (7 in 67+) Red, 0 finer. CAC: 10 in 67, 0 finer (8/17). NGC ID# 22ET, PCGS# 2764

**3116 1955 Doubled Die Obverse, FS-101, XF45 PCGS.** All obverse lettering and the date show strong doubling on this incredibly popular *Guide Book* variety. The well-detailed design elements are lightly worn and the pleasing olive-brown surfaces are lightly abraded. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3117 1955 Doubled Die Obverse, FS-101, AU58+ PCGS. CAC.** A Plus-graded near-Mint specimen of this incredibly popular variety, with pronounced doubling on the date and lettering. The glossy olive-brown surfaces are minimally abraded and eye appeal is quite strong. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3118 1983 Doubled Die Reverse, FS-801, MS67 Red PCGS. CAC.** An amazing Superb Gem with fiery orange mint luster and frosty surfaces. This piece exhibits rough surfaces that are an artifact of minting and commonly seen on this variety. Population: 67 in 67 (10 in 67+) Red, 1 finer. CAC: 11 in 67, 0 finer (7/17). NGC ID# 22HW, PCGS# 38063 Base PCGS# 3056

**3119 1992-D Close AM, FS-901, AU55 NGC.** PCGS estimates "about 15" Close AM 1992-D cents are known, although significantly more than that number are listed on the population reports of the two leading services, suggesting either new finds of this important variety or greatly inflated submission totals. The present Choice AU example shows no loss of detail to wear, but has slight high-point rub that prevents a Mint State designation. Lavender and steel-blue overtones accent coppery-orange underlying luster. NGC ID# 22JJ, PCGS# 391427 Base PCGS# 83099

## PROOF LINCOLN CENTS

### 1910 Lincoln Cent, PR66 Red Spectacular Visual Appeal

**3120 1910 PR66 Red PCGS. CAC.** Ex: 1994 Collection. One of 4,118 matte proof Lincoln cents struck in 1910, this Superb Gem presents original blue and cherry-red hues around the left obverse margin, ceding to fire-orange color elsewhere. Pristine surfaces and fully struck devices correspond to the high-end assessment. The visual appeal is outstanding. Population: 26 in 66 (2 in 66+) Red, 4 finer. CAC: 4 in 66, 3 finer (7/17).  
Ex: *Regency Auction XXII (Legend Rare Coin Auctions, 7/17)*, lot 45. NGC ID# 22KT, PCGS# 3308

### 1911 Lincoln Cent, PR66 Brown Elusive Matte Proof Issue

**3121 1911 PR66 Brown PCGS.** The matte finish used on proof coins of this era proved unpopular with collectors and proof mintages were reduced to reflect the declining demand. Only 1,725 proof Lincoln cents were struck in 1911 and few survivors can match the quality and eye appeal of the present coin. The design elements display razor-sharp definition throughout and the mostly red surfaces are impeccably preserved, with strong matte luster on both sides. NGC ID# 22KU, PCGS# 3309

**1912 Cent, PR66 Red and Brown**  
Few Available This Fine

- 3122 1912 PR66 Red and Brown PCGS.** A conditionally rare example of one of the more collectible matte proof Lincoln cents. Copper-orange is the dominant color on the obverse, but the reverse shows deeper burgundy toning. Both sides are fully struck with rich matte luster. A few tiny specks are not distracting. Population: 15 in 66 (2 in 66+) Red and Brown, 0 finer; 2 in 66 Red, 0 finer (7/17). NGC ID# 22KV, PCGS# 3313

- 3123 1914 PR66 Brown PCGS.** A delightful Premium Gem representative, with razor-sharp definition on all design elements and well-preserved lilac and brown surfaces that show typical matte proof luster characteristics. Population: 27 in 66 (2 in 66+) Brown, 3 finer (7/17). NGC ID# 22KX, PCGS# 3318

**1914 Lincoln Cent, PR66**  
Pristine Red and Brown Surfaces

- 3124 1914 PR66 Red and Brown PCGS. CAC.** The impeccably preserved surfaces of this spectacular Premium Gem show a mix of light brown and original red patina, with more red on the reverse. Both sides have strong matte luster and the design elements exhibit razor-sharp definition throughout. Eye appeal is outstanding. From a small proof mintage of 1,365 pieces. NGC ID# 22KX, PCGS# 3319

**1936 Cent, PR66 Red**  
Brilliant Finish Condition Rarity

- 3125 1936 Type Two — Brilliant Finish PR66 Red PCGS. CAC.** The Brilliant Finish 1936 proof cent is scarce in PR66 Red and extremely rare finer. This CAC-approved example displays glimmering copper-orange fields and sharp motifs. Eye appeal is outstanding with no distractions. PCGS and NGC combined have seen only five finer Red Type Two proofs. Population: 58 in 66 (4 in 66+) Red, 2 finer. CAC: 19 in 66, 1 finer (7/17). NGC ID# 22L3, PCGS# 3335

- 3126 1937 PR66 Red Cameo PCGS. CAC.** Proof coins from 1936 to 1942 are rarely encountered with cameo contrast. This impressive Premium Gem has exceptional light orange color, deeply mirrored fields, and pristine surfaces. Population: 28 in 66 (2 in 66+) Red Cameo, 4 finer. CAC: 9 in 66, 2 finer (8/17). NGC ID# 22L5, PCGS# 83338

## TWO CENT PIECES

- 3127 1864 Small Motto, FS-401, MS62 Brown PCGS.** Both sides show considerable brick-red, although gunmetal-blue fills a majority of this sharply struck example. Study beneath a lens reveals occasional unimportant marks. A scarce and ephemeral introductory subtype.

*Ex: Summer FUN Signature (Heritage, 7/2015), lot 3546. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579*

- 3128 1864 Small Motto, FS-401, MS64 Brown PCGS.** An attractive Choice specimen of the scarcer Small Motto variety, with well-preserved surfaces that show a mix of original red and steel-brown patina, with sharply detailed design elements and vibrant mint luster underneath. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

- 3129 1865 MS66 Brown PCGS. CAC.** The well-preserved olive-brown surfaces of this impressive Premium Gem are free of mentionable distractions and the design elements are sharply rendered on both sides. NGC ID# 22NA, PCGS# 3582

- 3130 1867 MS66 Red and Brown PCGS.** The lustrous original red surfaces of this delightful Premium Gem have mellowed to light brown and crimson in some areas, but no mentionable distractions are evident and the design elements are sharply detailed throughout. Population: 14 in 66 Red and Brown, 2 in 66 Red, 0 finer (8/17). NGC ID# 22NB, PCGS# 3592

- 3131 1871 MS66 Brown PCGS. CAC.** The well-preserved reddish-brown surfaces of this impressive Premium Gem show significant amounts of original red on the reverse. The design elements are sharply detailed throughout and the overall presentation is most attractive. NGC ID# 22NE, PCGS# 3609

## PROOF TWO CENT PIECES

- 3132 1872 PR66 Red and Brown NGC.** A visually interesting Premium Gem that offers lovely, lively lemon-orange surfaces overall with slight duskiness on the obverse. Rose and walnut shadings visit the margins of this late-date two cent proof. Census: 35 in 66 (1 in 66★) Red and Brown, 6 finer (7/17). NGC ID# 2752, PCGS# 3649

- 3133 1873 Closed 3 PR63 Red and Brown NGC.** The Closed 3 two cent proofs of 1873 are so-called originals (600 struck), in contrast to the rare Open 3 specimens that are reportedly restrikes. Amber and golden-brown hues dominate, enhanced with steel-blue and violet-rose accents. NGC ID# 2753, PCGS# 3652

## THREE CENT SILVER

- 3134 1851 MS66+ PCGS. CAC.** This magnificent Premium Gem boasts a full palette of visual attributes. The strike shows no weakness on any design elements, central or peripheral; strong, frosty luster glows on each side; and the delicately champagne-tinted surfaces have dashes of sun-gold, olive, and crimson toning that grab the viewer's attention. PCGS reports 21 finer examples (7/17) NGC ID# 22YX, PCGS# 3664

- 3135 1854 MS64 PCGS.** This powder-gray Type Two three cent silver shows the usually seen die clashing on each side, but the obverse radial die cracks are unusual. Only minor ticks amid good luster preclude a Gem grade. NGC ID# 22Z3, PCGS# 3670

**3136 1855 MS63 PCGS. CAC.** Representing the second year of the Type Two design with added borders around the star, and olive leaves and arrows above and below the denomination, the 1855 claims a low mintage of only 139,000 coins. This Select piece offers rich blue, green, and violet patina. Bold clash marks appear on each side. NGC ID# 22Z4, PCGS# 3671

**3137 1862 MS66 PCGS.** The design elements of this impressive Premium Gem are sharply detailed and some dramatic clash marks are evident on both sides. Satiny mint luster shines through low-intensity shades of greenish-gold and lavender-gray toning, adding to the outstanding eye appeal. NGC ID# 22ZB, PCGS# 3680

#### 1865 Three Cent Silver, MS64+ Low-Mintage Wartime issue

**3138 1865 MS64+ PCGS.** A Plus-graded Choice specimen of this scarce Civil War issue, from a business-strike mintage of 8,000 pieces. This coin exhibits sharply detailed design elements throughout and the well-preserved surfaces are enhanced by shades of greenish-gold and cerulean-blue toning, with most of the color on the reverse. Vibrant satiny mint luster is evident on both sides. Population: 19 in 64 (1 in 64+), 28 finer (7/17). NGC ID# 22ZF, PCGS# 3685

**3139 1869 AU55 PCGS.** Much of this issue's appeal comes from its small 4,500-coin mintage, although it is genuinely scarce in all grades as well. This Choice AU coin is ideal for the date collector. The design elements are sharply struck from unclapped dies, and satin luster remains in the fields despite brief circulation. Delicate lavender accents complement mainly champagne toning. Population: 9 in 55, 53 finer (7/17). NGC ID# 22ZK, PCGS# 3689

### PROOF THREE CENT SILVER

**3140 1866 PR66 PCGS.** This Premium Gem is fully struck but with slight die lapping visible in the recesses of the C on the reverse. Glimmering fields display concentric sea-green, gold, lavender, and mint hues. Eye appeal is outstanding. Population: 20 in 66, 2 finer (7/17). NGC ID# 27CC, PCGS# 3716

**3141 1871 PR65 PCGS.** Attractive mint-green, violet, blue, and gold hues decorate the mirrored surfaces of this Gem proof in concentric rings. Slight strike weakness is seen on the high points of the shield but no other distractions are observed. Population: 51 in 65, 37 finer (7/17). NGC ID# 27CG, PCGS# 3722

**3142 1872 PR65 PCGS. CAC.** Dappled shades of gold and lilac toning enhance the considerable eye appeal of this sharply detailed Gem, with well-preserved surfaces and reflective fields to match. An excellent addition to a fine date or type set. NGC ID# 27CH, PCGS# 3723

#### 1873 Three Cent Silver, PR65 Vivid Multicolor Toning

**3143 1873 PR65 PCGS.** Spectacular shades of cobalt-blue and pale gold toning visit the impeccably preserved surfaces of this delightful Gem. The design elements exhibit razor-sharp definition throughout and the fields are deeply reflective, under the patina. Overall eye appeal is terrific. This coin will be a welcome addition to a fine date or type set. NGC ID# 27CJ, PCGS# 3724

**3144 1873 PR65 NGC. CAC.** This glimmering Gem proof is razor-sharp and modestly contrasted despite deep original toning. Both sides display sea-green, gold, and lavender hues with no distracting marks. The 1873 is a proof-only issue and the final date in the three cent silver series. Housed in a prior generation holder. Census: 62 in 65 (1 in 65+, 1 in 65 ★), 34 finer; 14 in 65 Cameo, 18 finer; 1 in 65 Ultra Cameo, 3 finer. CAC: 17 in 65, 25 finer (7/17). NGC ID# 27CJ, PCGS# 3724

### THREE CENT NICKELS

**3145 1875 MS66 PCGS. CAC.** This is a boldly struck and well-preserved example with satiny luster and semireflective fields. Hints of pale champagne toning grace each side. The 1875 nickel three cent piece is scarce this fine and rare any finer. Population: 33 in 66 (6 in 66+), 4 finer. CAC: 15 in 66, 4 finer (7/17). NGC ID# 22NS, PCGS# 3743

**3146 1876 MS65 PCGS.** The Centennial year mintage of 160,800 three cent nickels in 1876 represented the final six-digit mintage of the 1870s for the denomination. Proof-only years followed in 1877 and 1878, and just 38,000 pieces were struck in 1879. This Gem Uncirculated 1876 example is prooflike throughout the fields with sharply struck devices. Few pieces are finer for the year. Population: 32 in 65 (1 in 65+), 13 finer (7/17). NGC ID# 275A, PCGS# 3744

**3147 1884 VF35 PCGS.** Among the rarest circulation-strike three cent nickel issues are the 1884 and 1885, the former offered here. This piece has pleasing, problem-free light gray surfaces and dappled steel toning. PCGS has only certified 84 examples of this issue in all circulated and Mint State grades, the lowest population of any issue in the series. NGC ID# 2766, PCGS# 3752

**3148 1885 VF35 PCGS.** PCGS population data indicates that the 1885 is the second rarest circulation strike three cent nickel in the series behind the 1884. This piece has pleasing pewter-gray surfaces with delicate lavender toning on the reverse. NGC ID# 275G, PCGS# 3753

## PROOF THREE CENT NICKELS

### 1866 Three Cent Nickel, PR67 Cameo Tied for Finest Certified

- 3149 1866 PR67 Cameo NGC.** Frosty luster glistens on the sharp relief details of this Superb Gem Cameo proof, while the fields exhibit deep reflectivity. The coin is essentially brilliant and shows almost no mint-made planchet depressions as are often seen on this type in proof format. This 1866 three cent nickel proof is among the finest Cameos certified. Census: 3 in 67 Cameo (1 in 67 ★), 0 finer (7/17). NGC ID# 275L, PCGS# 83762

- 3150 1868 PR66 NGC. CAC.** This champagne-toned Premium Gem is among the finest non-Cameo proofs certified. Even so, subtle field-device contrast is discernible on each side. The fields are deeply reflective. The 1868 proof three cent nickel is rare this fine. Census: 22 in 66, 0 finer. CAC: 4 in 66, 0 finer (7/17). NGC ID# 29NA, PCGS# 3764

- 3151 1871 PR66+ PCGS. CAC.** A Plus-graded Premium Gem from a small proof mintage of 960 pieces, this coin exhibits sharply detailed design elements and hazy, reflective fields with no mentionable distractions. Eye appeal is exceptional. NGC ID# 275S, PCGS# 3767

### 1879 Three Cent Nickel, PR68 Elite Quality, None Finer

- 3152 1879 PR68 NGC.** Iridescent pastel colors gleam from the satin-smooth surfaces of this exquisite 1879 proof three cent nickel. A Superb Gem in all regards, the reverse ribbon is fully formed and the strike is exceptionally sharp. The 7 and 9 in the date show minor recutting (Breen's so-called "heavy" date) but the loops in the numerals are not filled. Mirroring in the fields exists beneath the multicolor patina, and the surfaces appear technically flawless. This piece is tied for numerical finest among both regular and Cameo proofs. Census: 6 in 68 (1 in 68★), 0 finer, joined by 6 Cameo proofs in 68 and none finer (8/17). NGC ID# 275Z, PCGS# 3775

- 3153 1880 PR67 Cameo NGC.** Superb Gem proof 1880 three cent nickels are scarce, and Cameo examples in this grade are genuinely rare. No Ultra/Deep Cameos are known. This well-contrasted example is brilliant and sharp with almost perfect surface preservation. Census: 6 in 67 Cameo, 1 finer (7/17). NGC ID# 5E5S, PCGS# 83776

- 3154 1881 PR67+ PCGS. CAC.** Beautifully preserved surfaces display delicate lavender and ice-blue hues across the satiny devices and reflective fields. The strike is full. The 1881 proof three cent nickel is elusive in this condition and finer examples are extremely rare. Population: 69 in 67 (2 in 67+), 3 finer. CAC: 36 in 67, 1 finer (7/17). NGC ID# 2763, PCGS# 3777

- 3155 1881 PR67+ Cameo PCGS. CAC.** This high-end Superb Gem Cameo proof boasts a beautiful blend of mirroring and cartwheel luster in the fields, illuminating brilliant, flawlessly preserved surfaces. The strike is full. Finer 1881 Cameos are extremely rare. NGC ID# 2763, PCGS# 83777

### 1882 Three Cent Nickel, PR68 Beautiful Pastel Toning

- 3156 1882 PR68 NGC.** Reflective fields and frosty, sharp design elements complement a blend of rose and lavender toning on each side of this high-end proof 1882 three cent nickel. Close study of the surfaces fails to reveal a single flaw. Eye appeal is outstanding. This piece is among the finest non-Cameo proofs certified. Census: 6 in 68, 0 finer; 4 in 68 (1 in 68+) Cameo, 0 finer (7/17). NGC ID# 2764, PCGS# 3778

- 3157 1882 PR67+ Cameo PCGS. CAC.** A Plus-graded Superb Gem from a small proof mintage of 3,100 pieces, this coin exhibits sharply detailed design elements throughout, with deeply reflective fields that contrast boldly with the frosty devices. The virtually pristine surfaces enhance the incredible eye appeal. NGC ID# 2765, PCGS# 83778

- 3158 1883 PR67 Cameo PCGS.** This Superb Gem Cameo proof is fully struck and boasts remarkably deep mirroring in the fields. The obverse is slightly more contrasted than the reverse, but both sides have appreciable cameo qualities. Only a handful of finer Cameos are known. Population: 56 in 67 (8 in 67+) Cameo, 1 finer; 2 in 67 Deep Cameo, 0 finer (8/17). NGC ID# 2765, PCGS# 83779

- 3159 1885 PR67 NGC.** A spectacular Superb Gem from a mintage of 3,790 pieces, this coin offers sharply detailed design elements and deeply reflective fields, with no mentionable signs of contact. Overall eye appeal is terrific. NGC ID# 2767, PCGS# 3781

### 1887/6 Three Cent Nickel, PR67 Cameo Guide Book and Cherrypickers' Variety

- 3160 1887/6 FS-302 PR67 Cameo NGC.** The overdate is strong, with obvious repunching on the 8s and the clear loop of an underdigit 6 beneath the 7, and misplaced digits are clearly present in the dentils. This is a brilliant, nicely mirrored Superb Gem proof with designated Cameo contrast and flashy ivory-nickel color. A sharp strike fully defines the date anomalies as well as the primary motifs. The majority of 1887 proofs show overdating to one extent or another, yet they are rare with Cameo contrast and three sharp underdigits. Census: 10 in 67 Cameo (1 in 67+), 3 finer (7/17). NGC ID# 276A, PCGS# 416357 Base PCGS# 83784

## SHIELD NICKELS

- 3161 1869 MS66 PCGS. CAC.** This is a completely brilliant Premium Gem nickel that belongs in a top Registry Set. Diagonal polish lines occur in the reverse field, and myriad die cracks are suggestive of the difficulty the Mint had striking coins in this hard metal. Crisp olive leaves, shield lines, and stars. Population: 19 in 66 (1 in 66+), 0 finer. CAC: 9 in 66, 0 finer (7/17). NGC ID# 22P3, PCGS# 3796

### 1875 Shield Nickel, MS66 Unknown in Higher Grades

- 3162 1875 MS66 PCGS.** While its 2 million coin-mintage suggests otherwise, the 1875 Shield nickel is actually very rare in Premium Gem condition and unseen in higher grades. This Registry-quality offering presents magnificent gold and powder-blue patina with considerable brilliance remaining. The obverse is a touch soft, but the reverse is razor-sharp with a single tick on the denomination. Population: 15 in 66 (3 in 66+), 0 finer (7/17). NGC ID# 22PA, PCGS# 3804
- 3163 1883/2 FS-302 AU50 NGC.** The bold diagonal die crack above the date confirms the late die state of this scarce overdate variety. The "point" of the 2 is apparent southwest of the lower knob of the 3. An original chestnut-gold example with moderate peripheral carbon and generally unmarked surfaces. NGC ID# 22PD, PCGS# 38413 Base PCGS# 3814
- 3164 1883/2 FS-302 AU58 PCGS.** A prominent die crack through the ball of the shield down to the top of the 3 identifies this popular overdate variety, one of five 1883/2 overdate varieties recorded in the Fivaz-Stanton Cherrypicker's Guide. Light gold toning appears over the lustrous gray surfaces of this important piece. NGC ID# 22PD, PCGS# 38413 Base PCGS# 3814

### 1883/2 Shield Nickel, MS64 FS-302, Clear Overdate

- 3165 1883/2 FS-302 MS64 PCGS.** The underlying 2 is clearly visible left of the 3 in the date, although not quite as boldly as on FS-301. This near-Gem is satiny and lustrous with a hint of light golden toning. The strike is sharp. Peripheral die cracks appear on each side but are most prominent on the obverse, particularly at the date. Population (all overdate varieties included): 18 in 64 (1 in 64+), 11 finer (7/17). NGC ID# 22PD, PCGS# 38413 Base PCGS# 3814

## PROOF SHIELD NICKELS

- 3166 1867 No Rays PR66 PCGS.** This No Rays 1867 proof Shield nickel is boldly struck and displays appreciable field-device contrast on the obverse. A hint of light champagne toning emerges from the peripheries. Examples are seldom offered this fine, and no non-Cameos are finer. Population: 13 in 66 (1 in 66+), 0 finer; 18 in 66 Cameo (1 in 66+), 1 finer; 4 in 66 Deep Cameo (1 in 66+), 0 finer (8/17). NGC ID# 4T4L, PCGS# 3821

### 1867 No Rays Nickel, PR66 Original Pastel Toning, CAC Approval

- 3167 1867 No Rays PR66 PCGS. CAC.** Pastel shades of violet, blue, green, and gold adorn marvelously preserved surfaces. The original toning and excellent technical quality undoubtedly contribute to CAC's approval. A full impression with squared-off rims confirms the proof origin, though contrast is somewhat lacking. Eye appeal, of course, is not. Population: 13 in 66 (1 in 66+), 24 finer including Cameo and Deep Cameo. CAC: 3 in 66, 13 finer (7/17). NGC ID# 4T4L, PCGS# 3821
- 3168 1867 No Rays PR65 Cameo PCGS.** This starkly contrasted Gem Cameo proof is fully struck and brilliant, showing satiny luster on the design elements and legends. No distracting marks are present. Cameos are rarely encountered finer. Population: 36 in 65 Cameo, 19 finer; 1 in 65 Deep Cameo, 4 finer (8/17). NGC ID# 5EB6, PCGS# 83821
- 3169 1868 PR66 PCGS.** A sharply struck Premium Gem proof exhibiting brilliant nickel-gray surfaces, this deeply mirrored example has a hint of contrast with faint bluish overtones. Population: 13 in 66, 22 finer including Cameo and Deep Cameo (7/17). NGC ID# 276J, PCGS# 3822
- 3170 1870 PR66 Cameo PCGS.** Glassy fields display profound reflectivity under a veil of light champagne-gold color, though the overall appearance of this Premium Gem Cameo nickel is largely brilliant. Reportedly 1,000+ proofs struck. Population: 27 in 66 (3 in 66+) Cameo, 2 finer (7/17). NGC ID# 276L, PCGS# 83824
- 3171 1875 PR66 PCGS.** Brilliant mirrored surfaces shine through the wispy champagne toning on this lovely Premium Gem proof. Faint field-to-device contrast is insufficient for the Cameo designation. Population: 21 in 66, 13 finer including Cameo (7/17). NGC ID# 276S, PCGS# 3829
- 3172 1877 — Scratch — PCGS Proof Genuine. Unc Details.** The proof-only 1877 Shield nickel is highly popular with collectors and enjoys strong demand in all grades. This piece has a scrape in from the obverse border at 10:30 that prevents a numerical grade.

**1877 Nickel, PR64  
Acclaimed Proof-Only Date**

**3173 1877 PR64 PCGS.** From a mintage of only 900 proofs, the 1877 Shield nickel is an acclaimed key to the series. No circulation strikes were produced that year, so collectors are obliged to obtain a proof strike to fill the date in their sets. Champagne-tinged surfaces are predictably fully struck. Minor flecks and carbon specks are undistracting. NGC ID# 276U, PCGS# 3831

**3174 1878 PR64 PCGS.** For the second year in a row, the Shield nickel was only struck in proof format in 1878, when a mintage of 2,350 proofs was accomplished. This sharply detailed Choice example is lightly marked, but the reflective fields are somewhat dimmed by shades of lavender-gray toning. NGC ID# 276V, PCGS# 3832

**3175 1878 PR65 PCGS.** An exceptional Gem proof of this important proof-only Shield nickel, featuring satin luster and bold design motifs beneath lovely gold, lilac, and blue toning. NGC ID# 276V, PCGS# 3832

**3176 1878 PR66 PCGS.** A stunning Premium Gem proof that exhibits delicate blue toning, this sharply defined example has semi-mirrorlike surfaces that are typical of the proof-only issue. NGC ID# 276V, PCGS# 3832

**3177 1879/8 PR66+ PCGS.** The remnants of an undertype 8 can be seen between the knob and upper loop of the final digit in the date on this sharply detailed Plus-graded Premium Gem. The well-preserved surfaces show reflective fields and a few hints of pale green toning. NGC ID# 22PG, PCGS# 3834

## LIBERTY NICKELS

**3178 1885 AU53 PCGS.** A natural light gray example of the key issue among circulation strike Liberty nickels, this piece retains considerable underlying luster with splendid, natural surfaces. NGC ID# 2773, PCGS# 3846

**1886 Liberty Nickel, MS64  
Lower-Mintage Issue**

**3179 1886 MS64 PCGS.** The 1886 Liberty nickel has a small business-strike mintage of 3.3 million pieces, making it a scarce issue at the MS64 grade level. This attractive Choice specimen exhibits well-detailed design elements, with a touch of softness on the lower stars and wreath. The lightly marked, lustrous surfaces show a few highlights of greenish-gold and lavender-gray toning. PCGS has graded 66 numerically finer examples (7/17). NGC ID# 277U, PCGS# 3847

**3180 1889 MS66 PCGS.** Whispers of champagne-gold color visit the lustrous surfaces of this Premium Gem. The design elements are well-struck except for the often seen weakness in some of the star centers and the corn ear left of the bowknot. Population: 42 in 66 (4 in 66+), 0 finer (7/17). NGC ID# 2775, PCGS# 3850

**3181 1894 MS65 PCGS.** A relatively well-struck Gem example with minor weakness only stars 1 and 2. Some iridescence accentuates the light golden toning on each side, complementing softly frosted mint luster. Finer examples are scarce. Population: 70 in 65 (5 in 65+), 43 finer (7/17). NGC ID# 2779, PCGS# 3855

**3182 1901 MS66+ PCGS. CAC.** Thick, frosty mint luster gives this high-end Premium Gem outstanding eye appeal. The surfaces are unabraded, and the strike is bold aside from minor weakness on the outer points of the obverse stars. On the reverse, a shallow, well-hidden grease strike-through is located in the upper portion of the right wreath branch, affecting the sharpness in that area. Population: 82 in 66 (15 in 66+), 6 finer. CAC: 39 in 66, 4 finer (8/17). NGC ID# 277C, PCGS# 3862

**1906 Nickel, Toned MS66+  
Tied for Finest Certified**

**3183 1906 MS66+ PCGS.** This high-end Premium Gem is tied for the finest 1906 Liberty nickel certified. Vibrant cartwheel luster illuminates warm gold toning on each side, and the strike is impressively sharp throughout. A mark on Liberty's nostril and another near the right side of the V on the reverse are the only grade-limiting abrasions. Population: 40 in 66 (8 in 66+), 0 finer (7/17). NGC ID# 277H, PCGS# 3867

**3184 1908 MS66 PCGS.** Beautifully preserved and frosty with delicate champagne toning. The strike is considerably weak on the lower-left wreath and also on Liberty's temple and some stars. Nonetheless, no numerically finer 1908 nickels have been reported by PCGS. Population: 32 in 66 (6 in 66+), 0 finer (8/17). NGC ID# 24FR, PCGS# 3869

**3185 1910 MS66 PCGS.** Some iridescence appears throughout the champagne-gray surfaces of this satiny Premium Gem. The strike is above-average but not quite full on several stars. A few tiny ticks on Liberty's jaw limit the grade. Population: 37 in 66 (5 in 66+), 1 finer (7/17). NGC ID# 277L, PCGS# 3871

**3186 1910 MS66+ PCGS.** Lovely pastel toning in light rainbow hues appears on both sides of this high-end Premium Gem, warming beautifully preserved surfaces. The usual strike weakness occurs on the lower portion of the wreath and on a few peripheral stars. Population: 37 in 66 (5 in 66+), 1 finer (8/17). NGC ID# 277L, PCGS# 3871

**3187 1912-D MS65 PCGS.** Shades of golden-brown and lavender-gray toning blanket the well-preserved surfaces of this late-series Gem. The design elements are well-detailed, with a touch of the usual softness on the star centers and lower wreath. NGC ID# 277P, PCGS# 3874

**3188 1912-D MS65 PCGS.** Pastel rainbow hues form concentric rings on this Gem 1912-D Liberty nickel. The softly frosted luster is beautifully preserved, and the design elements are boldly struck save for the usual weakness on the lower-left portion of the wreath. PCGS lists 52 numerically finer representatives (7/17). NGC ID# 277P, PCGS# 3874

**3189 1912-D MS65+ PCGS.** A lovely example with olive-gold and lavender-blue toning over the usual satiny mint luster. The lower-left portion of the wreath is well-defined, although several obverse stars are incomplete. PCGS has awarded Plus designations to only 13 Gems, and there are 52 finer submissions reported at that service (7/17). NGC ID# 277P, PCGS# 3874

**1912-D Liberty Nickel, MS66  
None Numerically Finer at PCGS**

**3190 1912-D MS66 PCGS.** From a mintage of 8.4 million pieces, the 1912-D Liberty nickel is very scarce in MS66 condition, and finer examples are virtually unobtainable. This delightful Premium Gem is sharply detailed in most areas, with just a trace of softness on the lower stars. The well-preserved, lustrous surfaces show hints of greenish-gold and cerulean-blue toning. Population: 52 in 66 (4 in 66+), 0 finer (7/17). NGC ID# 277P, PCGS# 3874

**3191 1912-S MS63 PCGS.** The distinctive satin luster of the 1912-S nickel is especially prominent on this Select example, which shows only a light hue of golden toning. The coin is well-preserved and well-struck save for the corn ear to the left of the wreath bow, which is a trifle soft as usual. This semikey San Francisco issue boasts the lowest mintage of the series by a large margin at 238,000 coins. NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

**3192 1883 With Cents PR66+ Cameo PCGS.** A brilliant, starkly contrasted example with a full strike and frosty motifs. A few tiny ticks appear beneath a loupe but are not distracting. Finer With Cents 1883 proof Liberty nickels are rare. Population: 56 in 66 (7 in 66+), 10 finer; 49 in 66 (4 in 66+) Cameo, 6 finer; 4 in 66 Deep Cameo, 2 finer (7/17). NGC ID# 277S, PCGS# 83881

**3193 1884 PR66 Deep Cameo PCGS.** The 1 in the date is lightly recut, although this is not the FS-301 Repunched Date variety. As a proof type coin, this Premium Gem Deep Cameo displays razor-sharp detail and has profound field-device contrast. Delicate ice-blue and champagne hues grace each side. Population: 5 in 66 (1 in 66+) Deep Cameo, 2 finer (8/17). NGC ID# 22PV, PCGS# 93882

**3194 1885 PR65 PCGS.** A lovely Gem example of this popular proof issue, which is often acquired in the place of its more costly and key-date business strike counterpart. Both sides exhibit modest cameo contrast and delicate champagne toning. No distracting marks are present. NGC ID# 277T, PCGS# 3883

**3195 1885 PR65 Cameo PCGS.** Cameo examples of the 1885 proof nickel are scarce in Gem condition. This piece displays considerable contrast and has fully struck stars and wreath elements. A hint of light golden toning on each side is barely perceptible. Population: 44 in 65 (1 in 65+) Cameo, 73 finer (7/17). NGC ID# 277T, PCGS# 83883

**3196 1893 PR67 Cameo NGC. CAC.** The stark white-on-black contrast and virtual absence of contact marks account for the incredible eye appeal of this near-flawless PR67 Cameo nickel. Among 2,195 proofs minted in 1893. Census: 13 in 67 Cameo (4 in 67★), 0 finer. CAC: 14 in 67, 0 finer (7/17). NGC ID# 2783, PCGS# 83891

**3197 1894 PR66 Cameo PCGS. CAC.** This well-contrasted Cameo is a conditionally rare example of the 1894 proof. The design elements are razor-sharp, and the fields display deep mirroring with delicate champagne toning. Scattered, microscopic specks are discernible under a loupe but vanish to the unaided eye. Population: 28 in 66 (3 in 66+), 4 finer; 23 in 66 (4 in 66+) Cameo, 11 finer. CAC: 13 in 66, 2 finer; 13 in 66 Cameo, 6 finer (7/17). NGC ID# 5EJM, PCGS# 83892

**3198 1895 PR66 Cameo PCGS. CAC.** Only 2,062 nickels were produced in proof format in 1895. Few can equal the quality of this Premium Gem Cameo example with CAC approval. Each side has pronounced contrast and terrific eye appeal. Population: 11 in 66 Cameo, 3 finer. CAC: 6 in 66, 2 finer (7/17). NGC ID# 2785, PCGS# 83893

**1896 Liberty Nickel, PR66 Cameo  
Sharply Detailed Specimen**

**3199 1896 PR66 Cameo PCGS. CAC.** The design elements of this spectacular Premium Gem exhibit razor-sharp definition throughout, even on the usual problem areas, like the lower wreath. The deeply reflective fields contrast boldly with the frosty devices to create a dramatic cameo effect. A few delicate hints of pale gold toning visit the impeccably preserved surfaces. NGC ID# 2786, PCGS# 83894

**3200 1903 PR67 Cameo PCGS.** Gleaming nickel-white surfaces overall with a prominent patch of orange at the bottom left reverse margin and a faint echo on the left stroke of the V within the wreath. Intricately detailed and carefully preserved with just a hint of orange-peel texture in the mirrored fields that carry the coin's contrast. NGC ID# 278D, PCGS# 83901

**1905 Nickel, PR67+  
Immaculately Preserved**

**3201 1905 PR67+ PCGS. CAC.** The Mint bumped nickel proof production slightly in 1905 to 2,152 specimens, up from 1,817 coins the year before. Arcs of powdery-gold patina at the upper-right obverse and lower-left reverse are the only interruptions of the brilliance that characterizes this immaculate Superb Gem. Population: 27 in 67 (3 in 67+), 5 finer including Cameo coins. CAC: 16 in 67, 4 finer (8/17). NGC ID# 278F, PCGS# 3903

**1907 Liberty Nickel, PR67+  
None Graded Higher**

- 3202 1907 PR67+ PCGS. CAC.** The technical quality of this PR67+ Liberty nickel with CAC approval is unsurpassed at both services among non-Cameo representatives. There are five additional PR67 Cameo submissions at PCGS, but none with the added Plus. This piece offers ice-blue surfaces with glints of gold amid virtually flawlessly preserved surfaces. Partly contrasted. Population: 28 in 67 (6 in 67+), 0 finer. CAC: 15 in 67, 0 finer (7/17). NGC ID# 278H, PCGS# 3905

- 3203 1909 PR67 Cameo PCGS.** A Superb Gem proof Cameo with dramatic field-motif contrast and fully struck design elements. Neither side shows mentionable toning, and the overall eye appeal is outstanding. Only a handful of finer Cameos are known. Population: 34 in 67 (3 in 67+) Cameo, 2 finer (7/17). NGC ID# 278K, PCGS# 83907

**BUFFALO NICKELS**

- 3204 1913 Type One, Doubled Die Reverse, FS-1802, MS62 PCGS.** According to the *Cherrypickers' Guide*: "This variety exhibits a light spread on E PLURIBUS UNUM." The doubling is faint on this piece due to significant die fatigue that produces heavy metal flowlines on each side. The bison and Indian portrait are nonetheless well-defined. Both sides display light champagne toning. PCGS# 605980 Base PCGS# 3915

- 3205 1913-S Type Two MS65 PCGS.** A die crack passes through the date. The braid, horn, shoulder, and tail are crisp, although areas of incompleteness are characteristic among 1913-S Type Two nickels. Bright, frosty, and untuned surfaces exhibit small ticks and flecks, none of which are singular in nature. A rarity in higher grades. NGC ID# 22R3, PCGS# 3923

**1913-S Type Two Buffalo Nickel, MS65  
Sharply Struck, Attractively Toned**

- 3206 1913-S Type Two MS65 PCGS.** Delicate rainbow toning surrounds both peripheries on this Gem 1913-S Type Two Buffalo nickel, leaving the interiors with a light champagne hue. The strike is surprisingly sharp, and metal flowlines in the fields are only in their beginning stages. PCGS lists 44 finer representatives (8/17). NGC ID# 22R3, PCGS# 3923

- 3207 1914-D MS65 PCGS.** The dies are cracked, but metal flowlines are at a minimum. The centers are poorly struck as usual for the issue, but the bison's horn is complete. Warm golden toning graces each side over luminous, glistening mint luster. There are no distracting abrasions. Finer 1914-D Buffalo nickels are scarce. NGC ID# 22R5, PCGS# 3925

- 3208 1914-D MS65 PCGS. CAC.** Nickel-blue, golden-orange, and yellow-green shadings embrace most of each side. This Gem 1914-D nickel is well-defined and attractive for the grade, showing original mint luster. Housed in a green label holder. CAC: 39 in 65, 26 finer (7/17).

Ex: *FUN Signature* (Heritage, 1/2009), lot 789; *Baltimore Signature* (Heritage, 3/2009), lot 605. NGC ID# 22R5, PCGS# 3925

- 3209 1914-S MS65+ PCGS. CAC.** Examples of the 1914-S nickel were saved, possibly because of the issue's relatively low mintage, and are collectible through MS65. High-end Gems like this are exceedingly scarce. Iridescent blue, gold, and rose patina blankets frosty, sharply detailed surfaces. Terrific visual quality. NGC ID# 22R6, PCGS# 3926

- 3210 1915-S MS64 NGC.** A satiny, well-preserved near-Gem with brilliant luster and no major abrasions. The central high points show the expected strike weakness, although the bison's head and horn are well-defined. The 1915-S Buffalo nickel is infrequently offered in finer condition. NGC ID# 22R9, PCGS# 3929

- 3211 1916-S MS65 PCGS. CAC.** Above-average detail for the issue, though evidence of die erosion is present on each side. Subtle luster filters through reddish-orange and pale nickel-gray color. PCGS has graded 42 finer pieces (7/17).

Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 287. NGC ID# 22RC, PCGS# 3933

- 3212 1917-S MS64 PCGS.** Lustrous and typically softly struck for the issue. A light golden glow occurs over both sides. A shallow, curving line across the left side of the Indian's face limits the grade. Finer 1917-S Buffalo nickels are scarce.

Ex: *Baltimore Signature* (Heritage, 3/2009), lot 617. NGC ID# 22RF, PCGS# 3936

**1918/7-D Nickel, Well-Detailed VF20  
Clear Overdate and Mintmark**

- 3213 1918/7-D FS-101 VF20 NGC.** Attractive problem-free surfaces show olive tints atop battleship-gray patina, with metal flowlines visible in the fields from die fatigue. This coin is remarkably well-detailed, held back from an XF designation only by the absence of a full horn on the bison. The overdate feature is clear, as is the mintmark. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

- 3214 1918-D MS64 PCGS.** Pink and orange toning drapes the fields, while the luminous devices remain medium nickel-gray. A moderately well-struck example for the issue, showing a sharp horn but with weakness on the shoulder. Finer 1918-D nickels are scarce. Ex: *Baltimore Signature* (Heritage, 3/2009), lot 619. NGC ID# 22RH, PCGS# 3938

- 3215 1918-S MS63 PCGS.** This well-detailed Select specimen displays satiny mint luster and silver-gray patina, highlighted by traces of gold. Just a touch of softness shows on the hair and the bison's shoulder. Some strike doubling is evident on the Indian's profile. Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3238. NGC ID# 22RK, PCGS# 3940

- 3216 1919-D MS64 NGC.** The 1919-D Buffalo nickel is available in MS64 but scarce in MS65. This near-Gem displays satiny mint luster and warm golden toning. As usual for the issue, the strike is weak at the central high points and on the bison's head. No distracting abrasions are seen. NGC lists 24 finer representatives (7/17). NGC ID# 22RM, PCGS# 3942

**3217 1919-S MS63 PCGS.** The 1919-S is a challenging date to acquire in high grade. This is a collectible Select example with nickel-gray luster and satiny surfaces. The strike is considerably weak on the devices, as is usually seen to some extent on this San Francisco issue. NGC ID# 22RN, PCGS# 3943

**3218 1920-D MS64 NGC.** Struck from late-state dies with metal flowlines in the fields and a small rim cud above the ME in AMERICA. Moderate weakness is seen at the centers and on the bison's head and the Indian's feathers. Satiny luster shows minimal abrasions, and this piece displays appealing golden toning. NGC has seen only 29 finer examples (7/17). NGC ID# 22RR, PCGS# 3945

#### 1920-S Buffalo Nickel, MS64

**3219 1920-S MS64 PCGS.** Pleasing autumn-brown, stone-gray, and olive-gold toning embraces this satiny and conditionally scarce San Francisco nickel. Refreshingly unabraded, and the strike is excellent for the issue. One minor retained lamination is on the upper front leg of the bison. PCGS has graded 25 numerically finer examples (7/17). NGC ID# 22RS, PCGS# 3946

**3220 1921 MS66 PCGS.** This Premium Gem 1921 Buffalo nickel is boldly struck and frosty with near-brilliant coloration. Die wear is only in the most early stages of producing field fatigue, making the design especially sharp. Housed in a green label holder. PCGS lists 31 Superb Gems finer (8/17). NGC ID# 22RT, PCGS# 3947

**3221 1923-S MS64 PCGS.** Well-struck and luminous with satiny quicksilver surfaces. Green-gold toning covers parts of the fields, while the rest of this minimally marked piece is nickel-gray. The fields exhibit considerable die erosion, as normal for the issue. Ex: *Baltimore Signature* (Heritage, 3/2009), lot 629. NGC ID# 22RW, PCGS# 3950

#### 1924-D Nickel, MS65 Elusive Denver Product

**3222 1924-D MS65 PCGS.** Gem examples of the 1924-D Buffalo nickel are very scarce, and there are only nine higher grading events at PCGS and NGC combined, possibly including duplications. This satiny, nickel-gray representative exhibits typical strike detail with notable definition on LIBERTY. Ticks are well-hidden within the confines of the design. PCGS reports eight finer submissions (8/17). NGC ID# 22RY, PCGS# 3952

#### 1924-D Buffalo Nickel, MS65 Conditionally Rare in Finer Grades

**3223 1924-D MS65 PCGS. CAC.** The 1924-D does not get the same level of recognition as some other mintmarked Buffalo nickel issues, but it is elusive nonetheless, scarce at the Gem level and exceedingly rare any finer. The present example is well struck for the issue with soft nickel-gray luster that shows delicate reddish-orange elements. PCGS has graded eight numerically finer examples (7/17). NGC ID# 22RY, PCGS# 3952

**3224 1925-D MS64 PCGS. CAC.** The well-detailed design elements of this impressive Choice example show just a touch of the usual softness on the bison's shoulder and the lightly marked surfaces show subtle hints of pale gold and lavender-gray toning. NGC ID# 22S3, PCGS# 3955

#### 1925-D Buffalo Nickel, MS65 Seldom Encountered Any Finer

**3225 1925-D MS65 NGC.** The surfaces are silver-gray with considerable dollops of gold added into the mix, and much luster gleams from each side. The strike is typical for the issue, with weakness on LIBERTY and the high points of the bison. The reverse die, unsurprisingly, shows some rather advanced orange-peel effect from die erosion and overuse. Census: 46 in 65, 15 finer (7/17). NGC ID# 22S3, PCGS# 3955

**3226 1925-S MS64 PCGS.** The 1925-S Buffalo nickel is a well-known strike rarity in the series, and the present piece does show softness on most of the high points, including the first two digits of the date. The horn is complete. Die erosion produces some metal flowlines, more prominent on the reverse. The surfaces are relatively unmarked, and generous luster is present. Conditionally elusive any finer, as PCGS has certified only 30 coins in higher grade (7/17). Ex: *Baltimore Signature* (Heritage, 3/2009), lot 639. NGC ID# 22S4, PCGS# 3956

**3227 1926 MS67 PCGS.** This is an absolutely gorgeous, fully struck, and near-flawlessly preserved Buffalo nickel that should appeal to the most discerning specialists. Each side is richly toned in iridescent blue, gold, rose, violet, and green colors. Frosty luster emanates from beneath the elegant, multihued overlay. Population: 48 in 67 (2 in 67+), 0 finer (7/17). NGC ID# 22S5, PCGS# 3957

**3228 1926-D MS64+ PCGS. CAC.** A remarkably well-struck example of this mid-1920s Denver issue, showing satiny mint luster and attractive ice-blue, gold, and peach-orange toning. Few 1926-D nickels are known this fine with a CAC endorsement. CAC: 13 in 64, 24 finer (7/17). NGC ID# 22S6, PCGS# 3958

- 3229 1928-D MS66 PCGS.** This satiny Premium Gem is devoid of abrasions and shows warm golden toning over the luminous surfaces. The strike is weak at the centers with some of the original planchet surface not fully struck out. No numerically finer coins are reported by PCGS. Population: 56 in 66 (2 in 66+), 0 finer (7/17). NGC ID# 22SC, PCGS# 3964
- 3230 1929 MS66+ PCGS. CAC.** Softly frosted mint luster covers the surfaces and there is just the slightest hint of patina on each side. Sharply defined. NGC ID# 22SE, PCGS# 3966
- 3231 1929-S MS66+ PCGS.** Blushes of lavender appear throughout warm golden surfaces on this high-end Premium Gem. The strike is slightly soft at the centers, as usual, but no abrasions distract from the luminous patina. PCGS lists 10 finer representatives (8/17). NGC ID# 22SG, PCGS# 3968
- 3232 1934-D MS66 PCGS. CAC.** This spectacular Premium Gem is one of the finest certified examples of this popular D-mint delivery. Warm pastel color overlays the smooth, distraction-free surfaces. The features are above-average in striking definition with unbroken satin luster. Eye appeal is outstanding. Population: 92 in 66 (5 in 66+), 0 finer. CAC: 25 in 66, 0 finer (8/17). NGC ID# 22SM, PCGS# 3973
- 3233 1936-D 3 1/2 Legs, FS-901, VF20 PCGS.** This die-lapped Denver variety is arguably one of the most famous key dates from the 20th century. Each side is battleship-gray with olive accents and a uniform layer of friction from moderate circulation. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978
- 3234 1936-S MS67 PCGS. CAC.** The nearly 15 million nickels struck at the S-mint is lower than its P or D-mint counterparts, and the 1936-S is very scarce at this grade level. This Superb Gem is fully struck with brilliant surfaces and shimmering luster. Void of discernible impairments. Population: 88 in 67 (3 in 67+), 0 finer. CAC: 11 in 67, 0 finer (7/17). NGC ID# 22SU, PCGS# 3979
- 3235 1937-D — Improperly Cleaned — Three-Legged, FS-901, MS60 NGC Details. UNC.** The heavily eroded dies are diagnostic of this important *Guide Book* variety. The satiny mint luster shows relatively few abrasions, and warm golden toning appears over each side. The shallow front leg of the bison was effaced by die lapping, a practice that was common on five cent dies during the 1920s and '30s but seldom performed to such an extent as to efface design elements.
- 3236 1937-D Three-Legged, FS-901, MS61 PCGS.** Rather heavily abraded and graded accordingly, this Mint State Three-Legged Buffalo nickel will appeal to budget-restricted collectors. The advanced die state leaves the date and mintmark clear, although some softness is seen on the bison's shoulder. Under a loupe, a vertical linear mark is seen hidden on the Indian's braid below the tie. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

## PROOF BUFFALO NICKELS

### 1913 Type Two Buffalo Nickel, PR66 Lovely Iridescent Toning

- 3237 1913 Type Two PR66 PCGS.** The luminous matte surfaces of this Premium Gem Type Two proof are unmarked and display lovely iridescent toning in shades of champagne, lavender, and ice-blue. The strike is needle-sharp. Type Two matte proof Buffalo nickels are scarce in this grade and exceedingly so finer. NGC ID# 278S, PCGS# 3990

### 1914 Nickel, PR67 Finely Textured Satin Surfaces

- 3238 1914 PR67 PCGS. CAC. Ex: Forsythe II.** The 1914 proof nickels were extremely well-made. The Mint had clearly improved its production technique and consistency over the previous year. Survivors are often found in high grades, although Superb Gems are very scarce. Pale woodgrain toning over finely textured satin surfaces delivers terrific eye appeal. Nearly contact-free. PCGS reports 11 finer grading events. CAC: 47 in 67, 3 finer (7/17). NGC ID# 278T, PCGS# 3991
- 3239 1936 Type One — Satin Finish PR65 PCGS.** An exquisite strike is rendered in full brilliance on this attractively toned Type One proof nickel that exhibits lovely champagne, gold, and sea-green toning. A small spot is noted on the reverse border at 8:30. NGC ID# 278X, PCGS# 3994
- 3240 1936 Type Two — Brilliant Finish PR65 PCGS.** This glimmering Gem proof displays delicate champagne and lavender hues across the sharp, unmarked surfaces. A loupe reveals a few tiny pepper specks but none that are detracting to the unaided eye. NGC ID# 278Y, PCGS# 3995
- 3241 1937 PR66 PCGS.** A few subtle hints of lavender and emerald-green toning visit the pristine surfaces of this delightful Premium Gem, with sharply detailed design elements and deeply mirrored fields on both sides. Eye appeal is outstanding. NGC ID# 278Z, PCGS# 3996
- 3242 1937 PR66 PCGS. CAC.** A few delicate hints of ice-blue and emerald-green toning enhance the impeccably preserved surfaces of this delightful Premium Gem, with razor-sharp definition on the design elements and deeply mirrored fields. NGC ID# 278Z, PCGS# 3996
- 3243 1937 PR67 PCGS.** A brilliant proof with modest field-motif contrast on each side. The devices are satiny and the fields display deep mirroring. Full definition is present throughout the relief details. This 1937 proof Buffalo nickel is easily among the most appealing PR67 coins we have seen. PCGS reports 34 numerically finer examples (7/17). NGC ID# 278Z, PCGS# 3996
- 3244 1937 PR67 PCGS.** This deeply mirrored, lavender-tinted Superb Gem proof is struck to the full extent of the dies. The surfaces are pristine, and the eye appeal is outstanding. PCGS lists only 34 numerically finer examples of the final proof issue in the Buffalo nickel series (7/17). NGC ID# 278Z, PCGS# 3996
- 3245 1937 PR67 PCGS. CAC.** This magnificent Superb Gem exhibits fully struck design elements and deeply mirrored fields, with impeccably preserved brilliant surfaces. The 1937 proof nickel can be found through PR67 but is rare any finer. PCGS has graded 34 examples higher (7/17). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3246 1945-P Doubled Die Reverse, FS-801, MS67 NGC.** CENTS exhibits very strong die doubling, as do the final letters in MONTICELLO. STATES OF is also nicely doubled. FS-802 and FS-803 are also doubled die reverse varieties, but are much less dramatic than FS-801, which has attained a *Guide Book* listing. FS-801 has a triple-punched mintmark (below the base, and above the left side of the base), a fact neglected due to the greater interest in its die doubling. This is a highly lustrous Superb Gem with light olive-green toning and only minor field grazes. Ex: ANA Signature (*Heritage*, 8/2015), lot 3578. NGC ID# 22TX, PCGS# 38505 Base PCGS# 4173

**3247 1948-D MS67+ Full Steps PCGS.** Frosty, unabraded surfaces display warm champagne interiors, surrounded by partially blended rainbow border toning, all in pastel shadings. The strike is extremely sharp. No finer Full Steps 1948-D nickels are reported by either leading certification service. Population: 18 in 67 (4 in 67+) Full Steps, 0 finer (8/17). NGC ID# 22U9, PCGS# 84035

**3248 1949-D/S FS-501 MS67 NGC.** Satiny mint luster shows a light champagne hue on this nearly pristine FS-501 example. This variety shows the D mintmark punched over an S, with the underlying letter visible inside and to the upper-left of the D. NGC has only certified five examples in this grade and none finer (7/17). NGC ID# 22UC, PCGS# 38511 Base PCGS# 4039

**3249 1949-D/S FS-501 MS67 NGC.** The D mintmark is punched over an errant S on this *Guide Book* and *Cherry-pickers'* variety. NGC has attributed only five examples in MS67 and none finer (7/17). This example is boldly struck but a trifle soft on the steps of Monticello. A delicate champagne hue graces the softly frosted surfaces. NGC ID# 22UC, PCGS# 38511 Base PCGS# 4039

**3250 1952-S MS66 Full Steps PCGS.** Five and one-half steps are visible on this splendid Premium Gem, a rarity with such strong detail. This piece has highly lustrous surfaces with satin brilliance beneath rich gold toning. Population: 15 in 66 (3 in 66+) Full Steps, 0 finer (7/17). NGC ID# 22UM, PCGS# 84048

## PROOF JEFFERSON NICKELS

### 1939 Reverse of 1940 Nickel, PR68 Modest Field-Motif Contrast

**3251 1939 Reverse of 1940, FS-901, PR68 NGC.** Tied with one other as the finest non-Cameo proof at NGC, this Superb Gem 1939 Reverse of 1940 nickel displays full detail and pristine surfaces with deeply mirrored fields. The devices are softly frosted and modestly contrasted, particularly on the reverse. PCGS reports one coin in this grade, also with none finer (8/17). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

**3252 1942 Type One PR68 NGC.** Nickels were struck in a wartime silver composition later in the year, but this spectacular PR68 example was struck in the regular copper-nickel alloy. The design elements are razor sharp throughout and the impeccably preserved surfaces show highlights of greenish-gold toning. Census: 9 in 68, 0 finer (7/17). NGC ID# 27A3, PCGS# 4179

**3253 1942 Type One PR68 PCGS. CAC.** Intense sea-green toning visits the peripheries of this magnificent Satin proof, with delicate hints of lavender at the centers. The design elements are razor-sharp and the surfaces are virtually pristine. Eye appeal is terrific. Population: 21 in 68, 0 finer. CAC: 14 in 68, 0 finer (7/17). NGC ID# 27A3, PCGS# 4179

**3254 1971 No S, FS-501, PR69 Cameo PCGS.** Demand for Registry Set coins remains strong. This 1971 No S proof nickel is among the finest Cameos certified and is conditionally rare as such. The design elements are needle-sharp and show stark field-motif contrast. Neither side displays toning. Population: 21 in 69 Cameo, 0 finer; 17 in 69 Deep Cameo, 0 finer (8/17). NGC ID# 56PC, PCGS# 84204

### 1971 No S Nickel, PR69 Deep Cameo None Finer, Major Modern Rarity

**3255 1971 No S, FS-501, PR69 Deep Cameo PCGS.** Ranked 30th among the *100 Greatest U.S. Modern Coins* (2011), only 1,655 Jefferson nickel proofs were reportedly struck without the S mintmark. About 400 examples are known, including fewer than 50 pieces with Deep or Ultra Cameo contrast. This pristine black-and-white specimen is fully struck, as expected, without a lick of color. A monumental modern rarity in this top grade. Population: 17 in 69 Deep Cameo, 0 finer (7/17). NGC ID# 22YN, PCGS# 94204

### 1971 No S Nickel, PR69 Deep Cameo Tied for Finest Certified

**3256 1971 No S, FS-501, PR69 Deep Cameo PCGS.** This conditional rarity is among the finest No S 1971 proof Jefferson nickels certified. The needle-sharp motifs and starkly contrasted against liquidlike mirroring in the fields, and both sides exhibit a hint of warm light golden toning. A must-have Registry Set coin. Population: 17 in 69 Deep Cameo, 0 finer (7/17). NGC ID# 22YN, PCGS# 94204

## EARLY HALF DIME

**3257 1803 Large 8, V-1, LM-2, R.4, Good 4 PCGS.** This smooth, problem-free LM-2 half dime displays uniform olive-gray patina. The obverse is more sharply detailed than expected for the Good grade level, although substantial wear across the reverse that leaves the lower third mostly smooth limits the PCGS grade. LM-2 is the slightly scarcer of two Large 8 die varieties. NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

## BUST HALF DIMES

**3258 1832 V-8, LM-5, R.1, MS64 PCGS. CAC.** Satiny and mostly brilliant, this near-Gem 1832 Capped Bust half dime displays well-preserved surfaces and has excellent eye appeal. The highest hair curls on the Liberty portrait are well-defined, although the reverse still shows a touch of softness at the left corner of the shield. Clash marks and die cracks are evident on each side. CAC: 21 in 64, 54 finer (7/17). NGC ID# 232E, PCGS# 38667 Base PCGS# 4279

**1833 LM-4.1 Half Dime, MS66  
Colorfully Toned, Early Die State**

- 3259 1833 V-3, LM-4.1, R.2, MS66 NGC.** The LM-4 variety is one of the most readily available die marriages among the 10 varieties of 1833 half dimes. It is perhaps more desirable in this early die state (LM-4.1) than later states when the dies were lapped. The O in OF is multiply repunched and moderate die clashing exists on both sides. A lustrous Premium Gem, the coin is sharply struck with only slight weakness at the central curls. Attractive reddish-gold, blue, and olive-gray toning joins nearly mark-free surfaces to provide plenty of eye appeal. Census (all varieties combined): 26 in 66, 19 finer (7/17). PCGS# 38693 Base PCGS# 4280

**1833 V-2, LM-8 Half Dime, MS66  
Outstanding Eye Appeal**

- 3260 1833 V-2, LM-8, R.3, MS66 PCGS. CAC.** The F in OF is repunched, and a slender vertical die crack crosses the portrait. Golden-brown, sea-green, and peach-red toning endows this lustrous and well-preserved half dime. The strike is crisp except on the horizontal shield lines. Among the finest examples of this scarcer die pairing. NGC ID# 232F, PCGS# 38699 Base PCGS# 4280
- 3261 1834 V-1, LM-2, R.1, MS65 NGC. V-1, LM-2, R.1.** The most common variety of the year and readily obtainable in mint condition. That being said, few Gems are actually available, making coins such as this very desirable to type and date collectors. The obverse striking details are especially strong on this piece with only slight softness noted in the central portion of the reverse. The bright mint frost is covered with smoky gray-rose patina that is very attractive and obviously original. NGC ID# 232G, PCGS# 38702 Base PCGS# 4281
- 3262 1835 Large Date, Small 5C, V-9, LM-6, R.2, MS65 NGC.** This satiny Gem is sharply struck and displays mottled sea-green and golden-gray toning over slightly reflective fields. This is not an early die state coin, but the fields were lapped to remove metal flowlines, the remnants of which are still visible at Liberty's profile. Outstanding for type purposes and quite appealing. Housed in a prior generation holder. NGC ID# 232H, PCGS# 38714 Base PCGS# 4283
- 3263 1835 Small Date, Large 5C, V-5, LM-8.2, R.2, MS64+ NGC. CAC.** A pair of die cracks on the reverse at around 10 o'clock identify the late die state variant of LM-8. This piece displays original aquamarine, lavender, gold, and olive toning on each side with semireflective fields. The strike is sharp. A loupe reveals strike doubling on the date and stars. No distracting abrasions are seen. NGC ID# 232H, PCGS# 38716 Base PCGS# 4284

**SEATED HALF DIMES**

- 3264 1837 No Stars, Small Date (Flat Top 1) MS65 PCGS.** The No-Stars design subtype is a short-lived design type necessary for completion of a Seated Liberty half dime set and for more general type sets as well. This is the No Stars, Small Date variety, distinguished by a Flat Top 1 in the date. The Large Date variant has a Pointed 1. Lovely gunmetal-blue and ivory-gold "target" toning on both sides display bright mint luster and smooth, essentially unmarked surfaces. A sharply struck Gem Uncirculated example, it is ideal for a high-grade collection. NGC ID# 232M, PCGS# 4312
- 3265 1840-O Drapery XF40 NGC. V-7.** The V-7 variety is identified by the small reverse die cracks from the tops of I in AMERICA and U in UNITED to the rims. The pleasing gray surfaces of this scarcer New Orleans issue are lightly abraded and only light wear is evident on the design elements. NGC ID# 232X, PCGS# 4327
- 3266 1842 MS66 PCGS. V-1, Flynn-MPD-001.** The top of an errant 2 or 8 is seen in the dentils below the 4. This delightful Seated Liberty half dime features frosty luster under a veil of mixed blue, gold, and green toning. A few stray ticks, visible upon close inspection only, barely prevent an even higher grade for this Registry essential offering. Each side is fully struck. Population: 8 in 66 (2 in 66+), 1 finer (7/17). NGC ID# 2332, PCGS# 4330
- 3267 1844-O XF45 PCGS. V-1. Medium O.** Despite a reported mintage of 220,000 pieces, the 1844-O half dime is an elusive issue. This lightly marked example has mottled sea-green and lavender toning and exhibits inconsistency of strike. Population: 4 in 45, 27 finer (7/17). NGC ID# 2336, PCGS# 4334
- 3268 1853 Arrows MS66+ PCGS.** With a mintage in excess of 13 million coins, the 1853 With Arrows half dime is usually readily available, but not at the Premium Gem grade level. This sharply struck example displays satiny mint luster beneath light golden toning overall. Close examination reveals light clash marks on both sides of this beautifully preserved With Arrows type representative. Population: 51 in 66 (8 in 66+), 11 finer (7/17). NGC ID# 233Y, PCGS# 4356
- 3269 1860-O MS66 PCGS.** A delightful Premium Gem representative of the final half dime issue struck at the New Orleans Mint, this piece exhibits well-detailed design elements and well-preserved surfaces, under shades of golden-brown and magenta toning. Population: 9 in 66, 4 finer (8/17). NGC ID# 2348, PCGS# 4378
- 3270 1862 MS67 PCGS. CAC.** The 1862 is a plentiful issue, popular for type representation. This Superb Gem is semiprooflike with parallel die polishing lines in the fields. Some strike weakness appears on the wreath bowknot, but the obverse is better-defined. Gold and blue border toning surrounds brilliant interiors. There is a small strike-through in the field by Liberty's knee that should not be confused for an abrasion. Population: 57 in 67 (10 in 67+), 4 finer. CAC: 32 in 67, 3 finer (7/17). NGC ID# 234B, PCGS# 4381
- 3271 1862 MS67 PCGS. CAC.** Similar to the 1860, the 1862 Seated Liberty half dime is available in most Mint State grades, but is seldom seen as fine as MS67. This representative is well-struck, albeit lightly clashmarked, with frosty luster shining through a blanket of pale lavender-gray and sun-gold hues. Population: 57 in 67 (10 in 67+), 4 finer. CAC: 32 in 67, 3 finer (7/17). NGC ID# 234B, PCGS# 4381
- 3272 1868-S MS65+ PCGS. CAC.** The 1868-S half dime is a better date, especially at the upper grade levels. Areas of rich toning are present on this lustrous Gem example, primarily at portions of the outer edges, including shades of dark russet, olive-gold, and flecks of amber-orange. Pronounced clash marks are noted upon further examination, though the strike is well-executed and the preservation is pleasing. Population: 10 in 65 (1 in 65+), 4 finer. CAC: 4 in 65, 1 finer (7/17). NGC ID# 234P, PCGS# 4393

**3273 1871-S MS65 PCGS. CAC.** From a mintage of 161,000 pieces, the 1871-S half dime is rare in high grade. This sharply detailed Gem shows light clash marks, but no mentionable distractions on either side. The surfaces are lustrous and lightly toned. Population: 5 in 65, 6 finer. CAC: 3 in 65, 4 finer (7/17). NGC ID# 234W, PCGS# 4399

**3274 1872-S Mintmark Below Bow MS66 PCGS. CAC.** Pale golden patina drapes partly brilliant surfaces, forming a slight woodgrain pattern diagonally across the obverse. Moderate softness at the lower obverse and the corresponding area on the reverse is minor in relation to the boldly struck head and wreath elements, including the ear of corn. PCGS shows 11 coins finer. CAC: 21 in 66, 6 finer (7/17). NGC ID# 2352, PCGS# 4401

## PROOF SEATED HALF DIMES

### 1857 Half Dime, PR66 Scarce Proof Issue

**3275 1857 PR66 NGC.** Probably only 55 or so proofs exist of this date. This is a splendid Premium Gem that exhibits light gold, blue, and iridescent toning on both sides that partially subdues the mirrored fields and lustrous devices. Slight field-to-device contrast is evident, although the toning prevents a Cameo designation. Census: 8 in 66, 1 finer (7/17). NGC ID# 3X58, PCGS# 4436

**3276 1860 PR66 NGC.** A delightful Premium Gem from a proof mintage of 1,000 pieces, this coin exhibits sharply detailed design elements and well-preserved reflective fields, under shades of lavender-gray and greenish-gold toning. NGC ID# 235V, PCGS# 4443

**3277 1861 PR66 PCGS. CAC.** The 1861 is a fairly plentiful proof half dime in the context of the series, although it is conditionally rare in PR66 or better grades. This CAC-approved example displays a sharp strike and deeply reflective fields. A Cameo designation might have been awarded were it not for warm golden toning that yields to violet and blue at the borders. Population: 7 in 66, 2 finer; 1 in 66 Cameo, 0 finer. CAC: 8 in 66, 2 finer (8/17). NGC ID# 5LL5, PCGS# 4444

**3278 1862 PR65 PCGS.** From a tiny proof mintage of 550 pieces, this delightful Gem exhibits sharply detailed design elements and hazily reflective fields under vivid shades of lavender and sea-green toning. Overall eye appeal is terrific. NGC ID# 5LL6, PCGS# 4445

**3279 1862 PR66 NGC.** Splashes of orange, ruby-red, and jade-green endow the obverse. A hint of tan-gold toning visits the otherwise brilliant reverse. The reverse provides obvious cameo contrast, and both sides are well struck. A scant 550 proofs were struck. NGC ID# 5LL6, PCGS# 4445

**3280 1862 PR66 Cameo PCGS.** A delightful Premium Gem from a proof mintage of 550 pieces, this specimen is sharply detailed throughout, with deeply reflective fields that contrast noticeably with the frosty devices. Vivid shades of cerulean-blue and greenish-gold toning add to the outstanding eye appeal. NGC ID# 235X, PCGS# 84445

## EARLY DIMES

### 1796 Dime, JR-1, XF Details Sharp Obverse Definition

**3281 1796 JR-1, R.3 — Mount Removed — NGC Details. XF.** The familiar die cud at star 1 is immediately apparent on JR-1, a plentiful variety for the Draped Bust dime collector seeking a Small Eagle type coin. This piece has sharp detail and uniform olive-gold and stone-gray toning. The border dentils are complete. Most of the eagle on the reverse is effaced by what was a mounting point at the center of the coin for jewelry.

**3282 1798 Large 8, JR-4, R.3, VG8 PCGS.** The Large 8 variety is elusive in all grades. This well-circulated example displays partial detail on the central devices and border legends that are strong aside from the left-hand quadrants where they blend into the rims from an uneven strike. Each side is pleasing gunmetal-gray in color with relatively smooth surfaces. NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

**3283 1805 4 Berries, JR-2, R.2, VF30 PCGS.** An ideal selection for a circulated type set, this JR-2 example is confirmed by four berries on the olive branch, two on the outside and two inside the stem. Strong definition remains on the central motifs, with the Heraldic Eagle reverse showing bold field stars, a fully readable motto on the scroll, and only slight wingtip wear. Liberty's lower hair tresses are sharply defined amid attractive lilac-gold toning. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

## BUST DIMES

### 1820 Bust Dime, MS64 JR-11, Reflective Fields

**3284 1820 Medium 0, JR-11, R.3, MS64 NGC.** The Small C in 10 C narrows the list of possible die marriages to JR-10 or JR-11, while the I well below T in UNITED confirms that this is the JR-11 variety. Most collectors would regard the present near-Gem as brilliant, although the lustrous borders display a hint of gold patina. The fields are flashy and prooflike near the devices. Overall, this near-Gem example is crisply struck and nearly unmarked with plentiful eye appeal. (Note: Experts are divided on which varieties are Small 0, Medium 0, and Large 0 in the date. We believe JR-11 is a Medium 0. Others say it is a Large 0.) NGC ID# 236X, PCGS# 38789 Base PCGS# 4493

**3285 1821 Large Date, JR-5, R.3, MS63 NGC.** JR-5 shows repunching on star 3. This Select example is satiny and lightly abraded with gunmetal-gray, lavender, and olive-green toning. Several stars and the eagle's talons are incomplete, but the coin is otherwise well-struck. Housed in a prior generation holder. NGC ID# 236Y, PCGS# 38795 Base PCGS# 4496

**3286 1830 Medium 10C, JR-6, R.2, MS62 NGC.** The O in OF and 30 in the date are widely spaced. A vertical crack through the curls is also diagnostic of this relatively accessible variety. Frosty and mostly brilliant, each side exhibits daubs of pale patina. The obverse is moderately stronger than the reverse, which is slightly rotated. NGC ID# 2379, PCGS# 38843 Base PCGS# 4516

**3287 1834 Small 4, JR-7, R.2, MS62 NGC.** This piece is satiny and well-struck save for minor weakness on the fletchings and the left edge of the shield. Both sides are toned in golden hues with wisps of pale lavender throughout. Light surface chatter accounts for the grade. PCGS# 38872 Base PCGS# 4525

#### 1835 Capped Bust Dime, MS64 Popular JR-1 Variety

**3288 1835 JR-1, R.1, MS64 PCGS. CAC.** The JR-1 is among the more accessible die pairs for the date, and a number of high-end examples have survived, making it popular with type collectors. Rich toning lends this warmly lustrous near-Gem particularly strong eye appeal. Gold-orange, reddish-tan, and sage shadings are separated into outer rings and an inner core on the obverse, but the reverse has a more dappled appearance. Population: 76 in 64 (4 in 64+), 19 finer. CAC: 20 in 64, 11 finer (7/17). NGC ID# 237E, PCGS# 38879 Base PCGS# 4527

### SEATED DIMES

#### 1839 No Drapery Dime, MS67 Richly Toned

**3289 1839 No Drapery MS67 NGC.** Although NGC and PCGS have each certified a few pieces at an even higher numeric grade level, this is one of the finer 1839 dimes in existence. The strike is crisp with every design element showing the boldness that was intended by the engraver. The surfaces are frosty with radiant luster shimmering through original gray and gold color with attractive iridescent accents. As a representative of a short-lived design type, this piece will appeal to the advanced type collector in addition to the date collector. Census: 11 in 67, 9 finer (7/17). NGC ID# 237X, PCGS# 4571

**3290 1853 Arrows MS66 PCGS.** A razor-sharp strike complements frosty original luster on this Premium Gem Arrows type coin. Champagne toning graces each side, and a loupe fails to reveal any noteworthy imperfections. This date is scarce as fine as MS66 and is rarely encountered better. Population: 42 in 66 (3 in 66+), 20 finer (7/17). NGC ID# 2398, PCGS# 4603

**3291 1856-S F-101, R.5, XF45 PCGS.** The 1856-S is a scarce dime in all grades, coming from a mintage of 70,000 pieces that circulated extensively. This Choice XF coin displays original gunmetal-gray toning with olive and gold accents. Detail is bold and eye appeal is outstanding. Population: 9 in 45, 24 finer (7/17). NGC ID# 238W, PCGS# 538089 Base PCGS# 4613

**3292 1873-CC Arrows, F-101, R.4, Fair 2 NGC.** Only 18,791 pieces were struck of this issue, placing it at the forefront of must-have issues for Seated dime collectors. Heavily worn into the rims, the date is complete and just the bottom of the mintmark is missing. Light surfaces. NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

#### 1874 Arrows Dime, MS65 Frosty Mint Luster

**3293 1874 Arrows, F-102, R.3, MS65 NGC.** Lustrous champagne-gold surfaces display occasional blue and russet accents. A frosted Gem example of the two-year Arrows type, noted by Gerry Fortin to have the farthest left date position of all 1874 varieties. The reverse die is described as perfect, although we note a few light die cracks within the wreath and weakness at I and M of DIME. Slight blending of Liberty's hair definition exists, as always. Census (all varieties): 23 in 65, 31 finer (8/17). PCGS# 538330 Base PCGS# 4668

**3294 1875-CC Mintmark Below Bow, F-107, R.5, MS64 PCGS.** Both dies are heavily cracked and eroded, although the large break beneath the date has not yet fallen away into a rim cud in this die state. The coin shows relatively good sharpness and frosty luster that is mostly brilliant. A few amber toning accents appear near the obverse rims. Population: 19 in 64 (2 in 64+), 15 finer (8/17). PCGS# 538414 Base PCGS# 4674

#### 1891-O Dime, Brilliant MS66 Conditionally Rare Type Coin

**3295 1891-O MS66 PCGS. CAC.** Struck from lightly clashed and cracked dies but with sharp definition on the wreath and Liberty's figure. The surfaces are brilliant and frosty with only a few microscopic ticks in evidence. The 1891-O Seated Liberty dime is rare this fine and extremely rare in better condition. Population: 13 in 66, 3 finer. CAC: 7 in 66, 0 finer (7/17). NGC ID# 23BE, PCGS# 4707

### PROOF SEATED DIME

**3296 1875 PR64 Deep Cameo PCGS. F-101, R.3.** One of only three Deep Cameos graded by PCGS and in high demand as such. This near-Gem proof 1875 Seated dime displays a bold strike and stark field-motif contrast. A blush of light golden toning over each side adds to the eye appeal. Population: 1 in 64 Deep Cameo, 1 finer (7/17). NGC ID# 23CY, PCGS# 94772

## BARBER DIMES

- 3297 1910-D MS66 PCGS.** This issue is considerably rarer in Mint State than the mintage of 3.49 million pieces would suggest. Only six other coins have been so graded with only two finer at PCGS — a situation that has scarcely changed in 15 years (8/17). The richly frosted surfaces display a multicolored patina of iridescent rose, citrine, lime-green, and gray-lilac patina. Sharply defined throughout with no mentionable abrasions on either side. NGC ID# 23FG, PCGS# 4855

### 1911 Barber Dime, MS67 Registry Set Candidate

- 3298 1911 MS67 PCGS.** This spectacular Superb Gem Barber dime exhibits sharply detailed design elements and impeccably preserved surfaces, under pleasing shades of sea-green and lavender-gray toning. Both sides of this stunning specimen radiate vibrant mint luster, underneath the patina. Eye appeal is terrific. Population: 25 in 67 (2 in 67+), 2 finer (7/17). NGC ID# 23FJ, PCGS# 4857

- 3299 1913 MS66+ PCGS. CAC.** A mintage of 19.7 million coins explains the availability of the 1913 Barber dime in high grades. This is one of the top-graded examples at PCGS and CAC. It features dappled crimson and russet toning around brilliant, sharply defined centers. Population: 50 in 66 (11 in 66+), 0 finer. CAC: 16 in 66, 0 finer (7/17). NGC ID# 23FR, PCGS# 4863

## PROOF BARBER DIMES

- 3300 1893 PR67 NGC.** The frosted portrait of Liberty sits on smooth-mirrored, silver fields with dappled violet, blue, and slate-gray toning. While the obverse shows strong cameo contrast, the reverse is evenly toned in the same shades across the devices and reflective fields with slightly less distinct contrast. The strike is razor-sharp on both sides. Census: 21 in 67, 6 finer, joined by 14 in 67 Cameo, and 7 finer (8/17). NGC ID# 23G4, PCGS# 4877
- 3301 1894 PR66 PCGS. CAC.** A high-end, conditionally scarce Premium Gem example of this early Barber dime proof. The strike is needle-sharp, and neither side shows distractions of any sort. Attractive multicolor toning surrounds the margins on each side. Population: 41 in 66 (2 in 66+), 25 finer. CAC: 15 in 66, 20 finer (7/17). NGC ID# 23G6, PCGS# 4878
- 3302 1906 PR66 PCGS. CAC.** This Premium Gem proof Barber dime offers brilliant reflective fields and fully struck design elements, with outstanding eye appeal. No mentionable distractions are present. From a proof mintage of 675 pieces. NGC ID# 23GK, PCGS# 4890
- 3303 1910 PR66 PCGS. CAC.** Sharp, satiny design elements accent the deeply mirrored fields on each side of this high-end proof, while bold toning blankets the surfaces in shades of lavender, cobalt-blue, gold, and olive-green. Only a few faint hairlines are discernable, restricted to the reverse and well-hidden by the patina. NGC ID# 23GR, PCGS# 4894

## MERCURY DIMES

- 3304 1916 MS67 Full Bands PCGS. CAC.** This satiny Superb Gem is frosty and lightly toned with delicate champagne, lavender, and mint-green hues. The strike is sharp on the central devices and only a trifle weak at the outer edge of the border legends. The 1916 Mercury dime is often available in this grade, but finer examples are rare. CAC: 84 in 67, 2 finer (7/17). NGC ID# 23GX, PCGS# 4905

- 3305 1916-D Fine 12 NGC.** Sharp rims and a clear date and mintmark are strong characteristics at this grade level, and this piece also displays original silver-gray patina and smooth surfaces. A single mark below the NIT in UNITED is noted for pedigree purposes and complete accuracy. This is a highly appealing 1916-D Mercury dime for the grade. NGC ID# 23GY, PCGS# 4906

- 3306 1916-D Fine 12 PCGS.** Rare from the moment it was minted, the 1916-D remains the unquestioned key to the series in all grades. Deep olive-gray toning outlines the smoothly worn devices of this stone-gray example. All of the design elements are well-defined and most marks are diminished by wear. Faint iridescence lingers in the fields. NGC ID# 23GY, PCGS# 4906

### 1916-D Dime, VF25 Problem-Free Key Date Offering

- 3307 1916-D VF25 NGC.** The Denver Mint employed four die pairs in the striking of 264,000 Mercury dimes during the series' first year. This piece was struck from Die Pair 2, featuring a high mintmark and a reverse rotated clockwise toward 1 o'clock. This important key date representative saw considerable circulation before a sharp-eyed collector spotted it and set it aside. Hints of golden color accents light gray surfaces. Well-detailed with the expected amount of friction and small abrasions. NGC ID# 23GY, PCGS# 4906

### 1916-S Mercury Dime, MS67 Full Bands Among the Finest Known

- 3308 1916-S MS67 Full Bands PCGS.** The 1916-S Mercury dime is significantly rarer in Superb Gem condition than its Philadelphia counterpart. This top-grade Full Bands example displays vibrant, champagne-tinted luster with flecks of russet toning on each side. The lower diagonal fasces band is weak, but the horizontal bands are split. There are no mentionable abrasions. Population: 26 in 67 Full Bands, 0 finer (7/17). NGC ID# 23GZ, PCGS# 4909
- 3309 1917 MS67 Full Bands PCGS.** Flecks of pale golden patina appear over largely brilliant, exquisitely preserved surfaces. The central bands are fully split, and the portrait is well-defined. Practically devoid of post-Mint imperfections. Population: 31 in 67 (5 in 67+) Full Bands, 0 finer (8/17). NGC ID# 23H2, PCGS# 4911

**3310 1917 MS67 Full Bands PCGS.** The second-year 1917 Mercury dime is fairly plentiful thanks to a mintage of 55.2 million coins. Even Premium Gems can be located without much difficulty. Comparable Superb Gems are much rarer. A thin overlay of light gold color graces immaculate, sharply detailed surfaces. Population: 31 in 67 (5 in 67+) Full Bands, 0 finer (7/17). NGC ID# 23H2, PCGS# 4911

**3311 1918-S MS64 Full Bands PCGS.** Faint lavender accents appear throughout the mainly champagne-gold surfaces of this near-Gem 1918-S dime. The strike is sharp despite moderate die erosion that creates metal flowlines in the reverse fields. No singular abrasions are observed. Population: 65 in 64 (1 in 64+) Full Bands, 43 finer (7/17). NGC ID# 23H7, PCGS# 4921

#### 1919-D Dime, Toned MS66 Conditionally Rare

**3312 1919-D MS66 PCGS.** PCGS lists only a dozen Premium Gem 1919-D Mercury dimes, include seven non-Full Bands examples and five with Full Bands. None are finer in either category at that service (7/17). This piece is weakly struck at the central reverse but sharp around the borders. Russet-gold toning is on both sides but is deeper across the reverse. The satiny surfaces are devoid of abrasions. NGC ID# 23H9, PCGS# 4924

**3313 1919-D MS63 Full Bands PCGS.** A sharp strike and green-gold toning are the chief attributes of this Select Full Bands example. No major abrasions are seen but minor handling marks limit the grade. A die crack bisects the obverse from 12 to 6 o'clock. The 1919-D dime is scarce in Full Bands grades. NGC ID# 23H9, PCGS# 4925

#### 1924-S Mercury Dime, MS64 Full Bands Lustrous and Well-Preserved

**3314 1924-S MS64 Full Bands PCGS.** The 1924-S Mercury dime is a scarce issue in MS64 condition, with the Full Bands designation. This attractive Choice specimen exhibits sharply detailed design elements throughout, including fully split and rounded bands on the fasces. The well-preserved surfaces radiate vibrant mint luster. PCGS has graded 22 numerically finer examples (7/17). NGC ID# 23HL, PCGS# 4947

**3315 1926-D MS65+ Full Bands PCGS. CAC.** Pale blue is the primary overtone throughout this largely brilliant, well-defined, and vibrantly lustrous coin. An area of soft golden-tan color is present within the right reverse. There are 38 higher Full Bands submissions at PCGS. CAC: 19 in 65, 19 finer (7/17). Ex: *New York Signature* (Heritage, 12/2011), lot 3429. NGC ID# 23HS, PCGS# 4957

**3316 1928-D MS64 Full Bands PCGS.** This near-Gem is brilliant and sharp with satiny mint luster. No abrasions are observed, although a few faint lines appear at certain angles beneath a loupe, limiting the grade. The 1928-D Mercury dime is challenging in finer Full Bands grade levels. NGC ID# 23HY, PCGS# 4969

**3317 1935-D MS67 Full Bands PCGS.** This satiny, razor-sharp Superb Gem displays mostly brilliant luster but with daubs of olive toning on the left-hand side of the obverse. The 1935-D Mercury dime is scarce this fine and unknown numerically finer. Population: 52 in 67 (7 in 67+) Full Bands, 0 finer (8/17). NGC ID# 23JD, PCGS# 4995

**3318 1941 MS68 Full Bands NGC.** A magnificent MS68 specimen, with sharply detailed design elements and Full Bands definition on the fasces. The impeccably preserved surfaces are visited by shades of emerald-green toning and vibrant mint luster radiates from both sides. Census: 5 in 68 Full Bands, 0 finer (7/17). NGC ID# 23JX, PCGS# 5029

#### 1942/1 Dime, Well-Struck MS62 Popular Guide Book Overdate

**3319 1942/1 FS-101 MS62 PCGS.** The overdate feature is clear on this variety, and the current coin is well-struck. The fasces bands have nearly full separation. Satiny mint luster shows daubs of golden toning. Scattered abrasions contribute to the grade, but none are individually bothersome. Population: 33 in 62, 58 finer (7/17). NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

**3320 1943 MS67+ Full Bands PCGS. CAC.** This boldly detailed Superb Gem has brilliant and frosty silver luster. Splashes of gold and iridescent toning on both sides enhance the eye appeal of this delightful Mercury dime. PCGS has only certified seven finer examples (8/17). NGC ID# 23K9, PCGS# 5045

**3321 1943-D MS68 Full Bands PCGS. CAC.** Rainbow iridescence around the periphery mellows to brilliant centers on the obverse. The other side remains wholly untuned with fully split bands. Liberty's cheek and the fields on each side are virtually pristine and entirely deserving of the grade assessment. Population: 41 in 68 (2 in 68+) Full Bands, 0 finer. CAC: 16 in 68, 0 finer (7/17). NGC ID# 23K9, PCGS# 5047

**3322 1945-D MS67+ Full Bands PCGS. CAC.** An amazing example from the final year of issue for the Mercury dime series, this Denver Mint Superb Gem is fully brilliant with frosty, untuned silver luster. NGC ID# 23KE, PCGS# 5059

### PROOF MERCURY DIMES

**3323 1937 PR68 PCGS.** Glimpses of olive-gold toning appear throughout the glimmering fields of this high-end proof Mercury dime. The strike is full, and no surface imperfections are discernible. This is among the finest 1937 proofs certified. Population: 34 in 68 (1 in 68+), 0 finer (8/17). NGC ID# 27DH, PCGS# 5072

**3324 1941 PR68 PCGS.** An impressive Superb Gem, this popular proof Mercury dime is ideal for specialized collections, proof sets, or proof type sets. Both sides have considerable mint brilliance at the centers with vibrant gold, rose, and blue toning at the borders. NGC ID# 27DM, PCGS# 5076

## TWENTY CENT PIECES

- 3325 1875-S MS64 NGC.** The most plentiful twenty cent piece, with a mintage of more than 1 million coins, is the 1875-S, an ideal representative for a type collection. This Choice Mint State example has satin luster with delicate peripheral gold toning. NGC ID# 23R7, PCGS# 5298
- 3326 1875-S MS64 NGC.** A splendid Choice Mint State example with frosty silver luster and bold design definition, this 1875-S has light gold toning. A highly appealing example for a 19th century type collection. NGC ID# 23R7, PCGS# 5298

## PROOF TWENTY CENT PIECE

### 1878 Twenty Cent, PR63 Final Year of Issue

- 3327 1878 PR63 PCGS. BF-1, R.3.** The 1878 was the final year any twenty cent pieces were produced. It had been two years since the last business strikes were made, and now it was time to end the proofs also. Only 760 pieces were struck, and after the unsold coins were melted the net mintage was 600 proofs. This is a lightly toned example that displays remarkably deep mirrors in the fields. Lightly hairlined. NGC ID# 27H5, PCGS# 5306

## EARLY QUARTERS

- 3328 1805 B-2, R.2, VF35 PCGS.** Tompkins Die State 1/2, with a clashed reverse. The 5 touches the bust, and star 8 is far from the Y. Gunmetal-blue and olive patina around the margins cedes to varying shades of light and dark gray at the centers of this Choice VF Draped Bust type coin. Wispy marks and high-point blending do not detract. NGC ID# 23RC, PCGS# 38924 Base PCGS# 5313
- 3329 1806 B-5, High R.4, VF20 NGC.** Tompkins Die State 4/5. This late die state example of the scarce B-5 variety has numerous die cracks on each side. A uniform overlay of antique patina covers well-worn surfaces. The obverse is slightly better-defined than the reverse. NGC ID# 23RD, PCGS# 38931 Base PCGS# 5314

## BUST QUARTERS

- 3330 1818/5 B-1, R.2, AU50 NGC.** Tompkins Die State 2/4. Tompkins Die State 2/4. A die crack passes through the beak. Clash marks are visible on both sides. A cream-gray representative with generally unabraded surfaces, though faint marks are noted above the bust tip and the right (facing) wing. The strike is good except on the eagle's neck. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323
- 3331 1818/5 B-3, R.3, AU50 PCGS.** Tompkins Die State 2/2. Rich gunmetal-gray and sea-green toning blankets the fields, though the high points are cream-white. A problem-free representative. B-3 shares the same obverse die as the 1818/5 B-1, but B-3 was struck later and shows little evidence of a 5 underdigit. NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

- 3332 1822 B-1, R.2, VF35 PCGS.** This is the normal 1822 reverse that distinguishes it from the recent discovery that has the reverse of 1823. Rich blue-steel patina is intermingled with sea-green and champagne toning on this attractive example that shows only scattered marks on each side. NGC ID# 23RN, PCGS# 38969 Base PCGS# 5332
- 3333 1825/4/(2) B-2, R.2, VF35 PCGS. CAC.** The detail is sharp enough for an XF designation on the reverse, although the obverse shows a bit too much wear on Liberty's brow to qualify for the higher grade. The CAC green label confirms the strong VF detail and excellent eye appeal. Blended olive- and lavender-gray hues blanket each side and the surfaces are smooth. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336
- 3334 1828 B-1, R.1, AU53 PCGS.** Tompkins Die State 1/1. The 2 in the denomination has a curled base, and E in STATES is positioned over the B. This is the most often seen die marriage for 1828 (102,000 coins struck in all). Deep antique patina on the obverse lightens to gold and pale blue on the reverse. A sharply detailed Capped Bust quarter despite brief circulation. Population (all 1828 varieties combined): 15 in 53, 80 finer (7/17). NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342
- 3335 1831 Large Letters, B-5, FS-301, R.3, MS62 PCGS.** B-5 is popular for the repunching on the date, which shows the 1s entered over earlier numerals of a smaller logotype. The central devices on this piece are sharp, but the stars are incomplete at the borders. Some semiprooflike reflectivity is seen in the fields. Blue-gray and russet border toning surrounds light golden interiors. Housed in a green label holder. NGC ID# 23RW, PCGS# 38984 Base PCGS# 5349
- 3336 1831 Large Letters, B-6, R.3, AU58 PCGS.** More than 75% of the obverse sits under a thick patina of cloud-gray toning, while the reverse displays lustrous and frosted silver-gray shades. A few light abrasions exist beneath the heavy obverse toning. While not rare, the B-6 variety is notably scarce any finer than XF condition. NGC ID# 23RW, PCGS# 38985 Base PCGS# 5349

## SEATED QUARTERS

- 3337 1842-O AU55 PCGS. Briggs 2-B.** Just a trace of wear shows on the well-detailed design elements of this Choice AU specimen, which is sharply struck for a New Orleans issue of this era. The lavender-gray surfaces are lightly abraded and retain significant amounts of original mint luster. Population: 9 in 55, 31 finer (7/17). NGC ID# 23SP, PCGS# 5402
- 3338 1842-O Small Date VG8 PCGS. Briggs 1-A, late die state.** This sought-after early series issue was struck from a late state of the dies, with a severe depression on the reverse in the left side of the shield that effects the detail on the corresponding area of the obverse. This well-worn specimen retains some interior detail on the major design elements. NGC ID# 23SN, PCGS# 5403
- 3339 1851 MS62 PCGS.** Deep gold toning appears on the rich gray surfaces of this sharply defined Mint State 1851 quarter. Few high grade examples have survived from the 160,000 coin mintage. Population: 5 in 62, 16 finer (8/17). NGC ID# 23T6, PCGS# 5417
- 3340 1853 Arrows and Rays MS62 PCGS.** A brilliant and untuned example, this one-year type issue has inconsequential, grade-consistent marks, and was struck from a crisp obverse die and well-used reverse die that shows several die cracks. NGC ID# 23U4, PCGS# 5426
- 3341 1853 Arrows and Rays MS62 PCGS. CAC.** Brilliant silver surfaces radiate abundant luster and showcase glints of tan-gold. Liberty's head, the stars, and the lower portion of the eagle display crisp detail. Abrasions are minor for the grade. The 1853 Arrows and Rays quarter is a popular type that can usually be found in lower Uncirculated grades. NGC ID# 23U4, PCGS# 5426

**3342 1854-O Huge O, Briggs 1-A, FS-501, VG8 NGC.** The hand-engraved O mintmark is the hallmark of this intriguing *Guide Book* variety, although other die flaws affect the QUAR. in the denomination and additional peripheral lettering. This well-circulated example shows the BER in LIBERTY clearly, confirming the grade, but is otherwise mostly smooth across the devices. The rims are complete. Light gray surfaces show deeper olive and russet coloration in the fields. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**3343 1854-O Huge O, Briggs 1-A, FS-501, Fine 12 PCGS Secure.** This attractive circulated example shows smooth medium-gray surfaces with deeper accents in the protected regions of the fields. The rims are complete. An appealing collector-grade example of this famous No Motto variety. Population: 13 in 12, 55 finer (8/17). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**3344 1855-O Arrows XF45 PCGS.** The 1855-O Seated Liberty quarter is a scarce issue, rare in XF or AU condition and almost uncollectible in Mint State. This Choice XF coin is arguably underappreciated. Light gray surfaces show warm golden accents near the borders, and the design elements are boldly defined. Prooflike mirroring remains in the protected peripheral fields amid the legends and stars. Population: 4 in 45, 11 finer (8/17). NGC ID# 49XK, PCGS# 5436

**3345 1859 MS64 PCGS.** The 1859 is one of the more frequently encountered No Motto quarters and as such is often selected for a type representative. This is an attractive near-Gem that shows bright semiprooflike fields with a faint overlay of gray patina. Fully struck throughout (not always the case with this date). Population: 39 in 64 (1 in 64+), 14 finer (7/17).

**From The Morgan Hill Collection.** NGC ID# 23TL, PCGS# 5448

**3346 1865-S XF45 PCGS. CAC. Briggs 1-A.** From a mintage of 41,000 pieces, the 1865-S Seated Liberty quarter is an elusive issue in XF45 condition. This lightly worn, lightly abraded Choice XF specimen shows a full LIBERTY on the shield and pleasing shades of lavender-gray toning blanket the surfaces. Population: 5 in 45, 18 finer. CAC: 2 in 45, 3 finer (7/17). NGC ID# 23U3, PCGS# 5462

**3347 1866-S — Cleaned — PCGS Genuine. AU Details. Briggs 1-A.** The 1866-S Seated Liberty quarter boasts a low mintage of 28,000 pieces, making it an elusive issue in all grades. This well-detailed specimen is lightly worn, with lightly abraded tan-gray surfaces and muted mint luster, due to the noted cleaning.

**3348 1872-CC — Plugged — NGC Details. VF.** A challenging branch mint issue from a mintage of 22,850 pieces, this coin retains much interior detail on the well-detailed design elements and the lavender-gray surfaces are lightly abraded. Unfortunately, this piece has been plugged in the area of the date.

**3349 1874-S Arrows MS65 PCGS.** Frosty, original mint luster and sharp design elements give this Gem 1874-S Arrows quarter dollar excellent visual appeal. Dusky light golden toning over each side masks any trivial marks that limit the grade. Housed in a first generation "rattler" holder. Population: 50 in 65, 41 finer (7/17). NGC ID# 23VY, PCGS# 5495

**3350 1875-CC XF40 PCGS. CAC. Briggs 2-B.** This is a well-detailed example of the scarce 1875-CC issue, showing original pewter-gray patina with olive and gold accents. Uncirculated examples of this issue are rare, heightening demand for high-end circulated pieces. A relatively small mintage of 140,000 coins, which almost entirely entered circulation in the Western territories during the 19th century, explains the scarcity of this Carson City quarter dollar. Population: 18 in 40, 56 finer. CAC: 1 in 40, 15 finer (7/17). NGC ID# 23UY, PCGS# 5499

**3351 1876-S MS65 PCGS.** Type Two Reverse. Pearl-gray and straw-gold embrace this sharply struck, smooth, and lustrous Gem. A few freckles of forest-green patina congregate on the left obverse field. Population: 26 in 65 (2 in 65+), 8 finer (7/17). NGC ID# 23V4, PCGS# 5503

## PROOF SEATED QUARTERS

**3352 1873 Arrows PR64 PCGS. Briggs 5-D.** Although not designated a Cameo, this proof Arrows quarter nonetheless contrasts frosty motifs with glassy fields. A brilliant and sharply struck specimen held back in grade by inoffensive obverse field hairlines. Population: 35 in 64, 17 finer (7/17). NGC ID# 23XR, PCGS# 5574

**3353 1876 PR66 PCGS.** Stunning patina intermingles in shades of mint, teal, rose, aqua, steel-blue, and lilac on this Centennial-year Seated quarter proof, which shows virtually pristine preservation under the moderate layer of toning. The large mintage figure of 1,150 proofs included, Walter Breen theorizes in his *Proof Encyclopedia*, some dated 1875. The Centennial date makes this issue popular, of course, and this example's standout surfaces certainly make it a tempting potential acquisition. NGC ID# 3TWJ, PCGS# 5577

**3354 1878 PR64 Cameo PCGS.** Excellent field-to-device contrast is evident on this lovely Choice Cameo proof 1878 quarter dollar. The centers are brilliant, gradually changing to gold, rose, lilac, and blue. NGC ID# 23XA, PCGS# 85579

### 1880 Seated Quarter Colorfully Toned PR67

**3355 1880 PR67 NGC.** The large proof mintage of 1,355 pieces was, in part, a result of speculation in the 1880 proof-only Trade dollars, which were produced in record number. The 1880 quarter was part of the complete silver proof set, a coattail effect that had little to do with the low circulation strike mintages of quarters and half dollars for the year. This reflective Superb Gem is toned in shades of violet, cerulean-blue, and greenish-gold. The strike is pinpoint sharp and the eye appeal is dazzling. Census: 18 in 67 (4 in 67★), 4 finer, plus 18 in 67 Cameo or Deep Cameo and 6 finer in those formats. NGC ID# 23XC, PCGS# 5581

**3356 1883 PR66 NGC. Briggs 1-A, Flynn-MPD-001.** The 1883 Seated quarter is difficult to locate in any format, given that only 14,400 circulation strikes and 1,039 proofs were manufactured. This Premium Gem specimen offers delicate multicolor toning and pronounced contrast on the reverse. Impeccably preserved and eye-appealing. NGC ID# 23XF, PCGS# 5584

### 1883 Seated Liberty Quarter, PR67 Vivid Toning, Reflective Fields

**3357 1883 PR67 NGC.** This spectacular Superb Gem exhibits impeccably preserved surfaces and deeply reflective fields, under vivid shades of cerulean-blue, lime-green, and golden-brown toning. The design elements are well-detailed throughout. A single reverse die was used to strike both the proof and business strike quarters of 1883, but the proofs are easily differentiated by the tops of an errant 83 seen in the dentils below the date. Census: 15 in 67 (1 in 67+, 1 in 67★), 2 finer (7/17). NGC ID# 23XF, PCGS# 5584

- 3358 1891 PR64 Cameo PCGS. Briggs 1-A.** Untoned except for a glimmer of gold at the rims on the obverse and a thin presence of golden-gray patina on the reverse, this boldly contrasted final-year proof quarter is attractive with Choice mirrored surfaces. The strike is sharp despite some evidence of die rust on Liberty's draped gown. NGC ID# 597E, PCGS# 85592

## BARBER QUARTERS

- 3359 1892 MS66 NGC.** A stunning Premium Gem, this first-year Barber quarter dollar is ideal for a date specialist or type collector. The surfaces are frosty and highly lustrous with splashes of gold and blue toning. NGC ID# 23XT, PCGS# 5601
- 3360 1896-S — Damage — PCGS Genuine. XF Details.** Prominent surface scrapes appear at the upper right obverse of this otherwise pleasing and highly important 1896-S Barber quarter. Wisps of champagne toning appear along the borders, with faint hairlines on each side. Traces of luster remain visible.

1896-S Barber Quarter, Unc Details  
Low-Mintage Key

- 3361 1896-S — Improperly Cleaned — NGC Details. Unc.** From a low mintage of 188,039 pieces, the 1896-S Barber quarter is one of the three key dates of the series. This pleasing specimen features sharply detailed design elements and lightly abraded surfaces that show unnatural lavender toning and subdued mint luster, due to a light cleaning long ago.
- 3362 1901-S AG3 PCGS.** A fully original example of this rarest Barber quarter, this example has light gray surfaces with considerable deeper gray toning. The obverse has fully defined rims and the reverse border is merged into the tops of most letters, although the legend and denomination are fully readable. Minor scratches and handling marks are expected at this grade level. NGC ID# 23YR, PCGS# 5630
- 3363 1901-S AG3 NGC.** The obverse grades a solid Good 4 all by itself, the reverse is weak around portions of the rims, determining the AG3 designation. Blue and gold toning is seen in the fields while the majority of each side displays golden-tinted light gray patina. A problem-free example of this Barber quarter rarity. NGC ID# 23YR, PCGS# 5630
- 3364 1903-S MS65 PCGS.** A seldom seen Gem Mint State example of this heavily circulated San Francisco issue. The eagle's right (facing) talons and a few right-hand obverse stars are a trifle soft, but the strike is otherwise sharp. Satiny luster yields shades of lavender-gold, gray, and steel-blue toning. Population: 16 in 65, 13 finer (7/17). NGC ID# 23YX, PCGS# 5636
- 3365 1906-O MS66 PCGS. CAC.** Like many O-mint quarters in this turn-of-the-century series, the 1906-O is most often encountered in either the Good-VF or MS 60-64 grade ranges. Extensive circulation and poor preservation explain this seeming dichotomy. In addition to uncommonly bold strike definition, this lovely Gem displays a fresh, original toning scheme. The centers are nearly brilliant, but lilac, russet, and cobalt-blue patina thickens toward the borders. The luster is frosty in quality and the surface preservation is stellar for the issue. NGC ID# 23Z7, PCGS# 5644

- 3366 1909-O AU50 PCGS.** Just a touch of wear is evident on the well-detailed design elements of this impressive AU specimen, and the lightly abraded surfaces retain significant amounts of original mint luster. The overall presentation is quite attractive. NGC ID# 23ZJ, PCGS# 5655

- 3367 1913-S Good 4 PCGS.** A splendid, original 1913-S Barber quarter, one of the big three in the series, with the borders slightly merged into the peripheral design elements. A few scattered marks are evident as expected. NGC ID# 23ZW, PCGS# 5666

- 3368 1914-S MS64 PCGS.** This satiny near-Gem displays champagne luster with mottled russet overtones. No distracting abrasions are present. Under a loupe, minor strike weakness is seen on the eagle's right (facing) wing junction and talons. The 1914-S quarter dollar is scarce in this condition and exceedingly so in finer grades. Housed in an old green label holder. Population: 22 in 64, 22 finer (7/17). NGC ID# 23ZZ, PCGS# 5669

- 3369 1915 MS66 PCGS. CAC.** This frosty Premium Gem is boldly struck in most regions, with Liberty's face and hair curls particularly well brought up. The upper-right corner of the shield is a trifle soft, as usual. The surfaces are devoid of distractions, and both sides exhibit a blush of pale champagne toning overall. Superior quality and eye appeal. Population: 25 in 66, 2 finer. CAC: 7 in 66, 2 finer (7/17).

*Purchased by Eugene Gardner from David Hall (11/2002). NGC ID# 2422, PCGS# 5670*

## PROOF BARBER QUARTERS

- 3370 1894 PR66 PCGS.** Iridescent rainbow colors surround the frosted portrait of Liberty on the obverse, while the reverse displays rich tones of sea-green, pale-violet, and grayish-blue. The strike is sharp on this Premium Gem, one of 972 proofs struck for the year. Population: 20 in 66 (1 in 66+), 15 finer, plus 24 Cameo and Deep Cameo proofs in 66 or finer (8/17). NGC ID# 2429, PCGS# 5680

1896 Barber Quarter, PR67 ★ Cameo  
Spectacular Multicolor Toning

- 3371 1896 PR67 ★ Cameo NGC.** Spectacular shades of greenish-gold and cobalt-blue toning visit the impeccably preserved surfaces of this delightful Superb Gem proof. The sharply detailed, frosty design elements contrast boldly with the deeply reflective fields to create a dramatic cameo effect. Overall eye appeal is terrific. From a proof mintage of 762 pieces. NGC ID# 59JB, PCGS# 85682
- 3372 1901 PR65 Cameo PCGS.** A vivid ring of cobalt-blue toning surrounds the brilliant, well-preserved centers of this attractive Gem. The design elements are sharply detailed in most areas, with just a touch of softness on the shield point. Bold cameo contrast is evident between the deeply mirrored fields and the frosty devices. NGC ID# 242G, PCGS# 85687
- 3373 1904 PR66 PCGS.** A boldly struck, reflective Premium Gem proof with original multicolor toning in shades of mint-green, aquamarine, orange-gold, and lavender. Modest cameo contrast is present on the obverse. Finer 1904 proof quarters are rare. Population: 33 in 66 (1 in 66+), 14 finer (7/17). NGC ID# 242K, PCGS# 5690

- 3374 1905 PR65 PCGS.** This reflective Gem proof displays little contrast on the obverse, which exhibits mottled pink, sage, olive, and charcoal hues with much underlying brilliance. The reverse shows more contrast and less color, mostly pinkish-gold. This is a lovely representative for the grade. NGC ID# 242L, PCGS# 5691

**1908 Quarter, PR67  
Original Patina, CAC Approval**

- 3375 1908 PR67 PCGS. CAC.** Both sides display the array of blue, gold, and violet hues typically associated with an original, unadulterated proof from this era. The technical quality is on par with the extraordinary eye appeal, and the resulting CAC approval sticker is entirely deserved. From a low mintage of 545 specimens. Housed in an old green label holder. Population: 18 in 67 (3 in 67+), 7 finer (7/17). NGC ID# 242P, PCGS# 5694

- 3376 1911 PR65 Cameo PCGS. CAC.** Strong Cameo contrast is unexpected for a 1911 proof quarter, but this Gem example has it. Smooth, glassy-mirrored surfaces turn jet-black at certain angles, while the frosted devices appear frost-white and elevated against the fields. Just 543 pieces were struck as proofs, and relatively few of those have earned Cameo designation — fewer still with CAC endorsement. NGC ID# 242T, PCGS# 85697

- 3377 1912 PR66 PCGS.** Uniformly toned in deep olive-green and drab-gold hues that prevent cameo contrast. The eagle's right (facing) talons show the only notable strike weakness. The 1912 proof Barber quarter is seldom offered this fine. Population: 15 in 66, 14 finer (7/17). NGC ID# 242U, PCGS# 5698

- 3378 1913 PR65 PCGS.** From a small proof mintage of 613 pieces, this sharply detailed Gem displays reflective surfaces under rich shades of cobalt-blue, champagne-gold, and lavender-gray patina. No mentionable distractions are evident. NGC ID# 242V, PCGS# 5699

- 3379 1914 PR65 PCGS.** This fully struck Gem 1914 proof quarter displays perfectly squared rims and intricate interior detail. The fields are deeply reflective. The obverse displays modest cameo contrast. Both sides are tinted champagne-gold and have a dusting of burgundy and olive toning faintly evident over each side. Population: 18 in 65, 41 finer; 7 in 65 Cameo (1 in 65+), 14 finer (7/17). NGC ID# 242W, PCGS# 5700

## STANDING LIBERTY QUARTERS

- 3380 1917-S Type One MS64 Full Head PCGS.** Sharply struck and satiny with mottled russet and lavender-gold toning. Any trivial surface marks are well-hidden beneath the original patina. The scarcest of the 1917 Type One issues in Mint State. Housed in an old green label holder. NGC ID# 2433, PCGS# 5711

- 3381 1917 Type Two MS66 Full Head PCGS.** Frosty brilliance gives way to pale traces of almond-gold patina at the upper obverse border. Detail is incredibly bold on the head, rivets, chainmail, and date. Each side offers outstanding preservation and eye appeal to match. Only 15 finer submissions at PCGS (8/17). NGC ID# 2434, PCGS# 5715

## 1917-D Type Two Quarter, MS66 Full Head Dappled Toning With Underlying Brilliance

- 3382 1917-D Type Two MS66 Full Head PCGS.** Dappled toning fails to mask the satiny brilliance of this Premium Gem quarter with Full Head detail — a quality found on approximately 5% of the 6.2 million coin-mintage, according to J.H. Cline. Liberty's facial features and olive leaves are fully rendered, and the date is crisp. Slight blending over the first few rivets is expected. Immaculately preserved. Population: 27 in 66 (3 in 66+) Full Head, 3 finer (7/17). NGC ID# 2435, PCGS# 5717

- 3383 1917-S Type Two MS64 Full Head PCGS.** Satiny original mint luster complements delicate iridescent toning on this near-Gem Full Head example. The date numerals are head details are sharp, but the shield rivets and the leading edge of the eagle's left (facing) wing are a trifle soft. The overall definition and quality is excellent for the issue. NGC ID# 2436, PCGS# 5719

- 3384 1917-S Type Two MS65 Full Head PCGS Secure.** Glistening luster underscores vivid rose-gold and amber toning on this Gem Full Head Type Two quarter. The 1917-S is the first issue in the series to be seen less often in Full Head Mint State grades than in non-Full Head, making the present coin an important acquisition for the serious student of the series. Bold definition presents itself throughout, and the surfaces are free of any meaningful distractions. Population: 60 in 65 (3 in 65+) Full Head, 34 finer (7/17). NGC ID# 2436, PCGS# 5719

- 3385 1918-D MS64 Full Head PCGS. CAC.** A frosty Choice Mint State example, this sharply struck 1918-D quarter has frosty silver luster with delicate champagne toning on the obverse and full brilliance on the reverse. NGC ID# 3TWU, PCGS# 5723

- 3386 1919 MS66 Full Head PCGS.** This is a fully struck Premium Gem with sharp head details, shield rivets, date numerals, stars, and eagle feathers. Satiny mint luster shows a light golden hue over each side with no distracting abrasions. PCGS has seen only 31 numerically finer Full Head representatives (7/17). NGC ID# 243B, PCGS# 5729

- 3387 1919-D AU58 PCGS.** Denver officials limited Standing Liberty quarter production to 1.9 million coins in 1919, creating a series semikey in the process. Partial satin luster radiates over brilliant surfaces with specks of golden toning around the rims. Lightly impressed but surprisingly clean. NGC ID# 243C, PCGS# 5730

- 3388 1921 AU58 PCGS.** Peripheral gold and crimson elements yield to brilliant centers on this semikey Standing Liberty quarter (only 1.9 million coins produced). Trace friction on the head, shield, and breast feathers barely limits the grade. Well above-average for this elusive issue. NGC ID# 243H, PCGS# 5740

**1923-S Standing Liberty Quarter, MS63**  
Lustrous Better Date

- 3389 1923-S MS63 NGC.** A smallish mintage of 1.3 million Standing Liberty quarters was accomplished at the San Francisco Mint in 1923, and relatively few examples were saved by contemporary collectors. As a result, the 1923-S is a sought-after semikey issue today. This attractive Select specimen offers well-detailed design elements, with a touch of the usual softness on Liberty's head and the shield rivets. The lightly marked surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC ID# 243K, PCGS# 5744

**1923-S Standing Liberty Quarter, AU58**  
Unusual Circulated Full Head Specimen

- 3390 1923-S AU58 Full Head PCGS. CAC.** Just a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen, with Full Head definition and a trace of softness on the shield rivets. The lightly abraded surfaces exhibit highlights of lavender-gray and greenish-gold toning and retain much of their original mint luster. Eye appeal is quite strong. NGC ID# 243K, PCGS# 5745
- 3391 1924 MS66 Full Head PCGS.** Liberty's head and the date are sharp, and the shield rivets show above-average definition. Satiny mint luster displays light golden toning and shows few discernible abrasions. Finer Full Head 1924 quarter dollars are rarely encountered. Population: 71 in 66 (8 in 66+) Full Head, 14 finer (7/17). NGC ID# 243L, PCGS# 5747
- 3392 1924-S MS62 Full Head PCGS.** Both dies are clashed, lapped, and cracked, with the die cracks being more advanced than collectors usually see on Standing Liberty quarters. Hints of light golden rim toning frame brilliant interiors. The luster is satiny with minor slide marks that limit the grade. The date numerals are sharp. NGC ID# 243N, PCGS# 5751

**1924-S Standing Liberty Quarter, MS65**  
Richly Toned Full Head Example

- 3393 1924-S MS65 Full Head PCGS Secure.** A richly toned Full Head Gem, this 1924-S quarter displays several intermingled shades. The predominant colors are golden-orange and golden-brown, with splashes of emerald-green also appearing. The shield displays minor incompleteness of strike, but the head, date, and stars are sharp. Population: 35 in 65 (1 in 65+) Full Head, 11 finer (7/17). NGC ID# 243N, PCGS# 5751

- 3394 1928-S MS66 Full Head NGC.** A stunning Premium Gem, this fully brilliant Standing Liberty quarter exhibits a bold strike and untuned silver surfaces with exceptional eye appeal. NGC ID# 243Z, PCGS# 5771

- 3395 1930-S MS66 Full Head PCGS.** Merely 1% of the 1.5 million-coin mintage is believed to show Full Head definition. Most examples, this piece excluded, are softly struck. Frosty luster glistens from brilliant surfaces that display wisps of tan-gold patina. Only 31 finer Full Head submissions at PCGS (7/17). NGC ID# 2446, PCGS# 5781

## WASHINGTON QUARTERS

- 3396 1932-D MS64 PCGS.** This is a well-struck example with satiny luster and warm golden toning. A few tiny ticks on the obverse prevent a Gem grade but do little to interrupt the eye appeal. The 1932-D is a widely pursued key date in this near-Gem grade. NGC ID# 2448, PCGS# 5791

- 3397 1932-S MS65 PCGS.** Frosty luster and golden-gray tones accompany bold design definition on each side of this Gem example, while small orange-gold, lilac, and amber accents are seen periodically around the obverse periphery. This issue boasts the lowest business-strike mintage of the series (408,000 coins), and has long been considered a key date. PCGS records only four finer submissions (7/17). NGC ID# 2449, PCGS# 5792

- 3398 1934 Medium Motto, FS-402, MS67+ PCGS. CAC.** The Plus designation and green approval sticker confirm the exceptional preservation of this Registry-quality Superb Gem. Blushes of powder-blue, pastel-yellow, and rose complement brilliant, frosty surfaces. PCGS lists two finer submissions (8/17). PCGS# 146002 Base PCGS# 5793

- 3399 1943-S Doubled Die Obverse, FS-101, MS65 PCGS.** IN GOD WE TRUST is strongly die doubled north on this popular *Cherrypicker's* variety. The date and LIBERTY show notching and overly thick lettering as well. A glass reveals Washington's queue is also nicely doubled. Brilliant with a dusting of russet-gray and ice-blue toning, the fields are reflective and the devices are sharply struck. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

- 3400 1948-D MS67+ PCGS.** Intense shades of burnt-orange, lavender-gray, and amber toning visit the impeccably preserved surfaces of this Plus-graded Superb Gem, with more color on the obverse. The design elements are well-detailed and vibrant mint luster shines through the toning. NGC ID# 245M, PCGS# 5837

**1950-D/S Quarter, MS65+  
Registry Set Candidate**

- 3401 1950-D/S MS65+ PCGS.** This *Guide Book* variety shows an errant S mintmark at the top and upper-left edge of the primary D. The D is strike-doubled on this coin, along with portions of the peripheral legends. Frosty mint luster shows traces of champagne toning and a few flecks of russet. The strike is sharp. Examples are rarely seen this fine. Population: 19 in 65 (1 in 65+), 18 finer (7/17). NGC ID# 245T, PCGS# 5843

- 3402 1950-S/D FS-601 MS65+ PCGS.** This is a bold overmintmark feature that is almost visible to the sharp naked eye. Beneath a loupe, the underlying D mintmark is obvious. Vibrant cartwheel luster rolls around frosty surfaces on this high-end Gem, illuminating delicate yellow-gold toning. A few minor grazes on the portrait prevent an even finer grade. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

- 3403 1953-D MS67 PCGS. CAC.** This CAC-approved Superb Gem is among the finest 1953-D quarters known. The strike is sharp, and the satiny surfaces are devoid of any noticeable imperfections. Iridescence accentuates a blush of olive-gold toning on each side. Population: 35 in 67 (3 in 67+), 0 finer. CAC: 11 in 67, 0 finer (8/17). NGC ID# 2465, PCGS# 5853

- 3404 1965 MS67+ PCGS.** Attractive shades of golden-tan, cerulean-blue, and violet toning visit the impeccably preserved surfaces of this Plus-graded Superb Gem, with vibrant mint luster underneath. The design elements are sharply detailed and eye appeal is terrific. Population: 29 in 67 (3 in 67+), 0 finer (8/17). NGC ID# 246W, PCGS# 5878

**1966 Quarter Dollar, MS68  
Tied for Finest Certified**

- 3405 1966 MS68 NGC.** NGC lists two MS68 examples of the 1966 Washington quarter as the finest, while none are better than MS67+ at PCGS (8/17). This top-grade Registry Set rarity displays pristine, satiny mint luster and warm champagne toning. Under a loupe, some minor strike weakness is discernible on Washington's temple and below the eagle. NGC ID# 26K7, PCGS# 5879

**1968 Quarter, MS68  
Semiprooflike Fields  
Tied for the Finest Certified**

- 3406 1968 MS68 NGC.** The 1968 quarter dollar is available in all grades through MS67, but MS68 coins are extremely rare and are sought-after by Registry Set assemblers. This piece displays a bold strike and semiprooflike fields. Warm golden toning appears on each side over perfect surfaces. NGC lists five coins in this grade, PCGS two; none are finer (8/17). NGC ID# 246Z, PCGS# 5881

**EARLY HALF DOLLARS**

**1794 O-101 Half Dollar, Good Details**

- 3407 1794 O-101, T-7, High R.3 — Tooled — NCS. Good Details.** Tompkins Die State 1/2. The only obvious tooling on the coin is actually graffiti, where the numbers 17 were inscribed to replace missing digits in the worn date area. Otherwise, this is a solid Good coin with strong peripheral definition on the reverse and throughout most of the obverse, but weakness at the lower obverse and central reverse. Attractive medium-gray toning is a notch lighter on the raised areas.  
*From The Terry Brand Estate, Part IV.*

**1794 O-101a Half Dollar  
VG Sharpness**

- 3408 1794 O-101a, T-7, High R.3 — Reverse Scratched — NGC Details. VG.** Tompkins Die State 1/5. A series of vertical pinscratches below the ribbon on the reverse accounts for the lack of a numeric grade. That problem aside, this is a pleasing (and well-circulated) example of America's first-year Flowing Hair half dollar. The date is faint but all four digits are readable. The reverse is several points finer than the obverse, with sharp rims and dentils for the VG Details assignment. Pleasing light, silver-gray patina covers both sides.

- 3409** 1794 O-103, T-10, High R.5 — **Tooled, Improperly Cleaned — NCS. AG Details.** Tompkins Die State 1/1. A readily affordable example of the sought-after 1794 half dollar issue, here represented by a scarce die variety. The coin is nickel-gray with scattered hairlines overall and a cluster of tool marks above the eagle on the reverse. The obverse is essentially worn smooth save for the outline of the portrait and a faint remnant of the date. The reverse shows most of the peripheral legends, but the eagle and wreath are almost entirely worn away.  
*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39203 Base PCGS# 6051

**1794 O-104 Half Dollar, VG Details  
Impaired Yet Collectible**

- 3410** 1794 O-104, T-11, R.5 — **Tooled, Improperly Cleaned — NCS. VG Details.** Tompkins Die State Microscopically porous surfaces indicate the past cleaning, and several suspect areas in the fields suggest some overall smoothing. Diagonal adjustment marks remain at the central reverse. Deep olive-gray toning at the margins lightens into silver-gray centers. The date is weak only at the bottoms of the numerals, and the rims are sharp for a VG details coin. Overton-104 is a slightly better variety of the magical 1794 issue, always in-demand regardless of die pair and condition.  
*From The Terry Brand Estate, Part IV.*

- 3411** 1794 O-107, T-5, R.6 — **Damaged — ANACS. VG8 Details.** Tompkins Die State 1/2. The numerals "1876" are crudely engraved above the date, and a hole between the L and I of LIBERTY has been inexpertly plugged. Still, this well-worn apricot and silver-gray piece is a representative of a very rare variety. The devices are boldly outlined, and the border legends and stars are mostly clear.  
*From The Terry Brand Estate, Part IV.*

- 3412** 1795 2 Leaves, O-102, T-26, R.4, VG8 NGC. Tompkins Die Stage 1/1. An available variety in all grades and die states. The berries are arranged 9x8 with Two Leaves under each wing. Well-worn with partial hair curl detail and even violet-gray patina. Affordable, problem-free Flowing Hair type coin. NGC ID# 37NX, PCGS# 39215 Base PCGS# 6052

**1795 Two Leaves Half Dollar, VF30  
O-105, Attractive Patina**

- 3413** 1795 2 Leaves, O-105, T-25, High R.3, VF30 PCGS. Tompkins Die Stage 1/3. Overton-105 has the wreath berries arranged 10x7. Liberty's lowest curl touches star 1. Steve Tompkins posits that a remarriage exists with O-103, T-29 using the same reverse die. Violet-gray patina reveals attractive shades of olive-green within the recesses. Most of the finer details of the portrait and eagle are worn away, but the lower hair curls remain crisp, as do the stars and legends. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052

- 3414** 1795 2 Leaves, O-105a, T-25, R.4, VG8 PCGS. Battleship-gray centers display a faint pinkish-gray hue, with darker margins. The borders are strong, with nearly complete denticles on the obverse. Even overall wear, with good detail for the grade and all major design elements clearly defined. The surfaces are smooth with no detracting imperfections. A pleasing example of this first type. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

- 3415** 1795 2 Leaves, O-110, T-21, R.3, VG8 PCGS. This is the early die state with the lower obverse crack disappearing in the field. A lovely example with grayish-gold surfaces and lightly gray-tan devices on each side. Slight weakness is evident below the date. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

- 3416** 1795/1795 3 Leaves, O-111, T-19, High R.4 — **Improperly Cleaned — NGC Details. VG.** A distinctive 9x7 berry combination on the wreath with three leaves below the eagle's wings. O-111 is a scarce variety, wherein the present coin is a collectible, low-grade example. The central devices are boldly outlined and the peripheral legends are mostly clear even though the rims fade away in places (normal for screw press-struck half dollars of this period). The surfaces are uniformly gunmetal-gray and glossy from an old cleaning. The heavy die break from the reverse rim at 10 o'clock obliterates the STA in STATES.

- 3417** 1795 2 Leaves, O-116, T-11, R.4, Fine 15 NGC. Tompkins Die State 2/2. The deep-gray fields contrast boldly with lightly toned, silver-gray devices for an attractive "circulation cameo" look. Struck from a late state of the dies, the coin shows heavy die clashing beneath the rich patina and die cracks around the obverse stars and LIBERTY. On the reverse, a sharp extra row of clashed denticles is visible above UNITED. A tiny rim indent below star 15 is the sole mark of note on this Choice Fine example. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

**1795 O-117a Half Dollar, AU Details  
Planchet Streak and Lamination**

- 3418** 1795 2 Leaves, O-117a, T-3, R.4 — **Tooled — PCGS Genuine. AU Details.** Tompkins Die State 2/4. An interesting coin for study, sharply struck with strong About Uncirculated definition, but tooled in the lower right obverse field (apparently in an attempt to remove adjustment marks). A planchet streak runs along the left-hand stars, with a large, ragged planchet flake between stars 4 to 8 and the rim. Pleasing steel-gray surfaces show glimpses of golden mint luster in protected areas.

- 3419** 1795 2 Leaves, O-125, T-13, R.4, Fine 12 PCGS. Bold rims and well-detailed design elements are hallmarks of this midgrade Flowing Hair type coin. The fields show olive-green, gold, and reddish toning on each side, while the worn high points have lighter tan-gray patina. Eye appeal is pleasing for the grade. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

- 3420** 1795 2 Leaves, O-125, T-13, R.4 — **Surfaces Smoothed — PCGS Genuine. VF Detail.** The devices are well-detailed and the strike is even. Nonetheless, polished surfaces are unnaturally bright and prevent a numeric grade. The obverse is brilliant, while the reverse shows blue and lavender border toning around a golden interior. A few scattered abrasions are typical of the grade level.

**1795 Half Dollar, Fine 15**  
**O-129, S Over D Die Cutter's Blunder**

- 3421** 1795 2 Leaves, Second S Over D, O-129, T-7, R.5, Fine 15 PCGS. CAC. Tompkins Die State 1/3. Both half dollars and half eagles from 1795 show a similar die cutting error of the second S of STATES over a mispunched D, a curious happenstance for such a significant blunder. Among the half dollars, the O-129 S/D variety is slightly more scarce than many of the 31 die pairs. This example is a Choice Fine coin, with reddish-tan toning on the raised devices and smooth, olive-gray fields. The obverse shows a few small marks but it is smooth and attractive. The reverse, too, retains nice eye appeal with some muted adjustment marks primarily near the rims. CAC endorsed for quality. NGC ID# 24E7, PCGS# 39259 Base PCGS# 6052

**1802 Half Dollar, VF20**  
**O-101, T-1**

- 3422** 1802 O-101, T-1, R.3, VF20 PCGS. A problem-free example with stone-gray surfaces that exhibit faint traces of tan toning. Only a single die marriage is known for this challenging date. Bullion depositors of the day preferred payment in silver dollars, since fewer coins needed to be counted to pay out a given amount. Ex: *Houston Signature* (Heritage, 12/2008), lot 676; *Long Beach Signature* (Heritage, 9/2009), lot 718. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

- 3423** 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, XF40 PCGS. Tompkins Die State 2/3. Although the Overton-101 (Tompkins-1) and O-103 (T-3) varieties share the same obverse die and the reverses are similar, the field stars above the eagle are noticeably different. The present coin displays Small Reverse Stars, confirming O-101. This lightly toned, golden-gray example displays iridescent colors at the rims and a few grade-consistent, small marks. The vertical shield stripes are incompletely brought up. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

- 3424** 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF45 NGC. Delicate aquamarine, lilac-red, and straw-gold toning visits the margins of this nicely defined early half dollar. Pockets of luster are plentiful, although we note thin marks on Liberty's neck and the field above her chest. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

**1806/5 O-101 Draped Bust Half, AU53**  
**Knobbed Top 6 Over 5, Large Stars**

- 3425** 1806/5 O-101, T-6, R.3, AU53 NGC. Ex: Hilt Collection. A faint die crack crosses the tops of the letters ITE in UNITED, but no cud has formed, confirming the earlier die state of the variety. Thick stone-gray patina blankets both sides of this richly patinated half, with deeper charcoal-gray at the margins. Bold details remain on Liberty's hair with minimal wear. The eagle also displays sharp detail, although some of the field stars are weak. Notable abrasions are confined to two marks between STATES and OF on the reverse. Glimpses of reddish-gold luster remain in a few protected areas. NGC ID# 24EK, PCGS# 39296 Base PCGS# 6077

**1806/5 Draped Bust Half, AU53**  
**O-102, Luster Remaining**

- 3426** 1806/5 O-102, T-7, High R.3, AU53 NGC. The top of the underdigit 5 is visible near the top of the 6. The stars are large, and star 12 is recut with a broken tip near the highest point of star 13. The 0 in the date shows recutting. The reverse shows a bold die line running right from the shield border. The lowest purported berry of the six, "without a stem," is unseen on this piece due to die clashing. AME are all joined solidly at their bases. Ample luster is visible in the recesses of this AU53 specimen, and light tan patina concentrates at the margins. The design elements are well-defined, and a few minor obverse circulation marks do not distract. A nice, problem-free Draped Bust half. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

- 3427** 1806 Knob 6, Small Stars, O-106, T-4, R.4, XF40 NGC. Olive-gray toning is prominent on the reverse but less conspicuous on the obverse. Void of visible marks though the fields display faint hairlines beneath a loupe. A good strike save for the upper right reverse opposite the tip of the bust. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

- 3428** 1806 Pointed 6, No Stem, O-109, T-15, R.1, XF40 NGC. Tompkins Die State 2/2. Only light die clashing is visible on either side — above the date on the obverse, and within the field stars on the reverse. Faint golden-gray toning visits the lightly toned, silver-gray surfaces. Overton-109 is a readily available variety lacking the olive branch stem through the eagle's claw, which was a separate punch by the engraver who prepared the working dies. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

- 3429** 1806 6 Over Inverted 6, O-112, T-12, R.4, VF35 NGC. Tompkins Die Stage 2/1. A heavy vertical crack travels through the 8 up through the portrait. Another runs from the rim to star 11 and into the field. Once thought to be a 9, researchers have determined the underdigit is an errant inverted 6. All design elements maintain good detail despite considerable friction circulation. Steel-gray patina covers this early half dollar. NGC ID# CZEY, PCGS# 408871 Base PCGS# 6078

**1806 Draped Bust Half Dollar, XF40  
Pointed 6, Stem Through Claw  
O-116' Perfect Reverse Die**

- 3430** 1806 Pointed 6, Stem, O-116', T-20, R.7, XF40 NGC. Tompkins Die State 2/1. The obverse die is in its third use, now lapped, while the reverse die is in its second use but remains perfect, with no die clashing or die cracks. The state of the reverse die is important, since it meets the requirements for O-116 in its rare (currently R.7) prime die state. This example shows no trace of a die crack above UNITED or STATES, nor is there evidence of die clashing in the clouds or at OF. Glints of prooflike surface and mint luster remain around the raised motifs. Sea-green, gold, and light lilac-gray patina covers the sharply struck devices and attractive, minimally marked fields. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

**1806 O-116, T-20 Half Dollar, AU50  
The Usual Die State**

- 3431** 1806 Pointed 6, Stem, O-116, T-20, R.3, AU50 PCGS. Both dies show peripheral die cracks on this example that represents the normally encountered die state for the O-116 die pair. This piece has a typical strike with traces of luster beneath golden-brown and pale blue toning. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071
- 3432** 1806 Pointed 6, Stem, O-117, T-30, Low R.5, VF25 NGC. CAC. Ex: Highland Collection. The obverse die was used for several varieties, and appears here with heavy die cracks through the date and stars. While rated Low R.5, the O-117 might be scarcer and deserving of an R.5 or High R.5 rating. This piece has natural has muted champagne and medium gray toning with splashes of emerald in some reverse letters. PCGS# 39320 Base PCGS# 6071

- 3433** 1807 Draped Bust, O-105, T-4, R.1, XF40 PCGS. The usual early die state before a die lump develops between the ED in UNITED. This lightly circulated Draped Bust type coin displays light champagne-gray toning with hints of luster remaining in the protected regions. Scattered marks are seen on each side under a loupe. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

**1807 Draped Bust Half, AU50  
O-110, Middle Die State**

- 3434** 1807 Draped Bust, O-110, T-3, R.2, AU50 NGC. Tompkins Die State 2/2. A die crack through the top of STATES descends toward the clouds, but ends at the midpoint of the field above the clouds, so the variety is not quite O-110a. Likewise, the obverse die is in an intermediate die state with numerous cracks, but not all required for the latest stage. Rich gunmetal-gray toning on the obverse shows reddish-tan accents at the stars. The reverse is a notch or two lighter in its patina, with golden mint luster shining through brownish-gray toning. Sharp definition exists on all of the raised elements. NGC ID# 24EM, PCGS# 39351 Base PCGS# 6079

**1807 Half Dollar, AU50  
Draped Bust, O-110 Variety**

- 3435** 1807 Draped Bust, O-110, T-3, R.2, AU50 PCGS. Both sides show an extensive network of fine peripheral die cracks, the first three digits in the date are noticeably larger than the 7, and the five berries in the leaf all have stems, identifying the O-110 variety. This attractive AU specimen retains much original design detail and mint luster and the mostly brilliant centers yield to pleasing shades of golden-brown and steel-blue at the peripheries. NGC ID# 24EM, PCGS# 39351 Base PCGS# 6079

**BUST HALF DOLLARS**

**1808 Half Dollar, AU58  
O-103, Lightly Toned Near-Mint Example**

- 3436** 1808 O-103, R.1, AU58 PCGS. The bases of A and M in AMERICA touch, a key pick-up point for Overton-103. The scroll ends below the left edge of the right-hand upright on M to confirm the reverse die. On the obverse, the 1 in the date is missing its bottom-left serif and 08 is closer than 180. Nearly full mint luster remains on this borderline Uncirculated half. Struck from worn dies, the stars are drawn to the edge and flow lines distort the letter tops of the reverse legend. The central motifs, in comparison, are sharply rendered. This is a lightly toned O-103 with strong eye appeal. NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090

**3437** 1808 O-107a, R.2, AU58 PCGS. Ex: Meyer Collection. The later die state with a die crack through the upper obverse. The present piece is warmly lustrous and well struck for the time. The color is primarily light silver-gray with elements of gold near the margins and deeper gray shadings at the lightly rubbed high points. NGC ID# 24EP, PCGS# 39371 Base PCGS# 6090

**3438** 1811/10 O-101, R.1, AU50 PCGS. This is the normal overdate variety compared to the much scarcer O-102 that is rated R.4. This piece has light silver surfaces with delicate champagne and steel toning in the margins. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

**3439** 1811 Large 8, O-103a, R.3, AU58 NGC. Ex: Highland Collection. This is a brilliant, silver-white example of the late die state O-103a Large 8 variety. Nearly full mint luster remains across the vibrant, frosted surfaces. A diagnostic die crack runs tangent to the second 1 in the date, while multiple die clashing displays the outline of an inverse, upside-down eagle around the portrait. Parallel lines in front of Liberty's bust confirm the variety. An important find for the early Capped Bust specialist. NGC ID# 24EU, PCGS# 39424 Base PCGS# 6096

#### 1811 Half Dollar, Untoned AU58 Small 8, O-106

**3440** 1811 Small 8, O-106, R.3, AU58 PCGS. Parallel die lines over the eagle's left (facing) shoulder help attribute the variety. Substantial cartwheel sheen graces this stone-gray near-Mint half dollar. No marks are noticeable. A late die state with multiple sets of clash marks and the stars drawn to the edge. NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

#### 1813 O-107a Half Dollar, MS63+ Terminal Die State

**3441** 1813 O-107a, R.1, MS63+ NGC. This fully lustrous, high-end Select Mint State example displays splendid ivory surfaces with splashes of gold and iridescent toning. Both the obverse and reverse dies appear to be on the verge of catastrophic failure, with die clashing and strong die cracks that not only encircle parts of the margins, but branch off into the central motifs. Despite it all, the strike is sharp on the obverse. It is less sharp on the reverse at the eagle's head, where the late die stage takes its toll. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

**3442** 1814 O-103, R.1, AU58 PCGS. Vertical die lines define both the obverse and reverse of the Overton-103 variety. On the obverse, several lines run from the underside of the bust truncation to the edge in the area left of the date. A much bolder die line connects the left scroll ribbon to the wing below. Frosted cream-gray toning deepens at the borders of this nearly Mint State example. Soft luster glows from the well-preserved surfaces. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

#### 1814 O-103 Half Dollar, MS62 Untoned and Lustrous

**3443** 1814 O-103, R.1, MS62 PCGS. A bold, ridgelike die line from the end of the scroll to the eagle's left wing is the pick-up point that identifies the O-103 variety. Other die lines exist on the coin to confirm the variety below the bust drapery. This example is brilliant with strong silver luster across both sides. Struck from multiply clashed dies, the peripheral elements are drawn to the rim to confirm the late state of the dies. Nevertheless, crisp definition on the central elements adds to the appeal. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

**3444** 1814 O-107, R.2 — **Damaged** — NGC Details. **Unc.** Die lines between the ribbon end and stars 10 and 11, and a filled N in UNITED act as attribution markers. The obverse shows three digs near stars 4, 5, and 6 that likely account for the details grade. Razor-sharp with lively luster that percolates through attractive multicolor toning. Heavily clashed.

**3445** 1815/2 O-101a, R.2 — **Tooled** — PCGS Genuine. **VF Details.** Stone-gray surfaces show skillful smoothing to remove marks from circulation and die clashing. The diagnostic die crack through 50 C remains, confirming the late die state. Any evidence of the underdigit 2 beneath 5 in the date is gone. Still, this is an acceptable example of the low-mintage key date with strong definition for the VF level.

#### 1815/2 Half Dollar, O-101, XF40 Only Variety of the Year

**3446** 1815/2 O-101, R.2, XF40 NGC. A cream-gray representative with moderate wear and ample glimpses of luster within the stars and legends. Multiple sets of clashes are present, as made, but post-strike contact is minor aside from slender marks at 12 o'clock on the obverse and 7 o'clock on the reverse. The lowest mintage date of the Capped Bust half series.

Ex: *Philadelphia Signature* (Heritage, 8/2012), lot 3382. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

**3447** 1818/7 Large 8, O-101, R.1, AU50 NGC. A popular early overdate in the Capped Bust series, the underdigit 7 shows clearly above the top loop of 8 and its stem peeks through the lower loop as well. Mint luster remains at the borders beneath blue and russet album toning on the obverse, with shades of sea-green and reddish-gold on the reverse. Only light wear and small marks from circulation are seen. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

**3448** 1819/8 Large 9, O-105, R.2, AU58 PCGS. Autumn-gold and navy-blue toning invigorates the borders of this crisply struck near-Mint half dollar. The fields and motifs are mostly brilliant. Smooth aside from a single thin mark above the left shield corner. NGC ID# 24FC, PCGS# 39561 Base PCGS# 6119

**3449 1819 O-112, R.3, AU58 PCGS.** The reverse of this somewhat scarce variety is distinguished by TE in STATES joining at the top but not the bottom, due to an extra die-line connector. On the obverse, star 1 is quite close to the drapery and point between two dentils. This still-lustrous near-Mint State example displays splendid honey-gold and blue rim patina with silvery centers that are lightly hairlined but retain much eye appeal. NGC ID# 4FXD, PCGS# 39550 Base PCGS# 6117

**3450 1821 O-105, R.1, AU58 NGC. CAC.** This is the early die state without the die crack through TAT in STATES. This Choice AU example is richly toned in gold and gray with much underlying luster. NGC ID# 24FF, PCGS# 39582 Base PCGS# 6128

**3451 1822 O-103, Low R.5 — Artificial Toning — NGC Details. Unc.** Recutting on star 10 confirms the scarce O-103 variety. The surfaces are partially reflective with slightly blurred, lavender hue over gold-toned and silver-gray surfaces. The strike is crisp and sharp in comparison to the questionable patina. We seldom offer an Overton-103, seen here in its early die state.

**3452 1823 O-106a, Modified 3 in Date, R.2, MS62 NGC.** Overton-106 is quite scarce in the earlier die stage with its 3 in an unmodified state. This is the later die state with a “Tampered 3” as described by Dr. Peterson — an awkward patch of sorts at the junction of the outer loops of the 3. Cerulean-blue, sea-green, and lilac-gray shades cover the softly lustrous surfaces of this Mint State example. The strike is bold except at Liberty’s bust point and the eagle’s talons. NGC ID# 47HP, PCGS# 39610 Base PCGS# 6131

#### 1823 Bust Half, High-Census MS64 O-108a, Very Late Die State

**3453 1823 O-108a, R.3, MS64 PCGS.** Late die states of O-108 and the scarce O-109 are similar in appearance and diagnostics. Both show the same reworked 3 in the date. This example is a very late die state O-108a, best identified by a bold die crack above the date and the first A in AMERICA missing the inside serif on its right leg. The 3 is modified to bolster the connection between the upper and lower curves, with a small tine pointing downward into the adjacent field. This Choice Uncirculated half ranks at, or near, the top of the Census for O-108a. Vibrant cobalt-blue and amber-gold toning embellishes the highly lustrous, sharply struck fields and devices. Housed in an old, light-blue label holder with the barcode on the back. NGC ID# 24FJ, PCGS# 39613 Base PCGS# 6131

#### 1823 O-112 Half Dollar, Toned MS63

**3454 1823 O-112, R.1, MS63 PCGS.** The Tall 3 in the date is a distinguishing characteristic of the O-112, as is the extension of line 1 of vertical shield stripe 6 to the fourth horizontal crossbar. Amber-orange and pale-blue toning surrounds lilac-silver centers, which display sharp detail and strong strike doubling on Liberty’s profile. NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

**3455 1825 O-101, R.1, MS62 PCGS.** Although plentiful, this variety is popular with collectors for its unusual reverse spacing. This lovely Mint State example has frosty silver luster with brown high-point toning and rich iridescent peripheries. NGC ID# 24FL, PCGS# 39647 Base PCGS# 6142

**3456 1827 Curl Base 2, O-147, R.4, AU58 NGC.** Nearly full silver luster appears on this brilliant half dollar that is framed in gold, lavender, and blue toning. Among the 49 known die pairs for 1827 half dollars, only two (the other is O-146) have a Curl Base 2 in the date, and they are both from a single obverse die. NGC ID# 484S, PCGS# 39750 Base PCGS# 6145

**3457 1828 Square Base 2, Small 8s, Large Letters, O-117a, R.1, MS63 PCGS.** An original and attractive Select Uncirculated example. Recutting at the top serif of C in 50C identifies the Overton-117 variety, while a faint die crack along the top of UNITED STATES OF is blurry-but-present and denotes the late die state. Strong silver luster shines through a natural patina of storm-gray and deep-blue toning with a halo of amber-gold at the margins. NGC ID# 4D7L, PCGS# 39772 Base PCGS# 6151

**3458 1829 Small Letters, O-105, R.1, MS61 PCGS.** Housed in an early light-blue label holder with barcode on the back, this near-brilliant and frosted O-105 half is razor-sharp and lustrous. A thin translucent glint of reddish-gold patina is emerges along the rims to confirm the natural surfaces. TAT in STATES stairsteps down and the upper arrow shaft shows recutting to confirm the variety. NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

**3459 1830 Small O, O-103, R.1, MS62 NGC.** Recutting on the 5 in the denomination and the first A of AMERICA are diagnostic for the reverse and thus the die pair. Semireflective fields shine through a layer of peach and blue-green patina. NGC ID# 24FU, PCGS# 39812 Base PCGS# 6156

**3460 1832 Large Letters, O-101, R.2, AU58 PCGS. CAC.** O-101 is the sole Large Letters die pair for 1832, yet the most notable diagnostics for the variety do not involve the size of the lettering. Two of the pick-up points occur on the obverse. It is a Laced Lips variety, with a vertical die line from lips to chin, and the 8 in the date is boldly recut. On the reverse, a bold die break from the tail feathers into the left wing confirms the die marriage. This is a lightly toned and original near-Mint example, still lustrous with russet and blue accents over pleasing, silver-gray surfaces.

**From The Morgan Hill Collection.** NGC ID# 24FW, PCGS# 39885 Base PCGS# 6161

#### 1832 Small Letters Half, MS64 O-103, Recut 5 in 50C

**3461 1832 Small Letters, O-103, R.1, MS64 NGC. CAC.** Shades of peach-gold and blue cover the smooth obverse, while dove-gray, amber-gold, and blue toning appear on the reverse of this attractive O-103 half. The surfaces are brightly lustrous and satiny, with plentiful eye appeal for the near-Gem grade. The variety is known for its recut 5 in the denomination, with a diagnostic die lump in the drapery fold above 18 in the date. Housed in a prior generation NGC holder (pre-barcode) with the early NGC full-width hologram.

**Ex: Allstate Coin Co. (8/1992); ANA Signature (Heritage, 8/2016), lot 4682.** NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

**1832 Capped Bust Half Dollar, MS64  
Small Letters, O-111 Variety**

**3462** 1832 Small Letters, O-111, R.1, MS64 NGC. A short diagonal die line in the hair, below TY in LIBERTY, identifies the popular O-111 variety. Sharply detailed on the central design elements, this attractive Choice specimen shows just a touch of the usual softness on some of the star centers. The well-preserved surfaces show intense shades of bluish-gray toning, with highlights of pale gold at the peripheries. NGC ID# 9KXV, PCGS# 39869 Base PCGS# 6160

**3463** 1833 O-109, R.3, MS63 PCGS. A die line extending off the foot of the I in AMERICA toward the C identifies this collectible variety. Satiny luster is well-preserved with olive-gold toning on each side. PLURIBUS is weak and several right-hand stars are incompletely struck, but the Liberty portrait is bold. NGC ID# 24FX, PCGS# 39897 Base PCGS# 6163

**1834 O-106 Half Dollar, MS64  
Large Date, Small Letters**

**3464** 1834 Large Date, Small Letters, O-106, R.1, MS64 PCGS. Light wheat-gold and olive-green toning graces this lustrous and exceptionally unabraded Choice Capped Bust half. The high relief stars are incompletely defined, but the remainder of the designs are well struck. 22 different die marriages are known for the 1834 half, and only O-122 poses a great challenge for the variety collector. NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

**1834 O-109 Half Dollar, MS64+  
Small Date and Small Letters**

**3465** 1834 Small Date, Small Letters, O-109, R.1, MS64+ PCGS. CAC. This beautifully toned Choice Uncirculated half dollar displays aquamarine borders and chestnut-gold centers. The coruscating surfaces are unabraded aside from a hair-thin horizontal line beneath 50 C. on the reverse. A couple of the stars are softly impressed, but most of the design is pinpoint sharp. Just outside the Condition Census for the die pairing. Population: 69 in 64 (5 in 64+), 12 finer. CAC: 18 in 64, 12 finer (7/17). NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

**1834 Half Dollar, Census-Quality MS64  
O-114 Small Date, Small Letters**

**3466** 1834 Small Date, Small Letters, O-114, R.1, MS64 PCGS. A distinctive double outline on the clasp narrows the possible die varieties to O-113, O-114, or O-116, while sharp recutting on stars 3 and 4 confirms the O-114 obverse. Wide doubling of the E in E PLURIBUS UNUM and weakness at LUR of PLURIBUS confirms the variety. This near-Gem example ties for either second or third in the Condition Census for the variety, depending on which listing is used. Both Herrman and Parsley show MS64 coins high in the Census. Tangerine-gold accents visit the lustrous, lilac-gray surfaces. The strike is generally sharp, but incomplete on the star centers and scroll. NGC ID# 24FY, PCGS# 39918 Base PCGS# 6166

**REEDDED EDGE HALF DOLLARS**

**3467** 1836 Reedded Edge, GR-1, R.2 — Improperly Cleaned — NGC Details. VF. The steel-gray surfaces of this midgrade 1836 Reedded Edge half dollar are slightly smokey from an old cleaning, with deeper olive patina surrounding the borders. A loupe reveals scattered light marks over each side, as expected for the grade.

**3468** 1838 GR-2, R.3, MS62 PCGS. A sharply struck and fully lustrous example with satin surfaces beneath faint champagne and iridescent toning. Peripheral weakness on the obverse is the result of considerable die wear. PCGS# 531081 Base PCGS# 6177

**3469** 1839 Large Letters, GR-4, R.1, AU55 PCGS. CAC. Virtually full luster is muted on the obverse by delicate champagne toning with wispy golden-olive toning on the reverse. An attractive piece suitable for a date or type collection. PCGS# 531101 Base PCGS# 6179

**SEATED HALF DOLLARS**

**3470** 1846 Tall Date, Spiked 4, WB-108, Die Pair 13, R.3, MS63 PCGS. Dappled blue, violet, and gold patina provides blushes of color to this fully struck Select half dollar. Tall Date coins, attributed by the Open 6, are scarcer than their Medium Date cousins. This is one of the popular Spiked 4 die pairs. Population (all Tall Date varieties): 9 in 63 (1 in 63+), 7 finer (7/17). NGC ID# 24H7, PCGS# 572047 Base PCGS# 6252

**3471** 1853 Arrows and Rays, WB-101, MS61 NGC. Always in demand as a one-year type, the 1853 Arrows and Rays half was produced to the tune of more than 3.5 million pieces. The total number of die pairs is yet to be determined, although this example is struck from an interesting clashed die variety with rays protruding from Liberty's arm and the adjacent rock. Lightly toned silver-gray surfaces are lustrous and frosted. We note a pair of faint pin scratches from star 9 to just above Liberty's knee and shin. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

**3472** 1856-O WB-101, Die State 2, R.4, MS63+ PCGS. CAC. With a mintage of more than 2.6 millions coins, the 1856-O is seemingly a common date in the Seated Liberty series, but reality dictates that this issue is elusive in Mint State grades. This Select Mint State example is sharply struck with rich gold and iridescent toning over frosty luster. NGC ID# 24HP, PCGS# 572095 Base PCGS# 6288

**3473 1872-CC WB-101, Die Pair 1, R.4, XF45 NGC.** Elusive in all grades, the 1872-CC is one of five scarce-to-rare Carson City issues that challenge specialists of the series. Although not as rare as the 1870-CC, 1871-CC, 1874-CC, or 1878-CC, it is nearly so and the 1872-CC is always on many want lists. This is an attractive, lightly toned silver-gray example with few marks with nice luster remaining on both sides. Sharply struck for the Choice XF grade. Census: 16 in 45, 15 finer (7/17). NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

**3474 1873-CC Arrows, Small CC, WB-102, Die Pair 3, XF40 PCGS.** A wedge-shaped die lump in Liberty's gown identifies this relatively scarce variety. This pleasing XF example is a wonderful representative for a 19th century type set, or a specialized collection. The light gray surfaces exhibit delicate champagne toning with minimal marks. PCGS# 572215 Base PCGS# 6344

**3475 1874-CC Arrows, WB-102, Die Pair 3a — Cleaned — PCGS Genuine. VF Details.** The popular "Railroad Tracks" variety has die damage through TES of STATES, resembling railroad tracks. The cause of the damage is unknown and the subject of several theories. This piece is cleaned, exhibiting light silver surfaces and scattered handling marks.

**3476 1888 WB-101 MS64 PCGS.** A near-Gem with shimmering surfaces that have a little light golden patination and only faint, wispy abrasions noted in the fields. Sharply defined throughout. Ex: *Baltimore Bullet Sale (Heritage, 7/2003), lot 1713; Long Beach Signature (Heritage, 1/2004), lot 5938.* NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

## PROOF SEATED HALF DOLLARS

### 1857 Half Dollar, PR62 Rare Proof Issue

**3477 1857 PR62 PCGS.** Champagne-gold centers are flanked by deep purple toning at the margins, the latter being somewhat more extensive on the obverse. This sharply struck piece possesses great eye appeal for the numerical grade despite the presence of some inoffensive handling marks. A rare proof issue. Our roster lists only 36 representatives known. Population: 6 in 62, 35 finer (7/17).

Ex: *Long Beach Signature (Heritage, 2/2010), lot 1187; Baltimore Auction (Stack's, 6/2014), lot 1437.* NGC ID# 27TG, PCGS# 6411

### 1865 Seated Liberty Half, PR64 Cameo Only 500 Examples Struck

**3478 1865 PR64 Cameo NGC.** This high-contrast, near-Gem proof displays pleasing, iridescent rose-gold toning at the peripheries over deeply reflective proof surfaces. Significantly more scarce in high proof grades than the other Civil War years, this is the final No Motto year for the proof series. The strike is first-rate, and only a few light hairlines keep this near-Gem from an even higher grade. Only 500 proofs were made — examples with nice eye appeal such as this coin are always in demand. NGC ID# 27TS, PCGS# 86419

**3479 1870 PR64 PCGS.** Wispy blue toning visits the margins of this lovely lilac and gold half dollar, a Choice proof that is elusive in finer grades. Population: 62 in 64 (1 in 64+), 27 finer including Cameo (7/17). NGC ID# 27U5, PCGS# 6428

**3480 1873 No Arrows PR64 PCGS.** Struck early in the year before Arrows were added to the obverse, this Choice proof has dusky gray toning with peripheral iridescence over lightly mirrored surfaces. NGC ID# 27U8, PCGS# 6431

**3481 1873 No Arrows PR65 NGC.** The 1873 No Arrows proof half dollar saw a production of 600 pieces. On this Gem example, light golden-tan and russet obverse toning complements bluish-green accents in deeper hues on the reverse. The design features are sharply struck and both sides are free of significant marks. Census: 18 in 65 (1 in 65 ★), 24 finer; 10 in 65 Cameo, 7 finer; 0 in 65 Ultra Cameo, 2 finer (7/17). NGC ID# 27U8, PCGS# 6431

**3482 1876 PR63 Cameo NGC. CAC.** Type One Reverse, open bud. This well-contrasted Select proof displays brilliant interiors with warm gold and lavender border toning. The only noticeable strike weakness is on the eagle's left (facing) talons and is minor. Cameos are elusive in all grades. Census: 8 in 63 Cameo, 34 finer. CAC: 6 in 63, 13 finer (7/17). NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

### 1880 Half Dollar, PR66 Original Border Toning

**3483 1880 PR66 PCGS.** The 1880 Seated half dollar is an available proof issue overall, but it becomes scarce in Premium Gem condition and is rarely seen finer. This example shows a sharp strike save for a touch of incompleteness on the eagle's left (facing) talons, the neck feathers, and the central shield. The centers are mainly brilliant, surrounded by old-time violet, blue, and mint-green toning. Population: 23 in 66 (1 in 66+), 4 finer (7/17). NGC ID# 27UE, PCGS# 6441

**3484 1883 PR64 PCGS. CAC.** This lovely Choice proof exhibits sharp design definition and full mirrored surfaces beneath attractive blue and iridescent toning. NGC ID# 27UJ, PCGS# 6444

### 1883 Half Dollar, PR65 Cameo Border-Toned and Attractive

**3485 1883 PR65 Cameo NGC.** The 1883 proof is scarce in Cameo grades, and this Gem example is conditionally rare. The strike is sharp throughout, and the devices are frosty. Brilliant interiors cede to gold, violet, and blue border toning. A lovely Gem proof with outstanding eye appeal. Census: 22 in 65 Cameo (1 in 65+, 1 in 65 ★), 18 finer; 0 in 65 Ultra Cameo, 2 finer (7/17). NGC ID# 27UJ, PCGS# 86444

**3486 1884 PR65 NGC. WB-101.** A faint emergence of bluish-gray toning floats on the mirrored obverse fields and deepens to russet and gunmetal-blue shades at the margins of this Gem late-series proof. The reverse is intensely mirrored with a thin band of amber-gold at the rims. A few light obverse lines are visible with magnification, yet the strike is sharp and the overall eye appeal is satisfying. Census: 30 in 65, 20 finer (7/17). NGC ID# 27UK, PCGS# 6445

#### 1888 Seated Half, Needle-Sharp PR66

**3487 1888 PR66 NGC.** Light, even patina covers both sides of this lovely Premium Gem proof 1888 Seated half, which further exhibits a needle-sharp strike and excellent preservation throughout. The PR66 grade level is the highest in which examples can be located with any regularity. Only 832 proofs accompanied the circulation-strike mintage of 12,001 pieces. Census: 12 in 66, 6 finer (7/17). NGC ID# 27UP, PCGS# 6449

### BARBER HALF DOLLARS

**3488 1892-O MS62 PCGS.** A remarkable example of a scarce issue, this brilliant Mint State New Orleans half dollar features an above-average strike and fully lustrous, untuned silver surfaces with grade-consistent marks. NGC ID# 27UW, PCGS# 6462

**3489 1894 MS64+ PCGS.** Close study of Liberty's cheek at precise angles under a light is needed to identify a few light grazes that keep this piece from a Gem grade. The coin is frosty and beautifully toned in multicolor hues with excellent sharpness of strike. Finer 1894 Barber halves are rare. Population: 32 in 64 (2 in 64+), 36 finer (7/17). NGC ID# 24LN, PCGS# 6468

#### 1897-S Half Dollar, AU58

##### Seldom Seen Finer

**3490 1897-S AU58 PCGS. CAC.** The 1897-S Barber half is a slightly better date, benefiting in that regard from a mintage of just less than 1 million coins. Mint State survivors are scarce and out of reach for budget-conscious collectors. This Borderline Uncirculated representative exhibits sharp detail with a trace of friction over the high points of the devices. The obverse shows pale champagne toning with midnight-blue around the borders. The reverse shows the same colors, but in a more distinctive pattern — the blue forms a perfect crescent moon over the left two-thirds of the coin, and the champagne occupies the remainder. Population: 7 in 58 (1 in 58+), 70 finer. CAC: 3 in 58, 16 finer (8/17). NGC ID# 24M2, PCGS# 6479

**3491 1899 MS64 NGC.** This near-Gem shows almost no individually discernible abrasions, although both sides are deeply toned in russet and olive-gold hues that grow heavier toward the rims. The strike is sharp, and satiny luster emerges from beneath the patina. Census: 43 in 64 (2 in 64+), 23 finer (7/17). NGC ID# 24M6, PCGS# 6483

**3492 1900 MS64 PCGS.** MS64 is often described as the optimal collecting grade for the 1900 Barber half dollar, since it is quite scarce in Gem or finer conditions. Steel-gray, blue, and reddish-gold shades dominate the smooth surfaces of this lustrous and sharply struck near-Gem. The trouble spots on the eagle's shield and leg are fully struck on this Choice coin. NGC ID# 24M9, PCGS# 6486

**3493 1900 MS65 PCGS.** This Gem is boldly struck and toned in original aquamarine, lavender, and golden-gray hues. Only a few tiny marks are seen under a loupe, not out of line for the grade. The 1900 Barber half dollar is scarce in this condition and a rarity any finer. Population: 35 in 65 (4 in 65+), 15 finer (7/17). NGC ID# 24M9, PCGS# 6486

**3494 1905 MS63 PCGS.** Sharp design elements and satiny luster adorn this Select 1905 Barber half dollar beneath a blanket of russet-gold toning. Some tiny sky-blue accents appear at the rims. Scattered light abrasions account for the grade. Population: 18 in 63 (1 in 63+), 56 finer (8/17). NGC ID# 28PX, PCGS# 6501

#### 1908-O Half Dollar, Frosty MS66

##### Exceptional Color and Surfaces

**3495 1908-O MS66 PCGS. CAC.** Although plentiful in circulated condition, the 1908-O Barber half dollar is a rarity in MS66 or better grades. This CAC-approved Premium Gem displays original, frosty luster and appealing blue-green and golden-gray toning. The strike is impressively sharp, despite the New Orleans Mint origin of the coin. Population: 21 in 66 (3 in 66+), 16 finer. CAC: 12 in 66, 11 finer (7/17). NGC ID# 24N6, PCGS# 6514

**3496 1908-S MS64 PCGS. CAC.** This lovely S-Mint Barber half dollar survives from a mintage of 1.6 million coins, yet ranks among the better examples available on the market. Both sides have brilliant centers touched with champagne toning that deepens to lovely gold and blue at the borders. Population: 17 in 64 (1 in 64+), 17 finer. CAC: 5 in 64, 7 finer (8/17). NGC ID# 24N7, PCGS# 6515

**3497 1913-D MS64 PCGS. CAC.** Luminous, softly frosted mint luster is original from the mint, and a light golden hue on each side adds warmth and eye appeal. Considerable strike weakness is seen on the right (facing) side of the eagle, as is usually seen to some extent, and the obverse stars. The 1913-D Barber half is rarely seen this fine with a CAC green label. Population: 61 in 64 (2 in 64+), 18 finer. CAC: 17 in 64, 7 finer (8/17). NGC ID# 24NL, PCGS# 6528

**3498 1915 MS63 PCGS.** This satiny Select Mint State coin displays warm golden toning and largely unabraded surfaces. Faint marks on the cheek are all that prevent a finer grade. The eagle's talons and shoulder are well brought up. The 1915 Barber half dollar is inherently scarce in Mint State, coming from a mintage of only 138,000 pieces. Population: 22 in 63, 52 finer (7/17). NGC ID# 24NR, PCGS# 6532

## PROOF BARBER HALF DOLLARS

- 3499 1892 PR64 PCGS.** The Mint struck 1,245 proof half dollars in 1892, anticipating strong collector demand for this first-year issue. Examples remains highly sought-after to this day. An overlay of dusky golden-gray and mauve patina covers well-preserved surfaces. Few blatant signs of contact. NGC ID# 24NU, PCGS# 6539
- 3500 1896 PR64 Cameo PCGS.** Blue and lavender border toning attractively frames brilliant interiors, promoting stark contrast between the central devices and the mirrored fields. The right shield corner on the reverse is weakly struck, but the obverse of the coin is sharp. Finer Cameos are scarce. Population: 20 in 64 (2 in 64+) Cameo, 31 finer; 0 in 64 Deep Cameo, 3 finer (8/17). NGC ID# 24NY, PCGS# 86543
- 3501 1905 PR63 NGC. CAC.** Cameo 1905 proof half dollars are rare. This CAC-approved coin is not a Cameo, although there is a suggestion of contrast on both sides. Warm golden border toning accentuates the delicate cameo quality. The strike is sharp and a few scattered hairlines limit the grade. CAC: 2 in 63, 32 finer (7/17). NGC ID# 24P9, PCGS# 6552
- 3502 1905 PR65 PCGS.** The well-preserved surfaces of this impressive Gem are blanketed by mottled shades of gray toning, with sharply detailed design elements and reflective fields underneath. From a small proof mintage of 727 pieces. NGC ID# 24P9, PCGS# 6552
- 3503 1911 PR63 Cameo PCGS.** The sharply detailed design elements of this attractive Select specimen have enough mint frost to provide bold contrast with the deeply mirrored fields, creating a cameo effect that is most unusual on coins of this era. Only minor signs of contact are evident. NGC ID# 24PF, PCGS# 86558

### 1913 Half Dollar, PR66 Cameo Better Barber Half Date in All Formats

- 3504 1913 PR66 Cameo NGC. CAC.** Stark contrast between the frosted devices and the chromelike mirrored fields earns this proof Premium Gem the Cameo designation as well as CAC endorsement. Faint tan-gold shades and russet freckles do not diminish the mirroring or bold eye appeal. Just 627 proofs were struck, yet it is safe to say few are as sharp as this one. Census: 3 in 66 Cameo, 4 finer, plus 14 non-Cameo proofs in finer grades. CAC: 5 in 66, 2 finer (8/17). NGC ID# 24PH, PCGS# 86560

## WALKING LIBERTY HALF DOLLARS

- 3505 1916 MS64+ PCGS.** A Plus-graded Choice example of this important first-year issue, with sharply detailed design elements and slightly dimmed mint luster, under shades of lavender-gray, golden-brown, and amber toning. NGC ID# 24PL, PCGS# 6566
- 3506 1916 MS65 PCGS.** Demand for first-year 1916 Walking Liberty half dollar has yet to subside, 101 years after the coins were initially struck. That is especially true of examples in high grades like this frosted, lightly toned Gem. Shades include blue, green, and gold. Razor-sharp with broad rims. NGC ID# 24PL, PCGS# 6566

### 1917-S Half Dollar, Frosty MS64 Reverse Mintmark

- 3507 1917-S Reverse MS64 PCGS. CAC.** Frosty luster issues from brilliant surfaces speckled in crimson, russet, and gunmetal patina. This second-year near-Gem from a mintage of 5.5 million coins has the mintmark placed on the reverse for the first time. The Reverse Mintmark variety is far more accessible in high grades than its highly sought-after Obverse Mintmark cousin. Examples finer than this well-struck representative are very scarce. NGC ID# 24PU, PCGS# 6573
- 3508 1918-D MS62 PCGS.** Splashes of gold toning visit the light gray surfaces of this Mint State Denver half dollar that exhibits faint bluish overtones on each side. The strike is a trifle weak as expected for this issue. NGC ID# 24PW, PCGS# 6575
- 3509 1919 MS62 NGC.** The 1919 has one of the few sub-million mintages in the series (962,000 coins struck). Mint States survivors are scarce. The devices are fully struck. Each side is wholly brilliant and awash in thick, frosty luster. A readily appealing early-date example. NGC ID# 24PY, PCGS# 6577
- 3510 1921-D — Stained, Cleaned — NGC Details. AU.** This key-date Denver coin displays almost no discernible wear, although a thorough cleaning is obvious and the surfaces are deeply toned in green-gray and charcoal hues. Partial thumb separation is seen on Liberty's branch hand, but the central eagle feathers exhibit moderate weakness as normal. An affordable AU-level example of this challenging Walking Liberty half dollar.

### 1921-S Half Dollar, XF40 Conditionally Scarce Semikey

- 3511 1921-S XF40 PCGS.** Any example of the 1921-S Walking Liberty half dollar is a prize, but examples in upper circulated grades like this XF40 offering are decidedly finer than the average Fine to VF survivor. Actually, the issue is much scarcer than its key date P and D-mint counterparts in high grades. This moderately circulated piece has even gray patina with darker elements within the recesses. The highest points show blending, but the impression remains largely intact. NGC ID# 24R8, PCGS# 6585
- 3512 1923-S AU58 PCGS. CAC.** The 1923-S Walking Liberty half dollar circulated extensively, making Mint State coins elusive today. This CAC-approved near-Mint example displays mottled olive-gold and russet toning over each side with satiny underlying mint luster. Only slight high-point friction is observed. CAC: 8 in 58, 36 finer (7/17). NGC ID# 24R9, PCGS# 6586

**1927-S Half Dollar, Near-Gem  
Frosty and Brilliant**

**3513 1927-S MS64 NGC. CAC.** The 1927-S half dollar (2.4 million coins struck) circulated widely and is recognized as a challenge to find and procure in mint condition. In MS64, the issue is scarce. Finer coins are tightly held and rarely made available. Vibrant, frosty luster and brilliant surfaces are the defining traits of this near-Gem. A hint of incompleteness over the branch hand and head are typical, though slight thumb separation is evident. Smooth, minimally abraded fields. NGC ID# 24RA, PCGS# 6587

**3514 1934-D MS66 PCGS.** A delightful example from the first year of the so-called "Short Set" of Walking Liberty half dollars, this Premium Gem exhibits frosty silver luster beneath wispy champagne toning. Eye appeal is terrific. NGC ID# 24RG, PCGS# 6593

**3515 1934-S MS65 PCGS.** Satiny and lightly toned in champagne-gray hues, with deeper sun-gold and olive tinges in the recesses on each side. Excellent sharpness is seen along Liberty's figure and branch hand. The 1934-S half dollar is elusive any finer. NGC ID# 24RH, PCGS# 6594

**3516 1935-D MS65 PCGS.** A whisper of pale-gold patina gathers at the upper obverse rim of this otherwise brilliant and lustrous 1935-D Walker. The strike shows the usual lack of definition on the head and hand, but it is otherwise crisp and the fields are smooth, extremely flashy, and attractive. NGC ID# 24RK, PCGS# 6596

**3517 1935-S MS65 PCGS.** According to David Hall: "While not an ultra rarity, finding a Gem is much more difficult for this issue than others of this era." Indeed, Gems are exceedingly scarce and finer coins are rarely offered. This piece has daubs of gunmetal and golden patina around brilliant, well-struck centers. Frosty luster. NGC ID# 24RL, PCGS# 6597

**3518 1936-S MS66+ PCGS.** This essentially unabraded 1936-S Walker displays satiny mint luster beneath a glaze of light golden toning that warms each side. Flecks of russet appear near portions of the peripheries. Liberty's branch hand is a trifle soft, but the remaining design elements show good definition. PCGS reports 11 finer representatives (7/17). NGC ID# 24RP, PCGS# 6600

**3519 1941-D MS67+ PCGS.** This distinctive Superb Gem has brilliant silver luster on the untoned obverse, with deep orange and magenta toning over much of the reverse, a few splashes of bright silver still visible. The strike is bold with only minimal surface marks on each side. NGC ID# 24S4, PCGS# 6612 Base PCGS# 6612

**1941-S Half Dollar, MS66+  
Few Coins Known Finer**

**3520 1941-S MS66+ PCGS. CAC.** An elusive Premium Gem with CAC endorsement and highly appealing for its coveted Plus designation. PCGS reports only nine finer coins (8/17). This 1941-S Walker displays original, frosty mint luster with champagne toning that features daubs of deeper olive at the borders. Liberty's branch hand is weakly struck as normal. NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**3521 1941-S MS66+ PCGS. CAC.** A key issue in the late-date Walking Liberty series, the 1941-S is scarce in MS66 condition and it is rare any finer. This lustrous, colorfully toned example is certainly among the finest both in technical grade and eye appeal. Despite a bit of strike weakness at the centers (as almost always found on this issue), the immaculate surfaces and incredible toning of this Premium Gem earned the Plus designation from PCGS. Violet, blue, orange, lime-green, and golden-rose toning cover both sides of the coin in wonderful pastel hues. Strong luster radiates from the smooth, mark-free fields and devices. NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**3522 1942 MS67+ PCGS. CAC.** A blush of light golden toning graces the satiny surfaces of this high-end Superb Gem 1942 Walker. The strike is sharp and neither side exhibits notable abrasions. Sharp thumb separation on Liberty's branch hand and good definition of the eagle's leg feathers represents an almost full strike. PCGS has seen only six finer representatives, CAC just three (7/17). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

**3523 1947-D MS67 PCGS.** Remarkable fire-red, powder-blue, sea-green, and lavender toning endows this lustrous and nicely struck Superb Gem. Marks are inconsequential aside from a graze on the sun. Population: 43 in 67 (3 in 67+), 0 finer (7/17). NGC ID# 5ESK, PCGS# 6631

**PROOF WALKING LIBERTY  
HALF DOLLARS**

**3524 1936 PR62 PCGS.** This first-year brilliant proof Walking Liberty half dollar has brilliant silver surfaces with delicate peripheral gold toning. Both sides exhibit reflective devices and lightly mirrored fields. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half Dollar, PR66  
Attractive Multicolor Toning**

**3525 1936 PR66 NGC.** The Philadelphia Mint resumed commercial proof set offerings in 1936 and a mintage of 3,901 Walking Liberty half dollars was achieved. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the hazily reflective fields display highlights of emerald-green and lavender toning. Overall eye appeal is outstanding. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR66  
First Proof Issue**

- 3526 1936 PR66 PCGS.** This Premium Gem proof 1936 Walking Liberty half dollar features mottled champagne toning over its brilliant silver surfaces with fully mirrored fields and sharp design motifs. An exceptional example, this eye-appealing specimen will appeal to proof set collectors, type collectors, and series specialists. NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR66  
Sharp and Attractively Toned**

- 3527 1936 PR66 PCGS. CAC.** This fully struck proof has hints of iridescence throughout the delicate champagne patina, adding to the eye appeal of the glimmering fields and razor-sharp devices. Adolph Weinman's Walking Liberty half dollar was not originally issued in proof format, but in 1936 the Mint began to issue proof sets once again. The debut proof Walker is the scarcest proof in the series in high grade. PCGS has seen 48 submissions finer than the present coin (7/17). NGC ID# 27V4, PCGS# 6636

**1937 Walking Liberty Half, PR67+  
Subtle Iridescent Toning**

- 3528 1937 PR67+ PCGS. CAC.** Hints of iridescence at the borders complement warm yellow-gold toning overall. The strike is full, and we are hard-pressed to discern any grade-limiting surface flaws. PCGS has seen only 11 finer representatives and NGC has only certified 28 numerically finer (8/17). NGC ID# 5ESS, PCGS# 6637
- 3529 1942 PR68 NGC.** The obverse die is fresh with the sun rays crisp, while the reverse die shows some excessive polishing between the eagle's legs. This essentially brilliant final-year proof Walker displays a bold strike and glimmering mirrored fields. NGC lists just eight finer examples (7/17). NGC ID# 282G, PCGS# 6642

**FRANKLIN HALF DOLLARS**

- 3530 1951-S MS66+ Full Bell Lines PCGS. CAC.** Plus-graded and CAC-endorsed, this high-end Full Bell Lines 1951-S Franklin displays frosty original luster and exceptional surface preservation. Olive-gold and russet toning appears on each side, primarily near the borders. Eye appeal is excellent. PCGS lists six Superb Gems finer (7/17). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

- 3531 1952-S MS66 Full Bell Lines PCGS.** The 1952-S Franklin half dollar wades into rarified territory in Premium Gem condition with Full Bell Lines. This Registry-quality example showcases mottled green, mauve, and orange patina over the obverse, leaving the reverse mostly brilliant. Well-preserved surfaces display excellent detail. Population: 57 in 66 (8 in 66+) Full Bell Lines, 3 finer (7/17). NGC ID# 24T5, PCGS# 86663

- 3532 1956 MS67 Full Bell Lines PCGS.** This satiny Superb Gem is among the finest Full Bell Lines 1956 Franklin half dollars known and is conditionally rare as such. Silvery-blue, russet, and golden-orange toning graces each side. A couple of tiny ticks on Franklin's chin are all that deny an even finer grade. Population: 34 in 67 (1 in 67+) Full Bell Lines, 0 finer (7/17). NGC ID# 24TD, PCGS# 86671

- 3533 1958-D MS67 Full Bell Lines PCGS. CAC.** The impeccably preserved surfaces of this impressive Superb Gem are blanketed in shades of lavender-gray and sea-green toning, with more of the color on the obverse. The design elements are sharply detailed, with Full Bell Lines definition, and satiny mint luster shines through the patina. Population: 68 in 67 (2 in 67+) Full Bell Lines, 0 finer. CAC: 39 in 67, 0 finer (8/17). NGC ID# 5HNM, PCGS# 86675

**1961-D Half Dollar, MS66 Full Bell Lines  
Deep Original Toning**

- 3534 1961-D MS66 Full Bell Lines NGC.** Premium Gem Full Bell Lines 1961-D Franklin halves are rare, and none are known finer. This top-grade NGC coin displays frosty luster and a bold strike with deep russet, plum, olive, and golden border toning. The interiors show silvery-blue and champagne hues. Eye appeal is outstanding. Census: 4 in 66 Full Bell Lines, 0 finer (7/17). NGC ID# 24TP, PCGS# 86681

**PROOF FRANKLIN HALF DOLLARS**

- 3535 1950 PR65 Cameo PCGS. CAC.** This impressive Gem proof Franklin half dollar displays sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The well-preserved brilliant surfaces are free of mentionable distractions and eye appeal is outstanding. NGC ID# 27VA, PCGS# 86691

---

**1950 Half Dollar, PR66+ Cameo**  
**First-Year Proof Franklin**

**3536** 1950 PR66+ Cameo NGC. CAC. Glimmering fields and sharp, frosty motifs give this high-end Cameo proof dramatic white-on-black eye appeal, with largely perfect surfaces. The inaugural proof Franklin half dollar is scarce this fine and rarely offered finer. Census: 67 in 66 Cameo (2 in 66+, 4 in 66 ★), 18 finer; 3 in 66 Ultra Cameo (2 in 66+), 2 finer. CAC: 37 in 66, 15 finer (7/17). NGC ID# 27VA, PCGS# 86691

**3537** 1951 PR67 PCGS. CAC. This glimmering proof is fully struck and seemingly pristine. The interiors are brilliant, surrounded by peripheral violet and cobalt-blue rings. The 1951 proof Franklin is a popular Registry Set coin in this grade, and only five finer examples are certified by PCGS (7/17). NGC ID# 27VB, PCGS# 6692

---

**1953 Franklin Half Dollar, PR68 Cameo**  
**None Finer at PCGS**

**3538** 1953 PR68 Cameo PCGS. CAC. The design elements of this spectacular PR68 specimen are richly frosted and sharply detailed, creating intense cameo contrast with the deeply mirrored fields. Virtually pristine brilliant surfaces add to the terrific eye appeal. Population: 23 in 68 Cameo, 0 finer. CAC: 18 in 68, 0 finer (7/17). NGC ID# 27VD, PCGS# 86694

---

**1955 Half Dollar, PR68+ Ultra Cameo**  
**Exceptional Preservation**  
**A Registry Set Candidate**

**3539** 1955 PR68+ Ultra Cameo NGC. CAC. This remarkable Ultra Cameo proof 1955 half dollar is nearly flawless, showing brilliant white-on-black surfaces and full design definition. It would be nearly impossible for the untrained eye to tell the difference between this coin and the handful of PR69 Ultra Cameos that NGC lists finer. An outstanding Registry Set candidate. Census: 40 in 68 Ultra Cameo (1 in 68+, 3 in 68 ★), 7 finer. CAC: 24 in 68, 0 finer (7/17). NGC ID# 27VE, PCGS# 96696

**3540** 1957 PR69 Cameo NGC. An amazing black-and-white Superb Gem Cameo proof with fully brilliant surfaces. Deeply mirrored fields contrast nicely with the fully lustrous devices. Census: 40 in 69 Cameo (8 in 69★), 4 finer graded PR69 Deep Cameo (7/17). NGC ID# 24TX, PCGS# 86698

**3541** 1957 PR68 Deep Cameo PCGS. CAC. High-end Deep Cameo examples of the 1957 proof Franklin half dollar are in strong demand among Registry Set collectors. This piece is brilliant and starkly contrasted with fully rendered design elements. The motifs show satiny luster rather than thick frost. Population: 89 in 68 Deep Cameo, 4 finer. CAC: 29 in 68, 0 finer (8/17). NGC ID# 24TX, PCGS# 96698

---

**1960 Half Dollar, PR68+ Ultra Cameo**  
**Brilliant, Strongly Contrasted**

**3542** 1960 PR68+ Ultra Cameo NGC. CAC. Thick mint frost covers the obverse and reverse design motifs of this gorgeous Superb Gem Ultra Cameo proof. Both sides are brilliant and untuned with deeply mirrored fields and exceptional, highly appealing contrast. Census: 73 in 68 Ultra Cameo (2 in 68+, 1 in 68★), 6 finer. CAC: 32 in 68, 0 finer (7/17). NGC ID# 24TY, PCGS# 96701

---

**1962 Franklin Half, PR69 Deep Cameo**  
**None Certified Finer**

**3543** 1962 PR69 Deep Cameo PCGS. The design elements of this magnificent PR69 Franklin half dollar are sharply detailed throughout, and the deeply mirrored fields contrast profoundly with the frosty devices to create a dramatic cameo effect. The brilliant surfaces are just one tick away from technical perfection and eye appeal is tremendous. Population: 20 in 69 Deep Cameo, 0 finer (7/17). NGC ID# 27VK, PCGS# 96703

**1963 Franklin Half, PR69 Deep Cameo  
None Certified Finer**

- 3544** 1963 PR69 Deep Cameo PCGS. Ex: RRL. Thick frost throughout both motifs proclaims the production quality of the present final-year type coin. Non-cameo 1963 proof halves are plentiful, but white-on-black specimens are elusive. The immaculate surfaces display a hint of lemon-gold toning. The strike is slightly incomplete at the centers. Population: 20 in 69 Deep Cameo, 0 finer (7/17). NGC ID# 27VL, PCGS# 96704

**SMS KENNEDY HALF DOLLAR**

- 3545** 1966 SMS SP67 Deep Cameo PCGS. A beautifully struck Special Mint Set coin with all the contrast and eye appeal of a proof. This Superb Gem Deep Cameo is brilliant and fully struck with pristine surfaces. Examples are elusive this fine. Population: 37 in 67 Deep Cameo, 7 finer (8/17). NGC ID# 24WH, PCGS# 96846

**PROOF KENNEDY HALF DOLLARS**

- 3546** 1964 PR69 Deep Cameo PCGS. An exquisite Superb Gem Deep Cameo proof, this flawless piece has brilliant and untuned silver surfaces with outstanding contrast between the deeply mirrored fields and lustrous devices. NGC ID# 24WF, PCGS# 96800
- 3547** 1971-S PR69 Deep Cameo PCGS. Pleasing and practically perfect with pronounced contrast and pale peach-gold patina overall. A small frosted area projects from the tip of the bust to the 9 in the date. Population: 73 in 69 Deep Cameo, 0 finer (7/17). NGC ID# 24WM, PCGS# 96807

**EARLY DOLLARS**

- 3548** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VG8 NGC. Bowers Die State I. The silver-gray surfaces are well-worn but the rims are intact as are the dentils and motifs are all well-formed, albeit smooth from wear. Traces of parallel adjustment marks are limited to a brief group below the ear, where some detail of Liberty's hair strands survive. The expected light marks and faint lines exist (visible with a glass), but in balance this is a solid and appealing Two Leaves early dollar for the grade. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853
- 3549** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Plugged — PCGS Genuine. VF Details. Bowers Die State I. Tan toning appears throughout the muted battleship-gray surfaces of this VF-level Off-Center Bust dollar. Adjustment marks are seen around the reverse border and over the center but not on the obverse. The location of the plugged hole is not immediately apparent, although we note tool marks concentrated in the field to the left of the date.
- 3550** 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Graffiti, Repaired — NGC Details. Fine. Bowers Die State III. A scarce late die state example of the only 1796 Small Date, Large Letters dollar available for type and variety collectors. The B-6, BB-64 variant is an R.8 representative of the type but it is effectively uncollectible. This example of BB-61 is a stone-gray coin with graffiti etched in the fields along with some criss-cross lines. Efforts to repair and smooth the damage are of little benefit and the fields are somewhat porous as a result.

**1796 B-4, BB-61 Dollar, VF20**

- 3551** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF20 PCGS. A small round die chip is located near the drapery, directly above the 1, instantly identifying this variety. An attractive example with mottled gunmetal-blue, pale violet, and ivory toning on each side. Faint adjustment marks and trivial handling marks will pose no threat to the demand for this coin. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1797 B-1, BB-73 Dollar, VG Details  
9x7 Stars, Large Letters**

- 3552** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Improperly Cleaned — NGC Details. VG. Bowers Die State II. A raised pellet flaw below star 9 is diminished, virtually unseen on this well-worn early dollar. Variety BB-73, although plentiful in the absolute sense, is scarce relative to collector demand. Only 7,776 1797 dollars were struck, and the low mintage is understandably enticing. Outlines of the bust and eagle are clear over battleship-gray surfaces. Stars 8 and 9 and LIB are largely indistinct. Myriad marks throughout, but the cleaning is minimally distracting.

- 3553** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, VF20 PCGS. Bowers Die State III-IV; the die crack at the I in AMERICA is present as on die state IV, but the heavier cracks to the left of the date for die state III are not yet formed. BB-96 is a less often seen Knob 9, 5 Vertical Lines variety. This coin is evenly struck and has no visible adjustment marks. The surfaces are uniformly pewter-gray and smooth. Housed in a green label holder. NGC ID# 24X6, PCGS# 40011 Base PCGS# 40008

- 3554** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF35 PCGS. Bowers Die State III, both dies lapped. This well-detailed Large Eagle type coin is boldly and evenly struck. There are no adjustment marks visible on the obverse but a few remnants are seen along the reverse border under a loupe. Silvery-gray interiors cede to aquamarine and olive-gray border patina. Eye appeal is excellent. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

**1798 Large Eagle, Pointed 9 Dollar, VF20  
B-16, BB-110, Great Rarity for the Year**

**3555 1798 Large Eagle, Pointed 9, Wide Date, B-16, BB-110, R.6, VF20 NGC.** Bowers Die State III. A long die break extends from the rim below star 1 through the top of 179. Writing in the most recent edition of his *Silver Dollar Encyclopedia*, Dave Bowers explains this "is one of the great rarities of the year 1798. Probably no more than 30 to 50 are known. Estimates of the surviving population have varied widely, to as low as six to 12 coins." This well-circulated gray and tan-gold example maintains good detail with even wear. A few small digs near Liberty's eye and a scrape below the curl are within the parameters of the grade. This is an extremely important opportunity for those assembling a series by die variety. NGC ID# 24X6, PCGS# 40027 Base PCGS# 40018

**3556 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3 — Cleaning — PCGS Genuine. VF Details.** Bowers Die State VII. Two heavy die cracks extend inward from the rim near star 13. On this piece, the obverse die is slightly out of alignment toward 12 o'clock with almost no rim discernible above LIBERTY. The devices are well-detailed and each side shows lavender-gray and dusky toning. An old cleaning is not bothersome.

**3557 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF30 NGC.** Bowers Die State III, with die cracks through the bottom of STA and near OF A. BB-113 is a relatively available variety and a perfect entry point into the early dollar series in mid grades. This example has light olive-gray toning over surfaces that retain good detail considering time spent in circulation. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**3558 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5 — Damage — PCGS Genuine. XF Details.** Bowers Die State V, with a shattered reverse. The coin shows smooth olive-gray surfaces and evenly struck devices. The only discernible weakness occurs at the very centers on the eagle's head and neck and on Liberty's hair curls. A fresh-looking dig in the field near star 1 and the rim is the only imperfection on this attractive Heraldic Eagle type coin.

**3559 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4 — Improperly Cleaned — NGC Details. VF.** Bowers Die State II. Detail is strongly within the VF level, although unnaturally bright surfaces from an old cleaning prevent a numeric grade. Daubs of colorful toning appear occasionally around the outer peripheries. No adjustment marks are seen.

**3560 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, PCGS.** Bowers Die State III. Light golden-brown toning visits the peripheries of this otherwise stone-gray early dollar. Both sides are slightly bright, and display patches of hairlines beneath a lens. Marks are trivial aside from a single thin diagonal line on the portrait. An interesting curly lint mark (as made) is noted above the M in UNUM.

**3561 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF35 PCGS.** Bowers Die State IV. A readily available variety, although not in this later state of the dies with numerous obverse die cracks. A heavy reverse die crack from the edge to the branch stem and weak field stars above and right of the eagle's head typify the die stage. In other ways, the strike is sharp for this Choice VF coin. Golden-gray patina with silver-gray high points add eye appeal. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

**3562 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF20 NGC.** Bowers Die State I. The underdigit 8 is apparent beneath the second 9, and two additional stars jut out from the oversized clouds. Attractive patina covers this 18th century dollar, including hints of gold and violet. Partial curl and feather detail remains. Smooth and attractive. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

**3563 1799/8 13 Stars Reverse, B-1, BB-142, R.4 — Improperly Cleaned — NGC Details. VF.** Bowers Die State III. The second 9 punched over an 8, a 13 Stars reverse, and die crumbling near RIC confirm the scarce variety. The motifs retain considerable detail, while olive-gray surfaces displays signs of cleaning.

**3564 1799/8 13 Stars Reverse, B-1, BB-142, R.4, VF25 NGC.** Bowers Die State III. Advanced die crumbling near the I in AMERICA confirms the late die state of this popular overdate early dollar. Light reddish-gold and lilac-gray toning graces both sides of this VF example, which retains a surprising amount of mint luster for the assigned grade. A few small marks join a somewhat soft strike on the central motifs, yet the peripheries are bold. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884

**1799 Draped Bust Dollar, XF40  
7x6 Stars, B-11, BB-161**

**3565 1799 7x6 Stars, B-11, BB-161, R.3, XF40 ANACS.** Bowers Die State III, with a slender die crack through the letters in UNITED. Clash marks above the date and the prominent die crack from the rim, near D in UNITED identify the BB-161 variety. This impressive XF specimen shows only light wear on the design elements, leaving most interior detail intact. The pleasing surfaces are lightly abraded, under shades of lavender-gray toning. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**3566 1799 7x6 Stars, B-10, BB-163, R.2 — Improperly Cleaned — NCS. XF Details.** Bowers Die State III. Patchy umber-gray toning on the obverse disguises signs of an old cleaning, while the reverse shows natural silver-gray color with a few faint lines in the fields. The BB-163 variety is one of the more available die marriages for 1799 — most examples exist up to VF condition, but relatively few XF to AU coins survive.

**3567 1799 7x6 Stars, B-9, BB-166, R.1 — Improperly Cleaned — NGC Details. VF.** Bowers Die State III. Some olive and russet toning is seen in the protected regions, although the coin is largely nickel-gray with unnaturally glossy surfaces imparted by a vigorous cleaning. The coin is well-detailed and does not show any adjustment marks.

**3568 1799 7x6 Stars, B-9, BB-166 — Improperly Cleaned — NGC Details. VF.** Bowers Die State III. The surfaces appear soft and finely granular from the cleaning, a subdued cream-gray in color with deeper dove-gray toning at the margins. The rims are high and exposed with a few dings and irregularities as a result. Solid VF sharpness remains.

**3569 1800 B-5, BB-189, R.5 — Cleaned — PCGS Genuine. XF Details.** Bowers Die State I. Any cleaning was long ago, and this still-appealing early dollar has recovered with steel-blue and tan-gold toning around silver-gray centers. Light marks from circulation are visible with a glass, but strong XF details exist. BB-189 is one of the scarce varieties for 1800. No Uncirculated coins are listed in the Bowers roster of Notable Specimens, and few examples exceed the XF grade.

**3570** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — **Cleaning — PCGS Genuine. VF Details.** Bowers Die State VI. Unnaturally bright due to an old cleaning but with some olive-gray and russet toning reappearing on the reverse and along the lower obverse border. The coin is evenly struck and well-detailed. A nice Heraldic Eagle type coin.

**3571** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — **Improperly Cleaned — NGC Details. XF.** Bowers Die State IV. The details are solidly within the XF grade level, although hairlined surfaces betray an old cleaning that prevents a numeric grade. Both sides display deep olive-gray and gold-green toning with a slightly glossy texture. The strike is sharp and even, and no adjustment marks are seen.

**1800 B-13, BB-193 Dollar, XF40**  
**Attractive Golden Accents**

**3572** 1800 B-13, BB-193, R.3, XF40 NGC. Bowers Die State III. Bold clash marks appear near OF, and a crack joins the tops of AMER(ICA). Formerly considered a distinct variety (B-18), BB-193 is now widely recognized as merely a die state of B-18. This pleasing Draped Bust dollar showcases smooth steel-gray surfaces with golden-tan accents over the high points. Strong detail remains on the hair curls, wing feathers, and shield. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

**1801 Draped Bust Dollar, VF30**  
**B-2, BB-212 Variety**

**3573** 1801 B-2, BB-212, R.3, VF30 NGC. Bowers Die State II, with the double collar clash marks. BB-212 shows the first 1 positioned far from the hair curl, the arrowhead between U and N, and the leaf tip points to the left foot of the I in AMERICA. The left side of the drapery is worn, but much interior detail in Liberty's hair remains intact on this attractive VF30 specimen. The pleasing lavender-gray surfaces are lightly abraded. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

**1802 B-6, BB-241 Dollar, XF45**  
**Bold, Even Strike**

**3574** 1802 Narrow Date, B-6, BB-241, R.1, XF45 PCGS. Bowers Die State III, as usual, with the obverse lapped. A few faint adjustment mark remnants appear around the peripheries, but the border dentils are yet complete. The central devices exhibit sharp detail. This Choice XF BB-241 dollar displays mottled gold, lavender-gray, and gunmetal-blue toning over each side. A few marks on Liberty's cheek are not out of line for the grade. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1802 Dollar, AU Details**  
**B-6, BB-241, Narrow Date**

**3575** 1802 Narrow Date, B-6, BB-241, R.1 — **Graffiti — PCGS Genuine. AU Details.** Bowers Die State III, lapped obverse as usual. Several unguided scratches in the obverse fields — mostly behind Liberty's head — prevent a numeric grade. Both sides are bright slate-gray with bold detail and complete border dentils. A collectible Normal Date coin for the budget-restricted collector.

**3576** 1803 Large 3, B-6, BB-255, R.2, VG10 NGC. Bowers Die State II. A thin die crack connects stars 10 and 11 in this middle die state. The coin is well-worn, as the grade suggests, but evenly so. Soft pewter-gray surfaces show an expected scattering of minor marks with a few light rim bumps at the edges. No adjustment marks are observed. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

**3577** 1803 Large 3, B-6, BB-255, R.2 — **Cleaning — PCGS Genuine. VF Details.** Bowers Die State III, with a faint die crack connecting all stars on the right. The lavender-gray surfaces of this early dollar are lightly abraded, but a through-and-through planchet flaw is evident at the rim at 7 o'clock on the obverse, causing PCGS to certify this piece as an error. Much interior design detail remains intact, but an unnatural sheen indicates the coin has been cleaned in the past.

**SEATED DOLLARS**

**3578** 1845 AU53 PCGS. The 1845 Seated Liberty dollar is a scarce issue from a mintage of only 24,500 coins. Survivors are infrequently encountered, and Mint State pieces are rare, making this lovely AU example an excellent candidate for an advanced collection. Traces of luster shine through the natural grayish-gold toning on both sides that display trivial, grade-consistent handling marks. NGC ID# 24YF, PCGS# 6931

**3579 1845 AU55 PCGS. OC-1, R.2.** Osburn-Cushing Die State c/b. Angled die lines within the shield and the obverse date position confirm the Osburn-Cushing circulation strike die pair. The Choice About Uncirculated surfaces are reflective and glossy with dappled gold and blue toning on the obverse, and pale bluish-gray patina on the reverse. The coin is sharply struck with light wear and a few delicate lines across the semiprooflike fields. Light marks on the chin and neck and a couple of field ticks are small in size. NGC ID# 24YF, PCGS# 6931

**3580 1846-O XF45 PCGS. CAC.** The Choice XF surfaces are devoid of any serious marks or abrasions, and the rims show only the tiniest sign of circulation — both exceptional qualities for a Seated dollar in this grade, let alone one from the New Orleans Mint. Ideal old-silver toning reaches across the smooth surfaces and deepens slightly within recesses. A faint streak of deeper toning outside of stars 2 to 5 confirms the natural state of the surfaces, which have earned CAC endorsement. Population: 56 in 45, 127 finer. CAC: 8 in 45, 24 finer (7/17). NGC ID# 26GG, PCGS# 6933

---

**1847 Seated Dollar, MS62+  
High-End for the Assigned Grade**

**3581 1847 MS62+ PCGS. CAC. OC-2, R.1.** Osburn-Cushing Die State b/b. Uncirculated Seated dollars are scarce regardless of date, although the 1847 is moderately available to collectors. This Plus-graded example is CAC-endorsed and quite attractive for the grade. Pearlescent silver surfaces show a pleasing, pale-ivory sheen and plentiful mint luster. A light die crack runs beneath 847 in the date. A few light abrasions above the eagle's head and a minor reeding mark at its beak are noted, yet the surfaces are smooth, well-struck, and high-end for the assigned grade. Population: 16 in 62 (1 in 62+), 44 finer. CAC: 3 in 62, 4 finer (7/17). NGC ID# 24YJ, PCGS# 6934

**3582 1859-S XF45 PCGS.** A mintage that was halted after 20,000 strikes insures that the 1859-S remains an important issue in the Seated Liberty dollar series. Reflective luster is evident beneath light gold toning on both sides of this pleasing piece. Scattered marks are inconsequential. NGC ID# 24YZ, PCGS# 6948

**3583 1860-O MS60 PCGS. OC-1, R.1.** This thoroughly lustrous Seated Liberty type dollar is mostly brilliant and undeniably Uncirculated, although moderate abrasions do limit the grade. The central areas are sharp, but weakness is seen on several stars, Liberty's head, and Liberty's foot. Housed in a green label holder. NGC ID# 24Z3, PCGS# 6950

---

**1869 Seated Dollar, MS61  
Scarce in Mint Condition**

**3584 1869 MS61 PCGS.** The 1869 Seated dollar is usually seen in the VF to AU range. Mint condition survivors are rare. This lightly toned example shows untuned centers with gold, purple, and blue coloration around the borders. The effect is more dappled on the reverse. Three small pinscratches in the right obverse field serve as identifying markers. Population: 10 in 61, 36 finer (7/17). NGC ID# 24ZC, PCGS# 6962

**3585 1870-CC VG8 NGC. OC-6, R.5.** Osburn-Cushing Die State a/a. While the 1870-CC is the most-available Carson City silver dollar, it is seldom found in VG condition with pleasing, original surfaces. This example is ideal for the assigned grade, with rich gunmetal-gray patina and few marks, although we note a circular flaw above and left of 1 in the date. The most noticeable defect is a Mint-related planchet flaw above star 8, a fitting reminder of the earliest days of the old Nevada Mint, when such production anomalies were common. At least nine die pairs were required to strike just 12,462 pieces. NGC ID# 24ZE, PCGS# 6964

---

**1870-CC Dollar, AU Details  
Always Popular, First CC Issue**

**3586 1870-CC — Polished — PCGS Genuine. AU Details. OC-8, High R.4.** Medium CC mintmark. A faint clash mark joins the upper leaf to the wingtip. The 1870-CC is consistently one of the most popular issues in the Seated dollar series. Merely 12,462 pieces were struck during the Nevada branch mint's inaugural year of operation, yet it is the most collectible issue among the four CC Seated dollars. OC-8 survivors represent about 15% of the roughly 750 examples known. This bright, lightly circulated dollar shows evidence of polishing. Abrasions appear on each side, including a few small digs. Overall detail remains strong.

**1872 Seated Dollar, MS63  
Excellent Type Candidate**

- 3587 1872 MS63 PCGS. OC-8, R.2.** This die marriage features a high date, a die lump under the chin, and a raised line through the right side of the O in GOD. About 600 representatives from this die pair alone are believed extant, though few of any variety survive in Select Uncirculated condition — that despite a high mintage of 1.1 million coins. A few daubs of marginal golden-orange color complement frosty, untuned surfaces. The reverse is better-struck than the obverse, but the latter side remains well-detailed. Small ticks and grazes explain the MS63 assessment. Population: 20 in 63 (3 in 63+), 42 finer (8/17). NGC ID# 24ZJ, PCGS# 6968

- 3588 1872-CC — Cleaned — PCGS Genuine. VF Details. OC-1, High R.3.** A key date from a low mintage of 3,150 pieces, this specimen is lightly abraded, aside from a few marks in the right obverse field. LIBERTY is legible and only light wear is evident on the major design elements, but the luster is somewhat dimmed by the noted cleaning.

**TRADE DOLLARS**

**1873 Trade Dollar, Lustrous MS64  
Richly Toned Surfaces**

- 3589 1873 MS64 NGC.** The 1873 Coinage Bill was signed into law on February 12, 1873 (in political circles, referred to as the Crime of '73). Among its provisions was the authorization to abolish the Seated Liberty dollar and issue Trade dollars in its place. Just under 400,000 Trade dollars were struck in 1873 at the Philadelphia Mint. Few were saved, and the issue is very scarce in Choice Uncirculated or finer grades. This original and lustrous near-Gem example flashes vibrant lighter toned centers amid devices outlined by bluish-gray and deep-olive accents. Satiny surfaces show sharp definition with only minor and inconspicuous abrasions. Census: 35 in 64 (1 in 64+), 8 finer (7/17). NGC ID# 252W, PCGS# 7031

- 3590 1876 Type One Obverse, Type Two Reverse, MS62+ NGC.** Satiny mint luster gives this Plus-graded Mint State type coin pleasing visual appeal, harmonizing with olive-gold and russet toning over each side. Scattered light abrasions that determine the grade are masked by the patina. The only discernible strike weakness is seen on the eagle's right (facing) ankle and at the upper edge of the left (facing) wing. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

- 3591 1876-CC Type Two Reverse AU55 PCGS.** Tall CC. The Type Two Reverse without the berry under the claw is the usually seen variety among 1876-CC dollars (509,000 pieces produced). This is a Choice AU representative with a dusky-gray obverse and a mostly brilliant reverse. Sharply struck with a couple of reeding marks on each side. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

**1878-S Trade Dollar, MS64+  
Prooflike Obverse, Outstanding Type Coin**

- 3592 1878-S MS64+ NGC.** Most Uncirculated 1878-S Trade dollars grade no finer than MS63. This high-end Choice example is scarce, and finer pieces are exceedingly so. The obverse is fully prooflike, while the reverse displays more traditional satin luster. Both sides have light champagne toning with daubs of amber and aquamarine. The strike is sharp. Census: 69 in 64 (2 in 64+, 1 in 64 ★), 36 finer (7/17). NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

**1875 Trade Dollar, PR63  
700 Examples Struck**

- 3593 1875 PR63 PCGS.** Type Two Reverse. Only 700 proof Trade dollars were struck at the Philadelphia Mint in 1875. This attractive Select specimen exhibits strongly impressed design elements, with some minor loss of detail in the eagle's feathers, due to lapping. The lightly marked surfaces are blanketed in shades of slate-gray, golden-tan, and violet toning, with reflective fields underneath. NGC ID# 27YL, PCGS# 7055

- 3594 1876 PR62 Cameo PCGS.** Type I/II. The fields are nicely mirrored with delicate lines beneath a thin veil of champagne-gold patina. The raised devices are lightly frosted to earn the Cameo designation. A large mintage of 1,150 proofs was struck for the Centennial year, and many proofs were distributed to the general public, which was unfamiliar about how to handle and care for proofs. This example shows few light marks, yet the overall eye appeal is good. NGC ID# 27YM, PCGS# 87056

- 3595 1879 PR58 PCGS.** The year 1879 was the first occasional of no business strike Trade dollar production at any mint. The 1879 proof is an essential acquisition for the date collector. This is a collectible near-Mint example with a full strike and mirrored fields. Deep multicolor toning masks slight high-point friction on each side that determines the grade. A few marks appear in the left obverse field. Housed in a green label holder. NGC ID# 27YR, PCGS# 7059

- 3596 1881 PR61 PCGS.** A collectible grade for this proof-only Trade dollar issue, showing brilliant surfaces and fully struck design elements. Both sides show moderate hairlines that limit the grade, although they also display subtle cameo contrast that is most pleasing to the eye. NGC ID# 27YT, PCGS# 7061

---

**1881 Trade Dollar, PR62+ Cameo  
Brilliant and Sharply Contrasted**

- 3597 1881 PR62+ Cameo NGC. CAC.** This nearly brilliant late-date Trade dollar displays significant contrast between the fields and devices and is evenly balanced on each side. A few light hairlines and tiny contact marks explain the grade, but the only mark of significance is located below Liberty's extended arm. Only 960 proofs were struck in this year with no coins for circulation. NGC ID# 27YT, PCGS# 87061

- 
- 3598 1882 PR55 PCGS.** A slightly circulated example of this proof-only issue. Dusky gray toning covers both sides with deeper peripheries. The fields still retain most of the original proof reflectivity. Many late-series proof Trade dollars were spent in the 19th century during hard economic times and in the absence of strong collector interest in preserving the coins.  
*Ex: Central States Signature (Heritage, 4/2002), lot 6762.* NGC ID# 27YU, PCGS# 7062

- 3599 1882 PR62 PCGS.** Deep lavender-gray interiors are framed by brighter sea-green and gold peripheral toning on this lower-end 1882 proof trade dollar, masking the grade-limiting marks and hairlines. The strike is sharp, and the fields are deeply reflective. NGC ID# 27YU, PCGS# 7062

***End of Session One***

## SESSION TWO

## COLONIALS

1652 Oak Tree Sixpence, AU50  
Noe-20, IN on Obverse, N Reversed

- 3701** 1652 Oak Tree Sixpence, IN on Obverse AU50 NGC. Noe-20, W-400, Salmon 2-B, R.6. 33.8 grains. A glossy, aged-silver example, the inscriptions are complete although characteristically weak at the top of the first S in MASATHVSETS. N of IN is reversed. More accurately centered than most examples of Noe-20, with the obverse slightly displaced toward 2 o'clock and the reverse well-centered. The date is centered and features the diagnostic Tall 65. W in NEW ENGLAND is wide and thick at the first and third strokes. Noe-20 is a rare variety (R.6), often struck on cut-down Oak shillings, although it is undetermined if that is the case with the present example. We have seldom offered a finer example of the variety. NGC ID# 2ARJ, PCGS# 45360 Base PCGS# 19

1652 Oak Tree Shilling, AU50  
Noe-5, IN at Bottom

- 3702** 1652 Oak Tree Shilling, IN at Bottom, AU50 NGC. Noe-5, W-470, Salmon 3-D, R.2. 71.8 grains. Moderately off-center on the obverse toward 6 o'clock — as are most examples of Noe-5 — the reverse is beautifully centered. The letters IN MA are partially off the flan, and the top branches of the oak tree are slightly weak from the S-shaped wave of the rocker press. A vertical planchet indent or crimp leaves most of the design elements unaffected, while glossy and attractive warm-gray patina shows glimpses of reddish-gold luster in well-protected areas. Listed on page 41 of the 2018 *Guide Book*. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1652 Pine Tree Sixpence, XF45  
Sharp and Well-Centered Noe-33

- 3703** 1652 Pine Tree Sixpence, Pellets at Trunk, XF45 NGC. Noe-33, W-670, Salmon 2-B, R.3. 31.4 grains. The obverse die is displaced only slightly upward on this Choice XF example, with the inscription partially visible between 11 and 1 o'clock, and mostly visible before and after. A steel-gray and blue example with finely granular surfaces, but wonderfully crisp motifs for the assigned grade. The planchet shows only a hint of wave from the rocker dies. Listed on page 41 of the 2018 *Guide Book*. Census: 4 in 45, 8 finer (8/17). NGC ID# BYVT, PCGS# 45367 Base PCGS# 22

1652 Pine Tree Shilling, VF35  
Large Planchet, Monogram NE  
Rare Noe-8.2

- 3704** 1652 Pine Tree Shilling, Large Planchet, Ligatured NE, VF35 NGC. Noe-8.2, W-740, Salmon 7-E, R.6. 67.8 grains. A late die state of Noe-8 with a large die break below GL and an odd, upward-pointing flag on 5 in the date. Struck on a slightly wavy, irregularly shaped flan but well-centered on both the obverse and reverse. This is an attractive and glossy silver-gray example with faint blue overtones. Smoothly worn, especially at 2, but still Choice for the VF level. The Monogram NE (Ligatured NE) variety is listed on page 41 of the 2018 *Guide Book*. Census: 1 in 35, 18 finer (8/17). NGC ID# BNUC, PCGS# 45373 Base PCGS# 23

1652 Pine Tree Shilling, XF45  
Noe-22, Small Planchet  
Ex: Norweb, Partrick

**3705** 1652 Pine Tree Shilling, Small Planchet, XF45 NGC. CAC. Noe-22, W-870, Salmon 8-B, R.6. 69.5 grains. Ex: Norweb, Donald G. Partrick Collection. Exemplary reverse centering is seen on this gunmetal-gray shilling. The tree, date, and denomination are bold. Several letters in MASATHVSETS are partial, but all remain legible. An early die state, it lacks the break that usually joins the GL in ENGLAND. Nonetheless, cracks and breaks are prominent at D AN and across the top of the E in NEW. This example is tied for the finest in our records, along with another Partrick coin, and a third XF45 example that appeared two years ago in the Sundman sale.

Ex: *New Netherlands* (9/1954); *Norweb Collection, Part I* (Bowers and Merena, 10/1987), lot 1211; *Donald Groves Partrick; FUN Signature* (Heritage, 1/2015), lot 5595; *New York Signature* (Heritage, 10/2015), lot 3007. NGC ID# 2ARZ, PCGS# 24

1652 Small Planchet Pine Tree Shilling, AU53  
Noe-29, 'Thick 5' Reverse

**3706** 1652 Pine Tree Shilling, Small Planchet, AU53 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 71.45 grains. Struck on a clipped, out-of-round Small Planchet, this Noe-29 shilling alternates peach-red and grayish-blue toning with glints of remaining mint luster. The impressions are well-centered vertically on both the obverse and reverse, but the flan is narrow with the loss of some lettering upper-left obverse and upper-right reverse. The central devices are sharply struck for this "Thick 5" variety, while the legends alternate thick and normal characters on the somewhat egg-shaped planchet. Listed on page 41 of the 2018 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

Boston and vicinity, 1667

1739 Freidus 3.2-D Higley Copper, Good 4  
Probably Only Seven Other Pieces Known

**3707** 1739 Higley Copper, Broad Axe Good 4 PCGS. CAC. Breen-244, Freidus 3.2-D, W-8265, R.7. 177.8 grains. This unique reverse type is identifiable as Reverse D by the presence of the date, 1739, just faintly visible below the blade of the axe. The presence of a date on these pieces is another curiosity in the Higley series. Samuel Higley was lost at sea in May 1737, while delivering a load of copper ore to England. His will was entered into court records on June 7, 1737. So who exactly struck these pieces? Once again, we are left with only speculation. Some have claimed his older brother, John, Jr., struck them. It could just as likely have been one or several of Samuel Higley's business associates. All we know for sure is that they were minted in Connecticut in 1739.

Among the canon of stories and oral traditions associated with Higley coppers is one related by Sylvester Crosby and only recently debunked by Daniel Freidus. This legend claims that early 19th century goldsmiths used Higley coppers as copper alloy in jewelry because of the "fine quality of the metal of which they were composed." Freidus conducted metallurgical analyses on Higley coppers and other contemporary copper coins from America and England, and found no significant difference in the purity of the copper. All were over 95% pure, and most were 98% to 99% pure copper. Crosby related the story of their use by goldsmiths as a way to explain the extreme rarity of Higley coppers, even in the 1870s. Today their rarity is widely recognized, and only seven other examples were recorded of this variety on Freidus' roster from 20 years ago.

This is a heavily, although not atypically, worn example of a Higley copper. The obverse clearly shows the deer, the words VALUE PLEASE, the denomination below the deer, the curved lines below the deer and the five-pointed star. The reverse shows a faint outline of the broad axe. Of all the peripheral devices on the reverse, only the date shows plainly. Nevertheless, the surfaces are even brown and undamaged, unlike many Higley coppers. NGC ID# AUAZ, PCGS# 219

1787 Immunis Columbia Copper, AU55  
W-5680, Eagle Reverse

- 3708** 1787 Immunis Columbia, Eagle Reverse, AU55 NGC. W-5680, High R.4. A collectible Immunis Columbia variety, with an eagle on the reverse. This Choice AU representative displays smooth, problem-free chocolate-brown surfaces and boldly defined motifs. The border legends and the date are fully on the flan. No distractions are present. Listed on page 57 of the 2018 *Guide Book*. NGC ID# BFL, PCGS# 841

1787 Nova Eborac Copper, MS62 Brown  
W-5755, Seated Left, Glossy Surfaces

- 3709** 1787 Nova Eborac Copper, Seated Left, MS62 Brown PCGS. Breen-986, W-5755, R.3. The usual variety encountered of this issue, with the seated figure's finger pointing to the T in VIRT. The date is weakly impressed into the die. Glossy reddish-brown surfaces show no singular abrasions, although light slide marks on the high points of the devices are visible with a loupe. The strike is well-centered but weak along the upper-left reverse border, as usual. NGC ID# 2B4A, PCGS# 478

Undated Bar Copper, XF Details  
W-8520, Circa 1785

- 3710** (1785) Bar Copper — Environmental Damage — PCGS Genuine. XF Details. W-8520. Intertwined letters USA form the distinctive monogram obverse of the scarce Bar cent, while the reverse mimics the 13-lined face of some Revolutionary War buttons “but without the eye” (shank) as described by an 1795 New Jersey newspaper. This example displays pleasing medium-brown color with finely granular surfaces. The strike is slightly off-center on both obverse and reverse, as often seen for the issue. Listed on pages 75-76 of the 2018 *Guide Book*.

Undated Bar Copper, AU Details  
W-8520, Circa 1785

- 3711** (1785) Bar Copper — Obverse Scratched — NGC Details. AU. W-8520. Six short scrapes above U and S on the obverse monogram account for the Details grade. This is otherwise a smooth and appealing piece, with chestnut-tan toning and few marks other than those cited by NGC. All original Bar coppers are orphans of sort among Colonial issues, issued without a date and of uncertain origin. Their simple design and buttonlike motifs always have appeal for collectors.

1783 Washington & Independence Copper Restrike  
Draped Bust, Engrailed Edge, PR67 Red and Brown

- 3712** 1783 RES Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge PR67 Red and Brown PCGS. Baker-3, Vlack 17-L, W-10360, Musante GW-107, R.1. The original 1783 Draped Bust Washington & Independence tokens engraved by Thomas Wells Ingram were issued some time between 1815 and 1825. Medallist W.J. Taylor later acquired the original punches and used them to create new dies. These restrikes were made about 1860. Each side retains considerable mint red color along with steel-blue, rose, and golden-brown shadings. Pinpoint-sharp with a die crack from ES in STATES through the base of the rock. Listed on page 82 of the 2018 *Guide Book*. Population: 1 in 67 Red and Brown, 0 finer (7/17). NGC ID# 2B6T, PCGS# 686

1791 Washington Liverpool Halfpenny, AU58  
W-10650, Copper, Conditionally Rare

- 3713** 1791 Washington Liverpool Halfpenny, Copper, AU58 PCGS. Baker-17, W-10650, Musante GW-19, R.6. Ex: Garrett. The 1791 Liverpool halfpenny is sometimes confused with the 1793 Ship halfpenny, but the former is much rarer. This lightly marked golden-brown representative shows the die rust and reverse breaks that are characteristic of the issue. The strike is very sharp for the issue, with nearly complete definition on Washington's epaulets. An opportunity to acquire an example pedigreed to one of the most prestigious collections of early American coinage. Listed on page 83 of the 2018 *Guide Book*. Population: 3 in 58, 1 finer (7/17).  
Ex: Garrett Collection, Part IV (Bowers and Ruddy, 3/1981), lot 1708; Jones Beach Collection (Heritage, 1/2007), lot 750, which realized \$25,300; FUN Signature (Heritage, 1/2017), lot 3041. NGC ID# 2B7H, PCGS# 698

(1781) Betts-615 Libertas Americana Medal  
Original Dies, MS62 Brown

- 3714** (1781) Libertas Americana Medal, Copper, MS62 Brown NGC. Betts-615, Loubat-14. At 48 mm in diameter, struck in bronzed copper, the peerless Libertas Americana medal reigns among the finest examples of medalllic art. It is usually listed with Colonials in American numismatics, given its links to the earliest days of the country and the guiding influence of Benjamin Franklin in its design, and the role it played in the design and mintage of some of the earliest U.S. coinage. It was clearly the model for the Liberty Cap, Head Facing Left design of the 1793 half cent, as well as numerous other medals and tokens that followed in later years.  
While two pieces were reportedly struck in gold (gifted to the King and Queen of England, according to Benjamin Franklin), the medal is only known today in silver and bronze. The silver strikings are very scarce (about 35 exist) and the bronze pieces are only slightly more available with about 100 to 125 examples known. All are in high demand. This is a delightful original bronze representative, glossy and well-struck with medium-brown patina blending into bluish-brown high points. A tiny rim chip at 8 o'clock on the obverse is of negligible significance. NGC ID# CXPN, PCGS# 151815

## HALF CENT

1793 C-1, B-1 Half Cent, XF40  
First Half Cent Variety

**3715** 1793 C-1, B-1, High R.3, XF40 PCGS. Manley Die State 2.0, an intermediate state of the dies. The Cohen-1, Breen-1 1793 half cent is the first in the emission sequence, and therefore, this variety is the first half cent coined by the United States government during the first year of operation at the Philadelphia Mint, following a limited production of pattern or prototype pieces the previous year. This piece has smooth olive-brown surfaces with planchet flaws on each side. The obverse has a line of lamination from the nose to the border, and the reverse has a patch of lamination inside the lower right part of the wreath. Our EAC grade VF30. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

## PROOF BRAIDED HAIR HALF CENT

1848 Half Cent, PR63 Red  
B-2, Restrike, Green Label Holder

**3716** 1848 First Restrike, B-2, R.5, PR63 Red PCGS. Housed in a green label holder with original coppery-pink and orange surfaces that have a few scattered specks and marks, consistent with the grade. The strike is sharp, and the fields are deeply reflective. This issue shows small berries on the wreath and recutting on the T in CENT. There are perhaps 25 or 30 restrike proof 1848 half cents known to survive, although only a handful of these are full Red coins. PCGS lists four Red examples, including one each in PR62, PR63, PR64, and PR67 (8/17). This Select example will be an important acquisition for the proof half cent collector. Our EAC grade PR63. NGC ID# 26ZK, PCGS# 1301

## LARGE CENTS

1793 S-3, B-4 Chain Cent, Good 4  
The Usual Variety

- 3717** 1793 Chain, AMERICA, S-3, B-4, Low R.3, Good 4 PCGS. This variety, S-3, B-4, is about equal in surviving population to all other varieties combined. For that reason, it is the quintessential type coin for the Chain cent design. The date and LIBERTY are visible on the obverse, and most of the reverse lettering is similarly visible on this olive-brown and tan example. Our EAC grade AG3. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-4, B-5 Chain Cent, VF Details  
Periods Obverse

- 3718** 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Environmental Damage — PCGS Genuine. VF Details. Olive and steel-brown surfaces exhibit light corrosion on each side. A few trivial scratches appear within the links of the chain. Other trivial imperfections are also noted on this piece that is an integral part of a complete *Guide Book* collection of early cents. Our EAC grade VG10.

1793 Wreath Cent, AU53  
Vine and Bars Edge, S-8, B-13

- 3719** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, AU53 NGC. Breen Die State II. An impressive first-year cent with the Wreath reverse and Vine and Bars edge. This coin exhibits a horizontal twig and slightly defective 93 in the date, with a triangular bow on the reverse, identifying the popular Sheldon-8 variety. A bulge slants down to the right through the wreath on the reverse, showing an early stage of the die crack that later bisects the reverse along the edge of the bulge. Dramatic clash marks from the wreath are evident below Liberty's chin. The glossy mahogany brown surfaces are lightly abraded, with a trace of granularity in the field behind Liberty's head and just a touch of wear is evident on the strongly impressed design elements. The overall presentation is most attractive. Our EAC grade XF40. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1793 Wreath Cent, XF Details  
Sheldon-9, Vine and Bars Edge

- 3720** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State IV. Moderate surface granularity exists on both sides of this single-year type coin. Deep walnut-brown fields contrast with pleasing steel accents on the raised elements. A few minor rim nicks and a low spot at the dentils near 5 o'clock on the obverse are the most noticeable marks. Struck from a middle die state and generally well-defined despite the environmental factors that determine the assigned designation. Our EAC grade VF20.

1793 Liberty Cap Cent, VG Details  
Sheldon-13, Clear Date and Fraction

- 3721** 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — PCGS Genuine. VG Details. The devices and all legends are easily discernible on this 1793 Liberty Cap cent, although heavy granularity on each side prevents a numeric grade from PCGS. Complete borders surround each side, and the coloration is uniformly deep chocolate-brown. The edge lettering is clear. A couple of tiny rim bumps are noted above the ER in LIBERTY. Our EAC grade Good 5.

1793 Liberty Cap Cent, VF Details  
S-13, Well-Defined Motifs

- 3722** 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State I. The Liberty Cap is the rarest of the three first-year large cent types and is highly sought-after in all grades and varieties. Sheldon-13 shows the L in LIBERTY nearly touching the beads. Almost all known examples of this variety are well-circulated with environmental impairments, and only a single Uncirculated piece is known. The present coin displays bold detail and clear legends. The border beading is complete around both sides. The surfaces display moderate granularity and are deep chocolate-brown. Scattered marks include an old cut on Liberty's jaw. A well-centered and even strike is a hallmark of this piece. Our EAC grade VG10.

1794 Head of '95 Cent, XF40  
S-69, Attractive Surfaces

- 3723** 1794 Head of 1795, S-69, B-61, R.3, XF40 PCGS Secure. CAC. Breen Die State II, clashed and lapped. Sheldon-69 is occasionally available in the upper circulated grades, making for a nice Liberty Cap type coin or date representative. This piece is remarkably attractive, showing smooth chocolate-brown surfaces and bold, evenly struck design elements. The rims are problem-free, and the edge is comparably appealing. A single small tick is seen on the rear base of the bust truncation. Our EAC grade VF25. NGC ID# 223R, PCGS# 35690 Base PCGS# 1365

1795 Capped Bust Cent, AU55  
Plain Edge, S-76b

- 3724** 1795 Plain Edge, S-76b, B-4b, R.1, AU55 PCGS. Breen Die State VI. Clash marks are visible below the chin and in back of the head, below the cap. There is a rim bulge opposite the chin and the dies have been reground, weakening the pole. The pleasing olive-brown surfaces show only minor signs of contact and just a trace of wear is evident on the devices. Eye appeal is outstanding. Our EAC grade AU50. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

1795 S-78 Cent, Plain Edge, AU55  
Bold Central Detail

- 3725** 1795 Plain Edge, S-78, B-8, R.1, AU55 NGC. Breen Die State IV, showing multiple sets of clash marks on each side and a tiny die chip under Liberty's throat. The interior details are well-defined, but the borders are incomplete in places, as usual on this variety. Little high-point wear is discernible. Both sides display mostly smooth, deep burgundy-brown patina. A few light marks seen under a loupe are not distracting. Our EAC grade VF35. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

1795 S-78 Cent, MS63 Brown  
Plain Edge, Exceptional Surfaces

- 3726** 1795 Plain Edge, S-78, B-8, R.1, MS63 Brown PCGS. Breen Die State IV. This popular Plain Edge variety is plentiful overall but conditionally elusive in Mint State. This Select example is satiny and luminous with an original cartwheel effect and pleasing chestnut-brown surfaces with silvery overtones. Numerous clash marks are faintly visible at the cap and within the wreath below TES and OF. Other than a small area of olive discoloration in the field near Liberty's mouth there are no distractions. The surfaces are remarkably smooth and uniform. Exceptional interior sharpness translates to complete border dentils. Eye appeal is outstanding. Our EAC grade MS60. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

1796 Liberty Cap Cent, S-87, XF40  
Smooth, Glossy Surfaces

- 3727** 1796 Liberty Cap, S-87, B-8, R.3, XF40 PCGS. Breen Die State III. The crack through the 7 in the date arcs through the bust to the pole. This piece is only lightly circulated and shows smooth auburn and chestnut-brown surfaces. The obverse rims are weak as struck, but the central devices are bold. A collectible 1796 Liberty Cap variety. Our EAC grade VF30. NGC ID# 223V, PCGS# 35768 Base PCGS# 1392.

1797 Cent, MS63 Brown  
S-123, Reverse of 1797

**3728** 1797 Reverse of 1797, Stems, S-123, B-12, R.4, MS63 Brown PCGS. Breen Die State III. A crack connects the E in ONE to the T in CENT, and another extends downward into the field from the upper serif of the F in OF. The surfaces are smooth and glossy with uniform chestnut-brown and reddish patina. Some wisps of lavender and green appear when tilted beneath a light. Sharp border dentils frame intricately defined central details. An outstanding Draped Bust type coin from the 1700s. Our EAC grade MS60. NGC ID# 2242, PCGS# 35909 Base PCGS# 1422.

1798 S-179 Cent, AU58+  
Second Hair Style, Luster Remains

**3729** 1798 Second Hair Style, S-179, B-37, R.2, AU58+ PCGS. CAC. Breen Die State III. Inverted E in AMERICA. Walnut-brown surfaces retain hints of luster in the fields, but a brush of friction over the devices prevents a Mint State grade from PCGS. This boldly struck S-179 coin has complete border dentils on the reverse and partial dentils on the obverse, which is usually less well defined around the periphery. The surfaces are mostly problem-free aside from a few tiny marks on Liberty's profile. Our EAC grade AU50. NGC ID# 2244, PCGS# 36104 Base PCGS# 1434.

1799 S-189 Cent, XF Detail  
A High-End Example of This Key Date

**3730** 1799 S-189, B-3, R.2 — Environmental Damage — PCGS Genuine. XF Detail. Breen Die State II, exhibiting the die chip “mintmark” in the field above the T in CENT. This briefly circulated piece shows strong detail for the XF level, although uniform granularity is present across each side. The surfaces are deep burgundy-brown and the Liberty portrait has sharp hair curls. The appearance is remarkably similar to that of the Joseph Mickley coin, making this piece among the finer-known examples of Sheldon-189 and an important condition rarity. The typical example is well-worn in the VG or lower levels. This variety features the only use of both dies. As usual for the issue, the present example is bold on LIBERTY and shows the date blending into the rim at the bottom of the numerals. Our EAC grade Fine 15.

1809 S-280, B-1 Cent, MS63 Brown  
Impressive Mint State Example

**3731** 1809 S-280, B-1, R.2, MS63 Brown NGC. Breen Die State VII. The outsized 9 in the date shows traces of repunching, although flowlines to the edge temper the crispness of strike at the perimeters. Still, this Select Uncirculated 1809 is remarkably well-produced and well-preserved for a Classic Head cent. The lustrous, steel-brown surfaces flash glimpses of blue and lavender.

Post-Mint flaws are nearly nonexistent on the fields and devices, which show blending of the dentils but few abrasions or signs of contact. The strike is ideally centered on both obverse and reverse. Virtually all imperfections relate to the state of the dies, with the reverse particularly exemplary in strike and surface quality. While the 1809 is not rare in an absolute sense, any Classic Head cent at the level of the present coin is an opportunity not to be missed. Our EAC grade MS60. Census: 2 in 63 Brown, 2 finer (7/17). NGC ID# 224R, PCGS# 36466 Base PCGS# 1546

1810 Cent, MS63 Brown  
S-282, B-3, Vibrant Surfaces

**3732** 1810 S-282, B-3, R.2, MS63 Brown NGC. Breen Die State III. This glossy and lustrous Select Mint State coin has much to recommend it in comparison with other fine examples of the Sheldon-282 variety. Evenly dispersed umber-brown toning displays faint olive-gold undertones and a vibrant sheen.

A sharp strike shows only nominal incompleteness on star 8 amid flowlines along the right margin characteristic of the die state. The reverse is struck slightly off-center northeast, with some minor rim disturbance where the tops of ATES run up against the edge. Scattered light marks and strike-throughs require close examination with a lens to view. Few Classic Head cents exceed the eye appeal and surface quality of this outstanding coin regardless of variety. Our EAC grade AU58. Census (all 1810 varieties combined): 2 in 63 Brown, 5 finer (7/17). NGC ID# 224S, PCGS# 36475 Base PCGS# 1549

1811 S-287 Cent, MS62 Brown  
Scarce in Mint State Grades

- 3733** 1811 S-287, B-1, R.2, MS62 Brown NGC. Attractive derby-brown color with glimpses of golden luster at the margins add eye appeal to the glossy surfaces of this pleasing 1811 cent. Liberty's hair is sharply defined — the strike is sharp centrally, but less-so at the margins where several stars lack completeness from misaligned dies and slight die bulge along the lower edge. A few marks are scattered about both sides, some of which can be traced to the planchet, which shows a shallow flaw below Liberty's jawline. Conditionally scarce this fine both as a date and for the type. Our EAC grade AU55. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

## PROOF FLYING EAGLE CENT

1856 Flying Eagle Cent, Fine Detail  
Snow-9, Circulated Proof

- 3734** 1856 Snow-9 — Rim Damage — PCGS Proof Genuine. Fine Details. Snow-9 is an often-seen 1856 Flying Eagle cent variety, ideal for the collector seeking a single date representative without the added premium of a rare variety. This example experienced heavy circulation. Wear is even, and both sides have a two-toned appearance with deep chocolate-brown recesses and lighter tan-gold devices. The surfaces are finely granular under a loupe. A few small rim nicks and a light edge bump about 7 o'clock relative to the obverse are the only defects visible, although others may be hidden by the holder tabs.

## INDIAN CENTS

1864 Bronze Indian Cent, MS67 Red  
Tied for Finest-Certified No L Variant

- 3735** 1864 Bronze No L MS67 Red NGC. The composition of the Indian cent was changed from copper-nickel to bronze in 1864 and the coins struck earlier in the year did not include the designer's initial on the ribbon. This spectacular Superb Gem is tied for finest certified, with well-detailed design elements and lustrous original red surfaces that show a few clash marks on both sides. Census: 3 in 67 Red, 0 finer (7/17). NGC ID# 227L, PCGS# 2078

1906 Indian Cent, MS67 Red  
Tied for Finest Certified

- 3736** 1906 MS67 Red PCGS. The Philadelphia Mint struck a large mintage of more than 96 million Indian cents in 1906. The coins were released into circulation and few were saved for numismatic purposes until some interest in the issue developed after World War II. Many circulated examples were culled from circulation during that era and original rolls were sometimes found as late as the 1960s. In MS67 condition, with original red surfaces, the 1906 is an extremely rare issue, and no coins have been certified in higher grades (7/17).

The present coin is a stunning Superb Gem, with impeccably preserved copper-red surfaces that show no mentionable distractions. The design elements are well-detailed, with just a trace of the typical softness on the feather tips. Vibrant mint luster adds to the terrific eye appeal. Population: 3 in 67 Red, 0 finer (7/17). NGC ID# 2293, PCGS# 2225

## PROOF INDIAN CENTS

1864 Copper-Nickel Cent, PR66 Cameo  
Starkly Contrasted

- 3737** 1864 Copper-Nickel PR66 Cameo PCGS. Lavender and peach-yellow hues decorate the mirrored fields of this otherwise tan-gold Premium Gem Cameo. Field-device contrast abounds on both sides, and the strike is razor-sharp. A lone, microscopic speck is almost unseen near Liberty's hairline. No other imperfections are noted. Population: 10 in 66 Cameo, 1 finer; 4 in 66 Deep Cameo, 0 finer (7/17). NGC ID# 229E, PCGS# 82265

1900 Indian Cent, PR68 Red  
Single-Finest Certified Example

- 3738** 1900 PR68 Red NGC. A fairly generous mintage of 2,262 proof Indian cents was accomplished at the Philadelphia Mint in 1900 and collectors prize the issue for its turn-of-the century date. The present coin is the single-finest certified survivor from that important mintage. The design elements exhibit razor-sharp definition throughout, with a moderate coat of mint frost that stands out noticeably against the deeply reflective fields. The impeccably preserved original red surfaces show no distractions that are visible to the naked eye. Overall visual appeal is tremendous. This coin should find a home in the finest collection or Registry Set. Census: 1 in 68 Red, 0 finer (7/17). NGC ID# 22AN, PCGS# 2389

## LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown  
Luminous Surfaces

- 3739** 1909-S VDB MS66 Red and Brown NGC. Satiny mint luster adorns this Premium Gem S-VDB Lincoln cent in warm copper-orange and gold hues, with subtle chestnut accents that determine the Red and Brown color designation. The strike is sharp, and neither side shows abrasions. A few microscopic specks are barely discernible with a loupe. Census: 47 in 66 (4 in 66 ★) Red and Brown, 0 finer; 39 in 66 (1 in 66 ★) Red, 1 finer (7/17). NGC ID# 22B2, PCGS# 2427

1909-S VDB Lincoln Cent, MS65 Red  
Lustrous Original Surfaces

- 3740** 1909-S VDB MS65 Red PCGS. Arguably no U.S. coin series is more heavily collected than the Lincoln cent, and the 1909-S VDB is the most famous key date therein. This Gem Red example displays frosty copper-gold luster and has a sharp strike. A few unobtrusive specks are tucked close to the right-hand rims, and a loupe reveals faint crimson accents in the fields that form a woodgrain pattern. No distracting abrasions are seen. NGC ID# 22B2, PCGS# 2428

1911-S Lincoln Cent, MS66 Red  
None Certified Finer

- 3741** 1911-S MS66 Red PCGS. Just over 4 million Lincoln cents were struck at the San Francisco Mint in 1911 and few high-quality specimens were saved by contemporary numismatists. The 1911-S is a key issue in all grades today, but circulated examples can be located with a little patience, as they were culled from circulation by eager collectors, beginning in the 1930s. At the MS66 grade level, with original red surfaces, the 1911-S is very rare, and no examples have been certified in finer grades (7/17).

The present coin is a spectacular Premium Gem, with impeccably preserved copper-red surfaces that radiate vibrant mint luster from both sides. The design elements are sharply detailed throughout and overall eye appeal is terrific. Population: 16 in 66 Red, 0 finer (7/17). NGC ID# 22B9, PCGS# 2449

1913-D Lincoln Cent, MS66 Red  
None Numerically Finer

- 3742** 1913-D MS66 Red PCGS. CAC. For the Registry Set collector, this full Red Premium Gem is a must-have coin; it is among the finest certified at PCGS, and is also numerically equal to the example in the current highest-rated Registry Set. Rich coppery-orange luster engulfs each side in satiny radiance, while the motifs are sharp and abrasions are nearly nonexistent. A few faint carbon specks are noted in the upper-left obverse field. Population: 22 in 66 (3 in 66+) Red, 0 finer. CAC: 5 in 66, 0 finer (7/17). Ex: PNG New York Invitational (Heritage, 10/2014), lot 4625. NGC ID# 22BE, PCGS# 2464

1914-D Cent, MS65 Red and Brown  
Attractive Color, Strong Strike

- 3743** 1914-D MS65 Red and Brown NGC. The eye appeal of this in-demand key date Lincoln cent is tremendous. Violet and coppery-gold are the primary hues, accented with glints of pale blue and sea-green. The hair, legends, and wheat stalks are strongly impressed, and trivial marks are practically unseen without magnification. Census: 40 in 65 Red and Brown, 27 finer including Red (7/17). NGC ID# 22BH, PCGS# 2472

1914-D Cent, MS65 Red and Brown  
Satiny and Attractive

- 3744** 1914-D MS65 Red and Brown NGC. This Gem 1914-D cent leans heavily toward the Red color spectrum, although subtle burgundy tinting to each side prevents a Red designation from NGC. The pinkish surfaces are satiny and show only a few tiny specks. Well-struck design elements are an equally appealing attribute. Census: 40 in 65 Red and Brown, 3 finer; 20 in 65 Red, 4 finer (7/17). NGC ID# 22BH, PCGS# 2472

1917 Cent, MS65 Red and Brown  
Doubled Die Obverse  
Conditionally Rare *Guide Book* Variety

- 3745** 1917 Doubled Die Obverse, FS-101, MS65 Red and Brown PCGS. Struck from worn, flowlined dies but still sharply defined with good visibility of the die doubling on IN GOD WE TRUST and the date. Satiny original mint luster illuminates gold, plum, amber, and copper-orange hues on each side. No distracting spots are seen. Uncirculated examples of FS-101 are scarce, particularly with remaining copper-red color of any sort. This Gem is among the finest Red and Brown coins at PCGS (7/17). Eye appeal surpasses that of most of its peers. Recently, a Gem Red and Brown PCGS coin realized more than \$10,000 in our June 2016 Long Beach Signature sale. We feel that the present coin is visually superior to that piece. Population: 5 in 65 Red and Brown, 0 finer (7/17). NGC ID# 22BS, PCGS# 37674 Base PCGS# 92496

1919-S Lincoln Cent, MS65 Red

- 3746** 1919-S MS65 Red PCGS. A spectacular Gem representative of this popular early series issue, with razor-sharp definition on the design elements and well-preserved original red surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. Population: 21 in 65 Red, 4 finer, including 1 in 66 Red and Brown (8/17). NGC ID# 22C2, PCGS# 2521

1922 No D Cent, Unc Details  
Die Pair 2, Strong Reverse

- 3747** 1922 No D, Strong Reverse, FS-401 — Lacquer — PCGS Genuine. Unc Details. Die Pair 2. The second 2 in the date is sharp on this, the most desirable of the 1922 No D varieties. The current coin is glossy with iridescent chocolate-brown patina. Thin lacquer prevents a numeric grade, although the remnant of a cartwheel effect produces good eye appeal. There is a subtle area of discoloration at the back of Lincoln's shoulder.

1969-S Lincoln Cent, MS61 Brown  
*Guide Book* Doubled Die Obverse

- 3748** 1969-S Doubled Die Obverse, FS-101, MS61 Brown PCGS. Strong doubling is easily seen on the date and the letters in LIBERTY. The 1969-S Doubled Die Obverse is a rare and sought-after issue that always commands significant premiums. The variety is listed in both the *Guide Book* and *Cherrypickers*. The glossy surfaces of this handsome Mint State specimen have mellowed to a pleasing olive-brown, but only minor signs of contact are evident. The design elements are sharply detailed throughout, and the doubling is plainly evident on the pickup points. This coin will be a welcome addition to a fine specialized collection. Population: 2 in 61 Brown, 4 finer (7/17). PCGS# 37994 Base PCGS# 2921

1972 Cent, MS67 Red  
Doubled Die Obverse  
Conditionally Rare

- 3749** 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. Bold die doubling is visible on the date, IN GOD WE TRUST, and LIBERTY, as well as Lincoln's lapel. Other than a small speck behind Lincoln's head, there are no distractions on this Red Superb Gem. The strike is sharp, and the surfaces display satiny rose-gold and copper-orange coloration. Only a single numerically finer Red example is reported by PCGS. Population: 45 in 67 (1 in 67+) Red, 1 finer (7/17). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

## PROOF LINCOLN CENTS

1916 Cent, PR66 Red and Brown  
Few Available This Fine

- 3750** 1916 PR66 Red and Brown PCGS. In 1916, matte proof Lincoln cent coinage dipped to only 1,050 pieces, making this issue the second-scarcest in the matte proof series, trailing on the 1909 VDB. This Premium Gem example displays thick matte luster and a full strike. Copper-orange and gold hues are dominant, although lavender-red, olive, and russet hues appear under a loupe and define the Red and Brown color designation. Population: 23 in 66 (1 in 66+) Red and Brown, 4 finer; 5 in 66 Red, 0 finer (7/17). NGC ID# 22KZ, PCGS# 3325

1941 Cent, PR67 Red  
Tied for Finest Certified  
Registry Set Essential

- 3751** 1941 PR67 Red PCGS. The 1941 proof Lincoln cent is plentiful in most grades but becomes rare at the Superb Gem Red level. PCGS lists only eight submissions in PR67 Red and none finer, while NGC contributes just 10 more in this grade, also with none finer (7/17). No Cameos are known. These rare, top-tier coins are actively sought-after by Registry collectors. This piece is fully struck from highly polished dies, delivering watery, copper-orange fields that display unsurpassed preservation. A couple of tiny flecks appear near the T in TRUST, but there are no other mentionable imperfections. Eye appeal is outstanding. NGC ID# 3H34, PCGS# 3350

1969-S Cent, PR65 Cameo  
Spectacular Obverse Rim Break

- 3752 1969-S — Major Die Break — PR65 Cameo ANACS.** This 1969-S proof Lincoln cent has a large rim break at the upper right obverse, covering all but the first letter of TRUST. The cud measures approximately 3.5 by 6 mm. The piece has attractive field-to-device contrast with delicate lilac toning on its brilliant orange proof surfaces. The strike is bold, save for characteristic reverse weakness opposite the rim break. Another variety of 1969-S Lincoln cent is known with a major obverse rim break, but this is the only occurrence on a proof. NGC ID# 22LY, PCGS# 3422

TWO CENT PIECE

1869 Two Cent, MS66+ Red and Brown  
Almost Fully Mint Red, CAC-Endorsed

- 3753 1869 MS66+ Red and Brown PCGS. CAC.** This high-end Premium Gem leans heavily toward the Red side of the Red and Brown color scheme, showing only a hint of chestnut tinting to the satiny copper-orange surfaces. The strike is bold, and a few tiny specks are not distracting. The 1869 two cent piece is a rarity in this grade, regardless of color designation. Brown Premium Gems are almost nonexistent, and full Red examples are extremely rare. Population: 17 in 66 (1 in 66+) Red and Brown, 0 finer; 3 in 66 Red (2 in 66+), 1 finer. CAC: 6 in 66, 0 finer (7/17). NGC ID# 22ND, PCGS# 3604

PROOF THREE CENT SILVER

1866 Three Cent Silver, PR66+ Cameo  
Terrific Quality, Low Total-Mintage Issue

- 3754 1866 PR66+ Cameo PCGS. CAC.** The low circulation-strike mintage of 22,000 pieces for the 1866 accounts for added date pressure on well-preserved, attractive proofs like this. Proofs (725 coins struck) tend to be more available, but we should note that comparable Premium Gem specimens, especially those with the approval of CAC, are condition rarities in their own right. Variegated purple and orange border toning blends with pastel shades of blue and and rose centrally. A terrific all-around example of the date. Population: 13 in 66 (4 in 66+) Cameo, 4 finer. CAC: 12 in 66, 9 finer (7/17). NGC ID# 27CC, PCGS# 83716

1867 Three Cent Silver, Multicolor PR67  
Remarkable Mirrored Patina

- 3755 1867 PR67 NGC. CAC.** Spectacular apple-green, cherry-red, and peach-gold patina endows this fully struck and pristine specimen. Three cent silver pieces were replaced by fractional currency and three cent nickels during this period, explaining 1867 three cent silver's low mintage of 4,000 business strikes and 625 proofs. Census: 11 in 67 (2 in 67+★), 1 finer. CAC: 5 in 67, 0 finer (8/17). NGC ID# 27CD, PCGS# 3717

1867 Three Cent Silver, PR67  
Top-Grade Proof at PCGS

- 3756 1867 PR67 PCGS. CAC.** Olive-green, lavender-gray, and pale gold hues make up the concentric toning of this Superb Gem proof. The strike is razor-sharp throughout the interior motifs and the peripheral stars, and the fields are deeply mirrored. This is among the finest non-Cameos reported by PCGS and is a major rarity as such. Population: 4 in 67 (1 in 67+), 0 finer; 6 in 67 Cameo (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (7/17). NGC ID# 27CD, PCGS# 3717

## PROOF THREE CENT NICKELS

1884 Three Cent Nickel, PR67 Deep Cameo  
Among the Finest Deep Cameos at PCGS

**3757 1884 PR67 Deep Cameo PCGS.** This Superb Gem example is among the finest of just four Deep Cameos certified by PCGS (3/15). Outstanding surface preservation complements stark field-motif contrast, while both sides show a hint of light golden color. Heavy die polishing is evident in the recessed regions of the devices. Population: 3 in 67 (1 in 67+) Deep Cameo, 0 finer (7/17). NGC ID# 2766, PCGS# 93780

1887/6 Three Cent Nickel, PR67+ Cameo  
Strong Overdate, Tied for Finest at PCGS

**3758 1887/6 FS-302 PR67+ Cameo PCGS.** CAC. Ex: TDP Collection. Strong Overdate, the underlying 1886 is clearly visible beneath the primary date. This piece is fully struck and nearly pristine with appreciable cameo contrast. A hint of light champagne toning on each side only increases the visual appeal. This issue is rare in Superb Gem condition, and the present Plus-graded, CAC-approved Cameo is tied as the finest at PCGS. Population: 10 in 67 (2 in 67+) Cameo, 0 finer. CAC: 6 in 67, 0 finer (7/17). NGC ID# 276A, PCGS# 416357 Base PCGS# 83784

## PROOF SHIELD NICKELS

1866 Rays Nickel, PR66+  
Inaugural Issue, Two-Year Type

**3759 1866 Rays PR66+ PCGS.** CAC. The *Guide Book* reports an estimated mintage of 600+ proof nickels with the first-year Rays design. Official totals were not kept for minor proof coinage during that period. The devices are frosted and produce moderate contrast against the exceptionally clean and brightly reflective fields. Eye appeal is excellent. Population: 42 in 66 (2 in 66+), 45 finer including Cameo and Deep Cameo. CAC: 5 in 66, 14 finer (7/17). NGC ID# 276G, PCGS# 3817

1877 Nickel, PR66  
Only Struck in Proof Format

**3760 1877 PR66 PCGS.** The supply of minor coinage was sufficient to satisfy the needs of commerce in 1877, as a long-lasting period of economic contraction continued to affect the United States and much of the Western world during the Long Depression. The Mint struck 900 proof nickels for collectors that year. This brilliant Premium Gem has hazy fields that somewhat obscure the reflectivity. Population: 39 in PR66 (1 in PR66+), 57 finer including Cameo and Deep Cameo (7/17). NGC ID# 276U, PCGS# 3831

## LIBERTY NICKEL

1886 Liberty Nickel, MS66  
Sought-After Key, Registry Grade

**3761** 1886 MS66 PCGS. From a small mintage of 3.3 million pieces, the 1886 Liberty nickel is generally considered the second-rarest issue of the series, just behind its 1885-dated counterpart. However, the 1886 seems to be even rarer than the 1885 in high grade. Contemporary collectors preferred to update their collections of Philadelphia Mint coins by purchasing proof examples every year, so few high-quality business strikes were saved.

The present coin is a delightful Premium Gem, with well-detailed design elements that show a touch of the usual softness on some star centers and the lower wreath. The well-preserved surfaces radiate vibrant mint luster, with a few hints of pale gold toning. Eye appeal is outstanding. Population: 10 in 66 (2 in 66+), 0 finer (7/17). NGC ID# 277U, PCGS# 3847

## BUFFALO NICKELS

1918/7-D Nickel, XF40  
Guide Book Overdate, FS-101

**3762** 1918/7-D FS-101 XF40 NGC. CAC. The overdate feature is clearly visible on this lightly circulated representative. Even olive-gray patina blankets each side, while the design elements are boldly detailed for the grade. The first recorded auction appearance of this variety was in 1930, and while the overdate is not necessarily the rarest variety in the Buffalo nickel series, it has endured as the most sought-after. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

1921-S Nickel, Golden-Toned MS65  
Better Date, Scarce This Fine

**3763** 1921-S MS65 NGC. The 1921-S has one of the lowest mintages of the series with only 1.55 million pieces produced; unlike the 1931-S, which has a similarly low mintage, few '21-S nickels were set aside. This Gem has medium chestnut and golden-gray toning. The date and mintmark are well-struck, and even the central devices have strong detail. A minor mint-made lamination affects the tip of the horn. Struck from clashed dies with striated fields, as made. Census: 37 in 65 (2 in 65 ★), 5 finer (7/17).  
Ex: ANA Signature (Heritage, 3/2007), lot 281; Los Angeles Signature (Heritage, 8/2009), lot 308. NGC ID# 22RU, PCGS# 3948

**1926 Buffalo Nickel, Superlative MS67+  
CAC Endorsed, None Finer at PCGS**

**3764 1926 MS67+ PCGS. CAC.** While Gem and even Premium Gem examples of the 1926 are readily available, the issue only occasionally reaches the MS67 level and Superb Gem coins are significant condition rarities. More than 44 million pieces were struck, often with widely spaced, worn dies that limited sharpness of strike and compromised surface quality.

In terms of eye appeal and sharpness, the present example nothing short of stunning. The Chief's chiseled features display ice-blue shades softened by lemon-yellow and lavender highlights. Vibrant orange-gold shades grace the peripheries. Buff-gold and sky-blue join the palette on the reverse. Struck from fresh dies, the foreleg fur and braidknot definition are above average and the strike is sharp throughout. This is a superlative nickel for Registry Set purposes or for high-grade type — Plus-graded, and tied at the top of the PCGS population with one other piece. No examples are certified by PCGS any finer. Population: 48 in 67 (2 in 67+), 0 finer. CAC: 11 in 67, 0 finer (7/17). NGC ID# 22S5, PCGS# 3957

**1926-S Nickel, Satiny MS63  
Attractive Original Toning**

**3765 1926-S MS63 PCGS.** The 1926-S boasts the lowest mintage of the Buffalo nickel series at 970,000 pieces. Mint State coins are elusive in pleasing condition and are rarely seen at the Gem level. Worn reverse dies are the norm, and the bison's head and other design elements are normally weak. The example in this lot exhibits an above-average strike, though portions of the Indian's hair are soft. Most of the bison, with the exception of the hair on the head and the tail, reveals decent detail, and the horn is quite sharp. The peripheral elements are bold, save for the top portions of the letters in LIBERTY. Light golden-gray toning overlays lustrous surfaces, revealing subtle light blue, crimson and yellowish hues. A few small ticks on the Indian's cheek are not bothersome.

Ex: FUN Signature (Heritage, 1/2005), lot 5901; Long Beach Signature (Heritage, 6/2011), lot 3248. NGC ID# 22S7, PCGS# 3959

**1927-D Nickel, MS65  
Few Pieces Available Finer**

**3766 1927-D MS65 PCGS. CAC.** This Gem 1927-D is well-preserved and satiny with yellow-gold and mint-green toning overall. The strike is weakly executed on the bison's shoulder and the Indian's hair. Some metal flowlines in the fields denote worn dies, as usual. Finer 1927-D nickels are rarely encountered. Population: 82 in 65 (9 in 65+), 7 finer. CAC: 22 in 65, 1 finer (7/17). NGC ID# 22S9, PCGS# 3961

**1927-D Nickel, MS65+  
Seldom Available Any Finer**

- 3767 1927-D MS65+ PCGS. CAC.** The strike and natural appeal of this high-end Gem nickel are outstanding. The Bowers reference describes the 1927-D as "poorly detailed to minimally average," yet this coin is remarkably bold for the issue. The worn dies were often widely spaced, contributing to weakness in the centers and die erosion at the borders — two distractions not seen on this example. The nickel-gray surfaces are satin-smooth, essentially mark-free, and attractive, with a hint of warmth from occasional pale champagne-gold overtones. A Plus-graded Gem with CAC endorsement. Population: 82 in 65 (9 in 65+), 7 finer. CAC: 22 in 65, 1 finer (7/17). NGC ID# 22S9, PCGS# 3961

**1937-D Three-Legged Nickel, MS64  
FS-901, Perennial Collector Favorite**

- 3768 1937-D Three-Legged, FS-901, MS64 NGC.** This long-time *Guide Book* listing is a perennial fan-favorite. The missing leg is completely eliminated by die lapping on this Choice example. Each side is satiny nickel-gray, and while the obverse is well-struck with minor die erosion near the rims, the reverse lacks bold detail on the bison's head. A couple of stray ticks limit the grade, but they are of little consequence. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS64+  
Impressively Well-Struck**

- 3769 1937-D Three-Legged, FS-901, MS64+ PCGS.** The bison's right front leg is effaced by die lapping on this ever-popular variety, while the fields and recesses of the Indian portrait show metal flowlines from die fatigue. The mintmark is clear, and this piece is remarkably sharp on the central devices where incomplete details usually are apparent. This high-end near-Gem will please the Buffalo nickel specialist who appreciates the difficulty of finding a 1937-D Three-Legged nickel with decent eye appeal. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**PROOF BUFFALO NICKELS**

**1913 Type One Buffalo Nickel, PR67  
Nicely Toned, Only Year of Issue**

- 3770 1913 Type One PR67 NGC.** The Type One matte proofs maintain a high level of popularity, not because of their absolute or even condition rarity, but rather because they are only available in this one year. This is certainly a well-preserved example. Only one tiny spot can be found on the surfaces. Both sides show remarkable toning, displaying rich rose and lilac toning. Intricately detailed. Census: 37 in 67 (2 in 67★), 4 finer (7/17). NGC ID# 278R, PCGS# 3988

**1936 Buffalo Nickel, PR68  
Brilliant Finish, Tied for Finest at NGC**

- 3771 1936 Type Two — Brilliant Finish PR68 NGC.** The Type Two 1936 is the first brilliant finish proof in the Buffalo nickel series. It is available in most grades and only marginally scarce in PR67, but this PR68 coin is rare. NGC has certified only 19 pieces this fine and none finer (8/17). The surfaces are brilliant and deeply reflective. Full design definition is present, and no contact marks are seen. NGC ID# 278Y, PCGS# 3995

**JEFFERSON NICKELS**

**1942-D Nickel, MS64 Five Full Steps  
FS-501, D Over Horizontal D**

- 3772 1942-D D Over Horizontal D, FS-501, MS64 Five Full Steps NGC.** Full Steps examples of this popular *Guide Book* variety are rare in as fine condition as the present piece. The Choice Mint State surfaces deliver satiny luster cast in warm golden toning that deepens to lavender hues around the peripheries. A loupe reveals a few small, inconsequential marks. Suitable for Registry purposes. Census: 3 in 64 Full Steps, 1 finer (7/17). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

1946-S Nickel, MS67 Full Steps  
Tied With One Other as the Finest at PCGS

**3773 1946-S MS67 Full Steps PCGS.** This sharp Superb Gem is tied for the finest Full Steps 1946-S nickel certified, and it is one of only two pieces in this grade at PCGS (8/17). The surfaces are seemingly pristine under a loupe. Satiny, luminous luster has a delicate champagne hue, and the design elements exhibit virtually full definition. An unsurpassed and arguably unequaled Registry coin. NGC ID# 22U4, PCGS# 84030

1951-D Nickel, MS67 Full Steps  
Lavender and Peach-Tinted Luster  
Among the Finest Certified

**3774 1951-D MS67 Full Steps PCGS.** PCGS lists four MS67 Full Steps coins as the finest 1951-D nickels at that service, while NGC lists three in this grade with an MS67+ Full Steps coin arguably finer (8/17). With some duplication possible from crossovers, the 1951-D is an undeniable rarity in this grade and a must-have item for the Registry Set collector. This piece is well-struck and frosty with luminous lavender and peach surfaces. Eye appeal abounds. NGC ID# 22UH, PCGS# 84044

PROOF JEFFERSON NICKEL

1952 Nickel, PR68 Deep Cameo  
Brilliant, Pristine Surfaces  
Condition Census Registry Coin

**3775 1952 PR68 Deep Cameo PCGS.** Deep Cameo proof 1952 Jefferson nickels are rare in all grades, and pieces grading finer than the present example are nearly uncollectible. This Condition Census proof displays needle-sharp devices and seemingly flawless preservation. The brilliant surfaces exhibit stark cameo contrast. Population: 6 in 68 Deep Cameo, 1 finer (7/17). NGC ID# 27A6, PCGS# 94184

EARLY HALF DIMES

1800 Draped Bust Dime, AU58  
V-1, LM-1 Variety

**3776 1800 V-1, LM-1, R.3, AU58 NGC.** The late die state rim cud below the date has not yet developed on this near-Mint 1800 half dime. However, just to the left of the future cud location and still beneath the date is a small, jagged planchet clip that appears mint-made. The remainder of the rims are well-defined, and the interior devices show sharp definition. Golden, lavender, and pale blue toning appear in the fields amid remnants of delicate original luster. The eye appeal of this piece is magnificent for the collector who appreciates original, old-time coloration. Census (for the variety): 3 in 58, 1 finer (7/17). NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

**1802 Half Dime, V-1, LM-1, Fine Details**  
**One of Only 32 Distinct Examples Known**

- 3777 1802 V-1, LM-1, Amato-119, R.5 — Bent — PCGS Genuine. Fine Details.** The 1802 half dime is one of the classics in U.S. numismatics. The mintage is unknown, with there being a variance between the number recorded struck in the calendar year (13,010 pieces) and the number believed to have actually been struck bearing the 1802 date (3,060 pieces). Only 32 distinct examples were discovered by Jon Amato during the years he researched his definitive reference on the series. Medium gray-violet patina covers each side with darker accents surrounding the devices. Numerous marks are distributed over each side.

*Ex: A. Bernard Shore Collection (Superior, 1/1988), Details of Fine 12 or so, but damaged, lot 833; Fred J. Casterline and Brooks Hall Collections Sale (Superior, 1/1989), About Good 3, lot 1228.*

It is our sad duty to report the death of cataloger and researcher extraordinaire, Jon Amato. Jon worked for several years on his comprehensive reference *Numismatic Background and Census of 1802 Half Dimes*. This slim 64-page work covers all known 1802 half dimes. His work was awarded the NLG's award for best specialized book at the ANA on August 3.

**BUST HALF DIME**

**1836 Half Dime, Toned MS66**  
**V-2, LM-4, Small 5C, Condition Census**

- 3778 1836 Small 5C, V-2, LM-4, R.2, MS66 PCGS.** LM-4 shows repunching on several stars, and the O in OF is recut. This is a Small 5C variety, all three of which are collectively rare in MS66 or better condition. This Premium Gem is razor-sharp and satiny with unabraded surfaces. Original olive, lavender-gold, and aqua-gray toning blankets each side. Population (all varieties included): 9 in 66 (2 in 66+), 3 finer (7/17). NGC ID# 232J, PCGS# 38727 Base PCGS# 4288

**PROOF SEATED HALF DIME**

**1863 Seated Half Dime, PR68**  
**Finest-Certified Example**

- 3779 1863 PR68 NGC.** This delightful specimen is the finest certified survivor from a tiny proof mintage of 460 pieces. Spectacular rings of cobalt-blue toning surround deep emerald-green centers, with deeply mirrored fields underneath. The design elements display razor-sharp definition and the surfaces are immaculately preserved. Census: 1 in 68, 0 finer (7/17). NGC ID# 235Y, PCGS# 4446

## EARLY DIMES

1792 Copper Disme, Judd-10, AU50  
The Eighth Finest of 19 Known Examples

**3780 1792 Disme, Judd-10, Pollock-11, High R.6 AU50 PCGS.** Reeded edge. Ex: Liberty Collection. The obverse peripheral legend LIBERTY PARENT OF SCIENCE & INDUSTRY encircles an attractive central portrait of Liberty facing left, her locks flowing downward and to the right behind her head. The date 1792 is below, the flag of the 1 touching the lower bust truncation. On the reverse, a rather ungainly fledgling eagle dominates the center, with UNITED STATES OF AMERICA around and DISME below. The eagle's wingtips touch the T in UNITED and the E in AMERICA. The Judd-10 was struck in copper, with most examples showing normal vertical edge reeding. The design was also struck in silver with reeded edge (Judd-9), of which three pieces are known today, one of them a thick planchet specimen with the date removed. Three survivors also are known of the plain-edge copper version (Judd-11).

The fledgling U.S. Mint began operations in 1792 with a limited production of pattern coins in anticipation of regular production that began early the next year. Silver half dismes, although not actually coined within the physical Philadelphia Mint building, were the first regular issue coins produced by the government following Congressional approval with the Mint Act of April 2, 1792. Today we are unable to determine which, if any, 1792 pattern coins were actually produced within the Mint's walls late in 1792.

David Rittenhouse was appointed to the post of Mint Director, and he set about assembling a staff to operate the facility. He recruited Tristram Dalton to serve as the Mint treasurer early the following month. Other officers came along in due time. The actual designers of the various 1792 pattern issues remains undetermined in most cases. Robert Scot was appointed as Mint engraver in November 1793. Prior to that time, Joseph Wright provided designs for the 1793 Liberty Cap cent, and perhaps other coins, prior to his death in September 1793. It is likely he would have occupied the engraver's position at the Mint if he had survived the 1793 yellow fever epidemic. Other names of possible designers include Birch who prepared the 1792 pattern cent that bears his name, and Adam Eckfeldt who served at the Philadelphia Mint for nearly 50 years. Circumstantial evidence points to Eckfeldt as the designer of the 1792 dismes. The precise identities of some of the early designers and engravers in Mint history are "shrouded in archival mist," as Joel Orosz and Leonard Augsburger write in *The Secret History of the U.S. Mint*.

This splendid example displays faint bluish olive-brown toning with hints of tan. The surfaces are pleasing and the strike is bold. Minor planchet lamination appears vertically at the left side of the reverse. In our catalog of the Partrick Collection that we sold in the January FUN sale, we presented a roster of 19 known examples, including this piece that was ranked in eighth place on that roster. Surviving examples range from Specimen 65 to Poor 1. The successful bidder will treasure this remarkable piece for many years to come. NGC ID# 294H, PCGS# 11026

1796 Draped Bust Dime, JR-2, XF45  
Highly Sought First-Year Issue

**3781** 1796 JR-2, R.4, XF45 PCGS. The E and R in LIBERTY are too close together, as if the R is bumped out of the way. Likewise, the 7 and 9 in the date are closely spaced, while the 1 and 6 are distant. Slightly scarcer than other 1796 varieties, the JR-2 is sought for first-year type as the initial year of federal dimes, as well as the inaugural use of the Small Eagle reverse. This Choice XF example is sharp at the centers with a trace of plumage remaining on the eagle's breast. Golden highlights accent the minimally marked surfaces, framed by bluish-gray borders. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

1805 Draped Bust Dime, MS63  
Popular JR-2 Variety

**3782** 1805 4 Berries, JR-2, R.2, MS63 PCGS Secure. A substantial mintage of 120,780 Draped Bust dimes was accomplished in 1805, with two die varieties known for the date. The two varieties employed the same obverse die, but they are easily differentiated by the number of berries in the olive branch on the reverse. The present coin represents the JR-2 variety, with four berries in the branch. The JR-2 reverse also has narrow A's in the legend and shares some other characteristics with earlier reverse dies. It is possible that the reverse was engraved at an earlier date, perhaps as early as 1798. The JR-2 is the more available variety, making it a favorite choice of type collectors.

The coin offered here is an attractive Select specimen, with sharply detailed central design elements and just a touch of flatness on some stars. Both sides show clash marks, those on the reverse are especially dramatic. Some faint planchet adjustment marks are evident on the bust but signs of contact are minimal. The mostly brilliant surfaces show a few subtle hints of greenish-gold toning and eye appeal is outstanding. Population: 2 in 63, 4 finer (7/17). NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

## BUST DIMES

1814 Capped Bust Dime, MS65  
Large Date, JR-4

- 3783** 1814 Large Date, JR-4, R.2, MS65 PCGS. The 1814 Capped Bust dime claims a substantial mintage of 421,500 pieces, with five die varieties known for the date. This coin represents the JR-4 variety, with the second 1 in the date positioned left of the lowest curl and no period after C in the denomination. The JR-4 is an available issue in absolute terms, but high-grade specimens are elusive. The present coin is a spectacular Gem representative, with well-detailed design elements and lustrous surfaces that show interesting clash marks on both sides. From a late state of the dies, an extensive network of die cracks is evident on the reverse and the dentilation is weak in many areas. A few hints of lavender and pale gold toning add to the outstanding eye appeal. Population: 6 in 65 (1 in 65+), 3 finer (7/17). PCGS# 38776 Base PCGS# 4488

1827 JR-6 Dime, MS64+  
Semiprooflike Fields

- 3784** 1827 Pointed Top 1, JR-6, R.2, MS64+ PCGS. CAC. Over the last 24 years since we started our Permanent Auction Archives in 1993, we have only handled seven equal or finer grade examples of this die marriage. This Plus-graded Choice Mint State example displays reflective silver fields and brilliant ivory devices. Delicate blue-steel and golden-brown toning is limited to the peripheral obverse and reverse. Population (for all 1827 varieties combined): 3 in 64+, 16 finer (7/17). NGC ID# 2375, PCGS# 38816 Base PCGS# 4504

1829 JR-2 Dime, Toned MS66  
Large 10C, Exceptional Preservation

- 3785** 1829 Large 10C, JR-2, R.2, MS66 NGC. JR-2 is a plentiful variety but in this condition the 1829 dime as a whole is rare. Luminous original mint luster gives this Premium Gem type coin exceptional eye appeal along with original shades of lavender, blue, and orange-gold toning. The stars are intricately defined, but some strike weakness occurs toward the centers on the fletchings and the top point of the eagle's left (facing) wing. Not a single significant abrasion is observed. Census (all varieties included): 9 in 66 (1 in 66+), 1 finer (7/17). PCGS# 38840 Base PCGS# 94511

## SEATED DIMES

1873 Closed 3, No Arrows Dime, MS66  
Fortin-103, FS-301, Repunched Date

- 3786** 1873 Closed 3, No Arrows, Repunched Date, F-103, FS-301, R.3, MS66 PCGS. A Top 100 Seated Dime Variety. Struck early in 1873 prior to passage of the infamous Mint Act of 1873, this Closed 3 Premium Gem dime preceded the requirements for an increase in weight signified by arrows added on either side of the date, and the dictate for an Open 3 in the date. The coin is frosted and colorfully toned — sharply struck throughout — with all four digits in the date repunched, tied for finest at PCGS. A diagnostic diagonal die line in the lower gown confirms the Fortin-103 variety. Population (all Closed 3 varieties): 5 in 66, 0 finer (7/17). NGC ID# 23AA, PCGS# 145494 Base PCGS# 4659

1873-CC Arrows Dime, VF25  
Attractive Example of This Key Issue

- 3787 1873-CC Arrows, F-101, R.4, VF25 PCGS.** The Mint Act of February 12, 1873 mandated an increase in the weight of silver coins to stimulate their circulation in commerce. Arrows were added to the left and right of the date to signify the change in weight, creating a popular two-year subtype. The 1873-CC is frequently overshadowed by its unique No Arrows counterpart, though it remains one of the undisputed key dates in the Seated Liberty dime series. From a reported mintage of only 18,791 coins, CoinFacts estimates 125 pieces survive. Unlike many 1873-CC dimes, this example has not been cleaned. The surfaces are original and the only “problems” are a couple of grade-consistent marks in the center of the reverse. NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

1873-CC Arrows Dime, Choice VF  
A Challenging Carson City Key

- 3788 1873-CC Arrows, F-101, R.4, VF35 PCGS.** The 1873-CC dime is a scarce issue in all grades, but it is a genuine rarity above the VF level. This example is as close to XF as a VF coin gets. Wear is even, and good detail remains in the gown folds and the wreath, with all of LIBERTY crisp and clear. Light gray and deeper olive hues make up the patina. The surfaces are free of significant contact marks. Population: 8 in 35, 12 finer (7/17). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

PROOF SEATED DIME

1874 Arrows Dime, PR66 Cameo  
Among the Finest With Contrast

- 3789 1874 Arrows, F-101, PR66 Cameo NGC.** A stunning “black and white” Premium Gem Cameo proof, this glittering With Arrows dime has excellent contrast between the deeply mirrored fields and sharply defined, frosty white devices. Lovely peripheral iridescence on each side adds to its aesthetic appeal. Census: 4 in 66 Cameo, 0 finer (8/17).  
Ex: New York Signature (Heritage, 12/2011), lot 3388. PCGS# 539481 Base PCGS# 84770

BARBER DIMES

1893 Barber Dime, MS67  
Sharp and Attractively Toned  
Among the Finest Certified

- 3790 1893 MS67 PCGS.** The 1893 Barber dime is generally an available date, but Superb Gem examples are rarely encountered. Fewer than a dozen such coins are reported by PCGS and NGC combined. This Condition Census coin is razor-sharp and luminous with unabraded surfaces. Original olive-gray, gold, and lavender hues adorn each side. Population: 5 in 67 (2 in 67+), 0 finer (7/17). NGC ID# 23DN, PCGS# 4800

1895 Barber Dime, MS66  
Elusive P-Mint Issue

- 3791 1895 MS66 PCGS.** From a small mintage of 690,000 pieces, the 1895 Barber dime is the rarest Philadelphia Mint issue of the series. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved surfaces, under attractive shades of lavender-gray and golden-tan toning. Satiny mint luster shines through the patina. Population: 24 in 66 (13 in 66+), 4 finer (7/17). NGC ID# 23DV, PCGS# 4806

1895 Barber Dime, MS66+  
Attractive Multicolor Toning

- 3792 1895 MS66+ PCGS Secure. CAC.** Ex: Simpson. Mingled shades of champagne-gold, amber, and lilac toning enhance the well-preserved surfaces of this delightful Plus-graded Premium Gem. The design elements are sharply detailed throughout and both sides radiate vibrant mint luster. From a smallish mintage of 690,000 pieces. Population: 24 in 66 (13 in 66+), 4 finer. CAC: 6 in 66, 4 finer (7/17). NGC ID# 23DV, PCGS# 4806

## MERCURY DIMES

1916-D Mercury Dime, XF45  
Lightly Toned, Ultimate Series Key

- 3793 1916-D XF45 PCGS.** The Denver Mint was instructed to focus solely on the production of quarter dollars after November 24, 1916. It managed an output of 264,000 examples of the new Mercury dime before that point. The low mintage famously ranks the 1916-D as the ultimate series key. This Choice XF dime has pale almond-gold elements over silver-gray surfaces. The highest points are slightly worn and thin marks are scattered over each side, but the date and mintmark are boldly impressed. NGC ID# 23GY, PCGS# 4906

1925-D Mercury Dime, MS66 Full Bands  
Strike Rarity in the Series

- 3794 1925-D MS66 Full Bands PCGS.** A group of only 500 or so 1925-D Mercury dimes survives with Full Bands, according to PCGS CoinFacts. That places the issue firmly within the top quartile of strike rarities in the series. The 1925-D is also a condition rarity in this high grade. We note a single tick on the cheek. Otherwise, each brilliant side is practically flawless and sharply struck in the centers. Glints of golden-rose color mix with satiny luster. Population: 29 in 66 (2 in 66+) Full Bands, 4 finer (7/17). NGC ID# 23HN, PCGS# 4951

1928 Dime, MS67+ Full Bands  
Beautiful Border Toning

- 3795 1928 MS67+ Full Bands PCGS. CAC.** This Superb Gem Philadelphia coin is conditionally rare and seemingly pristine under a loupe. Not only are the fasces bands sharp, but the peripheral legends are boldly brought up. Silvery interiors are frosty and unabraded, surrounded by vivid forest-green, violet, and gold border toning. Eye appeal is outstanding. Population: 41 in 67 (4 in 67+) Full Bands, 1 finer (7/17). NGC ID# 23HX, PCGS# 4967

## PROOF TWENTY CENT PIECES

1877 Twenty Cent Piece, PR61  
Colorfully Toned

- 3796 1877 PR61 PCGS. BF-1.** A proof-only issue with only 510 pieces struck, many of which went unsold. The fields are brightly reflective and each side shows near-brilliant centers that are surrounded by pale rose and then sea-green toning. Hairlining is obvious on each side, as one would expect for a PR61. NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent, Richly Toned PR63  
Only 350-Piece Net Distribution

- 3797 1877 PR63 PCGS. BF-1.** After unsold pieces were melted, the net mintage for 1877 twenty cent pieces is believed to be around 350 pieces, all proofs. The fields show remarkably deep mirroring, evident even through the significant presence of toning. Speckled gray-rose patina deepens several shades around the margins. The strike is pinpoint-sharp with complete details evident even at the top of the eagle's left (facing) wing. NGC ID# 27H4, PCGS# 5305

## EARLY QUARTER

1796 Quarter Dollar, VG8 Details  
B-2, Bold Date and Eagle

- 3798 1796 B-2, R.3 — Plugged, Repaired, Whizzed — ANACS. VG8 Details.** Tompkins Die State 1/1. A crudely plugged hole still shows tool marks right of the date, and the corresponding O in OF is reengraved. The surfaces are granular and have scattered marks and light scratches. Varying shades of gray patina appear across a mildly glossy surface texture. The devices, date, LIBERTY, and most of the peripheral reverse legend are clear. Portions of the reverse rim are weak due to an uneven strike from the screw press. An affordable Small Eagle type coin. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

## BUST QUARTER

1821 B-1 Quarter Dollar, MS65  
The Finest Known by Two Points  
The Browning Plate Coin

**3799** 1821 B-1, R.3, MS65 NGC. CAC. Ex: "Col." E.H.R. Green. This impressive Gem is the finest known example, two points better than second-place in the Condition Census. It is plated in the Browning reference. Only eight Mint State examples of the 1821 B-1 quarter are recorded. *Early Quarter Dollars of the United States Mint* was published in 2010, and included a Condition Census for each variety, compiled by Rory Rea, Jim Koenings, and Aram Haroutunian. A special thanks is extended to those individuals for their tireless work that allows all collectors to know where their own coins rank.

The mintage of quarter dollars was 216,851 coins in 1821, produced from six die marriages. The average production of 36,142 coins per die pair is consistent with several other years of the large size Capped Bust quarters.

This Gem, formerly in the Eric P. Newman Collection, is an early die state with no visible die cracks. The obverse exhibits rich blue, gold, and reddish-gray toning around light silver at the center. The reverse is primarily brilliant light silver-gray with peripheral splashes of gold and blue. Census for all 1821 varieties: 7 in 65, 4 finer (7/17).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33342, where it realized \$30,550. NGC ID# 23RM, PCGS# 38963 Base PCGS# 5331

## SEATED QUARTERS

1853 Arrows and Rays Quarter, MS65  
A Richly Toned and Lustrous Example

**3800** 1853 Arrows and Rays MS65 PCGS. The Arrows and Rays issue of 1853 is one of the most common Seated Liberty quarters in circulated grades. Even the most rudimentary collections will usually have a well-worn example. With a mintage of over 15 million pieces, this is not surprising. However, those seeking a Gem or better example of this issue will face a challenging pursuit. Quarter dollars were one of the workhorses of commerce in the 19th century and — with the exception of a handful of pieces — it is apparent that all of the 1853 Arrows and Rays quarters entered circulation. This is a splendid, deeply toned example that displays subtly variegated deep gray, olive, and rose patina on each side, but the reverse is several shades lighter in hue. The mint luster is strongly apparent even through the various layerings of color. The strike is full throughout and there are no obvious or detracting abrasions. NGC ID# 23U4, PCGS# 5426

1870-CC Quarter, VF Details  
Key Carson City Issue

**3801** 1870-CC — Damage — PCGS Genuine. VF Details. Except for the 1873-CC No Arrows quarter (just five pieces confirmed), the 1870-CC quarter is the rarest Carson City issue. Few examples survived the first-year mintage of 8,340 pieces, and many of those survivors are impaired in one way or another. This example has two lengthy abrasions on the obverse. A shallow scrape runs downward through Liberty's head to the shield, and a thin cut angles from the shin through 1 in the date. The coin is otherwise problem-free for the grade with attractive old-silver toning and sharply defined devices.

## PROOF SEATED QUARTERS

1874 Arrows Quarter, PR66+  
Exceptional Preservation and Color

- 3802 1874 Arrows PR66+ PCGS. Briggs 5-D.** The arrows flanking the date were instituted in 1873 to signify an indiscernible weight increase in subsidiary silver coinage. The design was continued through 1874, when 700 proof quarters were struck. The two-year type is always popular with collectors. Original blue, violet, and gold patina melds with minimally toned centers. Preservation is exceptional. Population: 26 in 66 (14 in 66+), 16 finer including Cameo and Deep Cameo (7/17). NGC ID# 23XS, PCGS# 5575

1882 Quarter Dollar, PR67  
Beautifully Toned and Original

- 3803 1882 PR67 PCGS. Briggs 2-B.** A conditionally rare Superb Gem example of this otherwise plentiful proof issue, tied for the finest non-Cameo certified. Fully struck design elements and glimmering fields deliver strong eye appeal amid sky-blue, olive, and lavender-gold toning. No contact marks are present. Population: 11 in 67, 0 finer; 3 in 67 Cameo, 1 finer; 1 in 67 Deep Cameo, 0 finer (7/17). NGC ID# 23XE, PCGS# 5583

## BARBER QUARTERS

1898-O Quarter Dollar, MS66  
Attractive Original Toning  
Few Examples Known So Fine

- 3804 1898-O MS66 PCGS.** The 1898-O is a scarce issue in Mint State, with most such pieces scattered throughout the MS62 to MS65 grade range. Premium Gems are genuinely rare, and finer examples are prohibitively scarce. Our Permanent Auction Archives list only eight previous appearances of an MS66 coin, the last being a PCGS example that realized \$11,750 in our 2015 FUN Signature sale. The present example is satiny and vibrant with shades of golden-brown, sea-green, and magenta toning. The design elements are well-detailed, save for the eagle's right (facing) talons and a couple of right-hand stars, and eye appeal is outstanding. A Condition Census example. Population: 9 in 66 (2 in 66+), 2 finer (7/17). NGC ID# 23YE, PCGS# 5620

1907-D Quarter Dollar, MS66  
Multicolor Top-Grade Rarity

- 3805** 1907-D MS66 PCGS. CAC. The 1907-D Barber quarter is available through MS64 but is rare at the Gem level. This Premium Gem is among the finest known. Satiny mint luster is virtually unabraded, and the fields are especially luminous. Lovely multicolor toning graces each side. The eagle's right (facing) talons and the fletchings exhibit the only mentionable strike weakness. Population: 5 in 66, 0 finer. CAC: 3 in 66, 0 finer (7/17). NGC ID# 2329, PCGS# 5646

1913-S Quarter, XF Details  
Key San Francisco Issue

- 3806** 1913-S — Harshly Cleaned — PCGS Genuine. XF Details. Glossy surfaces and moderate hairlines are noted by PCGS, although this key-date Barber quarter boasts attributes that include bold design elements and light golden toning. Some of the finer details of the eagle's feathers are smoothed over by the cleaning application. The 1913-S is famously the lowest-mintage date in the series with a production of only 40,000 pieces.

## STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VF20  
Clear Date, Excellent Color

- 3807** 1916 VF20 PCGS. This problem-free midgrade example displays uniform pewter-gray surfaces with olive tints and even wear. The date is full. One of many 1916 Standing Liberty quarters likely plucked from circulation within a couple of decades of its coinage, this piece displays above-average eye appeal for the grade. Circulated examples of this key-date issue could still be encountered in circulation as late as the 1940s, although by that time findings were extremely rare. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55  
Ever-Popular First-Year Issue

- 3808** 1916 AU55 NGC. This is a pleasing example of the ever-popular, first-year Standing Liberty quarter. Slight high-point wear is hidden beneath olive-gray and faintly iridescent toning, while traces of luster remain visible near the borders. In 1916, new designs were prepared for all of the silver denominations, marking the first instance in United States Mint history that each denomination showcased its own unique design. Due to the low mintage of this introductory issue (just 52,000 coins), demand for 1916 Standing Liberty quarters in all grades has endured the test of time. Ex: *Long Beach Signature* (Heritage, 2/2006), lot 1003; *Summer FUN Signature* (Heritage, 7/2014), lot 3732. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55 Details  
Sharp Head Detail

- 3809** 1916 — Cleaned — ANACS. AU55 Details. Some russet toning is present on this piece, but hairlines and generally bright surfaces reveal an old cleaning. The coin is uncommonly sharp for the 1916 issue, particularly on Liberty's head and the central gown, and a brush of high-point friction over Liberty's left (facing) knee is barely noticeable. This would be an excellent example of the key Standing Liberty quarter issue for the collector on a budget who desires sharp detail. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55  
Satiny and Well-Detailed

- 3810** 1916 AU55 NGC. One of the trickiest, yet most underrated niches in U.S. numismatics is the lightly circulated key-date coin. There are many more collectors who want an attractive AU example than there are survivors, pushing many would-be owners either into the uncomfortably costly Mint State range or down on the grade scale. This Choice AU 1916 Standing Liberty quarter offers a great opportunity for collectors in the niche, for while light wear is distinct on the high points, the still-lustrous surfaces — pale gold-gray with dots of blue and violet — are generally smooth. A small abrasion is present to the left of Liberty's legs. Ex: *ANA Signature* (Heritage, 3/2011), lot 3586. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55  
An Elusive CAC-Approved Coin

- 3811** 1916 AU55 PCGS. CAC. There is barely a brush of high-point friction present on this high-end AU coin, and satiny luster remains in the fields. Mottled olive-green and russet toning blankets each side. The strike is bold for the issue. No major abrasions are present. CAC-approved About Uncirculated examples are rarely seen in this grade or finer. CAC: 7 in 55, 32 finer (7/17). NGC ID# 43XR, PCGS# 5704

1916 Quarter, MS63 Full Head  
First Standing Liberty Issue

- 3812** 1916 MS63 Full Head PCGS. The coinage redesign program that President Theodore Roosevelt initiated a decade earlier culminated in new designs for the three current silver denominations in 1916. The Mercury dime, Standing Liberty quarter, and Walking Liberty half dollar all debuted in 1916. While the dime and half dollar are plentiful today, the quarter is elusive. Only 52,000 of these coins were minted and few have survived. The present Select Mint State example has the eye appeal of a higher grade. Close inspection reveals a few minuscule marks on Liberty's head that limit the numerical grade level. Hints of champagne toning appear on both sides of this satiny and highly lustrous example.  
Ex: ANA Signature (Heritage, 2/2014), lot 3876. NGC ID# 2AMV, PCGS# 5705

1918-D Quarter, MS67 Full Head  
One of the Two Finest Full Head Coins Known

- 3813** 1918-D MS67 Full Head PCGS. Soft, luminous mint luster gives this Superb Gem glistening surfaces that are devoid of imperfection. The shield rivets are a trifle weak at the high point of the bust, but the date, head, stars, and eagle's feathers are sharp. A trace of champagne toning graces each side, adding warmth to the pristine surfaces.

The 1918-D quarter dollar in this condition is a major rarity, and this piece is one of only two Full Head examples so-graded (both PCGS) with none finer. PCGS and NGC combined list five non-Full Head coins in MS67, also with none finer (8/17). We have previously handled a number of MS66 Full Head coins but this is the first Superb Gem Full Head that we have offered at auction. Recent auction appearances of the other MS67 Full Head coin have realized in excess of \$30,000, but it has not been seen since 2013. We anticipate strong Registry collector interest when this CoinFacts plate coin crosses the auction block. NGC ID# 3TWU, PCGS# 5723

1920-D Quarter Dollar, MS66+  
Well-Struck, Few Known Finer

- 3814** 1920-D MS66+ PCGS. This high-end 1920-D quarter dollar displays partial head detail and above-average definition on the shield rivets. The top of the date numerals are weak, as usual. Original, frosty luster appears on each side with golden and russet border toning around the obverse. A few faint grazes on the left wall next to Liberty are all that prevent an even finer grade. Population: 37 in 66 (2 in 66+), 3 finer (7/17). NGC ID# 243F, PCGS# 5736

## WASHINGTON QUARTERS

1932-D Washington Quarter, MS65  
Important First-Year Key

- 3815** 1932-D MS65 PCGS. An original Gem specimen of this low-mintage, first-year issue with sharply detailed design elements and satiny mint luster under medium-intensity shades of golden-tan and lavender-gray toning. The 1932-D is the acknowledged key to the Washington quarter series and examples in high grade are especially elusive. Population: 89 in 65 (3 in 65+), 2 finer (7/17). NGC ID# 2448, PCGS# 5791

1932-S Washington Quarter, MS65+  
Sought-After, First-Year Key

- 3816** 1932-S MS65+ PCGS. A Plus-graded Gem representative of this low-mintage, first-year key, this coin exhibits razor-sharp definition on all design elements and the well-preserved, mostly brilliant surfaces display a few delicate hints of greenish-gold and lavender-gray toning. Vibrant Mint luster adds to the considerable eye appeal. PCGS has graded four numerically finer examples (7/17). NGC ID# 2449, PCGS# 5792

## PROOF WASHINGTON QUARTER

1936 Quarter, PR67  
None Graded Higher

- 3817** 1936 PR67 PCGS. The Mint resumed proof production in 1936, having last struck proofs in 1915. This is one of 3,837 Washington quarters manufactured in that first year. Each side of this Superb Gem exhibits dusky patina everywhere except the upper borders, where orange, magenta, and blue provide color. Nearly pristine. Population: 14 in 67, 0 finer (7/17). NGC ID# 27HN, PCGS# 5975

## EARLY HALF DOLLARS

1794 Half, Fine Details  
O-101, Obverse Graffiti

- 3818** 1794 O-101, T-7, High R.3 — Obverse Graffiti — NCS. Fine Details. Tompkins Die State 1/4. The crossbar of F is split into two planes. Attractive natural-gray toning covers both sides of this smoothly worn early half, which displays light graffiti pinscratched into the right obverse field. The surfaces are otherwise ideal for the grade, although we note three shiny, obverse rim bruises at 9, 11, and 2 o'clock.  
*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101a Half, Good 4  
Heavy Wear, Sunken Die

- 3819** 1794 O-101a, T-7, High R.3, Good 4 NGC. Tompkins Die State 1/5. Overton 101a has a diagnostic die crack through F in OF that progresses in length and severity until forming a bi-level surface not only at F, but affecting the entire upper reverse in concert with an opposing die crack between D and S of UNITED STATES. The reverse of this late die state example shows the biplanar effect on the reverse die, with a deeply toned sunken die area that is clearly defined. The obverse is heavily worn as well, with the date just a ghost — barely visible except at certain angles.  
*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, VG8  
O-101a, Well-Worn Yet Pleasing

**3820** 1794 O-101a, T-7, High R.3, VG8 NGC. Tompkins Die State 1/5. A die crack between the uppermost single leaf on the wreath to the outer curve of the second S in STATES defines the latest die state of Overton-101a. The area is exposed to abrasions and wear, and often the crack appears more ridgelike than clearly defined on well-worn pieces. Such is the case with this example. Iridescent toning melds into a brownish-gray and blue patina, with silver-gray high points. Weakness at the lower obverse diminishes the rim and dentils, where the date and star 15 are worn but visible.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half, VG10  
O-101a, First-Year Issue

**3823** 1794 O-101a, T-7, High R.3, VG10 NGC. Tompkins Die State 1/5. With exception of the rim above stars 12 to 14 (lowered by adjustment marks now mostly eliminated by wear), all of the obverse devices are outlined and the date is strong. Short adjustment marks remain in the recesses of Liberty's central hair strands. The reverse is a few points better, sharp at the wreath and outward, but less sharp at the eagle's head and body. Iridescent toning displays violet, blue, and gold hues, perhaps aided by an old wipe, but not important given the worn state of this still-collectible example.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VG8  
Deeply Toned Original Surfaces

**3821** 1794 O-101a, T-7, High R.3, VG8 NGC. Tompkins Die State 1/5. Dusky, steel-gray toning with charcoal-gray overtones disguise the well-worn devices, which fortunately show a thin outline of silver around most of the raised motifs to balance the aged patina. A glass reveals some expected small marks and abrasions, with a short, straight strike-through on either side of Liberty's head. The central elements show considerable wear, while the perimeters are sharper with nearly full dentils, date, legends, and stars.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, Fine 12  
Boldly Defined Eagle

**3824** 1794 O-101a, T-7, High R.3, Fine 12 NGC. Tompkins Die State 1/5. The reverse appears slightly dishd, and the strike is quite sharp on the eagle as a result — at least 10 points sharper than the obverse, which bows outward and is well-worn. NGC chose the middle road in assigning its grade. Struck from a late die state, the coin is attractive overall, although we note a sizeable obverse rim bump at star 14. Traces of golden luster remain.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half, VG10  
Problem-Free O-101a Example

**3822** 1794 O-101a, T-7, High R.3, VG10 PCGS. Tompkins Die State 1/5. The obverse die remains in its perfect state throughout the comparatively long run of O-101 die pair, while the reverse die advances through five die stages. This example is in the latest state of the reverse, with a biplanar crack through F in OF, and an additional die crack joining the single olive leaf at the right wreath top to the second S in STATES. Pleasing gunmetal gray toning provides a backdrop to the light-gray devices, and this example is strongly defined for the VG10 grade.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, Fine 15  
Impressive First-Year Type Coin

**3825** 1794 O-101a, T-7, High R.3, Fine 15 PCGS. Tompkins Die State 1/5. This coin is indeed Choice for the Fine 15 grade level, both visually and technically with glossy, attractive surfaces and strongly impressed devices. A halo of deep-gray toning frames the obverse portrait, while both sides of the coin display a faint gold tinge over the silver-gray interiors. The raised elements are universally sharp with moderate wear that minimizes any marks from circulation. An outstanding selection for early type.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, Fine 15  
Historic First-Year Issue, O-101a

**3826** 1794 O-101a, T-7, High R.3, Fine 15 NGC. Tompkins Die State 1/4. A Choice example for the grade, with moderate wear and exceptionally few marks. All of the devices are well-defined and the rims are bold. Some light, widely separated reverse adjustment marks are visible with a lens, yet they are nondistracting in hand. Areas of silver-gray toning intermix with pewter-gray overtones. This is an ideal collector coin and a sharp example of the first-year Flowing Hair type. Census: 8 in 15, 101 finer (7/17).

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF20  
Ideal for First-Year Type

**3827** 1794 O-101a, T-7, High R.3, VF20 NGC. Tompkins Die State 1/4. The Overton-101 variety is by far the most available 1794 die marriage, although the later O-101a die state is more frequently encountered. Examples in all grades are in demand by collectors of first-year Flowing Hair type, as well as by series specialists. The obverse die is in its first use on O-101, while the reverse die sees its fourth and final tenure, having distinguished itself by striking the vast majority of all 1794 half dollars produced.

This is a pleasing VF example with traces of reddish-gold mint luster still lingering in sheltered areas. The rims and dentils are bold, as are all four digits of the date. Moderate wear exists on the high points of Liberty's hair and the eagle's central elements. The silver-gray surfaces have an olive tinge with occasional blue and tan accents. Both sides are free of any adjustment marks.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VF25  
Popular O-101a, T-7 Variety

**3828** 1794 O-101a, T-7, High R.3, VF25 NGC. Tompkins Die State 1/3. Only 23,464 Flowing Hair half dollars were struck in 1794, with 11 die varieties known for the date. Star 1 pierces the lowest curl near the center on this coin, and there are 21 berries, arranged 10 left and 11 right on the reverse, identifying the popular O-101 variety. A faint die crack through the F in OF and the leaves identifies the late die state O-101a. This impressive VF25 example retains some interior detail on the central portion of Liberty's hair and all major design detail remains intact. The pleasing surfaces are blanketed in shades of lavender-gray and golden-brown toning and a shallow scrape below star 8 is the only abrasion of note. Hints of original luster shine through the patina.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF35  
Choice Middle Die State Example

**3829** 1794 O-101a, T-7, High R.3, VF35 NGC. Tompkins Die State 1/3. Although designated as the late die state O-101a on the holder, the present O-101 example is really a middle die state example, since no die crack crosses the single leaf below OF and travel to the last S in STATES. The discrepancy is of minor significance to many collectors, who seek the 1794 as the first Flowing Hair half dollar issue regardless of die stage.

This Choice VF example shows a few planchet-related marks but virtually no imperfections from circulation other than grade-consistent wear. Adjustment marks are visible within Liberty's hair strands and at the obverse border. We two areas of planchet roughness — one beneath the left (facing) wing and the other above the eagle's head on the reverse. Otherwise, the surfaces are smooth and attractive with slate-gray fields and contrasting silver-gray patina on the devices. Census (all 1794 varieties combined): 18 in 35, 42 finer (7/17).

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, XF40  
Conditionally Rare This Fine

**3830** 1794 O-101a, T-7, High R.3, XF40 NGC. Tompkins Die State 1/5. As often seen, the reverse of this O-101a is in its late die stage with a ridgelike crack joining the second S of STATES to the tip of the uppermost olive leaf. The die pair was seventh in the emission sequence for 1794 half dollars and it was by far the hardest of 11 total 1794 die marriages, with a rarity ranking of R.3. All other 1794 halves fall into the R.5 to R.8 range.

This example shows grade-appropriate smooth wear and attractive olive-gold toning at the borders. Steel-blue shades cover the fields and silver-gray patina defines the raised devices. Occasional light marks are seen with a glass, yet the dentils and rims are strong and traces of reflective luster remain in sheltered areas. We note bits of old, whitish residue within the crooks of the reverse letters and wreath, visible under magnification — perhaps glue from an old coin board. Census: 13 in 40, 29 finer (8/17).

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, XF45  
O-101a, T-7, Strongly Defined  
In-Demand First-Year Issue

**3831** 1794 O-101a, T-7, High R.3, XF45 NGC. Tompkins Die State 1/5. A total of 11 die pairs were needed to produce an estimated 23,464 1794-dated halves. Just 650 to 800 pieces survive among all varieties combined according to the 2015 Tompkins reference — most of which represent either the O-101 and O-101a dies. All die marriages are scarce and most are rare, thus one of the great challenges for early half dollar specialists to collect 1794 half dollars by variety.

This example of the O-101a late die state retains Choice XF definition on the devices. A somewhat bright, silver-gray coin, it shows a pale crescent of lilac-gray toning that occupies the right obverse field, with scattered gray accents on the reverse. Numerous shallow, Mint-caused adjustment marks angle across the eagle from top-left to lower-right. Faint lines and wispy marks dot the surfaces, with a singular small dig near star 3. Census (all 1794 varieties combined): 13 in 45, 16 finer (7/17).

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half, VF20  
Scarce O-103 Variety, Deep Border Toning

- 3832** 1794 O-103, T-10, High R.5, VF20 NGC. Tompkins Die State 1/1. The date is widely spaced between the 7 and 9, appearing as 17 94. This variety is the second of three uses of the obverse, paired with the sole use of the reverse. The right leg of R in AMERICA is repunched along the outer edge. Apparently, the reverse die failed early on in the minting of O-103, accounting for the scarcity of the variety.

Olive-gray tones deepen to bluish-gray shades at the margins. We note a cluster of small marks above the 79 in the date, and two small areas of slightly granular, deeper toning to the right of Liberty's chin and neck. The hair strands are well-defined for the assigned grade, as are the eagle's wing feathers. Significantly, only one confirmed Overton-103 example exists in a grade finer than the VF level.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39203 Base PCGS# 6051

1794 O-104 Flowing Hair Half, VG10  
Reverse Die Cud

- 3833** 1794 O-104, T-11, R.5, VG10 NGC. Tompkins Die State 2/3. A rim cud above E and R in AMERICA signifies the late reverse die state, while the obverse is in its middle die stage, lacking the prominent die break that develops at star 11 to the chin. Deep golden-gray toning in the fields contrasts with light-gray shades on the high points.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 Half Dollar, Fine Details  
Scarce O-104 Variety

- 3834** 1794 O-104, T-11, R.5 — Repaired — PCGS Genuine. Fine Details. Tompkins Die State 1/2. This is a lesser-seen 1794 variety. Flowing Hair half dollar specialists will appreciate the affordability of this example, which is denied a numeric grade due to tooling in the right obverse field. Elsewhere, the surfaces are bright silver-gray and moderately abraded. Some long, radial adjustment marks (mint-made) stretch from the reverse rim near OF to the eagle's head. The borders are strong and the devices are well-outlined.

*From The Terry Brand Estate, Part IV.*

1794 Flowing Hair Half, Good 4  
O-105, Smoothly Worn Collector Coin

- 3835** 1794 O-105, T-3, R.5, Good 4 PCGS. Tompkins Die State 1/3. Star 2 is attached to the curl, while star 1 does not touch the hair in any way — an obverse also employed on the very rare O-111 (T-2) and the very scarce O-106 (T-4). O-105 is relatively available compared to those two varieties, but it is still scarce in all grades. This example displays deep-gray fields with light-gray devices. The obverse is well-defined for the grade, lacking definition at Y in LIBERTY and above star 9. The reverse shows sinking of the die at the upper half of the eagle. We note scattered light porosity and a series of pinscratches across Liberty's bust point.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1794 Flowing Hair Half, VF Details  
Scarce O-105 Variety

- 3836** 1794 O-105, T-3, R.5 — Tooled — NCS. VF Details. Tompkins Die State 1/2. Olive-gold, blue, lavender, and gunmetal-gray toning lightens at the centers of this well-defined 1794 half. Areas of tooling are visible in the right obverse field, with a few old scrapes and digs at the central reverse. Sharp feather detail remains on the eagle's wings and Liberty's flowing hair strands. The date and stars are sharp for the VF Details level. A collectible example despite the problems noted by NCS.

*From The Terry Brand Estate, Part IV.*

1794 Flowing Hair Half, O-107  
Glossy, Well-Defined Fine 12

- 3837** 1794 O-107, T-5, R.6, Fine 12 NGC. Tompkins Die State 1/2. Two thin, old linear depressions run between star 12 and the underside of Liberty's chin — possibly remnants of a strike-through, or marks of a similar nature. Other light abrasions from circulation are long since minimized by smooth, even wear. Iridescent colors combine for a golden glow beneath brownish-gray and blue patina. Sharp definition for the grade exists on both sides. The Condition Census for O-107 — an R.6 variety — for many years topped out at VF25, until an XF45 example appeared as lot 4041 of our April, 2017 Central States Signature auction.

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

1794 Half Dollar, Fine 15  
Very Scarce O-107 Die Pair

- 3838** 1794 O-107, T-5, R.6, Fine 15 NGC. Tompkins Die State Lightly toned an even, golden-gray shade throughout both sides, this smoothly worn O-107 is problem-free for the grade except for a minor depression above the ear in Liberty's hair strands accompanied by a few faint adjustment marks. Elsewhere, light marks and nicks are consistent with the Choice Fine designation. The reverse in particular is well-preserved with close to 70% of the wing feathers defined. The rims, dentils, stars, and date are crisply struck. Steve Herrman's Summer, 2017 update indicates a Condition Census of 45, 25, 20, 20, 20, 15 (8/17).

*From The Terry Brand Estate, Part IV.* NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

1795 Half Dollar, XF45  
O-125, Two Leaves

- 3839** 1795 2 Leaves, O-125, T-13, R.4, XF45 NGC. The 1795 half dollar is the more available of the two Flowing Hair type issues and is often encountered in type specialists' cabinets. The piece here offered is of a scarce variety, characterized in part by star 1 fully piercing Liberty's lower hair curl. Rich gunmetal-gray and dusky olive-gold patina coats each side, with only light wear seen over the well-defined design elements. Numerous mint-made adjustment marks are noted around the obverse periphery, causing minor softness of strike on the lower-right dentils. This piece will be of interest to both the type collector and the early half dollar variety specialist.

*Ex: FUN Signature (Heritage, 1/2001), lot 7727; Chicago Signature (Heritage, 8/2011), lot 3910; Houston Signature (Heritage, 12/2013), lot 3624; Long Beach Signature (Heritage, 6/2014), lot 4506.* NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

1797 Small Eagle Half Dollar, Fine Details  
O-101, Amato-330

- 3840** 1797 O-101, T-1, Amato-330, R.5 — Graffiti — NGC Details. **Fine.** This earlier die state shows three of the die cracks on Reverse A that later develop into O-101a. Two of the three are only vaguely discernible with strong magnification, the third is readily visible. The first is extremely faint, connecting the tops of ES in STATES with the top of O in OF. The other is seen at the top of the first T in STATES and travels only faintly to the eagle's neck. The third is better developed and located at the upper-right of the O in OF. Several pedigree identifiers are listed on page 216 of the Amato reference, the most obvious being the graffiti in the left field in the form of a vertical scratch between stars 4 and 6, and a backward S in the lower-right obverse field. The surfaces are light overall with slightly darker peripheries. Detailing is stronger on the devices on the left part of each side, weaker on the right, indicating the dies were misaligned at the time of striking.  
*Ex: Stanley Simon Collection (Stack's, 1/1989), lot 1004, where it brought \$15,400.*

Over the past 15 years cataloger Jon Amato has brought his expertise in cataloging every Small Eagle half dollar that has been consigned to us. It is with a profound sense of loss that we had to say good-bye to Jon when he died in early August. Jon left us with a masterful 338-page reference on the series that we will continue to use far into the future when cataloging this short and interesting series.

BUST HALF DOLLARS

1809 O-106 Half Dollar, MS64  
Vibrant Luster, Strong Impression

- 3841** 1809 Normal Edge, O-106, R.3, MS64 PCGS. A die crack connects stars 1-7, the usually seen die state. The reverse shows a straight die line protruding up into the wing from the right shield corner. This rose-gray Choice Mint State coin shows occasional glints of blue and gold with excellent mint luster and great eye appeal. A strong strike appears throughout, although several of the obverse stars on the obverse, and the letter tops on the reverse, are drawn toward the rim. No significant abrasions noted. Population (all varieties): 14 in 64 (1 in 64+), 6 finer (7/17). NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

Dr. Jon Amato

1812/1 Bust Half, AU50  
Large 8, O-101a

- 3842 1812/1 Large 8 AU50 PCGS. O-101a, R.5. The 1812/1 Small 8 makes a regular appearance in auctions and at coin shows, but the 1812/1 Large 8 is rare. It is known by a single die marriage with two major die states. O-101a has a linear die crack between the 12 in the date, and O-101 lacks that crack. Both die states are on most Bust half dollar want lists, and are also in demand by those who collect strictly by *Guide Book* variety. This attractive AU50 example is a pearl-gray and almond-gold piece that shows numerous pockets of luster. The curls display light wear, and neither side exhibits any reportable abrasions. Population (for the variety): 1 in 50, 0 finer (7/17). NGC ID# 24EX, PCGS# 39442 Base PCGS# 6102

1814/3 O-101a Half Dollar, MS63  
Lustrous, Late Die State

- 3843 1814/3 O-101a, R.2, MS63 PCGS. Nearly all examples of this overdated variety come from a late state of the dies, designated O-101a in the Overton reference. This example displays a long crack through the left-side stars, across the cap, and down through the right-hand stars. An additional, heavy crack runs beneath the date. Both sides exhibit multiple die clashing. Attractive steel-blue toning at the lower-left quadrant merges with lustrous, silver-gray shades with olive-gold highlights. Population (with overdate): 3 in 63, 6 finer (8/17). NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1815/2 O-101 Half Dollar, VF35  
Excellent Coloration

- 3844 1815/2 O-101, R.2, VF35 PCGS. The early die state variant of O-101 is clashed but does not yet show a crack through the denomination. This Choice VF example has good interior detail and shows appealing gunmetal-gray patina overall with lighter tan-gray accents on the high points of the design. The fields are smooth and problem-free. O-101 is the only die pair known for the 1815 half dollar. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1822 Half Dollar, O-115, MS64  
Semiprooflike Fields

- 3845 1822 O-115, R.3, MS64 PCGS. CAC. Although the variety exhibits peripheral die cracks on the reverse, this near-Gem 1822 Capped Bust half dollar is semiprooflike. The strike is razor-sharp, and no distracting contact marks are seen. Deep aquamarine toning appears over much of each side with some lighter grayish hues in the centers. Population (all Normal Date varieties included): 61 in 64 (8 in 64+), 16 finer. CAC: 11 in 64, 8 finer (7/17). NGC ID# 24FG, PCGS# 39603 Base PCGS# 6129

1827 O-106 Bust Half, MS65  
Square Base 2, Top of the Census

- 3846** 1827 Square Base 2, O-106, R.2, MS65 NGC. Softly lustrous beneath a rich layer of lavender, blue, and orange-gold toning, the hair and cap are razor-sharp and the reverse motifs are bold. Stars 1 to 5 and star 8 lack complete central definition, but they are frequently flat for the variety. The multicolor eye appeal more than atones. The Condition Census for O-106 tops out at MS65 in both the Parsley and Herrman references, with just one other O-106 reaching the full Gem grade, and so the present coin is seemingly tied at the top of the Census for the variety (7/31). NGC ID# 24FN, PCGS# 39698 Base PCGS# 6144

1834 O-114 Half Dollar, Top-Ranked MS65  
Small Date, Small Letters, Narrow Arrowheads

- 3848** 1834 Small Date, Small Letters, O-114, R.1, MS65 NGC. Clear repunching on stars 3 and 4 as well as on the lower outer loop of 8 help differentiate O-114 from its oft-mistaken O-113 brethren. They share the same hub die with an unusual, double clasp. Semiprooflike fields and vibrant cobalt-blue, violet, and amber-gold toning give this Gem Uncirculated example extraordinary eye appeal. As usual, LUR in PLURIBUS is weak and most stars are flat, but the central strike is top-notch. Mint luster is especially strong on the reverse. Tied for finest of the variety. NGC ID# 24FY, PCGS# 39918 Base PCGS# 6166

1827 O-146 Half Dollar, Lustrous MS63+  
Curl Base 2, Elusive Type for the Year

- 3847** 1827 Curl Base 2, O-146, R.2, MS63+ PCGS. CAC. A whopping 49 varieties exist for the 1827 Bust halves (not counting sub-varieties by die state), yet only two varieties exist with the Curl Base 2. Each is of great interest to collectors of the series. This O-146 example displays a faint vertical line through the horizontal shield lines far above gule 6, while the second A of AMERICA nearly touches the top arrowhead. The coin is sharply struck with some nominal incompleteness on the left-hand star centers, but crisply defined across the central motifs. Pleasing grayish-gold toning deepens around the raised devices with strong mint luster beneath the frosty surfaces. This Select half dollar ranks near the low end of the Condition Census for the variety. NGC ID# 24FN, PCGS# 39749 Base PCGS# 6145

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, GR-1, AU55  
Sharply Struck, Early Die Stage

- 3849** 1836 Reeded Edge, GR-1, R.2, AU55 PCGS. Housed in a previous generation green label holder, this Choice About Uncirculated example of the low-mintage first-year Reeded Edge half retains a pleasing amount of mint luster. Only a few small marks dot the otherwise smooth, sharply struck surfaces. A small die crack is just starting to the right of the second S in STATES, indicating an early state of the dies. Lightly toned in pale-gold, blue, and lilac-gray hues. Population: 30 in 55, 56 finer (8/17). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Reeded Edge Half Dollar, MS63  
GR-1, Condition Census Quality  
Low-Mintage Key

1838 GR-6 Reeded Edge Half Dollar, MS64  
Lightly Toned and Appealing

**3850** 1836 Reeded Edge, GR-1, R.2, MS63 NGC. The 1836 Reeded Edge half dollar is a famous key in the series. Reportedly 1,200+ coins were struck, and these were the first circulating United States coins manufactured using a steam powered press. Graham writes: "You will need to be extremely patient to find a nice original coin, as many have been cleaned or mishandled, especially in the circulated grades."

This is a totally original Select example that qualifies for the low end of the Condition Census. It has mixed cobalt-blue, violet, and gold patina over the entirety of each side. The design elements are well-struck with trifle softness on the highest points of the eagle's wing and left talons. Census: 6 in 63, 7 finer (7/17). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

**3851** 1838 GR-6, R.3, MS64 PCGS. CAC. The 1838 Reeded Edge half dollar as a whole is scarce in MS64 and rare finer. This CAC-approved near-Gem displays sharp central devices with some weakness around the peripheral design elements. A curving line on Liberty's jaw is the only abrasion of note. The interiors have light champagne toning, while the border regions show deeper orange-gold, lavender, and blue hues. Population: 64 in 64 (5 in 64+), 11 finer. CAC: 19 in 64, 5 finer (7/17). NGC ID# 24G5, PCGS# 531087 Base PCGS# 6177

## SEATED HALF DOLLARS

1848 Half Dollar, Top-Grade MS65  
WB-102, Repunched Date

- 3852** 1848 Repunched Date, WB-102, MS65 PCGS. CAC. The 4 in the date is clearly recut below the diagonal and the crossbar on this conditionally rare variety. Wiley-Bugert believe this variety to be an 1848/47 overdate, although remnants of a 7 are not discernible on this piece. As a date, the 1848 Seated half is rare in Mint State, and none are known finer than the MS65 grade level. Rich forest-green, lilac-gray, and tan colors swirl about this satiny and carefully preserved Gem. The eagle's left (facing) leg is not fully struck but this is of little importance. No Motto Seated half dollars of any date are rarely encountered with such lofty preservation. Population: 5 in 65, 0 finer. CAC: 4 in 65, 0 finer (7/17).  
Ex: *Portland Signature* (Heritage, 3/2004), lot 5821; *Summer FUN Signature* (Heritage, 7/2016), lot 3859. PCGS# 572063 Base PCGS# 6260

1853 Arrows and Rays Half  
WB-101, Brilliant and Frosted Gem

- 3853** 1853 Arrows and Rays, WB-101, MS65 PCGS. This Gem 1853 Arrows and Rays half is one of the defining condition rarities of the Seated half series. More than 3.5 million pieces were struck, yet the coin's scarcity in Gem or finer grades — combined with its demand as a single-year type — far exceed its easy availability in lesser grades.  
The present coin is needle-sharp despite clashed dies. Frost-white surfaces gleam with Mint-fresh cartwheel luster. Glimpses of powdery, gray-gold patina are thinly distributed across virtually undisturbed surfaces. There are simply no marks to report. An interesting die crack curves from the edge below Liberty's foot, through the rock support, across the lower shield and across the hand. Eye appeal is extraordinary. Population: 15 in 65 (1 in 65+), 12 finer (7/17). NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

1873-CC Seated Half Dollar, AU58  
Arrows, WB-102 Variety

- 3854** 1873-CC Arrows, Small CC, WB-102, Die Pair 3, R.4, AU58 NGC. Half dollars were struck both with and without arrows at the date at the Carson City Mint in 1873. This coin displays the popular Arrows design and a small CC mintmark, with an open 3 in the date. The well-detailed design elements show just a touch of wear and the lightly abraded surfaces retain traces of original mint luster. Census: 8 in 58, 15 finer (7/17).  
Ex: Orlando Signature (Heritage, 7/2013), lot 3164. PCGS# 572215 Base PCGS# 6344

1877 Seated Half, MS66+  
Richly Toned and Brightly Lustrous

- 3855** 1877 Closed Bud, WB-103, MS66+ PCGS. CAC. This is the Closed Bud reverse with no evidence of repunching on the date. The mintage of 8.3 million pieces makes this a moderately available date, and one that is overshadowed by the post-1878 issues with their memorably low mintages. This is a beautiful coin that displays rich sea-green and rose toning on each side. The peripheries are strong with some weakness evident in the centers. Population: 28 in 66 (9 in 66+), 2 finer. CAC: 14 in 66, 0 finer (7/17). NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

PROOF SEATED HALF DOLLARS

1870 Half Dollar, PR67  
Beautifully Toned

- 3856** 1870 PR67 PCGS. Gorgeous aqua patina on each side surrounds silver and pink centers, and the proof strike is full throughout, save for a hint of softness on the lower-left eagle's claw, a problematic area often encountered on this Christian Gobrecht-inspired design. Among the few finest survivors from a mintage of 1,000 proofs. Lower grade examples are available, but that availability trails off significantly at the PR66 level, and at this grade this is the only piece so graded. None are finer at either service (7/17). There are no obvious contact marks on either side of this Superb Gem. NGC ID# 27U5, PCGS# 6428

1876 Half Dollar, Brilliant PR66 Deep Cameo  
Glittering Deep Mirrors, Rich Contrast

- 3857** 1876 PR66 Deep Cameo PCGS. Jet-black, glassy fields and frost-white devices present stunning contrast when viewed at the proper perspective. The silver-mirrored surfaces show only a few delicate, short lines and the snowy devices are pristine save for a tiny contact on the gown line beneath Liberty's left shoulder. Brilliant and extremely attractive, this Premium Gem Deep Cameo is the finest-graded for the format at PCGS. Population: 1 in 66 Deep Cameo, 0 finer (7/17). NGC ID# 27UA, PCGS# 96437

## BARBER HALF DOLLARS

1892-O Barber Half, Good 6  
Rare Micro O Variety

- 3858** 1892-O Micro O, FS-501, Good 6 NGC. There is little middle ground for the rare Micro O Barber halves. With only a few exceptions, it is found in either well-worn condition or in higher grades. The high-grade pieces were preserved early on, since collectors were aware of the variety almost upon issue (thanks to Augustus Heaton's *Mint Marks* book, published in 1893). Those that escaped the clutches of well-connected collectors slipped by unnoticed by the general public, often until worn smooth. This example is a tad better than that, assigned the Good 6 grade by NGC. Light silver-gray surfaces show glimpses of almond-gold at the borders. The reverse rims merge with the Legend, but all of the motifs are present and the diagnostic quarter-sized mintmark is sharp. PCGS# 391216 Base PCGS# 6463

1904-S Half Dollar, XF45  
Choice Light Toning, Crisp Strike

- 3859** 1904-S XF45 PCGS. CAC. Legions of Barber half collectors have the 1904-S on their want list in precisely this grade. The CAC endorsement bolsters its status, and the light, olive-gold toning at the borders adds significant eye appeal while confirming the original surfaces. A few tiny ticks are grade-consistent while the strike affirms the Choice XF designation. Population: 20 in 45, 84 finer. CAC: 4 in 45, 14 finer (7/17). NGC ID# 24MP, PCGS# 6500

1904-S Half Dollar, MS64  
Green CAC, Old Green Holder  
Conditionally Rare

- 3860** 1904-S MS64 PCGS. CAC. The 1904-S Barber half dollar is a rarity in Mint State, and only a handful of coins are known finer than the present near-Gem. This is only the fourth time we have handled an MS64 example of this challenging issue, with a recent PCGS CAC coin realizing \$21,150 (Heritage, 2/2017). This example could very well surpass that coin in terms of visual merit, showing softly frosted surfaces that emit beautiful olive-gold, lavender, silvery-blue, and peach-orange hues. The reverse coloration is especially pleasing. Strike weakness appears on the eagle's right (facing) talons the right shield corner, as usual. CAC-approved and housed in an old green label holder. Population: 13 in 64 (1 in 64+), 9 finer. CAC: 6 in 64, 5 finer (7/17). NGC ID# 24MP, PCGS# 6500

1907-S Half Dollar, MS63  
A Better Date in Uncirculated Condition

- 3861 1907-S MS63 PCGS.** The 1907-S is conditionally scarce in Mint State, despite a mintage of 1.25 million pieces. This Select representative displays satiny mint luster with intrusion of light golden hues around the borders. The usual strike weakness is seen on the eagle's right (facing) wing junction and talons, as well as the adjacent shield corner. Light marks on the cheek are all that limit the grade. Population: 10 in 63, 27 finer (7/17). NGC ID# 24N3, PCGS# 6511

1911 Barber Half Dollar, MS66+  
Finest Certified at PCGS

- 3862 1911 MS66+ PCGS. CAC.** An adequate mintage of 1.4 million Barber half dollars was accomplished at the Philadelphia Mint in 1911, but the issue is rare in MS66 condition, and finer coins are virtually unobtainable. This delightful Premium Gem exhibits sharply detailed design elements throughout, and the well-preserved, creamy surfaces radiate vibrant mint luster. Population: 16 in 66 (1 in 66+), 0 finer. CAC: 4 in 66, 0 finer (7/17). NGC ID# 24ND, PCGS# 6521

1915-D Barber Half Dollar, MS66  
None Numerically Finer at PCGS

- 3863 1915-D MS66 PCGS.** An adequate mintage of 1.1 million Barber half dollars was struck at the Denver Mint in 1915, the last year of the design. This spectacular Premium Gem displays well-detailed design elements, with just a touch of the usual softness on the eagle's claw and arrow fletching. The well-preserved surfaces show highlights of golden-tan and lavender-gray toning, with satiny mint luster underneath. Population: 24 in 66 (3 in 66+), 0 finer (7/17). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLAR

1897 Half Dollar, PR66 Cameo  
Deeply Mirrored Fields

- 3864 1897 PR66 Cameo PCGS. CAC.** The obverse is untoned, while the reverse displays a swath of golden patina over the upper and central areas. The surfaces "fade to black" on each side when the coin is tilted slightly, the result of deep reflectivity in the fields and thick mint frost on the devices. Trivial signs of contact preclude an even finer grade. Population: 14 in 66 (3 in 66+) Cameo, 11 finer. CAC: 7 in 66, 3 finer (7/17). NGC ID# 24NZ, PCGS# 86544

WALKING LIBERTY HALF DOLLARS

1916-S Walking Liberty Half, MS65  
Elusive Issue in Finer Grades

- 3865 1916-S MS65 PCGS.** The 1916-S Walking Liberty half dollar claims a small mintage of 508,000 pieces and relatively few high-quality examples were saved by contemporary collectors. As a result, the 1916-S is a condition rarity in grades above the MS65 level. This impressive Gem offers well-detailed design elements and well-preserved lustrous surfaces, with a few subtle hints of pale gold toning. PCGS has graded 14 numerically finer examples (7/17). NGC ID# 24PN, PCGS# 6568

1920-D Half Dollar, MS64+  
Scarce in Finer Condition

- 3866 1920-D MS64+ PCGS. CAC.** The 1920-D is a better date in high grade, scarce in MS64 and borderline rare in MS65. This high-end near-Gem balances quality and affordability in a coin with frosty original mint luster and a hint of light champagne toning. Partial thumb separation is evident on Liberty's branch hand, and the head shows good detail. The eagle's trailing leg is incompletely defined on the forward feathers. CAC-approved coins are rare this fine. CAC: 15 in 64, 11 finer (7/17). NGC ID# 24R4, PCGS# 6581

**1921-D Half Dollar, Sharp MS64+  
Rare CAC-Approved, Plus-Graded Example**

- 3867 1921-D MS64+ PCGS. CAC.** At only 208,000 pieces, the 1921-D Walking Liberty half dollar mintage is the lowest in the series. The '21-D is the second-scarcest of the three 1921 keys in high grade, and it is genuinely rare above MS64. However, even in MS64 this issue is scarce, and we believe it is scarcer in this grade than the certified population reports suggest. Near-Gems appear at auction only slightly more frequently than MS65 coins. This piece is the first Plus-graded MS64 that we have handled, and it is only the seventh CAC-approved example we have seen in the same grade. Sharp thumb separation on Liberty's branch hand and bold head detail are hallmark attributes, while original mint luster shows a hint of light champagne toning near the borders. A few tiny surface marks are unobtrusive. PCGS lists 37 finer submissions. CAC: 18 in 64, 13 finer (7/17). NGC ID# 24R7, PCGS# 6584

**1927-S Half Dollar, MS64+  
Challenging in Higher Grades**

- 3868 1927-S MS64+ PCGS. CAC.** An outstanding example, this near-Gem has a better than average strike with full, frosty mint luster. The obverse exhibits a lovely display of mottled iridescence. The reverse is mostly brilliant with peripheral gold and iridescent toning. PCGS has only certified 87 finer examples (7/17). NGC ID# 24RA, PCGS# 6587

**1938 Walking Liberty Half, MS67+  
Only One Finer Coin at PCGS**

- 3869 1938 MS67+ PCGS. CAC.** From a mintage of 4.1 million pieces, the 1938 Walking Liberty half dollar is often underrated, outside of series specialists. It is the scarcest Philadelphia Mint issue of the late 1930s. This Plus-graded Superb Gem offers sharply detailed design elements and impeccably preserved, lustrous surfaces with outstanding eye appeal. PCGS has graded one numerically finer example (7/17). NGC ID# 24RU, PCGS# 6604

**1945-S Walking Liberty Half, MS67  
Registry Grade Example**

- 3870 1945-S MS67 PCGS. CAC.** Vivid rings of magenta and greenish-gold toning surround the essentially brilliant centers of this delightful Superb Gem. The surfaces are impeccably preserved and both sides radiate vibrant mint luster. The design elements are well-detailed, with just a touch of the usual softness on Liberty's head and wreath hand. Eye appeal is terrific. Population: 43 in 67 (1 in 67+), 0 finer. CAC: 16 in 67, 0 finer (7/17). NGC ID# 24SH, PCGS# 6626

## PROOF FRANKLIN HALF DOLLARS

1952 Half Dollar, PR68 Cameo  
Finest at Both Services

- 3871** 1952 PR68 Cameo PCGS. CAC. The Mint upped Franklin half dollar production to 81,980 proofs in 1952, but production quality remained a lingering issue. Pronounced reflectivity is generally found either on one side or another, but a Cameo designation requires both sides to exhibit equally profound contrast. The fields are uniformly glassy and deeply mirrored throughout this impeccably preserved PR68 Cameo half dollar. Each side remains naturally brilliant, and strike definition is unsurprisingly complete. There are only five comparably graded examples at PCGS, and none are higher. CAC: 6 in 68, 0 finer (7/17). NGC ID# 27VC, PCGS# 86693

1958 Franklin Half Dollar, PR68 Deep Cameo  
Among the Finest Known

- 3872** 1958 PR68 Deep Cameo PCGS. CAC. This CAC-approved, remarkably high-end proof Deep Cameo 1958 half dollar is among the finest Deep Cameos certified at PCGS. The only finer PCGS coin is a lone PR68+ Deep Cameo, which recently realized \$32,900 in our August 2017 ANA Signature sale. The present example is brilliant, starkly contrasted, and very nearly flawless. The white-on-black appearance is captivating. Population: 28 in 68 (1 in 68+) Deep Cameo, 0 finer. CAC: 12 in 68, 0 finer (7/17). NGC ID# 27VH, PCGS# 96699

## SMS KENNEDY HALF DOLLAR

1967 SMS Half Dollar, SP68 Deep Cameo  
Stark White-on-Black Contrast

- 3873** 1967 SMS SP68 Deep Cameo PCGS. Tied with just 17 others as the finest Deep Cameo at PCGS (7/17), showing stark white-on-black contrast that is devoid of toning. The strike is full, and the eye appeal is exceptional. Special Mint Set coins come with varying degrees of prooflike qualities, although the present coin is clearly among the finer-known in that regard. NGC ID# 24WJ, PCGS# 96847

## PROOF KENNEDY HALF DOLLAR

1964 Half Dollar, PR68 Deep Cameo  
FS-401, Accented Hair

- 3874** 1964 Accented Hair, FS-401, PR68 Deep Cameo PCGS. The Accented Hair variety is rare in PR68 Deep Cameo at PCGS and almost unknown finer. This piece is brilliant with stark white-on-black contrast and dramatic eye appeal. The strike is fully rendered, and no imperfections are observed. Population: 17 in 68 Deep Cameo, 1 finer (7/17). NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

## EARLY DOLLARS

1795 Flowing Hair Dollar, VF20  
B-7, BB-18, Three Leaves

- 3875** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, VF20 PCGS. Bowers Die State I, as usual. This is a boldly struck olive-gray coin with no adjustment marks visible. The design elements show bold detail for the grade, including a defined eye on the eagle. The border dentils are complete and sharp. Most of each side displays olive-gray patina, although lighter hues are seen over the central devices. An excellent Flowing Hair, Three Leaves type coin. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

1795 Flowing Hair Dollar, VF25  
B-5, BB-27, Three Leaves

- 3876** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 PCGS. Bowers Die State II. This Three Leaves type coin has bold central devices and complete border dentils, although some faint adjustment marks are discernible along portions of the obverse periphery. Both sides display deep olive-gray patina and smooth surfaces. A die crack extends toward the rim from the left wreath stem, indicating this often-seen early die state. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, Toned VF30  
Off-Center Variety, B-14, BB-51

- 3877** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 PCGS. Bowers Die State I. Struck from perfect dies, as always. BB-51 was the Mint's initial use of the Draped Bust design, and the portrait was positioned too far left in the master die — a situation soon remedied with the BB-52 variety. This example is richly toned in gunmetal-blue, tan-gold, and cream-gray shades. The motifs are especially well-defined for the VF level with only a few minor marks and surprisingly smooth surrounding fields. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, XF40  
Centered, B-15, BB-52

- 3878** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 PCGS. Bowers Die State V. The highest wave of hair is under the E in LIBERTY, identifying the BB-52 variety. On this later die state, there is a prominent die break in Liberty's hair and the beginning of a faint die crack through the letters ICA on the reverse. This lightly worn XF specimen retains much interior design detail in Liberty's hair and all major design elements are bold. Shades of lavender-gray and magenta toning blanket the lightly abraded surfaces. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1796 Draped Bust Dollar, VF35  
Small Date, Large Letters, B-4, BB-61

- 3879** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35 PCGS. Bowers Die State I. Rich, natural bluish-gray patina covers both sides of this exceptional, Choice VF BB-61 dollar. Numerous pinhole-sized interludes in the toning allow glints of silver to shine through and give the coin a kind of effervescent eye appeal. Well-struck for the assigned grade, careful scrutiny with a glass reveals only an occasional minor mark or line, but they are thoroughly camouflaged by the toning and unseen in-hand. As the sole collectible variety featuring the Small Date obverse paired with a Large Letters reverse, this *Guide Book* variety is a necessity for type and early dollar specialists alike. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1797 Small Eagle Dollar, Pleasing VF35  
B-3, BB-71, 10x6 Stars, Luster Remains

- 3880** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF35 NGC. Bowers Die State III. Six stars face Liberty's portrait, while 10 stars on the left is the only such arrangement in the dollar series. This Choice coin retains a fair amount of mint luster despite 25 points of wear. Attractive blue and reddish-tan toning adds natural appeal. There are no adjustment marks to distract the eye. A minor rim bump near the first S in STATES and a short abrasion above the first A in America are the sole marks of note. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 B-3, BB-71 Dollar, Lightly Toned AU50**  
**10x6 Stars, Small Eagle, Large Letters**

- 3881** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, AU50 NGC. Bowers Die State III. This is the only early dollar with the 10x6 obverse star arrangement. Examples are moderately available at the About Uncirculated level. Although the reported mintage of 1797 dollars is understated (BB-73 was partially or wholly struck in 1798 and included with that year's production), all three varieties are challenging. This lightly toned AU example has thin bands of olive-gold toning that run horizontally across both sides. Struck from lapped dies, a few of the stars are drawn to the edge of the finely textured fields. Some high-point weakness combines with nominal wear, visible mostly at the peripheries. Substantial mint luster remains, and there are only a few minor abrasions. Brief adjustment marks appear at the upper-right and lower-left obverse margins. Census: 10 in 50, 23 finer (7/17). NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1798 Large Eagle Dollar, AU Details**  
**B-27, BB-113, Close Date, Pointed 9**

- 3882** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Improperly Cleaned — NGC Details. AU. Bowers Die State II. The obverse die held together to strike seven 1798 varieties (BB-113 through BB-119), but BB-113 is the only usage paired with a reverse die where field star 12 is distant from the beak, and the olive leaf tip points between R and I in AMERICA. This stone-gray example was cleaned at one time and lacks its original patina. A few faint swirl lines exist in the smooth, slightly subdued fields, yet About Uncirculated definition remains.

**1799 Dollar, Well-Detailed AU53**  
**B-5, BB-157, 7x6 Stars**

- 3883** 1799 7x6 Stars, B-5, BB-157, R.2, AU53 NGC. Bowers Die State III, cracked through UNITED STATES and AMER along the reverse periphery. This satiny pewter-gray type coin displays hints of luster in the protected regions with a light tan-gold hue overall. The surfaces are smooth and devoid of distracting abrasions. Some mint-made adjustment marks reach into LIBERTY from the upper obverse dentils. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

**1799 7x6 Stars Dollar, AU53**  
**B-8, BB-165, Sharp Detail**

- 3884** 1799 7x6 Stars, B-8, BB-165, R.3, AU53 PCGS. Bowers Die State II, cracked through the LIB in LIBERTY but without the later crack that travels through the TY. This sharply detailed Draped Bust type coin has complete border dentils and sharp interiors with no adjustment marks. Olive-green and golden-gray toning on each side is deepest at the rims, leaving the interiors with a very light patina. A few faint marks are not distracting. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

**1802/1 Draped Bust Dollar, XF45**  
**Wide Date, B-3, BB-234**

- 3885** 1802/1 Wide Date, B-3, BB-234, R.3, XF45 PCGS. Bowers Die State III. The remnants of an undertype 1 are clearly visible below the final digit in the date and there is a die lump in the field below star 8, identifying the BB-234 variety. Some faint clash marks above the date indicate the later die state. Most interior detail on Liberty's hair and drapery remains intact on this Choice XF specimen, and the lightly abraded surfaces are blanketed in attractive shades of lavender-gray toning, with traces of original mint luster underneath. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

**1802 Narrow Date Dollar, AU50**  
**B-6, BB-241, Ample Remaining Luster**

- 3886** 1802 Narrow Date, B-6, BB-241, R.1, AU50 NGC. Bowers Die State III. The right base of T in LIBERTY is missing, diagnostic for the Guide Book Narrow Date variety. This pleasing dollar has pale grayish-gold surfaces with considerable luster. Small marks are present but are incidental for the grade. Census: 5 in 50, 21 finer (7/17). NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

## GOBRECHT DOLLARS

1836 Gobrecht Dollar, AU Details  
Judd-60 Original, Die Alignment I

- 3887** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Spot Removals — NGC Details. AU. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State E. The diagonal die clash is readily apparent (State D) as are the rim nick above the A in STATES (State E), but the die chip in the dentils below the R in DOLLAR is hidden by one of the prongs on the NGC holder. An oval-shaped planchet flaw is noted near 11 o'clock on the obverse with light pinscratching in the area. More pinscratching is seen just below the eagle's beak on the reverse. Light gray patina overall with slightly deeper accents around the devices. Lightly hairlined.

1836 Original Gobrecht Dollar, PR61  
Judd-60, Medallion Alignment, DA IV

- 3888** 1836 Judd-60 Original, Medal Alignment, Pollock-65, R.1, PR61 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment IV (head of Liberty opposite the O in OF after a medal turn). Die State F. Die Alignment IV shows the eagle flying level in the starry field after a medal turn. The die scratch though the O in DOLLAR and scratch below the D in DOLLAR are very faint on this example. The Mint's account books show these pieces were struck in the final week of 1836. Unlike many Gobrecht dollars, this example displays watery fields that really do make a proof designation make sense. (Many 1836s are Prooflike at best.) Each side is mostly brilliant with a thin ring of golden and blue patina around the outermost reach of the rims. Well, but not completely defined. Minimal marks. This is really a splendid Gobrecht dollar that would serve well as a type coin. NGC ID# BLWV, PCGS# 11226

## PROOF SEATED DOLLARS

**1858 Seated Dollar, PR62**  
Well-Known, Proof-Only Date

- 3889 1858 PR62 PCGS.** For many years the mintage of 1858 Seated dollars was thought to be in the range of 60-80 pieces. That earlier estimate is clearly in error, if one looks at nothing more than the number of individual coins known. Today the mintage is generally believed to be 300 pieces. All examples are known to be proof-only with not even a rumor of any business strikes. This is a situation similar to the 1895 Morgan dollars, although 1858 dollars are much scarcer than their 1895 counterparts, yet they cost less because of the relative popularity of each series. This is a deeply mirrored example that shows just the slightest tinge of rose toning over each side. Hairlines explain the grade. Fully detailed in all areas. Population: 28 in 62, 45 finer (7/17). NGC ID# 252C, PCGS# 7001

**1863 Seated Dollar, PR63 Cameo**  
Only 460 Proofs Struck

- 3890 1863 PR63 Cameo PCGS. OC-P1.** Only 460 proof Seated Liberty dollars were struck in 1863, when wartime hoarding and the suspension of specie payments made proof sets more expensive and difficult to order. This attractive Select specimen exhibits sharply detailed, frosty design elements that contrast boldly with the mirrored fields. Only minor signs of contact are evident, and a few hints of pale gold toning add to the outstanding eye appeal. Population: 11 in 63 (2 in 63+) Cameo, 18 finer (7/17). NGC ID# 252H, PCGS# 87006

**1867 Silver Dollar, PR65 Cameo**  
Rarely Offered So Fine

- 3891 1867 PR65 Cameo NGC.** Most proof 1867 Seated Liberty dollars lack substantial cameo characteristics. This Gem is a conditionally rare exception, showing pronounced field-device contrast and virtually brilliant surfaces. The strike is fully rendered, and neither side exhibits mentionable signs of contact. Faint die polishing lines in the fields should not be mistaken for hairline scratches. Visual appeal is outstanding. Census: 13 in 65 Cameo (1 in 65 ★), 10 finer; 3 in 65 Ultra Cameo, 3 finer (7/17). NGC ID# 252N, PCGS# 87015

## TRADE DOLLARS

**1873-CC Trade Dollar, MS63**  
**Finest Example at Auction in Three Years**  
**A Major Condition Rarity**

**3892 1873-CC MS63 PCGS.** Ex: Linda Collection. For common type coin Trade dollars, MS63 is not a particularly high grade. But for the 1873-CC, MS63 coins are genuinely rare, only seen at auction once every few years. We have previously handled only six coins in this grade, the last of which was a PCGS example in our November 2014 Beverly Hills Signature sale that realized \$17,625. Other auction appearances of this date in MS63 have neared or exceeded \$30,000 between 2008 and 2014. No Select of finer '73-CC Trade dollars have been seen at auction since, meaning that the present coin may find itself in higher demand than expected when it crosses the auction block.

Liberty's figure and the stars are well-defined, and the eagle shows weakness only the right (facing) talons. Both sides are satiny and brilliant with the occasional minor abrasion as expected for the grade. A die marker on this piece is a horizontal tine through the D in DOLLAR. A few finer examples are reported by the grading services, but they are apparently in strong hands, as none have made recent auction appearances. This is a rare and important opportunity for the Trade dollar specialist. NGC ID# 252X, PCGS# 7032

**1877-CC Trade Dollar, MS64**  
**Extremely Rare Any Finer**

**3893 1877-CC MS64 PCGS.** Only 534,000 Trade dollars were struck at the Carson City Mint in 1877. All but 3,000 of the coins were produced in June, July, and August, supposedly for export to China. Contemporary newspaper accounts indicate some of the coins circulated domestically, however, although they were not popular with the general public. Certainly few examples were saved in high grade, and the 1877-CC is a prime condition rarity in grades above the MS64 level.

This impressive Choice example exhibits well-detailed design elements, with just a touch of softness on the upper stars and Liberty's hair. The well-preserved surfaces show only minor signs of contact, with subtle hints of golden-tan and lavender toning. Satiny mint luster adds to the outstanding eye appeal. Population: 12 in 64 (1 in 64+), 2 finer (7/17). NGC ID# 253D, PCGS# 7045

## MORGAN DOLLARS

### 1878-CC Morgan Dollar, MS66+ Few Available Finer

**3894 1878-CC MS66+ PCGS. VAM-9.** CC tilted right, die lines in reverse fields. The 1878-CC Morgan dollar as a whole is rare above MS66. This collectible Premium Gem displays frosty, brilliant luster with no distracting abrasions. The obverse is sharply defined, although the reverse has weakness on the eagle's talons. PCGS reports a half-dozen finer representatives (7/17). NGC ID# 253M, PCGS# 7080

### 1878-CC Morgan Dollar, MS66 First-Year Carson City Issue

**3895 1878-CC MS66 PCGS. CAC.** The 1878-CC Morgan dollar is always in demand because of its first-year status and the charismatic CC mintmark. This spectacular Premium Gem exhibits sharply detailed design elements in most areas, but the eagle's talons show the typical lack of detail for this issue. The impeccably preserved, lustrous surfaces are visited by attractive shades of sea-green, violet, and lavender-gray toning. NGC ID# 253M, PCGS# 7080

### 1879-CC Morgan Dollar, MS63 Frosty and Brilliant

**3896 1879-CC MS63 PCGS.** This Normal Mintmark 1879-CC Morgan dollar displays frosty, brilliant mint luster and well-defined design elements. Scattered abrasions on the obverse limit the grade. In Mint State, the 1879-CC is the second-scarcest Carson City Morgan, trailing only the 1889-CC. Limited quantities were distributed through the GSA sales of the early 1970s, from where most other CC-mint dates get their vast availability. NGC ID# 253U, PCGS# 7086

### 1879-CC Morgan Dollar, MS64+ Semiprooflike, CAC-Approved

**3897 1879-CC MS64+ PCGS. CAC.** Most of the Uncirculated 1879-CC Morgan dollars known today came out of the GSA sales of the early 1970s. There were only slightly more than 4,000 coins represented in the GSA disbursements, and today the '79-CC is considered the second most elusive Morgan in the Carson City short set, trailing only the 1889-CC. The present coin is not pedigreed to the GSA hoard, although one might speculate that such was its origin due to the frosty, brilliant luster and lightly marked surfaces. It is Plus-graded, CAC-approved, and especially appealing. The surfaces are brilliant. Although not fully Prooflike, the fields do show appreciable reflectivity. Some trivial strike weakness is seen on the eagle's breast and the hair above Liberty's ear, as usual. Finer examples of the date are scarce. NGC ID# 253U, PCGS# 7086

1879-S Silver Dollar, MS68  
Beautiful Morgan Type Coin

- 3898 1879-S MS68 PCGS.** The 1879-S is a popular type coin among Morgan dollar collectors, as it is available through MS67. This MS68 coin, however, is conditionally scarce, and no numerically finer representatives are known (8/17). Satiny, semireflective fields set off the frosty, sharp design elements amid a wash of light golden toning. Sun-orange and violet border toning surrounds both peripheries. NGC ID# 253X, PCGS# 7092

1880-CC VAM-5 Dollar, MS66+ Prooflike  
8 Over High 7, Top 100 Variety

- 3899 1880-CC 8 Over High 7, VAM-5, MS66+ Prooflike NGC.** A Top 100 Variety. The second 8 in the date is clearly punched over a 7. A die gouge on the upper right serif of U(N)UM is a further diagnostic. This amazing MS66+ Prooflike example of the VAM-5 variety is surely a treat for specialists. Boldly struck with reflective fields and frosted motifs, this Premium Gem dollar remains all-brilliant. Census (all 1880-CC varieties): 22 in 66 (2 in 66+) Prooflike, 1 finer (7/17). NGC ID# 2542, PCGS# 41133 Base PCGS# 7103

1880-CC GSA Dollar, 8/7 Overdate, MS66  
VAM-7, Reverse of 1878

- 3900 1880-CC Reverse of 1878, 8 Over 7, VAM-7, GSA, MS66 PCGS.** A Hit List 40 Variety. The 8 is repunched over a 7, the remnant of the lower part of the 7 apparent as a dash below the 8. This variety was discovered by Ted Clark in 1970. The reverse with its parallel arrow feathers and small CC mint mark was discovered by Howard Newcomb in 1913. The surfaces are brilliant, as are most GSA dollars, with thick mint frost. A few faint grease stains are seen on the obverse, struck into the coin when produced, but the only mark of any note is an angling abrasion on the lower portion of the eagle's breast. NGC ID# AP7P, PCGS# 518860 Base PCGS# 7110

1881-CC GSA Dollar, Frosty MS67  
Among the Finest in GSA Plastic

- 3901 1881-CC GSA MS67 NGC.** The 1881-CC is a sought-after date in high grade, particularly in original GSA holders. Superb Gem GSA coins are major rarities. NGC and PCGS combined list only 36 submissions in MS67 (including Plus- and Star-designated pieces), with none finer (8/17). This example is nearly perfect in its preservation, showing brilliant, frosty mint luster and sharp design elements. The cheek and field are clean in the prime focal plains of the obverse. We have previously offered only eight Superb Gem GSA 1881-CC dollars, with a recent MS67+ example realizing nearly \$20,000 (Heritage, 4/2017). Census: 35 in 67 (3 in 67+, 1 in 67 ★), 0 finer (8/17). NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

**1881-S Dollar, MS68+  
Practically Flawless, Devoid of Color**

- 3902 1881-S MS68+ NGC.** The 1881-S is a great option for type collectors and a reliably available issue in grades as high as MS68. For Registry Set builders, however, only a handful of coins have achieved a Plus designation, and a single finer example has been graded by NGC (7/17). Utterly devoid of color and razor-sharp, this Superb Gem is unmarked and wholly deserving of this impressive grade assessment. NGC ID# 2549, PCGS# 7130

**1885-CC Dollar, Radiant MS67  
Popular, Low-Mintage Issue**

- 3903 1885-CC MS67 NGC.** In spite of its low mintage of only 228,000 coins, the 1885-CC was largely set aside at the time of issue and very few pieces actually entered circulation. Still, the low mintage is a lure for collectors. It is also an issue that was very well-produced. This piece is brilliant and exhibits the expected radiant mint luster. Additionally, it is essentially mark-free. NGC ID# 254S, PCGS# 7160

**1887-S Doubled Date Dollar, MS66  
VAM-4, The Finest Certified**

- 3904 1887-S Doubled Date, VAM-4, MS66 PCGS. CAC. Ex: California.** A Hot 50 Variety. The date is most noticeably doubled at the top of the 1 and the top of the 7 in the date. This is the finest VAM-4 we have offered and it is also the finest certified (7/17). The surfaces are brilliant and exude bright mint frost. Nearly unmarked, the strike is just a bit weak in the centers. NGC ID# 2554, PCGS# 134004 Base PCGS# 7180

**1888-O Morgan Dollar, MS63  
Scarface, VAM-1B3 Variety**

- 3905 1888-O Scarface, VAM-1B3, MS63 PCGS.** A Top 100 Variety. Vivid shades of sea-green, magenta, and steel-gray toning visit the well-preserved surfaces of this impressive Select example, with vibrant mint luster underneath. A prominent die break extends all the way across Liberty's cheek and into her hair, identifying the famous "Scarface" variety. Population: 19 in 63 (4 in 63+), 1 finer (8/17). NGC ID# 2556, PCGS# 133918 Base PCGS# 7184

**1890-O Morgan Dollar, MS66  
Very Rare Any Finer**

- 3906 1890-O MS66 PCGS.** This delightful Premium Gem exhibits sharply detailed design elements for a New Orleans issue, with just a trace of softness on the eagle's breast. The well-preserved surfaces radiate vibrant mint luster and show a few subtle hints of golden-tan toning. Eye appeal is outstanding. Population: 29 in 66 (1 in 66+), 0 finer (8/17). NGC ID# 255E, PCGS# 7200

**1892-CC Dollar, MS64  
Never Released En Masse**

- 3907 1892-CC MS64 PCGS.** The 1892-CC is far scarcer than its counterparts from the early years of the 1880s. The issue was never released en masse, though Mint State coins are available through near-Gem condition. Naturally, demand always exceeds supply. This is a minimally toned, well-struck Carson City dollar with occasional specks of tan-gold color. The fields are smooth and generally clean. Faint roller marks appear on the chin. NGC ID# 255M, PCGS# 7214

1892-S Morgan Dollar, Unc Details  
Sharp, Nicely Toned Example

- 3908** 1892-S — Cleaned — PCGS Genuine. Unc Details. The 1892-S Morgan dollar is a prime condition rarity in the series and unworn, lightly abraded examples are always in demand. Attractive shades of lavender-blue and greenish-gold toning blanket the lightly marked surfaces of this impressive specimen. The design elements are sharply detailed throughout and hints of prooflike reflectivity shine through the toning. The mint luster is somewhat dimmed by the noted cleaning.

1893-CC Morgan Dollar, MS63  
Semiprooflike Fields

- 3911** 1893-CC MS63 PCGS. Brilliant, frosty surfaces are original, and this Select 1893-CC Morgan displays minimal abrasions for the grade. The fields are semiprooflike. Examination of the central devices shows the usual strike weakness on the eagle's breast and the hair above Liberty's ear. The 1893-CC is a slightly better date in high grade among Carson City Morgans, as almost no examples were distributed through the GSA sales of the early 1970s. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, AU58+  
Final Carson City Issue

- 3909** 1893-CC AU58+ PCGS. CAC. A meager mintage of 677,000 Morgan dollars AU58+ was achieved at the Carson City Mint in 1893, the final year of coinage operations at the famous Western facility. This Plus-graded near-Mint specimen exhibits sharply detailed design elements with the slightest trace of wear on the high points. The lightly abraded, creamy surfaces retain much of their original mint luster, adding to the considerable eye appeal. NGC ID# 255S, PCGS# 7222

1893-CC Morgan, MS62 Prooflike  
Elusive With Mirrored Fields

- 3912** 1893-CC MS62 Prooflike NGC. Prooflike examples of the 1893-CC Morgan dollar are elusive, and those grading finer than MS62 are rare. This piece is brilliant save for a halo of yellow-gold rim toning. The fields are deeply reflective, delivering a subtle cameo effect on the obverse. The usual strike weakness is seen on the central devices, and the surfaces are moderately abraded. NGC ID# 255S, PCGS# 7223

1893-CC Dollar, MS63  
Always in High Demand

- 3910** 1893-CC MS63 PCGS. A dusky layer of violet-gray patina allows the underlying brilliance to shine through. This Select dollar offers the usual degree of central incompleteness found among 1893-CC examples, but the outer elements display a good impression. A few small reed marks and field grazes are noted. This final-year representative derives from a mintage of 677,000 coins. NGC ID# 255S, PCGS# 7222

1893-S Dollar, VF25  
Well-Detailed Collector Coin

- 3913** 1893-S VF25 PCGS. A pleasing steel-gray VF example of the 1893-S Morgan dollar, showing moderate wear and lightly marked surfaces. The 1893-S is widely regarded as the biggest key date in the series due to its low mintage of 100,000 coins. Many low-gray examples exist, but collectors usually strive for better quality than the low circulated levels offer. This well-detailed VF coin will appeal to a number of Morgan dollar enthusiasts. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, XF Details  
Pleasing Coloration**

- 3914 1893-S — Cleaned — PCGS Genuine. XF Details.** The 1893-S Morgan dollar is highly sought-after in all grades, but XF-level coins are somewhat scarce in comparison to lower-grade pieces. This example displays good detail and has pleasing olive-gray patina that lightens toward the interiors. Quite attractive to the unaided eye, but showing faint hairlines under a loupe, which prevent a numeric grade.

**1894 Dollar, MS63  
Bright Cartwheel Luster**

- 3915 1894 MS63 NGC.** Only the 1893-S can claim a lower mintage than this scarce Philadelphia Morgan dollar issue. The Mint struck a paltry total of 110,000 coins in 1894 during the depths of an economic depression. Most survive in circulated grades, while mint examples are typically heavily marked. Not so with this all-brilliant Select offering. Each side is needle-sharp with unobtrusive grazes and cartwheel luster. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS63+  
Lightly Toned and Appealing**

- 3916 1894 MS63+ PCGS.** This satiny, Plus-graded Select example displays original mint luster cast in shades of gold, lavender, and pale olive toning, the deeper hues primarily clustered toward the rims. Slight strike weakness occurs on the hair above Liberty's ear and on the eagle's breast and talons. The 1894 is a semikey date in all grades but is particularly scarce in the middle and upper Mint State levels. NGC ID# 255V, PCGS# 7228

**1896-S Dollar, Brilliant MS64  
Much Finer Than the Average Example**

- 3917 1896-S MS64 PCGS.** Grading more than 14 full points higher than the average 1896-S dollar at PCGS or NGC, this brilliant Choice Uncirculated representative should meet the standards of the most discriminating Morgan dollar specialists, who know just how difficult this issue is to locate well-struck and well-preserved. Detail is typical, and frosty mint luster rolls over surfaces with scattered grazes but few deep or overly detracting abrasions. NGC ID# 2564, PCGS# 7244

**1896-S Dollar, MS64+  
CAC-Approved Quality for the Grade**

- 3918 1896-S MS64+ PCGS. CAC.** Mint condition 1896-S dollars are exceedingly elusive, ranking among the most difficult Morgan dollars to locate in Uncirculated grades. MS64 is the highest level within the realm of affordability for most enthusiasts. Here is a Choice 1896-S that features top-notch quality for the grade. Although typically softly struck, each side is readily appealing with original mint brilliance and frosty luster. A couple of grazes on the cheek and in the obverse fields are minimal. CAC: 56 in 64, 8 finer (7/17). NGC ID# 2564, PCGS# 7244

**1898-S Morgan Dollar, MS65+  
Elusive Prooflike Specimen**

- 3919 1898-S MS65+ Prooflike PCGS.** This Plus-graded Gem exhibits well-detailed design elements, with just a touch of softness on the hair strands above Liberty's ear. The frosty devices contrast boldly with the deeply reflective fields and the well-preserved, mostly brilliant surfaces show a few hints of greenish-tan toning. Population: 6 in 65 (1 in 65+) Prooflike, 7 in 65 DM, 0 finer (8/17). NGC ID# 2569, PCGS# 7257

1899-O VAM-6 Dollar, MS63  
Micro O, Top 100 Variety

- 3920** 1899-O Micro O, VAM-6, Top 100, MS63 PCGS. A Top 100 Variety. A mintmark punch intended for Barber quarters was inadvertently used on five different 1899-O Morgan dollar die varieties. VAM-6 has a near date, and the mintmark is entered low and tilted right. Freckles of golden-brown, plum-red, and cobalt-blue embrace the borders of this coruscating representative. The reverse is well-preserved, and the obverse has a few light marks. Peripheral design elements are generally crisp, but typical New Orleans Mint incompleteness occurs over the centermost areas. Population (all Micro O varieties): 10 in 63, 21 finer (7/17). NGC ID# 256C, PCGS# 133948 Base PCGS# 87260

1901 Dollar, Lustrous MS62  
Scarce This Well-Preserved

- 3921** 1901 MS62 PCGS. This key Morgan dollar grades nearly 10 points higher than the typical example at the leading certification services, highlighting the issue's rarity in better states of preservation. Liberty's cheek and the fields are surprisingly clean with a couple of sizeable abrasions on the neck, chin, and above the eagle. The hair and breast feathers exhibit good detail. A lustrous and brilliant representative in scarcely seen mint condition. NGC ID# 256J, PCGS# 7272

1904-O Morgan, MS67 Prooflike  
Sole CAC-Approved Coin in This Grade  
A Great Condition Rarity With Prooflike Fields

- 3922** 1904-O MS67 Prooflike PCGS. CAC. The 1904-O Morgan dollar, common in most grades since the Treasury releases of the 1960s, is conditionally scarce in MS67. Prooflike coins in this grade are extremely rare, and this piece is the only one with a CAC endorsement. The design elements are remarkably well-struck and satiny, set against deeply reflective fields. Neither side shows mentionable toning or abrasions. Population: 2 in 67 Prooflike, 0 finer; 1 in 67 Deep Mirror Prooflike, 0 finer. CAC: 1 in 67, 0 finer (7/17). NGC ID# 256V, PCGS# 7293

## PROOF MORGAN DOLLARS

1878 8TF Morgan Dollar, PR64+ Cameo  
A Rare Cameo Proof, VAM-14.8, Spiked Eye

**3923** 1878 8TF PR64+ Cameo PCGS. CAC. VAM-14.8, Spiked Eye. A small die gouge at Liberty's eye earns this coin the "Spiked Eye" moniker. The VAM-14.8 dies were originally used for proof coinage — represented here — but were later employed for circulation strikes. The latter variant is scarcer, but this proof coin is equally intriguing. Under a loupe, the date numerals are faintly recut, and the left-hand stars show minor quadrupling.

Cameo eight tailfeathers proof Morgans are collectively rare regardless of variety. PCGS lists 27 such submissions, with the majority in the PR63-PR64 numeric range. Only a handful of CAC-endorsed coins are known. This Plus-graded near-Gem possesses pronounced contrast and significant appeal. The strike is sharp and no distracting marks are seen. Brilliant interiors cede to olive-gold and sea-green border toning, with a few small splashes of blue around the RIB in PLURIBUS. No Deep Cameos are recorded at PCGS. Population (all varieties included): 9 in 64 (4 in 64+) Cameo, 6 finer. CAC: 7 in 64, 4 finer (7/17). NGC ID# 2572, PCGS# 87311

1898 Dollar, PR66 Cameo  
Toned and Contrasted

**3924** 1898 PR66 Cameo PCGS. CAC. Cameo and Deep Cameo proof 1898 Morgan dollars are scarce in high grade. This Premium Gem Cameo displays lavender and olive-gray toning in the fields, leaving the central devices brilliant so as to accentuate the field-device contrast. The strike is sharp and the fields are deeply mirrored. Few CAC-endorsed Cameos exist this fine. Population: 8 in 66 Cameo, 2 finer; 10 in 66 Deep Cameo, 18 finer. CAC: 4 in 66, 1 finer (7/17). NGC ID# 27ZW, PCGS# 87333

## PEACE DOLLARS

1922-D Peace Dollar, MS66+  
Blazing Brilliant Luster

**3925** 1922-D MS66+ PCGS. CAC. While the Philadelphia issue of this year is common in MS66, the 1922-D Peace dollar is much more challenging, and in finer grades is a great rarity. This Plus-graded CAC coin displays bold detail and frosty, brilliant mint luster. No distracting abrasions are seen. PCGS reports only three finer representatives (8/17). NGC ID# 257D, PCGS# 7358

1922-D Peace Dollar, MS67  
Registry Worthy, Finest at Both Services

**3926** 1922-D MS67 NGC. Frosty, luminous luster rolls over beautifully preserved surfaces on this Registry worthy Superb Gem 1922-D Peace dollar. The strike is bold, and eye appeal is excellent. Superb Gem 1922-D dollars are very rare and appear at auction with even greater infrequency. Census: 17 in 67 (1 in 67★), 0 finer (7/17). NGC ID# 257D, PCGS# 7358

## GOLD DOLLARS

1923 Peace Dollar, MS67  
Among the Finest at Both Services

- 3927** 1923 MS67 PCGS. CAC. This P-mint Peace dollar often serves as a type, given its abundance through most Mint State grades. Even Superb Gems, while scarce, are obtainable. They are also the finest examples certified at both services. This piece features complete brilliance and relatively strong definition. Liberty's cheek and the fields are nearly flawless. Population: 69 in 67, 0 finer. CAC: 27 in 67, 0 finer (7/17). NGC ID# AMPA, PCGS# 7360

1923-D Peace Dollar, MS66  
Extremely Rare in Finer Grades

- 3928** 1923-D MS66 PCGS. CAC. From a substantial mintage of 6.8 million pieces, the 1923-D Peace dollar is very scarce in MS66 condition, and finer examples are virtually unobtainable. This delightful Premium Gem exhibits sharply detailed design elements throughout, and the impeccably preserved, creamy surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 257G, PCGS# 7361

1927-S Peace Dollar, MS65  
Only One Coin Finer at NGC

- 3929** 1927-S MS65 NGC. With a mintage of only 866,000 coins, the 1927-S is a better date in Gem condition, scarce in this grade and highly sought-after. Finer coins exist but are prohibitively rare. This MS65 example displays a bold strike and satiny mint luster cast in a light tan-gold hue. No distracting abrasions appear. Census: 81 in 65 (4 in 65+), 1 finer (7/17). NGC ID# 26J6, PCGS# 7372

1849-C Gold Dollar, AU58  
Closed Wreath  
Partially Reflective Fields

- 3930** 1849-C Closed Wreath AU58 PCGS. Variety 1. The debut gold dollar from the Charlotte Mint is a rarity in Mint State, and such pieces frequently lack the eye appeal of the present near-Mint coin. Partially prooflike fields and bold design elements render pleasant aesthetics despite slight high-point friction and a few light marks. The Charlotte Mint accomplished a mintage of 11,634 coins in 1849, including the extremely rare Open Wreath variety. Gold dollar production declined the following year to fewer than 7,000 coins. Population: 14 in 58, 22 finer (7/17).  
*From The Morgan Hill Collection.* NGC ID# 25BC, PCGS# 7505

1849-O Gold Dollar, MS64  
Open Wreath, Rare So Fine

- 3931** 1849-O Open Wreath MS64 NGC. Variety 3. Lapped reverse. The first-year cachet of 1849-O gold dollar explains its popularity, and a decent number of coins survive in lower Uncirculated grades for those who demand a Mint State representative. Choice pieces are harder to come by. The obverse is fully struck, while the reverse details are weakened by die lapping. Vibrant luster flows over luminous lemon-gold surfaces. Census: 28 in 64 (3 in 64+), 16 finer (7/17). NGC ID# 25BE, PCGS# 7508

1851-D Gold Dollar, MS61  
Collectible Mint State D-Mint Coin

- 3932** 1851-D MS61 NGC. Variety 3-D. From a mintage of 9,882 pieces, the 1851-D gold dollar is an undisputed rarity in Uncirculated condition. This MS61 coin is a collectible example in a sought-after grade. Satiny yellow-gold surfaces offer minimal abrasions and show good eye appeal. This variety shows the mintmark faintly recut. Census: 19 in 61, 34 finer (7/17).  
*From The Morgan Hill Collection.* NGC ID# 25BM, PCGS# 7515

**1853 Gold Dollar, MS66+**  
Great for Type Purposes

- 3933 1853 MS66+ PCGS. CAC.** The ease that this date can be found and the relatively high grade it can be located make it the logical choice for type purposes, especially for a Type One example. This high-grade example has bright yellow-gold surfaces and exhibit radiant mint luster. Virtually mark-free. Population: 61 in 66 (6 in 66+), 12 finer. CAC: 26 in 66, 5 finer (7/17). NGC ID# 25BU, PCGS# 7521

**1855 Type Two Gold Dollar, MS63+**  
Rich Reddish Patina

- 3934 1855 Type Two MS63+ PCGS.** The gold dollar was a perfect example of the Neoclassical need to impose order. This long-lived art movement was especially suitable for coinage since order must be imposed because of design considerations. However, the need for order goes beyond the design and layout. Thick designs cannot oppose each other on the obverse and reverse because of the need to have each side fully strike up with one blow from the press. This lesson was learned the hard way by James Longacre with his 1854 redesign (the Type Two design) of the gold dollar. Die opposition and subsequent weak central details caused Longacre to modify the coin's design again in 1856 to the Type Three design. This is a high-grade example that displays rich reddish-gold color. The strike details are remarkably sharp with all digits complete in the date. NGC ID# 25C4, PCGS# 7532

**1855-O Gold Dollar, MS61**  
Most Popular O-Mint Issue in the Series

- 3935 1855-O MS61 PCGS. Variety 2.** Lapped reverse, as often seen. There is only one Type Two gold dollar issue struck at the New Orleans Mint: the 1855-O. This is also the most popular and final gold dollar from the Louisiana branch mint. Only a few hundred examples survive from a mintage of 55,000 coins, however. Perhaps 50 or so are in Uncirculated condition. Brightly lustrous surfaces feature scattered wispy marks. Strong detail on the headdress and lower wreath. Population: 14 in 61, 26 finer (7/17). NGC ID# 25C7, PCGS# 7535

**1857-D Gold Dollar, AU58**  
CAC-Approved With an Above-Average Strike

- 3936 1857-D AU58 NGC. CAC. Variety 9-L.** The most remarkable feature of this coin is the strength of strike on the entire obverse and most of the reverse. The 1857-D is well-known as a poorly produced, weakly struck dollar, but the present coin is weak only on the lower portion of the wreath. The curious raised segments are prominent around the border of the reverse. The surfaces display bright orange-gold color and there are no mentionable abrasions. Ex: *Central States Signature* (Heritage, 4-5/2010), lot 3425. NGC ID# 25CF, PCGS# 7546

**1858-D Gold Dollar, AU58**  
Low-Mintage Type Three Issue

- 3937 1858-D AU58 PCGS. Variety 10-M.** The 1858-D gold dollar is a curious issue. Only 3,477 pieces were struck, and yet quite a few examples are known in high grades. With only 125-150 pieces believed extant in all grades, it is not exactly a type coin, but it is one of the few D-mint Type Three gold dollars that can be located in AU and even mint condition. It is also much better struck than the preceding 1857-D. Slight softness is noted on the high points of this coin, and each side displays rich yellow-orange color. A few shallow field marks are noted on the reverse, but we only see one on the obverse. Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 4533. NGC ID# 25CJ, PCGS# 7549

**1859 Gold Dollar, Shimmering MS66+**  
Full Strike Detail

- 3938 1859 MS66+ PCGS. CAC.** The 1859 ranks among the more available gold dollars of the period. However, the average certified grade is only 60.4. Coins at this esteemed level are very rare and finer pieces are extremely so. This piece also boasts a sought-after green label sticker for quality within the grade — rightfully so. Shimmering rose-gold surface are nearly pristine with full strike detail on the motifs. Clashed lightly on each side. Population: 10 in 66 (3 in 66+), 5 finer. CAC: 7 in 66, 3 finer (7/17). NGC ID# 25CL, PCGS# 7551

## CLASSIC QUARTER EAGLE

1866 Gold Dollar, MS65  
Sharp Strike, Vibrant Luster

- 3939 1866 MS65 PCGS. A spectacular Gem representative from a meager business-strike mintage of 7,100 pieces, this coin exhibits sharply detailed design elements, with some dramatic clash marks on both sides. The well-preserved orange-gold surfaces radiate vibrant mint luster, adding to the exceptional eye appeal. Population: 10 in 65, 19 finer (7/17). NGC ID# 25D2, PCGS# 7565

1869 Gold Dollar, MS66  
Exceptional Quality and Eye Appeal

- 3940 1869 MS66 PCGS. CAC. Only 5,920 business-strike gold dollars were struck in 1869, making this date scarce-to-rare in all grades. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved lemon-yellow surfaces with vibrant mint luster on both sides. Eye appeal is tremendous. Population: 2 in 66 (1 in 66+), 11 finer. CAC: 3 in 66, 6 finer (7/17). NGC ID# 25D5, PCGS# 7568

## EARLY QUARTER EAGLE

1804 BD-2 Quarter Eagle, AU Details  
Interesting 14 Stars Reverse Variant

- 3941 1804 14 Stars Reverse, BD-2, R.4 — Cleaned — PCGS Genuine. AU Details. Bass-Dannreuther Die State a/a. This curious 14 Stars Reverse variety constitutes virtually the entire production of 3,327 quarter eagles in 1804. Examples of BD-1 are virtually unobtainable, and only 150 to 200 BD-2 representatives are believed extant. Of further interest to specialists: This reverse was also used to strike JR-2 dimes. Orange-gold surfaces are muted from improper cleaning, but Liberty's portrait, the eagle, the legends, and dentils remain sharp. The left-hand stars are slightly soft, and high-point blending is minor.

1836 Script 8 Quarter Eagle, MS63  
Head of 1835, Variety 11

- 3942 1836 Script 8 MS63 PCGS. CAC. Head of 1835, Breen-6143, Variety 11, R.2. After the newness of the new design wore off after 1834, relatively few examples of the Classic design — both quarter eagle and half eagle — were set aside by the public. This is especially true of coins in Uncirculated grades, which makes this series so challenging in mint condition. This is a bright example that displays softly frosted mint luster. No obvious abrasions are present and the color is even, bright yellow-gold throughout. Population: 37 in 63 (3 in 63+), 15 finer. CAC: 9 in 63, 8 finer (7/17). NGC ID# 25FU, PCGS# 7694

## LIBERTY QUARTER EAGLES

1843-D Two and a Half, AU58+  
Popular Issue for Type Purposes

- 3943 1843-D Small D AU58+ PCGS. CAC. Variety 4-H. Late Die State with a pronounced die crack from the top of the eagle's left (facing) wing through the right side of the first S in STATES. More than 36,000 pieces were struck of the 1843-D and it is the most frequently encountered Dahlonega quarter eagle. The surfaces are bright with an overlay of light reddish patina. A few marks are scattered about, but none are individually concerning. Generous portions of mint luster remain. Softly struck in the centers. NGC ID# 25GP, PCGS# 7730

1849-C Quarter Eagle, AU58  
High-End for the Issue

- 3944 1849-C AU58 NGC. Variety 1.** The 1849-C quarter eagle is among the scarcer Charlotte quarter eagles from this period, rare in the upper AU grades and extremely rare in Mint State. In agreement with this analysis, Doug Winter estimates that only 125-150 pieces are known in all grades, mostly in VF and XF condition. This near-Mint example is rare by all accounts. An above-average strike leaves minor weakness only on the eagle's left (facing) leg, and the olive-gold surfaces retain some semiprooflike reflectivity in the fields. A brush of friction over the high points of the design is all that precludes a Mint State grade. Census: 24 in 58, 9 finer (7/17). NGC ID# 7HRT, PCGS# 7753

1861 Two and a Half, MS65+  
Type Two Reverse  
Conditionally Scarce

- 3945 1861 New Reverse, Type Two, MS65+ PCGS. CAC.** Two different hub types were used to manufacture quarter eagle dies in 1861, differentiated most readily by the size of the arrowheads and the closeness of the fletchings to the eagle's left (facing) talons. This high-end Gem example of the Type Two issue displays sharp motifs and frosty wheat-gold mint luster. A tiny mark below star 5 appears to be all that limits the grade. Population: 36 in 65 (1 in 65+), 13 finer. CAC: 7 in 65, 3 finer (7/17). NGC ID# 25JX, PCGS# 7794

1888 Two and a Half, MS66  
None Numerically Finer at PCGS

- 3946 1888 MS66 PCGS.** Jewel-like surfaces coruscate with frosted mint luster to earn the rarely encountered Premium Gem designation, an honor bestowed on just half a dozen 1888 quarter eagles by PCGS. Only one or two tiny marks and grazes disturb the vibrant, blond-gold fields and devices. The dies clashed, but not to the detriment of a sharp strike, which shows only slight incompleteness at the central shield stripes and the eagle's exposed leg. Population: 6 in 66 (2 in 66+), 0 finer (7/17). NGC ID# 25LC, PCGS# 7840

1889 Liberty Quarter Eagle, MS65  
Very Rare Any Finer

- 3947 1889 MS65 NGC.** The 1889 Liberty quarter eagle claims a modest mintage of 17,648 pieces and the issue is extremely rare above the MS65 level. This spectacular Gem exhibits well-detailed design elements, with a touch of the usual softness on the hair above the brow and the eagle's leg. The well-preserved orange-gold surfaces are awash in satiny mint luster. Census: 12 in 65, 2 finer (7/17). NGC ID# 7JTT, PCGS# 7841

INDIAN QUARTER EAGLES

1911 Indian Quarter Eagle, MS65  
Conditionally Rare Any Finer

- 3948 1911 MS65 PCGS. CAC.** The 1911 Indian quarter eagle claims a substantial mintage of 704,000 pieces, but the issue is a prime condition rarity in grades above MS65. This impressive Gem exhibits sharply detailed design elements and vibrant mint luster on both sides. The well-preserved orange-gold surfaces add to the outstanding eye appeal. PCGS has graded just 12 examples in 65+ and 1 finer. CAC: 53 in 65, 0 finer (7/17). NGC ID# 7KR6, PCGS# 7942

1911-D Two and a Half, MS62  
Strong D, Sharp Wire Rim

**3949** 1911-D MS62 NGC. In 1911, quarter eagle coinage at the Denver Mint amounted to only 55,680 pieces. Commercial demand for the denomination was virtually nonexistent except for a spike in interest toward the end of the year when new coins were sought as Christmas gifts. This Uncirculated survivor is well-struck and displays the usual straw-gold satin luster. A loupe reveals a few faint lines in the fields that limit the grade.

*From The Morgan Hill Collection.* NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS63  
Razor-Sharp Strike

**3950** 1911-D MS63 NGC. The D is bold on this piece, a trait not always found on this key. Likewise, the impression is razor-sharp on the headdress, shoulder, leg feathers, and arrows/fletchings. The partial wire rim around the upper obverse and lower reverse is characteristic of this famous Denver Mint quarter eagle issue. Collectors of this series and even those only vaguely familiar with it easily recognize the 1911-D with its low mintage of 55,680 coins as the singular key date among its peers. Importantly, this Select Uncirculated example is more than three grade points higher than the average representative at the grading services. NGC ID# 7KR7, PCGS# 7943

**1914 Two and a Half, MS64+**  
Lustrous, Reddish-Gold and Lilac Color

- 3951 1914 MS64+ PCGS.** The 1914 is well-known as the second scarcest issue in the series. It is also difficult to locate with clean surfaces and in high grade. MS64 is generally the finest one can locate and availability drops significantly any finer. This Plus-graded piece is very close to Gem quality, but at a fraction of the cost. The lustrous reddish-gold surfaces have a significant amount of lilac interspersed on each side. Minimally abraded. NGC ID# 7KRA, PCGS# 7946

**1915 Two and a Half, MS65+**  
Razor-Sharp and Pristine

- 3952 1915 MS65+ PCGS. CAC.** This high-end Gem 1915 quarter eagle is seemingly only a single, small tick mark away from an MS66 grade; the sole discernible graze is in the left reverse field just above the E in E PLURIBUS UNUM. Only 13 of more than 200 Gems at PCGS have received a Plus designation, and only six MS66 coins are listed finer (8/17). The CAC green label further heightens the appeal of this piece. Razor-sharp design elements and satiny yellow-gold luster make up the other aesthetic attributes. NGC ID# 7KRC, PCGS# 7948

## THREE DOLLAR GOLD PIECES

**1854-O Gold Three Dollar, AU58**  
Attractive New Orleans Type Coin

- 3953 1854-O AU58 NGC. Variety 2.** Coinage of three dollar gold pieces hit its peak in the first year of production, when three different mints struck the denomination. More than 138,000 coins were struck at Philadelphia, while Dahlonega and New Orleans issued significantly smaller numbers at 1,120 and 24,000 pieces, respectively. The New Orleans issue is sought-after in all grades but is particularly scarce at the near-Mint level and rare in Mint State. Demand for this issue is continuous and strong in all grades as it is the only O-mint date in the series.

The current coin is well-detailed with a brush of friction across the high points. Satiny straw-gold surfaces are mostly smooth and appealing. The protected peripheral regions of the fields show delicate reflectivity, suggesting an early die state. Census: 95 in 58 (2 in 58+), 22 finer (7/17).

*From The Morgan Hill Collection.* NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU58  
Requisite New Orleans Type**

**3954 1854-O AU58 PCGS. Variety 2.** The 1854-O was the New Orleans Mint's only venture into the mintage of three dollar gold pieces, making the issue essential for a complete O-Mint gold type set. Just 24,000 pieces were struck, most of which circulated. Uncirculated pieces are very scarce as a result. A number of borderline Uncirculated pieces exist, and over the years a few of these have migrated into Mint State holders.

This near-Mint example shows just a touch of wear. The fields are partially prooflike and the bow is incomplete, suggesting the dies were lapped. An interesting die flaw exists adjacent to U in UNITED — an unusual strike-through — which exists not only on the present coin, but others in our archive. A survey of 72 pieces reveals that 12.5% of the sample have the same anomaly (one in eight coins on average). Interestingly, all of these examples show lapped dies and die cracks through a weak mintmark. Still, this piece is attractive with only a bit of light chatter and lustrous, sun-gold surfaces. Population: 28 in 58 (1 in 58+), 2 finer (7/17). NGC ID# 25M5, PCGS# 7971

**1855 Three Dollar, Scintillating Near-Gem**

**3955 1855 MS64 PCGS.** The 1855 is more available overall than most other dates in the series thanks to its high mintage of 50,555 coins. It is rare in near-Gem condition, however, and only a handful of finer pieces are known. Scintillating luster over peach-gold surfaces delivers wonderful visual appeal. Strongly struck everywhere except the wreath bow with minor wispy marks in the obverse field. Population: 30 in 64 (2 in 64+), 4 finer (7/17). NGC ID# 25M6, PCGS# 7972

**1855-S Three Dollar, AU50  
Among the Scarcest Issues in the Series**

**3956 1855-S AU50 PCGS.** The average grade awarded to the 400 estimated survivors is XF40, cementing this early San Francisco issue's status as one of the scarcest entries in the set despite a moderate mintage of 6,600 coins. Bright yellow-gold color reveals elements of reddish patina. Well-defined motifs show slight merging over the highest points. Population: 15 in 50, 32 finer (7/17). NGC ID# 7K5D, PCGS# 7973

**1860-S Three Dollar Gold, AU58**  
**A San Francisco Condition Rarity**

**3957 1860-S AU58 PCGS.** The San Francisco Mint struck three dollar gold pieces for commercial usage only in 1855, '56, '57, and '60. Of these four issues, the 1860-S has the second-lowest mintage at only 7,000 coins. Unlike the Philadelphia issues of the 1880s, the 1860-S three dollar circulated in the Western regions. Today, only a handful of Mint State pieces are known, and high-end AU coins are themselves rare. This piece represents only the sixth occasion on which we have offered a PCGS-graded coin in AU58. Auction realizations of the most recent pieces range from nearly \$16,000 to more than \$21,000, indicating strong demand for this conditionally rare branch mint issue.

The present coin displays satiny, partially lustrous surfaces and smooth fields. The wreath bowknot is weakly struck, but the obverse is sharp. Only slight high-point friction is observed under a loupe. Population: 10 in 58, 4 finer (7/17).

*From The Morgan Hill Collection.* NGC ID# 7K5M, PCGS# 7981

**1864 Three Dollar Gold, AU55**  
**A Scarce Issue in This Condition**

**3958 1864 AU55 PCGS. CAC.** The 1864 three dollar gold piece comes from a mintage of only 2,600 pieces and was produced during a period when few gold coins were set aside for numismatic purposes. The Mint State population of this issue is scant, making high-end AU coin heavily pursued. This CAC-approved example displays a good strike and warm straw-gold coloration with minor field chatter. Some reflectivity is seen in the protected regions. Population: 32 in 55, 66 finer. CAC: 4 in 55, 12 finer (7/17). *From The Morgan Hill Collection.* NGC ID# 7HSK, PCGS# 7985

**1864 Three Dollar Gold, MS61**  
**Elusive Issue in All Grades**

**3959 1864 MS61 PCGS.** The 1864 three dollar gold piece claims a meager business-strike mintage of 2,630 pieces and its Civil War era date adds to the constant demand for this issue. This attractive Mint State specimen offers well-detailed design elements and lightly marked orange-gold surfaces with slightly dimmed satiny mint luster. Population: 4 in 61, 36 finer (7/17). NGC ID# 7HSK, PCGS# 7985

**1878 Three Dollar Gold, MS64**  
**Outstanding Type Coin**

**3960 1878 MS64 PCGS. CAC.** The 1878 three dollar gold piece claims the second-highest mintage of the series, at 82,304 pieces, making it an available date and a popular choice of type collectors. This attractive Choice specimen offers well-detailed design elements and well-preserved orange-gold surfaces with vibrant, satiny mint luster on both sides. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS64+  
Favorite Type Issue

- 3961** 1878 MS64+ PCGS. CAC. Satiny orange-gold luster delivers a heavy dose of eye appeal on this Plus-graded Choice 1878 three dollar gold piece. The wreath bow is weakly struck as always, but the obverse is well-brought-up. Only minor signs of contact are evident. The 1878 is a favorite choice of type collectors because of its plentiful Mint State population. NGC ID# 25MZ, PCGS# 8000

## EARLY HALF EAGLES

1802/1 Half Eagle, BD-1, AU55+  
Centered Overdate

- 3962** 1802/1 BD-1, High R.4, AU55+ PCGS. Bass-Dannreuther Die State a/b, shattered reverse die. This is a Centered Overdate variety, showing the 1 remnant centered in the loop of the primary 2. The reverse shows numerous die cracks in this late state. Bright yellow-gold surfaces have some areas of original luster but mostly exhibit lightly worn patina with minor field chatter. There is very little high-point wear. BD-1 is scarce with fewer than 100 survivors believed known. However, it is still among the more plentiful die varieties of the 1802 half eagle, often encountered in type and date collections, as well as the more advanced variety sets. NGC ID# 25NX, PCGS# 519890 Base PCGS# 8083

1802/1 Half Eagle, BD-8, MS61  
Terminal Die State

- 3963** 1802/1 BD-8, R.4, MS61 NGC. Bass-Dannreuther Die State c/c, the rare terminal die state that shows a heavy rim cud above the T in UNITED. Die cracks from an earlier state run through the UNI and ED. On the obverse, thin die cracks connect stars 3 and 5 to the dentils. Both dies are clashed. BD-8 is a plentiful High Overdate variety, although this is only within the context of 1802 half eagles; merely 150 to 200 pieces are known in all grades, and few are from the terminal die state. This low-end Mint State example has light field chatter that limits the grade but no singular abrasions that distract. The obverse is satiny in the fields, while the reverse shows semiprooflike characteristics. Both sides are yellow-gold with coppery-orange overtones that attest to the originality of the patina. A sharp strike spans the border stars, dentils, and central devices. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

1806 Knob 6 Half Eagle, BD-6, XF45  
Capped Bust Right Type Coin

- 3964** 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF45 NGC. Bass-Dannreuther Die State d/f, clashed and cracked, the latest die state recorded for this plentiful Knob 6 variety. BD-6 is frequently encountered at auction, but attractive, high-end pieces are in constant demand for type purposes. This Choice XF coin displays excellent detail with hints of luster in the reverse fields. Pleasing olive-gold and peach hues adorn the surfaces. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Bust Right Half Eagle, Unc Details  
Popular Early Type Issue

- 3965** 1806 Knob 6, 7x6 Stars, BD-6, R.2 — Obverse Improperly Cleaned — NGC Details. Unc. Bass-Dannreuther Die State d/e. This coin represents the available BD-6 variety, with the stars arranged 7x6 on the obverse. The design elements are sharply detailed in most areas, but show a touch of softness on the juncture of the left (facing) wing and shield on the reverse. Some clash marks are evident on the reverse, but the pleasing orange-gold surfaces are lightly marked overall. Some faint planchet adjustment marks are seen on the bust. Obverse luster is a trifle dimmed by the noted cleaning.

1807 Bust Right Five Dollar, MS64  
BD-4, Only One Example Finer  
Important Offering for Advanced Collectors

- 3966** 1807 Bust Right, BD-4, High R.4, MS64 NGC. Bass-Dannreuther Die State c/a. A shortened curl is directly over the 1 in the date, and the first T in STATES is close to the cloud. The obverse is shared with BD-3, while the reverse was later paired with two other head dies to create BD-5 and BD-6. This is the most available variety among them, yet only 70 to 90 examples are known. It is the technical quality of this near-Gem half eagle; however, that should resonate most with advanced specialists. There are only a handful of 1807 Bust Right five dollar gold coins that survive in this state of preservation, with a single example graded higher.

Luminous luster over light lemon-gold surfaces gives this piece the appearance of having been freshly minted. Definition is mushy at the immediate centers, but the stars, wingtips, and tailfeathers are boldly struck. Although lightly marked, it is difficult to image a finer representative. Truly a magnificent specimen from this transitional period in the early Mint's history. Census (all varieties): 9 in 64, 1 finer (7/17). NGC ID# CKLF, PCGS# 519901 Base PCGS# 8092

1810 BD-4 Five Dollar, AU58  
Large Date, Large 5

- 3967** 1810 Large Date, Large 5, BD-4, R.2, AU58 NGC. Bass-Dannreuther Die State a/a. Devoid of cracks or clash marks. The 1810 Large Date, Large 5 half eagle is the most frequently encountered die pair for the issue. The estimated mintage is 90,000 coins, of which 500 to 750 pieces are believed extant. The lower obverse and upper reverse show incompleteness and file marks along the edges. Detail is good elsewhere, and frosty remaining luster glows from each yellow-gold side. Scattered abrasions are expected. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1813 Half Eagle, BD-1, AU58  
Well-Struck Type Coin

- 3968** 1813 BD-1, R.2, AU58 NGC. Bass-Dannreuther Die State b/b, lightly clashed. BD-1 is a popular type-coin issue, being the more plentiful of the two 1813 half eagle varieties. The surviving population is estimated to be between 450 and 650 coins, although the availability declines significantly in high grade. This near-Mint representative offers sharp detail and satiny yellow-gold luster. A cartwheel effect remains discernible despite minor field chatter. *From The Morgan Hill Collection.* NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

1813 BD-2 Half Eagle, AU50  
The Scarcer of Two Varieties

- 3969** 1813 BD-2, R.4, AU50 NGC. Bass-Dannreuther Die State d/b, lightly cracked and clashed. BD-2 is the scarcer 1813 half eagle variety, easily identified by the first S in STATES being positioned directly above the E in E PLURIBUS UNUM. This AU coin shows equal amounts of high-point wear and field luster amid bright straw-gold patina. Scattered light marks are not distracting. Strike weakness is seen on the eagle's left (facing) wing as usual. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

1813 Half Eagle, BD-2, MS61  
Attractive Mint State Type Coin

- 3970** 1813 BD-2, R.4, MS61 PCGS. Bass-Dannreuther Die State d/b, showing light cracks on both sides. BD-2 is the scarcer of the two 1813 half eagle varieties, with fewer than 200 pieces believed known. Uncirculated examples of the variety — and of the date in general — are in demand as type coins, as the 1813 is the only readily available date in the Capped Small Bust, Large Size type. This example is better-struck than many of its peers, showing above-average definition of the eagle's left (facing) wing feathers. The strike is even and boldly rendered, and the satiny, lustrous surfaces display pleasing yellow-gold coloration. Light handling marks on the cheek and in the field limit the grade in the absence of any singular abrasions. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

1829 Capped Head Half Eagle, AU Details  
 Very Rare Small Diameter, BD-2 Variety  
 Nine Examples Traced, Ex: Stickney/Brand

**3971 1829 Small Diameter, Small Date, BD-2, R.7 — Improperly Cleaned — NGC Details. AU.** Bass-Dannreuther Die State a/a. Half eagles were struck with a close collar for the first time in 1829, as production switched over from the old open collar technology part way through the year. The resulting coins had a smaller, more exact diameter than the open collar issues, as the collar confined the planchets and imparted the edge reeding as the metal tried to expand under pressure from the dies during striking. Of course, the close collar coins were thicker than their open collar predecessors, as the specifications for weight and composition remained the same. Since they contained the same amount of gold, their intrinsic value continued to be significantly greater than their face value, and the close collar coins were almost all hoarded, exported, or melted as soon as they were issued, much like their open collar counterparts.

Mint records indicate 57,442 half eagles were produced in 1829, split between the two types, but few examples of either issue are known today. PCGS CoinFacts estimates 8-9 examples of the 1829 Small Diameter Capped Head half eagle are extant in all grades. In lot 4682 of our January 2012 FUN Platinum Night Signature catalog we compiled a roster of nine coins known to us, a figure that corresponds well with the PCGS estimate. Three of those specimens are included in institutional collections, two in the National Numismatic Collection at the Smithsonian Institution, and one in the Harry Bass Foundation. One of the NNC coins and the specimen in the Bass Foundation are reportedly proofs. PCGS and NGC have combined to certify a total of six coins, including an unknown number of resubmissions and crossovers (7/17).

The present coin has an illustrious pedigree dating back to pioneering collector Matthew Stickney. Stickney was one of the first systematic collectors of U.S. coins by date and design type, and he probably obtained this piece in his most active collecting period, before 1854. In 1907, long after his death, his collection was sold by his daughters through prominent Philadelphia dealer Henry Chapman. Chapman described this coin as:

“1829 Small date. Small letters on reverse. The edge beaded instead of deep surratures as in previous years. The whole coin smaller and being the size of the succeeding five years. Extremely fine. Of excessive rarity, probably about five known. See plate. One in the Smith collection sold for \$210.”

Chapman astutely described the physical appearance of this close collar coin, noting the smaller numeral and letter punches used to impress the date and legends on the dies, and the smaller diameter planchets. He also mentioned the new beaded borders, as opposed to the old cigar-shaped dentils on the open collar issues. The lot realized an impressive \$360, to super collector Virgil Brand. The current record price realized for the issue is a staggering \$881,250, brought by the MS65+ PCGS example in the Pogue Collection, Part IV sale in May of 2016.

The coin offered here is a handsome example of this classic gold rarity, with strongly impressed design elements that show just a trace of actual wear. Intricate detail remains evident on Liberty's hair strands and the eagle's feathers. The pleasing orange-gold surfaces show only minor signs of contact, with a few insignificant rim dings at 12 and 3 o'clock on the obverse. The luster is somewhat dimmed by the noted cleaning, but the overall presentation is most attractive. With only six coins available to collectors, it may be years before a comparable specimen of this rare early gold issue is publicly offered, once this lot has passed. Series specialists should bid accordingly.

*Ex: Matthew Adams Stickney; Stickney Collection (Henry Chapman, 6/1907), lot 671; Virgil Brand, Brand Journal number 39044; Thomas Melish Collection (Abe Kosoff, 4/1956), lot 1953; 1963 FUN (Federal Brand Enterprises, 1/1963), lot 4187, the cataloger of this sale believed the coin in this lot was from the Dunham Collection, but the plate matches the Stickney/Melish plates; NASC Convention (RARCOA, 2/1972), lot 871; Kingswood Coin Auctions (2/1997), lot 119; the present consignor.*

## LIBERTY HALF EAGLES

**1842-C Liberty Half Eagle, VF30**  
Rare Small Date Variety

**3972 1842-C Small Date VF30 PCGS. CAC. Variety 1.** This coin is extensively worn but basically problem-free and certainly attractive for the grade; attractive enough, in fact, to gain approval from CAC. The wear is compounded by the fact that the strike is quite soft at the borders, especially on the obverse. On both sides, the deep golden centers are contrasted by splashes of reddish-gold towards the rims. There are many marks visible but none is especially deep or detracting. This is a very pleasing example of the rarest collectable Charlotte gold coin and a great option for the ambitious date collector of Charlotte half eagles who doesn't have the big budget required to purchase a high-grade 1842-C Small Date.

This is the rarest half eagle from this mint with an estimated 60-80 pieces known in all grades. While typically seen in lower grades, there are not many clean, problem-free examples in VF. Population: 7 in 30, 36 finer. CAC: 2 in 30, 10 finer (7/17).

Ex: *Central States Signature* (Heritage 4/2010), lot 2355; *FUN Signature* (Heritage, 1/2012), lot 4878. NGC ID# 25SV, PCGS# 8208

**1854 Half Eagle, MS64+**  
CAC-Endorsed, The Sole Finest Known

**3973 1854 MS64+ PCGS. CAC.** The 1854 is among the more plentiful No Motto Liberty half eagles in high grade, although its availability is relative; no half eagle from this period is common in Mint State, and the 1854 is rarely seen above MS62. The Condition Census is composed of a handful of MS64 coins, of which the present piece is the only one awarded a Plus designation. Sharp and frosty, this yellow-gold finest-known shows no obvious abrasions. A loupe reveals, at certain angles, faint lines in the obverse fields that prevent a Gem designation, but the eye appeal is outstanding. The CAC green label endorses the exceptional quality.

We have previously handled an MS64 coin on only 11 occasions, including duplicate appearances by some coins. The last was in lot 6210 of our April 2015 Central States Signature sale, where an NGC coin realized \$15,275. We have not offered a PCGS-graded near-Gem in nearly a decade, and we anticipate record demand for this finest-known 1854 half eagle when it crosses the auction block. Population: 5 in 64 (1 in 64+), 0 finer. CAC: 3 in 64, 0 finer (7/17). NGC ID# 25UG, PCGS# 8256

1879-S Liberty Half Eagle, MS63  
Rare Prooflike Example

- 3974 1879-S MS63 Prooflike NGC.** A delightful Select specimen, with sharply detailed design elements throughout and deeply reflective prooflike fields. The bright yellow-gold surfaces are lightly marked. Although there are eight numerically finer non-prooflike examples at NGC, only a single prooflike specimen has been certified finer (8/17) NGC ID# 25X9, PCGS# 78350

1881-CC Liberty Half Eagle, AU53  
Elusive Carson City Issue

- 3975 1881-CC AU53 NGC. Variety 1-A.** From a small mintage of 16,886 pieces, the 1881-CC is widely considered the rarest Carson City half eagle of the decade. This impressive AU53 example shows some light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. Census: 10 in 53, 27 finer (7/17). NGC ID# 25XE, PCGS# 8356

1882-CC Half Eagle, AU58  
Very Scarce at This Level

- 3976 1882-CC AU58 NGC. Variety 1-A.** The 1882-CC half eagles are scarce in AU58 and rare in full Mint State, although the issue is still considered one of the more accessible pre-1890 dates from the facility. Peach-gold tones blend with interspersed greenish elements, while shimmering luster glows from the recesses. This nearly Uncirculated five dollar gold piece displays strong strike definition on the stars, feathers, talons, and olive leaves. NGC has seen 27 finer submissions (7/17). NGC ID# 25XH, PCGS# 8359

1882-CC Liberty Five, AU58  
Excellent Carson City Type Coin

- 3977 1882-CC AU58 NGC. Variety 1-A.** A relatively large mintage of 82,817 Liberty half eagles was accomplished at the Carson City Mint in 1882, making the issue one of the more available dates of the series, and a popular choice of branch mint type collectors. This impressive near-Mint specimen shows just a trace of high-point wear on the well-detailed design elements, and the still-lustrous orange-gold surfaces are lightly abraded. NGC has graded 27 numerically finer examples (7/17). NGC ID# 25XH, PCGS# 8359

1883-CC Half Eagle, AU58  
Vary Rare in Finer Grades

- 3978 1883-CC AU58 NGC. Variety 1-A.** Bright and satiny with pale golden color throughout. Just a hint of striking softness is noted on Liberty's highest curls and on the eagle's neck feathers. A few easily overlooked grease stains are found in the vicinity of star 10. The low mintage 1883-CC half eagle, one of a mere 12,958 pieces struck, is very scarce in grades approaching Mint State and a condition rarity at the Uncirculated level. Census: 21 in 58 (1 in 58+), 8 finer (7/17).  
Ex: Long Beach Signature (Heritage, 2/2006), lot 2954. NGC ID# 25XL, PCGS# 8362

1893-CC Liberty Half Eagle, MS63  
Final-Year Branch Mint Issue

- 3979 1893-CC MS63 PCGS. Variety 2-A.** The 1893-CC Liberty half eagle is a popular, final-year issue, from a mintage of 60,000 pieces. This impressive Select specimen exhibits sharply detailed design elements throughout, with lustrous yellow-gold surfaces that show some minor chatter in the fields of both sides. Delicate die cracks connect some stars on the left. Population: 16 in 63 (1 in 63+), 8 finer (7/17). NGC ID# 25YB, PCGS# 8384

1899 Liberty Half Eagle, MS67  
Tied for Finest at PCGS

- 3980 1899 MS67 PCGS. CAC.** A large mintage of 1.7 million Liberty half eagles was achieved at the Philadelphia Mint in 1899, but few survivors can match the quality and eye appeal of this spectacular Superb Gem. Razor-sharp definition is evident on all design elements, including the hair curls and star centers. The vivid orange-gold surfaces are impeccably preserved, with no mentionable distractions on either side. Vibrant mint luster radiates from both sides and overall visual appeal is terrific. This piece is tied with one other coin for finest certified honors at PCGS, making it a strong Registry Set candidate (7/17). It may be years before a comparable specimen becomes available. NGC ID# 25YS, PCGS# 8398

1899 Five Dollar, PR65 Ultra Cameo  
Only 99 Proofs Produced

- 3982 1899 PR65 Ultra Cameo NGC.** With a mintage that matches the last two digits of the year, 99 proofs were struck of the 1899 proof half eagle. A curiously high number of survivors are known, especially high-grade ones. In all grades and with all degrees of contrast, both services have certified a total of 65 proof 1899 fives. Undoubtedly there are numerous resubmissions included in that total number, but a reasonable number of survivors would be in the range of at least 45 coins. There are 13 finer examples known, again combining the data from each certification service. The finest is an NGC PR69 Deep Cameo (8/17). This is a profoundly contrasted example. An orange peel texture is seen on each side, but is more pronounced on the reverse. The only mentionable pedigree identifier is a very shallow pinscratch that projects outward from the bridge of Liberty's nose. NGC ID# 28D5, PCGS# 98494

## PROOF LIBERTY HALF EAGLES

1897 Proof Half Eagle, Unc Details  
Only 83 Examples Struck

- 3981 1897 — Altered Surfaces — PCGS Proof Genuine. Unc Details.** From a proof mintage of 83 pieces, this impressive specimen exhibits sharply detailed design elements throughout and the fields remain deeply reflective, despite the noted cleaning. The orange-gold surfaces are lightly abraded, but some hair lines are visible in the fields. The overall presentation remains most attractive.

1902 Half Eagle, PR62 Cameo  
Rare With Field-Device Contrast

- 3983** 1902 PR62 Cameo NGC. Mint records indicate that 162 proof half eagles were struck in 1902, and today fewer than 100 pieces are believed to survive. The vast majority lack an significant cameo contrast, as the proof die preparation process was altered in this year to polish the devices to a gleaming mirror just like the fields. Of the 69 pieces reported by NGC and PCGS combined, only 18 are Cameos, and none are Ultra/Deep Cameos. This is a well-contrasted example, and some scattered hairlines in the obverse fields place it in an affordable grade level. The strike is full. Deep reflectivity makes the fields glimmer with the slightest rotation beneath a light. Census: 1 in 62 Cameo, 9 finer (7/17). NGC ID# 3YDK, PCGS# 88497

1904 Five Dollar, PR64  
Deeply Reflective and Problem-Free

- 3984** 1904 PR64 PCGS. As a proof, the 1904 five dollar is a "common" date (if any date can be called that), with 136 pieces struck. Perhaps half of that number now survive today in all grades. This deeply reflective coin features the typical non-contrasting appearance used in the proofing process between 1902 and 1904. The surfaces are rich reddish-gold with only a few scattered hairlines mostly on the obverse, none of which are especially troubling. Close examination reveals some milky patina in the fields on each side. Scarce and desirable. Population: 12 in 64 (1 in 64+), 2 finer (7/17).  
Ex: Long Beach Signature (Heritage, 2/2005), lot 8672. NGC ID# 28DA, PCGS# 8499

INDIAN HALF EAGLES

1909-O Half Eagle, AU55  
Just 34,200 Pieces Struck

- 3985** 1909-O AU55 PCGS. CAC. Since Bela Lyon Pratt's Indian Head design did not appear until 1908, and the New Orleans Mint closed in 1909, there was little time for production of New Orleans gold coins from the new design. The present 1909-O half eagle is an exception. It is the only New Orleans issue that features the Indian Head design. An article in the March 16, 1909 issue of the New Orleans *Times-Picayune*, reporting on Mint Director Frank Leach's first official visit to the New Orleans Mint, quotes Leach regarding half eagles: "As soon as the local Mint gets through with the silver bullion on hand it will start making five-dollar gold pieces. I had the dies sent here a short time ago." The Louisiana coinage factory produced 34,200 of those half eagles, including this piece that shows a trace of rub on the Indian's cheek and on the high point of the wing on the reverse. Nearly full yellow-gold luster remains with orange toning accents. NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU58  
Singular New Orleans Type Coin

- 3986 1909-O AU58 NGC.** Half eagle coinage at the New Orleans Mint was minimal after the reopening of the facility in 1879. The denomination was coined only 1892, '93, and '94, and then once more in 1909. The mintage in 1909 was cut short by the closure of the mint in April, with the final production being 34,200 coins. The 1909-O half eagle is important both as the final gold issue from the New Orleans Mint but also as the only O-mint issue featuring Bela Lyon Pratt's Indian Head design. It is also a major key date within the Indian half eagle series and the rarest in high grade.

This near-Mint representative displays satiny straw-gold surfaces with luster remaining in the recesses. Light friction in the fields suggests brief circulation, although the design is as sharp as it was when struck. Scattered light field marks accompany the grade. The mintmark is clear under a loupe.

*From The Morgan Hill Collection.* NGC ID# 25ZK, PCGS# 8515

1914 Indian Half Eagle, MS64+  
Elusive Issue Any Finer

- 3987 1914 MS64+ PCGS. CAC.** The 1914 Indian half eagle claims a mintage of 247,000 pieces and the issue is elusive in grades above the MS64 level. This Plus-graded Choice example displays sharply detailed design elements throughout, and the well-preserved orange-gold surfaces show only minor signs of contact. PCGS has graded 32 numerically finer examples (7/17). NGC ID# 28DU, PCGS# 8527

1915 Indian Half Eagle, MS65  
Registry Grade Example

- 3988 1915 MS65 PCGS.** A substantial mintage of 588,000 business-strike Indian half eagles was struck at the Philadelphia Mint in 1915, but the issue is very scarce at the MS65 grade level, and no coins have been certified in higher numeric grades (8/17). This spectacular Gem offers sharply detailed design elements and well-preserved, lustrous surfaces. Population: 60 in 65 (6 in 65+), 0 finer (7/17). NGC ID# 28DX, PCGS# 8530

## EARLY EAGLE

1795 Capped Bust Right Eagle, AU55  
 Historic First-Year Issue  
 Popular BD-1 Variety

**3989** 1795 13 Leaves, BD-1, High R.3, AU55 NGC. Bass-Dannreuther Die State b/a. The Philadelphia Mint struck its first circulating gold coins in 1795. After an initial mintage of half eagles, the Mint turned its attention to the ten dollar denomination and delivered its first batch of 1,097 Capped Bust Right eagles on September 22. The new coins were probably of the BD-1 variety, with star 11 near Y in LIBERTY and the leaf nearly touching U in UNITED on the reverse. The present coin represents the BD-1 variety and may have been included in the historic first delivery. A total of 5,583 Capped Bust Right eagles were struck in late 1795, and there are five known die varieties for the date. Some 1795-dated coins may have been struck early in 1796, as well.

The BD-1 is the most available 1795 variety, with a surviving population of 225-325 examples in all grades. It probably accounted for at least the 2,795 eagles delivered in five batches before November 27. It may also have been included in some later deliveries. This was the only use of the obverse die, but the reverse was used again to strike the BD-2 variety of this date.

The coin offered here is an attractive Choice AU specimen, with pleasing orange-gold surfaces that show only minor abrasions. Faint planchet adjustment marks are evident on close inspection on the obverse and reverse dentils. A small rim ding is present at 3 o'clock on the obverse and only a touch of wear is evident on the well-detailed design elements. Dentilation is weak in some areas on both sides and a thin die crack travels through most of the stars on the left. This coin should find a home in a fine date collection or type set. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551

## LIBERTY EAGLES

1844-O Ten Dollar, AU55  
Conditionally Elusive New Orleans Issue

**3990** 1844-O AU55 PCGS. Variety 1. Most examples of this early New Orleans issue circulated and were lost to attrition. A handful of Mint State pieces survive but they are far out of reach for most collectors. This Choice AU representative displays sharp detail and hints of luster. The yellow-gold surfaces exhibit scattered abrasions, as normal for New Orleans gold of this period. Population: 12 in 55 (1 in 55+), 14 finer (7/17). NGC ID# 554G, PCGS# 8591

1846 Ten Dollar, AU55  
Tied for Finest With CAC Green Label  
Ex: S.S. Republic

**3991** 1846 AU55 NGC. CAC. Ex: S.S. Republic. With only 20,095 pieces struck, the 1846 ten is unsurprisingly scarce in all grades. About Uncirculated pieces are rarely offered, especially with CAC approval, and only a handful of Mint State coins are known. This CAC-approved Choice AU representative displays sharp detail and bright yellow-gold surfaces, consistent with the usual look of coins recovered from the S.S. Republic. The surfaces are moderately abraded but retain prooflike mirroring in the most protected regions. Census: 12 in 55, 8 finer. CAC: 2 in 55, 0 finer (7/17). NGC ID# 262W, PCGS# 8594

1866-S No Motto Ten Dollar, AU53  
Rare Last-of-the-Type Issue

**3992** 1866-S No Motto AU53 NGC. A notation in the *Report of the Director of the Mint*, for the fiscal year ended June 30, 1866, stated:

"The motto, 'In God we trust,' authorized by the act of Congress of March 3, 1865, has been placed upon all the gold and silver coins of the United States susceptible of such addition since the commencement of the current year."

Gold eagles at Philadelphia in 1866 were struck only with the new Motto dies, although the San Francisco Mint produced 8,500 No Motto coins early in the year before new dies arrived. The 1866-S No Motto eagle is rare in all grades and almost unknown in Mint State. This About Uncirculated example displays sharp detail and partially lustrous yellow-gold surfaces with smooth fields. A mere handful of coins are known in this grade, and only a handful are known finer. Census: 4 in 53, 9 finer (7/17). NGC ID# 264H, PCGS# 8644

1870-CC Ten Dollar, XF Details  
Collectible Example of This Rarity

- 3993** 1870-CC — Cleaning — PCGS Genuine. XF Details. Variety 1-B. The Carson City Mint's inaugural ten dollar gold issue is a famous rarity. Fewer than 60 coins are believed to survive from a mintage of 5,908 pieces, and none are known in Mint State. Survivors are dispersed throughout the VF and XF grade levels with the finest pieces grading AU55. Even if located, most of these will be out of reach for budget-restricted collectors. The present example, however, displays faint hairlines on each side that expose a light cleaning, which keeps it from a numeric grade and makes it more accessible than XF coins otherwise are. The design shows grade-consistent wear, and each side is cast in light abrasions, as usual. There is a small rim bump below the 18 in the date, almost unworthy of mention.

1874-CC Liberty Eagle, XF45  
Lightly Marked Surfaces

- 3994** 1874-CC XF45 NGC. Variety 1-A. The 1874-CC Liberty eagle claims a mintage of 16,767 pieces, a small production total in absolute terms, but quite generous in the context of the series. This attractive Choice AU specimen exhibits some light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain a few traces of original mint luster. Census: 36 in 45, 52 finer (7/17). NGC ID# 54UF, PCGS# 8670

1874-S Ten Dollar, AU53  
None Known in Uncirculated

- 3995** 1874-S AU53 NGC. The 1874-S ten dollar has a memorable mintage of 10,000 coins. It is a significant condition rarity with no Uncirculated examples apparently known, at least none have been certified by the major services. At the AU53 level, this is one of the finer pieces known. The surfaces are smooth and relatively unabraded. Each side displays attractive, original reddish-gold patina. Census: 13 in 53, 16 finer (7/17). NGC ID# 2659, PCGS# 8671

1877-CC Liberty Ten, AU50  
Rarely Seen Finer

**3996 1877-CC AU50 NGC. Variety 1-A.** The 1877-CC Liberty eagle claims a small mintage of 3,332 pieces. In the late 1980s and early 1990s the issue was seen with some frequency, suggesting a small hoard may have been dispersed at that time. The 1877-CC has been much more elusive since the late 1990s and PCGS CoinFacts estimates the surviving population at 60-75 examples in all grades today. No Mint State specimens have been certified, but David Akers reported seeing one coin that he graded Choice.

This impressive AU50 coin displays well-detailed design elements with a touch of wear on the high points, and a clash mark in the reverse field above the eagle's right (facing) wing. The pleasing orange-gold surfaces are lightly abraded for the grade, with a few traces of original mint luster on both sides. Altogether, an attractive representative of this rare branch mint issue. Census: 4 in 50, 8 finer (7/17). NGC ID# 265G, PCGS# 8678

1878 Ten Dollar, MS64  
Tied for Finest at NGC

**3997 1878 MS64 NGC.** An unexciting mintage of 73,700 Liberty eagles at the Philadelphia Mint in 1878 produced a major condition rarity by modern availability standards. The 1878 ten in Uncirculated condition is scarce and is rarely seen finer than MS62. This Choice example is among the best pieces at NGC, and only a single Gem is finer at PCGS (8/17). Sharp design elements reside within frosty orange-gold luster, and no distracting abrasions are seen. Eye appeal is outstanding. Census: 8 in 64, 0 finer (8/17). NGC ID# 265J, PCGS# 8680

1878 Ten Dollar, MS64+  
Exciting Registry Opportunity

**3998 1878 MS64+ PCGS. CAC.** When one just looks at the mintage of 73,700 pieces, the 1878 would appear to be moderately scarce but nothing would tip off the collector to just how rare it actually is in high grades. Our records show merely seven MS64 appearances for the 1878 eagle in the past 10 years, attesting to the issue's extreme rarity at this grade level. The strike is uniformly bold, especially on the stars, talons, fletchings, and olive leaves. Radiant frost blends with peach-gold color. The reverse border shows a few darker alloy spots. Totally original and undoubtedly exciting for the dedicated specialist. Population: 10 in 64 (2 in 64+), 1 finer. CAC: 2 in 64, 0 finer (7/17). NGC ID# 265J, PCGS# 8680

1878-CC Liberty Eagle, AU50  
Low-Mintage Branch Mint Issue

**3999** 1878-CC AU50 NGC. **Variety 1-A.** Variety 1-A, the only known variety. Genuine examples exhibit tiny die lumps below the E in TEN and a short, horizontal die line on the lower neck of Liberty. Only 3,244 Liberty eagles were struck at the Carson City Mint in 1878 and the majority of the mintage was released into circulation in the regional economy. Few examples were preserved by contemporary collectors, making the 1878-CC a rare issue in high grade. The surviving population is estimated at 60-75 examples in all grades today. This attractive AU specimen offers pleasing orange-gold surfaces that retain just a few traces of original mint luster. The highpoint details are somewhat bluntly struck and there are no obvious or detracting marks on either side. Census: 6 in 50, 16 finer (7/17).

Ex: *San Francisco Signature* (Heritage, 7/2005), lot 10380. NGC ID# 265K, PCGS# 8681

1882-CC Liberty Eagle, AU55  
Elusive Carson City Issue

**4000** 1882-CC AU55 PCGS. **Variety 2-A.** This is an especially choice piece that has significant portions of mint luster surrounding the outer devices and each side is evenly draped in an unusual gray-orange patina. Exceptionally clean for this normally heavily abraded issue. From a low mintage of 6,764 pieces. Population: 24 in 55, 25 finer (7/17).

Ex: *FUN Signature* (Heritage, 1/2003), lot 8817. NGC ID# 2663, PCGS# 8696

1883-CC Ten Dollar, AU58  
Rare So Fine, Reflective Fields Dominate

**4001** 1883-CC AU58 PCGS. **Variety 1-A.** The 1883-CC is a challenging date in all grades, but it is particularly scarce in the upper AU range, with Mint State pieces being genuinely rare. The Carson City mint struck only 12,000 gold eagles in 1883, continuing a trend of low annual mintage figures for the denomination at the Nevada branch mint. Most coins were dispersed into circulation, with the few high-grade coins known today surviving merely by chance. The present near-Mint example is sharply detailed and might have garnered a Mint State designation were it not for slight dulling of the reflective fields by minor rub. Each side displays bright yellow-gold patina with ample luster remaining. An old reed mark below the mintmark on the reverse is the only singular abrasion. Population: 15 in 58 (1 in 58+), 4 finer (7/17). NGC ID# 2667, PCGS# 8700

1884-CC Ten Dollar, AU58  
Above-Average Strike, Semireflective Fields

- 4002** 1884-CC AU58 NGC. **Variety 1-A.** Eagle production at the Carson City Mint fell to 9,925 coins in 1884. Perhaps 300 examples survive, and unlike other CC-mint eagles from the 1880s, the 1884-CC is often seen with bluntness of detail over the central high points. The issue also possesses curious die lines that may be attempted cancel marks. While the present coin displays the latter features, it lacks ill-defined devices. Overall detail is bold despite a trace of rub, and the surfaces have survived the passage of time with relatively little evidence of coin-to-coin contact. Appealing with bright, semireflective luster in the protected areas. Census: 28 in 58, 9 finer (7/17). NGC ID# 266B, PCGS# 8704

1884-CC Liberty Eagle, AU58  
Elusive Low-Mintage Issue

- 4003** 1884-CC AU58 NGC. **CAC. Variety 1-A.** Only 9,923 Liberty eagles were struck at the Carson City Mint in 1884 and all known examples show a number of prominent die scratches on the portrait. This impressive near-Mint specimen exhibits just a trace of wear on the sharply detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. Census: 28 in 58, 9 finer. CAC: 5 in 58, 2 finer (7/17). NGC ID# 266B, PCGS# 8704

1893-CC Ten Dollar, Near-Mint  
Final Carson City Representative

- 4004** 1893-CC AU58 NGC. **Variety 1-A.** Boasting a low mintage of 14,000 coins and an average grade of AU50, it should come as little surprise that the 1893-CC ten dollar is as elusive as it is in near-Mint condition. Doug Winter proposed in 2001 that six to eight Uncirculated pieces survived. The certification figures reflect a survivorship only slightly higher than that 16 year-old estimate. This lustrous apricot-gold eagle has the appearance of a finer coin. Well-struck on the upper stars, fletchings, and claws, and minimally abraded. A single tick occurs on the chin. Census: 46 in 58, 14 finer (7/17). NGC ID# 2672, PCGS# 8726

1893-CC Eagle, Still-Lustrous AU58  
Minimally Marked, CAC Endorsed

- 4005** 1893-CC AU58 NGC. **CAC. Variety 1-A.** Given its rarity in full Mint State, any 1893-CC eagle that comes close to such a designation is of keen interest to series collectors and Carson City specialists. This near-Mint example is remarkably free of marks with smooth, fields and substantial mint luster. Only a hint of circulation exists to diminish the original prooflike sheen — some of which remains in protected areas. The strike is crisp across the attractive, medium-gold surfaces. Census: 46 in 58, 14 finer. CAC: 8 in 58, 3 finer (8/17).  
*From The Morgan Hill Collection.* NGC ID# 2672, PCGS# 8726

## INDIAN EAGLES

1908-D Indian Eagle, MS66  
Underrated No Motto Issue  
Only Three Finer Certified

**4006 1908-D No Motto MS66 NGC.** By congressional mandate, the motto IN GOD WE TRUST was added to Augustus Saint-Gaudens' designs for the eagle and double eagle part way through the year in 1908, the first year the designs were produced at the Denver Mint. A moderate mintage of 210,000 Indian eagles of the No Motto type was accomplished at the Colorado facility before the change was implemented. Unfortunately, few high-quality examples were saved by contemporary collectors, as the novelty value of the design had worn off the year before, when a large mintage was coined at the Philadelphia Mint.

In addition, the Denver Mint technicians experienced some difficulty adapting their presses to the segmented edge collars used to impart the star edge devices during striking. Although they were able to figure things out eventually, the 1908-D No Motto Indian eagle is one of the most poorly produced issues of the series. Most examples seen have flat strikes and lackluster surfaces that tend to be heavily abraded. In his catalog of the Thaine B. Price Collection, David Akers noted:

"Despite its 210,000 mintage figure, which is only moderately low by Indian Head Eagle standards, the 1908-D No Motto is very difficult to locate in any Uncirculated grade, and nearly all known mint state specimens fall well short of the Choice category. In Choice Uncirculated condition, the 1908-D No Motto is rare and above that level it is very rare. True Gems ... can be counted on the fingers of one hand and rank among the rarest and most desirable issues in the series."

The present coin is one of those rare and desirable exceptions to the rule. This spectacular Premium Gem exhibits a much better-than-average strike, especially on the reverse, where it shows fine definition in the feathers on the eagle's shoulder. The pleasing orange-gold surfaces are impeccably preserved and both sides radiate vibrant mint luster. Overall eye appeal is terrific. We expect intense competition from series specialists when this lot is called. Census: 5 in 66, 3 finer (7/17). NGC ID# 28GH, PCGS# 8854

**1908-S Ten Dollar, MS63+  
Luminous Original Mint Luster  
A Scarce Date in High Grade**

**4007 1908-S MS63+ PCGS. CAC.** Satiny orange-gold luster is original, and the surfaces are free of any severe abrasions. Minor strike weakness occurs on the eagle's shoulder, although the obverse is better-defined. The Plus designation and CAC endorsement are well-earned.

The 1908-S is famously among the lowest-mintage dates in the Indian eagle series with 59,850 pieces. Uncirculated survivors are spread throughout the grade spectrum but are decidedly scarce at all levels. Quality-conscious collectors on a budget will want to seek a piece in MS63 or MS64, as such coins are far more obtainable than their higher-grade counterparts but still offer a degree of rarity and can come with outstanding eye appeal. Such is the appeal of this example, which surpasses its peers on technical and visual grounds. Population: 46 in 63 (1 in 63+), 75 finer. CAC: 3 in 63, 19 finer (7/17).

*From The Morgan Hill Collection.* NGC ID# 28GL, PCGS# 8861

**1911-D Ten Dollar, AU58  
Lowest Production in the Series**

**4008 1911-D AU58 PCGS.** The 1911-D eagle claims an even smaller mintage than its famous quarter eagle counterpart. Merely 30,100 pieces were struck, making this a key within the series, particularly in the upper states of preservation. Both sides are well-struck, showing the faintest trace of rub that prevents a full Uncirculated assessment. Reddish-gold surfaces display tiny ticks and partial mint luster. NGC ID# 28GU, PCGS# 8869

**1915 Indian Eagle, MS66  
Only One Numerically Finer at PCGS**

**4009 1915 MS66 PCGS.** The economic uncertainties of World War I caused the U.S. Mint to drastically curtail the production of gold coins during that conflict. As a result, the 1915 Indian eagle was the last ten-dollar gold piece struck at the Philadelphia Mint until 1926. A substantial mintage of 351,075 eagles was accomplished in 1915, and the coins were generally well-produced. This delightful Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of the usual softness on the eagle's shoulder. The impeccably preserved orange-gold surfaces radiate vibrant mint luster on both sides and eye appeal is terrific. Population: 13 in 66 (2 in 66+), 1 finer (7/17). NGC ID# 28H5, PCGS# 8878

1915-S Indian Eagle, AU58  
Popular Low-Mintage Issue

- 4010** 1915-S AU58 PCGS. The 1915-S Indian eagle claims a small mintage of just 59,000 pieces, making it an elusive issue in high grade. This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. This coin should find a home in a fine collection of Indian eagles. NGC ID# 28H6, PCGS# 8879

1915-S Ten Dollar, AU58  
Low Mintage, Conditionally Rare

- 4011** 1915-S AU58 PCGS. CAC. A low mintage of 59,000 pieces ensures the scarcity of the 1915-S ten. A majority of survivors are in circulated grades, which suggests that issue was released into the West Coast economy, instead of exported to foreign bank vaults. The present near-Mint example displays vibrant cartwheel luster and offers smooth olive-gold surfaces. A trace of wear on the forehead curls limits the grade, but not the eye appeal. NGC ID# 28H6, PCGS# 8879

1916-S Eagle, MS63  
Swirling Frosty Luster

- 4012** 1916-S MS63 PCGS. The 1916-S is a mid-range rarity in Select Uncirculated condition. Its certified population drops even further in MS64, where the issue becomes largely out of reach. Warm shades of rose and sun-gold color merge with swirling frosty luster. The headdress feathers and forecurls are strong. Lightly abraded. NGC ID# 28H7, PCGS# 8880

1916-S Indian Eagle, MS65  
Rarely Seen Finer, Ex: Duckor

- 4013** 1916-S MS65 PCGS. Ex: Duckor Collection. The 1916-S eagle has a comparatively low mintage of 138,500 pieces. Most of the known examples are either lightly circulated or in lower Mint State grades, as the '16-S did not actually circulate to any great degree. Thirty or forty years ago, nice Uncirculated examples of this date simply were not available. In the late 1970s, a couple of small hoards were discovered, including one in Beverly Hills, California, that possibly yielded as many as 125 pieces. This, in turn, boosted the overall population of the 1916-S ten. As a result, this date is no longer considered rare, but it is still very scarce in the finer grades of Uncirculated.

Most 1916-S tens are noticeably abraded, leading to grade restrictions of MS62 or so. Survivors typically are seen sharply struck, although definition is often lacking on the eagle's upper wingtip. Some specimens exhibit somewhat muted luster - especially when compared to many other dates in the Indian ten dollar series. These are usually coins that can be traced to the discovery hoards of the 1970s. Other (non-hoard) coins have brighter luster and a typical greenish-gold or orange-gold appearance. This coin has the attributes of a non-hoard coin, with bright red-orange color and extremely bright, satiny luster. Well defined throughout, a few minor abrasions have collected on each side. These, however, are entirely consistent with the assigned Gem grade. Unlike many 1916-S eagles, there is none of the characteristic weakness on the 1 and right side of the 9 in the date. As an identifier, a tiny raised die dot shows below star 4. Population: 14 in 65, 10 finer (7/17).  
Ex: Dr. Stephen Duckor; FUN Signature (Heritage, 1/2008), lot 3289, realized \$20,700. NGC ID# 28H7, PCGS# 8880

## LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU58  
Appealing First-Year Type One Twenty

- 4014 1850 AU58 NGC.** California gold was shipped in quantity to both the Philadelphia and New Orleans Mints for a substantial production of double eagles in 1850. Always in demand as the first year of issue, 1850 twenties survive in reasonable numbers without any significant influx of shipwreck recoveries or foreign finds. This near-Mint example has a sharp strike and shows no large abrasions, although myriad small marks and field chatter scatter across what were once prooflike surfaces. Attractive medium-gold color has the subtle green tinge of Gold Rush bullion. Census: 154 in 58 (3 in 58+), 74 finer (8/17).

*From The Morgan Hill Collection.* NGC ID# 268F, PCGS# 8902

1851 Double Eagle, Fully Struck MS61

- 4015 1851 MS61 PCGS Secure.** The relief elements display full strike detail throughout this impressive second-year double eagle. Eye-catching lavender and sun-gold colors provide additional appeal, which is far better than one might assume for the MS61 grade. There are scattered marks over each side, but none pose much of a distraction. NGC ID# 268H, PCGS# 8904

1851-O Double Eagle, XF40  
Medium Orange-Gold Color

- 4016 1851-O XF40 PCGS. Variety Unconfirmed.** The mintmark placement is slightly further left than usual, but not quite as far left as the rare Variety 4. It may be an example of Variety 2 or of a new Variety 5. The 1851-O (315,000 coins minted) is a favorite among collectors looking for a representative of the New Orleans No Motto type. Device definition is good with grade-consistent merging. The only area of mentionable weakness occurs on the upper obverse stars. Medium orange-gold surfaces showcase green accents and numerous small abrasions. NGC ID# 268J, PCGS# 8905

1852 Liberty Double Eagle, AU58  
Excellent No Motto Type Coin

- 4017 1852 AU58 PCGS.** According to Doug Winter's doubleeaglebook.com, "The 1852 is among the better produced Type One double eagles from any mint. The obverse is usually well detailed with sharp, individually defined hair, strong stars and completely separated denticles. The reverse is also well struck." Such is the case with this nearly Uncirculated 1852 twenty. Friction is hardly apparent, while red and green-gold hues color moderately lustrous, remarkably smooth surfaces. This is a great No Motto type representative. NGC ID# 268K, PCGS# 8906

1852-O Double Eagle, AU53  
Attractive, Minimally Marked Surfaces

- 4018 1852-O AU53 PCGS. Variety 1.** Since there was no operating federal Mint in San Francisco in 1852, California bullion was shipped to the Philadelphia and New Orleans facilities for double eagle production. This is an originally toned and well-preserved example of the New Orleans mintage, which totaled 190,000 pieces. Remarkably few marks exist on the greenish-gold surfaces, with glimpses of reflective mint luster among the motifs. NGC ID# 268L, PCGS# 8907

1852-O Twenty Dollar, AU55  
Collectible New Orleans Issue

**4019 1852-O AU55 PCGS. Variety 1.** In the early 1850s, the primary origin of gold bullion deposits at the United States Mint and its branches was California, with smaller domestic quantities coming from Oregon and the Atlantic states. Double eagles were the principle recipient of freshly mined gold out of all of the circulating federal denominations, resulting in fairly substantial mintages of the denomination at both Philadelphia and New Orleans. Production of double eagles at New Orleans amounted to 190,000 pieces in 1852, a number dwarfed by the Philadelphia mintage of more than 2 million pieces but still rating as one of the highest production totals of the series from the New Orleans branch. Double eagle coinage at this branch mint rapidly declined in 1854, after the San Francisco Mint became operational and California gold was no longer shipped in large quantities to Eastern mints.

Today, the 1852-O is one of the only New Orleans double eagles that is usually available, although it is conditionally scarce. The present Choice AU coin displays sharp detail and partially lustrous yellow-gold surfaces. There is a small planchet lamination left of the mintmark, and some abrasions are noted on Liberty's cheek. Uncirculated examples of this date are rare. Population: 42 in 55, 57 finer (7/17). NGC ID# 268L, PCGS# 8907

1854 Liberty Head Twenty, AU58  
Elusive Large Date Variety

**4020 1854 Large Date AU58 NGC. CAC.** The mintage of the 1854 Large Date double eagle is unknown, but the issue is much scarcer than its Small Date counterpart. The date logotype was the same one used on silver dollars from this year. Probably only 10% or so of the mintage used this larger date punch. The present coin is well-detailed, showing only the slightest signs of circulation. The pleasing surfaces are light yellow-gold, with orange highlights, and bright mint luster. Census: 20 in 58 (1 in 58+), 10 finer. CAC: 6 in 58, 2 finer (7/17).

*Ex: Houston Signature (Heritage, 12/2010), lot 4606. NGC ID# 268S, PCGS# 98911*

1855-S Type One Twenty, MS63  
Ex: S.S. Central America

- 4021 1855-S MS63 NGC.** Ex: S.S. Central America. Medium S. This die variety is not listed among the recognized Central America variants, as it shows a broken A in STATES as well as an incomplete top of the E in AMERICA. This was only the second year of production for the San Francisco mint, and 879,675 double eagles were struck. More than 300 1855-S twenties were recovered from the S.S. Central America, a small percentage compared to the number of 1857-S double eagles but Type One twenties are generally unavailable to collectors, especially in high grade. This is a brightly lustrous example that shows even reddish-gold color. The surfaces are lightly marked with one exception: There is a prominent horizontal abrasion across the neck of Liberty. NGC ID# 268X, PCGS# 8916

1856-S Liberty Twenty, AU58  
Ex: S.S. Central America

- 4022 1856-S No Serif, Full A, Variety 17M, AU58 PCGS. CAC.** Ex: S.S. Central America. SSCA 5917. The vivid orange-gold surfaces of this impressive near-Mint specimen are minimally abraded and both sides radiate vibrant mint luster. The design elements are sharply detailed and show just a trace of wear on the high points. More than 1,000 examples of the 1856-S double eagle were recovered from the wreck of the S.S. Central America, many in high grade. Population: 21 in 58, 10 finer. CAC: 3 in 58, 3 finer (7/17). NGC ID# 2692, PCGS# 70022 Base PCGS# 8919

1857-S Double Eagle, MS64  
Spiked Shield Variety  
Ex: S.S. Central America

- 4023 1857-S Spiked Shield, Variety 20A, MS64 PCGS. CAC.** Ex: S.S. Central America, SSCA 2423. This frosty tangerine-gold shipwreck coin displays razor-sharp detail and considerable "pop," as some would say in describing its vibrant cartwheel luster. A few small marks on the cheek limit the grade, but no other distractions are apparent. Housed in a gold label holder of its original distribution, the coin is accompanied by a signed certificate of authenticity and a faux *Ship of Gold* book as well as the original, forest-green Blanchard box of issue.  
**From The Morgan Hill Collection.** NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

1858-S Twenty Dollar, AU58  
Partially Lustrous, Original Surfaces

- 4024 1858-S AU58 PCGS.** There is plenty of original mint luster remaining on both sides of this orange-gold survivor. The surfaces are uncommonly well preserved, with little evidence of wear and overall bold definition. Each side is a little scuffy but no more than one should expect for a circulated double eagle from the early years of production at the San Francisco Mint. Population: 51 in 58 (2 in 58+), 19 finer (7/17).

Ex: FUN Signature (Heritage, 1/2004), lot 7948; Pittsburgh Signature (Heritage, 8/2004), lot 7564; ANA Signature (Heritage, 8/2007), lot 3291.

From The Morgan Hill Collection. NGC ID# 2699, PCGS# 8925

1860 Double Eagle, MS61  
Frosty Luster, Rose-Gold Hues

- 4025 1860 MS61 PCGS.** In his webbook on the No Motto double eagle series, Doug Winter writes this about the 1860: "With the exception of the 1865, no Type One date had its higher grade availability altered more by the S.S. Republic treasure than the 1860. Some of the best individual double eagles from this wreck were dated 1860 ... ." The origin of this Uncirculated twenty dollar gold piece is unknown. It displays frosty, textured surfaces with a decided green-gold hue. The neck feathers are notably strong, while the stars and curls exhibit a hint of softness. Each side is readily appealing despite scattered, grade-consistent abrasions. NGC ID# 269D, PCGS# 8929

1861-O Double Eagle, AU50  
Historically Important Issue  
Struck in This Transitional Year

- 4026 1861-O AU50 PCGS. Variety 1.** The 1861-O double eagle was produced in the amount of 17,741 coins, but there are only estimates as to how many were struck under the authority of each of the issuing entities: the federal government, the state, and the Confederacy. In any case, the issue is a rare one today, with Garrett and Guth estimating that only 200 survive in all grades, most of them VF to XF. The present AU piece shows a weak date, as often seen on the issue, and the fields appear lapped. Many small-to medium-sized abrasions pepper each side, the most obvious a scratch on the lower obverse near the denticles to the right of the final 1. A light streak of grease struck into planchet in the upper obverse field at first looks like a contact mark. The strike is a bit soft in the center of each side, with orange-gold color dominant. Population: 16 in 50, 42 finer (7/17).

Ex: Central States Signature (Heritage, 4/2012), lot 5330. NGC ID# 269J, PCGS# 8934

**1864-S Double Eagle, AU58**  
Elusive in High Grade

- 4027 1864-S AU58 PCGS.** The 1864-S double eagle is a better date in high grade, scarce in AU58 and exceedingly so in Mint State. Only a handful of Mint State coins are known finer than MS62. This near-Mint coin displays a bold strike from unlapped dies, with frosty orange-gold luster in the fields. Scattered abrasions accompany a brush of high-point wear. Population: 48 in 58, 53 finer (7/17). NGC ID# 269T, PCGS# 8942

**1866 Liberty Double Eagle, AU55**  
First Type Two Issue

- 4030 1866 Motto AU55 PCGS.** The motto IN GOD WE TRUST was added to the double eagle design in 1866, creating the popular Type Two motif. This impressive Choice AU specimen exhibits strongly impressed design elements, with just a trace of wear on the high points. The lightly abraded orange-gold surfaces retain much of their original mint luster and overall eye appeal is quite strong. NGC ID# 269X, PCGS# 8949

**1865 Double Eagle, AU58**  
Final Philadelphia No Motto Issue

- 4028 1865 AU58 PCGS.** The 1865 represents the final Philadelphia issue of No Motto double eagles (351,175 coins). This still-lustrous, reddish-gold twenty is well-struck without obvious friction over the devices. As is the case for nearly all Type One representatives, save for those recovered from the sea, myriad bagmarks are present on each side. NGC ID# 269U, PCGS# 8943

**1866 Motto Twenty, AU58**  
First-Year Type Two Design

- 4031 1866 Motto AU58 NGC.** A substantial mintage of 698,775 double eagles represents the debut year for the Motto design, yet most survivors grade no better than Extremely Fine. Relatively few examples of the issue actually saw circulation, and those that did are normally well-worn. Uncirculated pieces are quite scarce as well, placing near-Mint State representatives such as the present AU58 coin in high demand. This piece displays nearly full mint luster throughout its rich-gold surfaces, and only light chatter from bag storage and transport. Census: 177 in 58 (2 in 58+, 2 in 58★), 43 finer (7/17). NGC ID# 269X, PCGS# 8949

**1865 Twenty Dollar, MS61**  
Unusually Attractive for the Grade

- 4029 1865 MS61 NGC.** This is a thoroughly luminous Mint State example of a conditionally challenging Philadelphia issue. Well-detailed design elements complement remarkably smooth, frosty surfaces that show a pleasing cartwheel effect. Unobtrusive slide marks on the high points of the devices limit the grade. The 1865 double eagle is only occasionally available in Uncirculated condition. NGC ID# 269U, PCGS# 8943

**1868-S Liberty Double Eagle, AU58**  
Elusive Type Two Issue in High Grade

- 4032 1868-S AU58 PCGS. CAC.** Despite the more-than-adequate mintage of 837,500 pieces, the 1868-S Liberty double eagle is rare in high grade. Like most Type Two twenties, the 1868-S was extensively circulated at the time of issue, was not recovered from shipwrecks in large quantities, and was not heavily saved by contemporary collectors. This lightly worn near-Mint specimen offers still-lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Population: 87 in 58 (2 in 58+), 35 finer. CAC: 26 in 58, 10 finer (7/17).. NGC ID# 26A4, PCGS# 8954

1869-S Liberty Twenty, MS61  
Type Two Issue in Mint State

- 4033 1869-S MS61 PCGS.** The 1869-S Liberty double eagle is elusive in all Mint State grades, like most Type Two issues. This impressive MS61 example displays sharply detailed central design elements, but a touch of softness is evident on the stars. The lustrous orange-gold surfaces show a number of grade-consistent contact marks, but the overall presentation is quite attractive. Population: 42 in 61, 16 finer (7/17). NGC ID# 26A6, PCGS# 8956

1871 Double Eagle, AU55  
Underrated and Elusive in High Grade

- 4034 1871 AU55 PCGS.** Double eagle production at Philadelphia — typically substantial — dipped below the six-figure mark in 1868 and then again in 1871, but was back into the seven-figure range in 1873. The 1871 double eagle is a better date in high grade, scarce in AU condition and a major rarity in Mint State. This Choice AU coin displays partial luster and pleasing yellow-gold surfaces. Bold design elements share a scattering of abrasions with the fields, as normal for this grade level. Population: 39 in 55, 39 finer (7/17). NGC ID# 26AA, PCGS# 8960

1871-S Liberty Double Eagle, MS61  
Nice Type Two Example

- 4035 1871-S MS61 PCGS.** The 1871-S Liberty double eagle was produced in large numbers, and some coins initially used in foreign trade have been repatriated in recent times, making the issue reasonably available in circulated grades. Unfortunately, like most Type Two twenties, the issue is quite elusive in high grade. This impressive Mint State specimen offers well-detailed design elements, and the lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 59 in 61, 33 finer (7/17). NGC ID# 26ND, PCGS# 8962

1871-S Double Eagle, MS61  
Rare With CAC Approval

- 4036 1871-S MS61 PCGS. CAC.** Micro S. Although the San Francisco Mint produced 928,000 double eagles in 1871, few of those have survived in Mint State grades. In fact, PCGS and NGC combined have only seen slightly more than 300 submissions in Uncirculated condition. This example has brilliant yellow-gold luster and trivial, grade-consistent marks. Well above-average with sought-after CAC approval. Population: 59 in 61, 33 finer. CAC: 15 in 61, 8 finer (7/17). NGC ID# 26ND, PCGS# 8962

1872 Twenty Dollar, MS60  
Pleasing Straw-Gold Representative

- 4037 1872 MS60 PCGS.** Although a couple of premium-quality Uncirculated 1872 double eagles are known, all but a handful of mint condition examples survive in MS60 or MS61. Here is a pleasing straw-gold representative with slightly better strike detail than usual. Myriad marks appear in the fields and on Liberty's cheek. NGC ID# 26AD, PCGS# 8963

## 1872 Double Eagle, Bright Reddish-Gold MS61

- 4038** 1872 MS61 PCGS. This Uncirculated Type Two double eagle has a decidedly reddish-gold cast enhanced by the radiant luster that glistens over each side. The strike is somewhat indistinct over the highest points, and marks are scattered throughout — characteristics that define most 1872 twenties and explain the low surviving population in MS61 or higher. Population: 54 in 61, 13 finer (7/17). NGC ID# 26AD, PCGS# 8963

1872-CC Liberty Twenty, AU Details  
Scarce Early Series Issue

- 4039** 1872-CC — Smoothed — PCGS Genuine. AU Details. Variety 1-B. The widely spaced CC mintmark identifies the variety. The 1872-CC Liberty double eagle is a scarce issue, with a reported mintage of 26,900 pieces. This interesting specimen exhibits light wear on the design elements and the orange-gold surfaces are moderately abraded. The surfaces have an unnatural sheen, however, and some areas have been smoothed and polished.

1872-CC Double Eagle, AU53  
Scarce Early CC-Mint Issue

- 4040** 1872-CC AU53 PCGS. Variety 1-A. Double eagle coinage at the Carson City Mint began in March 1870, but the mint's lack of a bullion account with which to immediately pay depositors reduced the amount of gold that was put through the coining process the first year. In 1871 and 1872, production of double eagles increased but remained in the low five-figure range annually. The 1872-CC double eagle is a semikey date today, surviving in limited numbers from extensive circulation in the Nevada Territory. Most of the 26,900-coin mintage is not known to survive. In Uncirculated condition, this issue is extremely rare and far out of reach for most collectors.

Some original mint luster remains in the protected regions of the fields on this About Uncirculated example, complementing bold design elements and warm orange-gold color. Scattered abrasions on the obverse are unobtrusive to the naked eye. Carson City double eagles of this period almost never seen without assorted abrasions.

*From The Morgan Hill Collection.* NGC ID# 26AE, PCGS# 8964

1873 Open 3 Twenty Dollar, MS63  
Minimally Marked Type Representative

- 4041** 1873 Open 3 MS63 PCGS. As the most frequently encountered Type Two twenty, the 1873 Open 3 is the usual choice for type representation. It is not generally found in such high grade as seen here, and rarely offered any finer. Rich orange-gold luster rolls over surfaces that are minimally abraded for the grade and are especially clean on the reverse. PCGS counts 11 finer submissions (7/17). NGC ID# 26AL, PCGS# 8967

1873-S Double Eagle, MS62  
Scarcer Closed 3 Variant

- 4044** 1873-S Closed 3 MS62 NGC. CAC. Like most Type Two double eagles, the 1873-S with the Closed 3 in the date is rare in MS62 condition and virtually unobtainable in higher levels of Mint State. This attractive MS62 example is well-detailed with a touch of softness on the central obverse. The lustrous orange-gold surfaces are lightly marked for the grade. Census: 48 in 62 (4 in 62+), 4 finer. CAC: 8 in 62, 0 finer (7/17). NGC ID# 26AL, PCGS# 8969

1873 Open 3 Twenty Dollar, MS63+  
Doubled Die Obverse, FS-101

- 4042** 1873 Open 3, Doubled Die Obverse, FS-101, MS63+ NGC. LIBERTY is doubled on this *Cherrypickers' Guide* variety. The curls, stars, neck, and wing feathers display far better detail than one is used to seeing among Type Two twenty dollar gold pieces. Luminous frost enlivens rose and green-gold surfaces that exhibit noticeably few overt abrasions for the MS63 grade. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873-S Open 3 Twenty Dollar, MS60  
Frosty With Green and Rose Accents

- 4045** 1873-S Open 3 MS60 PCGS. The Open 3 variant of the 1873-S twenty dollar is about two to three times scarcer than the Closed 3 variety manufactured earlier in the year. All Uncirculated examples are very scarce. The reverse is noticeably stronger than the obverse, especially on the feathers, though most star radials are complete. Accents of mint-green and rose complement frosty yellow-gold surfaces. Myriad abrasions. NGC ID# 26AM, PCGS# 8979

1873-S Double Eagle, MS62  
Closed 3, Coruscating Frost

- 4043** 1873-S Closed 3 MS62 PCGS. Most double eagles produced at the San Francisco Mint in 1873 are of this variety. The facility was late to receive new Open 3 dies, created to better distinguish the 3 from an 8. This variant is scarce in Mint State, very scarce in MS62, and extremely rare in MS63 or higher. Coruscating luster and peach-gold color give each side far better allure than the grade implies. Complete star radials and crisp feathers are an added bonus, shifting attention away from peppered abrasions. NGC ID# 26AL, PCGS# 8969

1874 Twenty Dollar, MS61  
Fresh Mint Luster

**4046** 1874 MS61 PCGS. Uncirculated 1874 Liberty double eagles are challenging in any grade but are especially scarce finer than MS61. MS63 or better pieces are genuinely rare. This is a collectible example with moderate abrasions but none that are individually bothersome. Original frosty mint luster cartwheels around each side in luminous yellow-gold hues. NGC ID# 26AN, PCGS# 8970

1874-CC Liberty Twenty, AU50  
Attractive Mint Luster

**4047** 1874-CC AU50 NGC. Variety 1-A. A most attractive representative of this popular branch mint issue, from a relatively large mintage of 115,085 pieces, this coin exhibits well-detailed design elements with some light wear on the high points. The pleasing orange-gold surfaces are minimally abraded for the grade and retain much of their original mint luster. NGC ID# 26AP, PCGS# 8971

1874-CC Liberty Twenty, AU58  
Excellent Branch Mint Type Coin

**4048** 1874-CC AU58 NGC. CAC. Variety 1-A. A relatively large production of 115,085 Liberty double eagles was accomplished at the Carson City Mint in 1874, the second-highest mintage of the series. As might be expected, the 1874-CC is one of the more available Carson City twenties and it is a popular choice of branch mint type collectors. However, like most Type Two double eagles, the 1874-CC is a challenge to find in high grade.

This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the strike is better-than-average for the issue. The pleasing orange-gold surfaces are lightly abraded and retain significant amounts of original mint luster. The overall presentation is most attractive. NGC has graded 16 numerically finer examples (7/17). NGC ID# 26AP, PCGS# 8971

1875 Twenty Dollar, MS63  
Swirling Cartwheel Luster

- 4049** 1875 MS63 NGC. Swirling cartwheel luster rolls over orange-gold, frosty surfaces on this delightful Select double eagle — the only 1875-dated U.S. gold denomination that is readily obtainable. A quick glance reveals lovely eye appeal and a bold strike, while a loupe brings out minor cheek abrasions that preclude an even finer grade. Census: 28 in 63, 4 finer (7/17). NGC ID# 2547, PCGS# 8973

1875-CC Double Eagle, Luminous AU55

- 4050** 1875-CC AU55 NGC. **Variety 1-B.** Curved die lines on Liberty's neck aid in attribution. The 1875-CC has a fairly high mintage for a Carson City double eagle (111,151 coins). It is more accessible than most other issues from this always-popular Western branch mint. Luminous luster and attractive green-gold color make up for indistinctness on the stars and curls. Myriad marks are unsurprising. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty, AU58  
Remarkably Lustrous Surfaces

- 4051** 1875-CC AU58 NGC. **Variety 9-A.** In addition to the usual attributes for this variety, there is also the confirming die line above the E in AMERICA. As the most available CC twenty from this decade, the 1875-CC is available for both mintmark sets and as a Type Two for an advanced type set. Significant mint luster is seen over each side with just a bit of thinning in the fields. The strike details are somewhat soft and there are the expected number of medium-sized abrasions present on each side. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, MS61  
Lustrous Type Two Example

- 4052** 1875-CC MS61 PCGS. **CAC. Variety 5-A.** With a generous mintage of 111,151 pieces, the 1875-CC twenty is among the more available CC twenties. It can occasionally be found in mint condition also, making an interesting Type Two representative. This issue is even more appealing when one considers the thick mint luster usually encountered, even on AU coins. This piece exhibits the luster this issue is so well known for. Much original brightness is also evident, and the devices are well-defined overall. The grade indicates the presence of numerous abrasions, most of which are located on the obverse. On the lower reverse there is either a grease stain that was struck into the surface of the coin at the time of manufacture or a stain of some sort. NGC ID# 26AT, PCGS# 8974

1876-CC Twenty Dollar, AU55  
Glowing Luster Remains

- 4053** 1876-CC AU55 PCGS. Variety 3-A. Choice About Uncirculated condition is an optimal collecting grade for the 1876-CC double eagle, which appears on the market relatively often in XF through AU condition. Each side enjoys partial remaining luster that glows from orange and green-gold surfaces. Soft over the stars, curls, and feathers. A single scrape between stars 1 and 2 merits attention. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, MS60  
Minimal Abrasions for the Grade

- 4054** 1876-CC MS60 NGC. Variety 3-A. Softly frosted wheat-gold luster gives this Mint State 1876-CC double eagle pleasing eye appeal. Scattered abrasions limit the grade, but their impact is less severe than usual for the MS60 level. The strike is sharp. Variety 3-A is largely attributed by date position and mintmark placement. The 1876-CC overall is among the more collectible Carson City twenties in Mint State. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, MS60  
Sought-After Mint State Example

- 4055** 1876-CC MS60 NGC. Variety 1-A. The 1876-CC is a fairly plentiful issue in the context of Carson City double eagles, although Mint State examples remain elusive and highly sought-after. This piece is moderately abraded, but original orange-gold luster with shades of peach and lavender throughout delivers good eye appeal. The strike is bold, and the protected portions of the reverse fields show slight reflectivity.  
*From The Morgan Hill Collection.* NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, MS61  
Pleasing for the Grade

- 4056** 1876-CC MS61 NGC. Variety 3-D. Wide CC mintmark. Widely viewed as a common date within the Carson City short set, the 1876-CC double eagle is conditionally scarce in Mint State. This example has scattered abrasions, as the grade suggests, but it stands apart from many of its peers by not showing any obvious signs of high-point friction — a common complaint on many Carson City double eagles in this grade. The strike is bold, and each side offers original, frosty mint luster with a radiant cartwheel effect. A hint of olive-gold patina accompanies the more significant abrasions. Finer examples of the 1876-CC twenty are out of reach for most collectors. NGC ID# 26AW, PCGS# 8977

1880 Double Eagle, MS60  
Seldom Offered in Mint State

- 4057** 1880 MS60 PCGS. Unlike 1880 double eagles bearing an S mintmark, the twenty dollar gold coins struck at the Philadelphia Mint that year are rarely found in Uncirculated condition. When offered, such coins are usually no higher than MS61. This mint condition double eagle features wheat-gold color with tinges of green. A plethora of abrasions are scattered over each side. Population: 14 in 60, 34 finer (7/17). NGC ID# 26BA, PCGS# 8992

**1881-S Liberty Double Eagle, MS63**  
None Finer at NGC

- 4058 1881-S MS63 NGC. CAC.** A substantial mintage of 727,000 Liberty double eagles was accomplished at the San Francisco Mint in 1881, but none were struck at Carson City, and the Philadelphia Mint produced only a token mintage of 2,199 examples. As a result, there was great commercial demand for the 1881-S, and the issue circulated heavily in both domestic and overseas trade. Today the 1881-S can be easily located in circulated grades, but Mint State specimens are definitely elusive.

The present coin is an impressive Select specimen, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. Overall visual appeal is outstanding. Census: 5 in 63, 0 finer. CAC: 2 in 63, 3 finer (7/17). NGC ID# 26BD, PCGS# 8995

**1882-CC Liberty Double Eagle, AU58**  
Nice Luster and Color

- 4059 1882-CC AU58 NGC. CAC. Variety 1-B.** From a mintage of 39,140 pieces, the 1882-CC Liberty double eagle is a scarce issue at the AU58 grade level, and Mint State coins are quite elusive. This impressive near-Mint representative shows just a trace of wear on the strongly impressed design elements, and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26BF, PCGS# 8997

**1882-CC Double Eagle, AU58**  
Substantial Luster Remains

- 4060 1882-CC AU58 NGC. CAC. Variety 1-B.** A peripheral die crack surrounds much of the outer reverse border legends on this variety. The 1882-CC double eagle is available in AU grades, but the scarcity of Mint State pieces promotes strong demand for near-Mint coins such as the present piece. Sharp design elements and frosty fields show original olive-gold patina and substantial luster. Light chatter on Liberty's cheek contributes to the grade. *From The Morgan Hill Collection.* NGC ID# 26BF, PCGS# 8997

**1883-CC Double Eagle, AU58**  
Lustrous Carson City Type Coin

- 4061 1883-CC AU58 NGC. Variety 2-A.** A frequently seen variety among 1883-CC double eagles, showing the mintmark positioned partially over the D in DOLLAR and a small tine protruding from the reverse dentils above the E in STATES. The 1883-CC as a date is scarce in Uncirculated condition, and lustrous near-Mint coins like the present are in demand. This piece is sharp and vibrantly lustrous. Surface chatter appears over the yellow-gold patina. *From The Morgan Hill Collection.* NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, AU58**  
Seemingly Finer Than the Grade Suggests

- 4062 1883-CC AU58 NGC. CAC. Variety 1-B.** Diagonal lines in the shield and a centered mintmark confirm the variety. Razor-sharp strike detail, radiant mint frost, and few overt abrasions give this nearly Uncirculated Carson City double eagle the appearance of an even finer example. The faintest indication of rub barely limits the grade. Luminous medium reddish-gold color adorns each side. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS61  
Unmistakably Original

- 4063 1883-CC MS61 PCGS. Variety 2-A.** The placement of the second C in the mintmark over the D in DOLLAR is a simple diagnostic marker for the more available of two known die pairs. Reddish-gold coloration, green-gold accents, and glowing luster are unmistakably original. Small grease spots occur under star 3, left of the neck, and below the arrowheads. The obverse exhibits pinpoint strike detail, while the reverse is moderately softer on the neck and tailfeathers. The MS61 grade assessment is limited by scattered bagmarks and grazes. The 1883-CC serves as an available issue to represent the CC double eagle type. Nearly 60,000 pieces were struck, and examples come to market in lower Mint State grades with some degree of regularity. Still, finer coins are rare with only 27 higher grading events at PCGS (7/17). NGC ID# 26BH, PCGS# 8999

1884-CC Liberty Double Eagle, AU55  
Popular Type Three Carson City Issue

- 4064 1884-CC AU55 PCGS. CAC. Variety 1-A.** The 1884-CC Liberty double eagle is a popular Type Three branch mint issue, from a mintage of 81,139 pieces. This attractive Choice AU specimen shows just a touch of wear on the strongly impressed design elements, and the lustrous orange-gold surfaces are lightly marked for the grade. The overall presentation is most appealing. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Double Eagle, AU55  
Lustrous and Lightly Abraded

- 4065 1884-CC AU55 NGC. CAC. Variety 1-A.** The 1884-CC Type Three double eagle is seen more often than the reported mintage of 81,139 pieces would suggest. This Choice AU specimen is an attractive representative for a date or type set. Only the slightest trace of friction shows on the high points of the strongly impressed design elements, and the lightly abraded orange-gold surfaces retain much of their original mint luster.  
*From The Morgan Hill Collection.* NGC ID# 26BK, PCGS# 9001

1889-CC Liberty Double Eagle, AU58  
Smooth, Partially Lustrous Surfaces

- 4066 1889-CC AU58 NGC. Variety 1-A.** The early die state without cracks at the base of the date. This near-Mint 1889-CC double eagle comes from a mintage of only 30,945 coins, and finer pieces are scarce. The strike is sharp, and high-point wear is at a strict minimum. Luster remains in the fields amid original olive-gold patina. A hidden mark on Liberty's throat is the only mentionable abrasion. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS60  
Famous Date-Mintmark Combination

- 4067 1889-CC MS60 PCGS. Variety 1-A.** Only one variety is identified for the 1889-CC double eagle, although others may exist. After a three-year intermission, the Carson City Mint began coinage production again in the last quarter of 1889, following necessary repairs to the equipment that sat idle since the end of 1885. Once the coinage presses were again operational, 30,945 double eagles were minted at the Nevada facility. The only other coins struck there in 1889 were 350,000 silver dollars, for a total production of less than \$1 million. This Mint State representative has dusky high-point toning over its frosty yellow surfaces with scattered, mostly inconsequential marks. NGC ID# 26BV, PCGS# 9011

1890 Double Eagle, MS63  
Scarce and Desirable So Fine

- 4068 1890 MS63 PCGS.** Mint State examples of the 1890 double eagle are scarce finer than MS62, and rarely is a Choice or finer example seen. This Select representative offers sharp design elements and frosty yellow-gold mint luster. Light surface chatter on Liberty's cheek and in the field limits the grade, but the patina is original. Population: 48 in 63, 6 finer (7/17). NGC ID# 26BX, PCGS# 9013

1890-CC Liberty Twenty, AU50

- 4069 1890-CC AU50 NGC. Variety 1-A.** The 1890-CC Liberty double eagle is one of the more available Type Three issues from the famous Western mint. This impressive AU50 specimen is lightly worn and lightly abraded, with a better-than-average strike and pleasing orange-gold surfaces that retain traces of original mint luster. An excellent choice for the type collector or series specialist. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, AU58  
Late Die State

- 4070 1890-CC AU58 NGC. Variety 1-A.** From a mintage of 91,209 pieces, the 1890-CC Liberty double eagle is a plentiful Type Three issue and a popular choice of branch mint type collectors. This attractive near-Mint example is from a late state of the dies, with sharp definition on the obverse, but some incomplete detail in the tail feathers, due to lapping. A lightly worn, lightly abraded orange-gold specimen, with much original mint luster. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58  
Appealing, Lustrous Surfaces

**4071** 1890-CC AU58 NGC. Variety 1-A. Late die state, lapped reverse. The eagle's tailfeathers are partially effaced, but the obverse is unlapped. Moderate original mint luster remains in the protected portions of the fields. Frosty yellow-gold surfaces show light, scattered abrasions but only a touch of high-point friction. An appealing coin that will fit in well with an otherwise Mint State Carson City collection.

*From The Morgan Hill Collection.* NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU58  
Exceptional Mint Luster

**4072** 1890-CC AU58 PCGS. CAC. Variety 1-A. This is a later die state piece that shows lapping on the tail feathers of the eagle and only slight evidence of die doubling. The surfaces appear to us to be fully lustrous (perhaps that factored into the CAC endorsement). Each side is original and untampered, with semireflective fields and light orange-gold color. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, MS60  
Excellent Branch Mint Type Coin

**4073** 1890-CC MS60 PCGS. Variety 1-A. Mint records indicate 91,209 Liberty double eagles were struck at the Carson City Mint in 1890, a modest production total in absolute terms, but not unusually small in the context of the series. The issue was released into circulation and many coins were used in foreign trade. A substantial number of pieces were repatriated from European holdings over the years and a small hoard entered the market in the mid-1990s to increase the supply available to present-day collectors. As a result, the 1890-CC is one of the more available Carson City twenties in today's market.

The present coin is an impressive Mint State specimen, with well-detailed design elements that show some incomplete detail on the eagle's tail feathers, due to lapping. The pleasing orange-gold surfaces retain much of their original mint luster and show the expected number of minor contact marks for the grade. This coin should find a home in a fine collection of Carson City double eagles or a branch mint type set. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS60  
Frosty Green and Rose-Gold Surfaces

- 4074 1890-CC MS60 PCGS. Variety 1-A.** A scarce issue from a mintage of 91,209 pieces, the 1890-CC double eagle is generally available in grades up to about MS62. However, all Mint State survivors are subject to far greater demand than the known population can satisfy. Two varieties are known that differ in the position of the mintmark, and Variety 1-A as offered here is observed on 90% of auction appearances. A nicely detailed example, this Mint State Carson City twenty exhibits bright luster throughout the frosty rose-gold surfaces with greenish coloration over the design high points. Although both sides show myriad surface marks, they are entirely trivial and inconsequential. NGC ID# 26BY, PCGS# 9014

1890-S Liberty Twenty, MS63  
Type Three Branch Mint Issue

- 4075 1890-S MS63 PCGS.** Despite an ample mintage of 802,750 pieces, the 1890-S Liberty double eagle is scarce in MS63 condition, and finer coins are quite elusive. This attractive Select specimen offers sharply detailed design elements and vivid orange-gold surfaces that show some minor contact marks on Liberty's cheek and the left obverse field. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 66 numerically finer examples (7/17). NGC ID# 26BZ, PCGS# 9015

1892-CC Twenty Dollar, Choice AU  
Original Khaki and Red-Gold Surfaces

- 4076 1892-CC AU55 NGC. Variety 1-A.** Mintmark collecting was still in its infancy when these double eagles were issued by the Carson City Mint in 1892. Perhaps some pieces were set aside for numismatic purposes around that time, but virtually all known survivors are the result of repatriations from overseas vaults or happenstance. Blended khaki and reddish-gold coloration graces well-preserved, original surfaces with minimal friction. NGC ID# 26C6, PCGS# 9020

**1892-CC Double Eagle, MS61**  
**Heavily Exported Low-Mintage Issue**

- 4077 1892-CC MS61 PCGS. Variety 1-A.** The sole dies, used to strike 27,265 double eagles in 1892. The situation facing the Carson City Mint during its final years of operation were as follows: declining Comstock Lode yields in the face of increased export demand. That meant that while the CC-mint was taking in less and less bullion to coin every year, the Treasury still required the facility to produce as much as it could to ship overseas. Exportation also explains the relative availability of the 1892-CC and its contemporaries in high grades. With that in mind, truly Mint State examples are elusive. This frosty, well-struck twenty dollar gold piece offers rich reddish-gold color with greenish accents. Myriad bagmarks are noted. NGC ID# 26C6, PCGS# 9020

**1892-S Double Eagle, MS63**  
**Very Scarce Any Finer**

- 4078 1892-S MS63 PCGS. CAC.** The 1892-S goes from readily obtainable in MS62 to very scarce in MS64. The MS63 grade level bridges that differential. This Select representative presents pinpoint definition on the stars and curls. The reverse is a trifle softer. Original peach-gold coloration with faint green and rose accents adorns each frosty side. NGC ID# 26C7, PCGS# 9021

**1893-CC Liberty Double Eagle, XF45**  
**Final Carson City Twenty**

- 4079 1893-CC XF45 NGC. CAC. Variety 1-A.** Only 18,402 Liberty double eagles were struck at the Carson City Mint in 1893, the final year of coinage operations at the famous Western facility. Fortunately, the issue was well-produced, and high quality specimens are seen more frequently than the small mintage would suggest. This lightly worn, lightly abraded Choice XF specimen retains traces of original mint luster, adding to its considerable eye appeal. NGC ID# 26C9, PCGS# 9023

**1898-S Twenty Dollar, MS65**  
**Only One Coin Finer at PCGS**  
**Among the Finest With CAC Endorsement**

- 4080 1898-S MS65 PCGS. CAC.** Struck from unlapped dies with bold, sharply detailed design elements and vibrant cartwheel luster. The original tangerine-gold surfaces show only the most microscopic grazes, none out of line for the Gem grade. Liberty's cheek is notably well-preserved. The 1898-S double eagle is scarce in this grade, and PCGS has seen only a single numerically finer example. CAC: 14 in 65, 0 finer (7/17). NGC ID# 26CL, PCGS# 9034

## HIGH RELIEF DOUBLE EAGLES

1903 Liberty Twenty, MS65  
Colorful, Lustrous Example

- 4081** 1903 MS65 PCGS. CAC. From a mintage of 287,200 pieces, the 1903 Liberty double eagle is a condition rarity in grades above the MS65 level. This impressive Gem displays sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate especially vibrant mint luster. Eye appeal is terrific. PCGS has graded four numerically finer examples (7/17). NGC ID# 26CW, PCGS# 9043

1906-D Double Eagle, MS64+  
First Denver Twenty, Rare Any Finer

- 4082** 1906-D MS64+ PCGS. One of just two Liberty Head double eagle dates from the Denver Mint, this borderline Gem example is vibrantly lustrous and well-struck for the first-year D-Mint issue. Sun-gold cartwheel luster radiates from richly frosted surfaces. Only a few shallow abrasions preclude a full Gem grade, which is seldom granted as witnessed by only 14 numerically finer pieces seen by PCGS (8/17). NGC ID# 26D5, PCGS# 9050

1906-D Liberty Double Eagle, MS64+  
First Denver Mint Issue

- 4083** 1906-D MS64+ PCGS. CAC. The 1906-D Liberty double eagle claims a mintage of 620,250 pieces and the issue is not difficult to locate in MS64 condition, but examples in finer grades are quite elusive. This Plus-graded Choice example exhibits well-detailed design elements and vivid orange-gold surfaces, with only minor signs of contact. Vibrant mint luster enhances the outstanding eye appeal. PCGS has graded 14 numerically finer examples (7/17). NGC ID# 26D5, PCGS# 9050

1907 High Relief Twenty, MS63  
Collectible 'Wire Rim' Variant

- 4084** 1907 High Relief, Wire Rim MS63 NGC. High Relief twenties are broken down into two types, Wire Rim and Flat Rim. The Wire Rim variant was not intentionally produced as such by the Mint. In fact, it was an unintentional error in production that resulted in a thin "fin" of metal that was squeezed between the tiny gap between the die faces and collar. It wasn't until late in production that Mint personnel solved (or mostly solved) the problem of "finning." The collectibility of the so-called Wire Rim has persisted over the past century and given collectors two variants. On this piece much of the wire rim shows, indicating it was struck between early September and mid-December 1907. The surfaces exude the rich, satiny mint luster these pieces are so well known for, and each side is cloaked in a thin layer of reddish patina. Close examination shows a few tiny contact marks, but none are immediately apparent to the unaided eye.

*From The Morgan Hill Collection.* NGC ID# 26F2, PCGS# 9135

1907 Wire Rim Double Eagle, MS64  
Struck in High Relief

MCMVII High Relief Twenty, MS65  
Bright Yellow-Gold Surfaces

**4085 1907 High Relief, Wire Rim MS64 PCGS.** The three-dimensional nature of High Relief double eagles was a revolutionary concept in coin design and production in 1907, and it has remained a collector favorite over the more than 100 years. The concept seemed to surprise everyone except the designer, Augustus Saint-Gaudens. Saint-Gaudens was the preeminent sculptor in late 19th century America. He labored for years on most of his major sculptural works, creating a lifelike quality not seen previously. He transferred that sculptural way of thinking into his design for the double eagle, creating devices that resembled sculpture more than they resembled any coinage then in production. This is a satin-surfaced example that shows the usual layer of light, even reddish patina. The strike is strong throughout and there are no obvious or detracting contact marks on either side.

*From The Morgan Hill Collection.* NGC ID# 26F2, PCGS# 9135

**4086 1907 High Relief, Wire Rim MS65 PCGS.** Some coins just present better in-hand than others. This is one. The surfaces are bright yellow-gold with almost no trace of patina. The expected satiny mint luster is present and adds even more to the attractiveness of this High Relief. The strike details are especially notable with pinpoint definition on every design element. This intricate detailing gives the skirt lines a sculptural, three-dimensional quality. The surfaces are essentially free from contact marks; certainly none are apparent without a loupe. The Gem quality of this piece is immediately apparent to even the most casual observer. NGC ID# 26F2, PCGS# 9135

## SAINT-GAUDENS DOUBLE EAGLES

1907 Saint-Gaudens Double Eagle, MS64  
High Relief, Flat Edge Variant

- 4087** 1907 High Relief, Flat Rim, MS64 PCGS. Augustus Saint-Gaudens' 1907 High Relief double eagle is widely considered this country's most beautiful regular-issue coin design. From a limited mintage of 12,367 pieces, most of the coins exhibit a fin, or Wire Rim, around the edge of the coin, created when metal was extruded through the narrow gap between the dies and collar during the striking process. This feature made the coins difficult to stack and was considered a defect at the time. By mid-December, 1907, Mint technicians had discovered how to eliminate the fin by adjusting the milling and dimensions of the planchets slightly. Accordingly, the coins struck late in the year display a Flat Edge. The Flat Edge coins are about four times as scarce as their Wire Rim counterparts.

This attractive Choice example represents the scarcer Flat Edge type, with the expected razor-sharp definition on the central design elements. The well-preserved orange-gold surfaces radiate vibrant mint luster, with a few hints of red showing at selected angles. Overall eye appeal is terrific. NGC ID# 26F2, PCGS# 9136

1908-S Twenty Dollar, AU55  
Moderately Lustrous Fields

- 4088** 1908-S AU55 NGC. The San Francisco Mint began production of Saint-Gaudens double eagles in 1908, but only 22,000 pieces were struck. The 1908-S is among the more famous condition rarities in the series due to its low mintage. This Choice AU example is satiny and partially lustrous with excellent detail. Light surface chatter is present, but there are no singular abrasions.

*From The Morgan Hill Collection.* NGC ID# 26FA, PCGS# 9149

**1909 Saint-Gaudens Double Eagle, MS65**  
Underrated Issue in High Grade

**4089 1909 MS65 PCGS.** The Philadelphia Mint struck a smallish production total of 161,282 Saint-Gaudens double eagles in 1909, split between the overdate 1909/8 and the perfect date 1909 issues. The coins were struck early in the year, primarily as currency reserves, and later used to settle accounts in foreign trade. The 1909 is surprisingly difficult to locate in high grade today, despite the discovery of a small hoard by Manfra, Tordella and Brooks in the 1980s. Most of those coins were lower Mint State examples, but their presence in the marketplace has somewhat masked the true rarity of this issue in high grade.

The present coin is a spectacular Gem, with sharply detailed design elements throughout and vivid orange-gold surfaces that show only insignificant signs of contact. Especially vibrant mint luster radiates from both sides, accentuating the terrific eye appeal. Population: 22 in 65 (1 in 65+), 7 finer (7/17). NGC ID# 26FC, PCGS# 9150

**1909-D Twenty Dollar, MS64**  
Attractive and Original

**4090 1909-D MS64 PCGS.** The 1909-D Saint-Gaudens double eagle comes from a low mintage of 52,500 coins, one of the lowest mintages in the series by a significant margin. The issue is usually available through MS63 and is only marginally scarce in MS64. However, Gems are rare and will be out of reach for most collectors. This satiny near-Gem displays original golden luster and a bold strike. The fields are well-preserved but a few light marks within the eagle's wings limit the grade. PCGS lists 25 numerically finer representatives (7/17).

*From The Morgan Hill Collection.* NGC ID# 26FD, PCGS# 9152

**1913-S Twenty Dollar, MS64**  
Finer Examples Are Rare

**4091 1913-S MS64 PCGS.** Nearing the top of the certified population for this impressively low-mintage issue, the present example sports brilliant luster over copper-gold surfaces. While there may be a few too many light abrasions to achieve the Gem level, this specimen appears quite high-end for the assigned grade. PCGS has graded 24 coins finer (7/17).

*Ex: Central States Signature (Heritage, 4/2006), lot 4631.*

*From The Morgan Hill Collection.* NGC ID# 26FR, PCGS# 9163

**1914 Twenty Dollar, MS64**  
Seldom Offered Finer

**4092 1914 MS64 PCGS.** The 1914 is among a handful of Saint-Gaudens double eagles with a mintage below six-figures. Uncirculated examples of the date are usually available through MS64, but Gems are out of reach for the average collector. This near-Gem example displays bold details and satiny straw-gold luster. No major abrasions are present. PCGS lists 44 finer submissions (7/17).

*From The Morgan Hill Collection.* NGC ID# 26FS, PCGS# 9164

**1922-S Twenty Dollar, MS64  
Outstanding Luster**

**4093 1922-S MS64 NGC.** The 1922-S is a slightly better date in Uncirculated condition and genuinely rare in MS65 or finer grades. This near-Gem is collectible but still retains significant technical quality and eye appeal. Frosty straw-gold luster is original, and the design elements show bold definition. Some light contact marks on Liberty's figure deny a finer grade. NGC lists 18 higher-grade representatives (7/17).

*From The Morgan Hill Collection.* NGC ID# 26G4, PCGS# 9174

**1924-D Double Eagle, MS64  
Scarce Branch Mint Issue**

**4095 1924-D MS64 NGC.** The 1924-D, once a great rarity in the series, is now more available thanks to overseas repatriations. However, it remains a moderate rarity, and coins finer than this near-Gem are virtually uncollectible. Aside from the usual weakness around the obverse border (the result of worn or mismatched dies rather than a soft strike), Liberty face and torch hand display strong detail. Rose centers merge with sun-gold peripheral hues and satiny luster throughout. NGC reports 11 finer submissions (8/17). NGC ID# 34VF, PCGS# 9178

**1924-D Twenty Dollar, MS64  
Bright, Satiny Surfaces**

**4094 1924-D MS64 PCGS.** In February 1925, 13,012 Denver double eagles from the previous year were transferred to the Philadelphia Mint Cashier and likely put in the vault as uncurrent coins. Only 33 pieces were actually paid out by the Philadelphia and Denver Mint Cashiers. Of the several hundred survivors, this is an especially attractive example that displays rich, even reddish-gold color and bright satiny mint luster. Few marks are apparent and the strike is strong throughout. NGC ID# 34VF, PCGS# 9178

**1925-S Twenty Dollar, MS62  
Scarce, Heavily Melted Issue**

**4096 1925-S MS62 PCGS.** The S-mint manufactured double eagles from January through July 1925. A total of 3.7 million pieces were struck, of which Roger Burdette estimates 1,500 examples survive, mostly in circulated grades through MS62. Finer examples are very scarce. This piece has good peripheral detail with central softness. The opposite is usually true. Radiant luster sweeps across lightly abraded yellow-gold surfaces. NGC ID# 26GC, PCGS# 9182

1925-S Double Eagle, MS63  
A Conditionally Challenging Date

1925-S Double Eagle, MS64  
A High-End Example of This Scarce Issue

**4097 1925-S MS63 PCGS.** Although more than 3.7 million pieces were struck, the 1925-S double eagle is scarce in all Mint State grades. In their gold coin *Encyclopedia*, Garrett and Guth write: "The tremendous mintage reported for the 1925-S double eagle should be disregarded, as most of this issue ended up being melted in the 1930s (like so many other branch-mint issues of the period)." Auction data for this issue over the past two decades indicates that Mint State examples are most frequently seen in MS63 or lower grades, with finer pieces being rare. This is in agreement with the certified population figures.

The current Select example displays a bold strike and satiny peach-gold mint luster. A few light abrasions determine the grade but none are individually significant. Population: 94 in 63 (1 in 63+), 29 finer (7/17).

**From The Morgan Hill Collection.** NGC ID# 26GC, PCGS# 9182

**4098 1925-S MS64 PCGS.** In their gold coin *Encyclopedia*, Garrett and Guth write: "The tremendous mintage reported for the 1925-S double eagle should be disregarded, as most of this issue ended up being melted in the 1930s." Recent research by Roger Burdette suggests that only about 1,500 examples survive in all grades, many originating in European or South American hoards and others distributed domestically through the Mint Cashier. This Choice example is among the finer Mint State pieces known and is conditionally rare in this grade. Gem and finer coins are extremely rare, far out of reach for even many well-heeled collectors. The coin is satiny and lustrous with yellow-gold surfaces. Slight weakness is seen on the top of the torch, but the strike is otherwise bold. Only a few faint grazes on the high points of the design elements limit the grade. Population: 24 in 64 (1 in 64+), 5 finer (7/17). NGC ID# 26GC, PCGS# 9182

1926-S Double Eagle, MS64  
Exceptional Luster

**4099 1926-S MS64 PCGS.** This better-date Saint-Gaudens double eagle is in the usual MS64 condition, although it is clearly a fine piece for the grade. Frosty surfaces show original wheat-gold luster and only a few insignificant abrasions. The strike is bold. Although usually available, near-Gem examples of the 1926-S double eagle are in constant demand due to the rarity of higher-grade pieces. This example will appeal to collectors seeking as much quality and eye appeal as possible for the grade.

*From The Morgan Hill Collection.* NGC ID# 26GF, PCGS# 9185

1951-S Booker T. Washington Half Dollar  
MS67 Prooflike, Among the Finest

**4102 1951-S Booker T. Washington MS67 Prooflike NGC.** CAC. NGC reports 37 Prooflike examples of the 1951-S Booker T. Washington half dollar, of which this piece and four other MS67s are the finest. A single MS67 ★ Deep Prooflike coin is arguably finer (8/17). This piece is brilliant and reflective with nearly pristine surfaces. A loupe reveals some mint-made die polishing lines in the fields. The CAC endorsement is an added appeal. NGC ID# BYKB, PCGS# 89426

COMMEMORATIVE SILVER

1928 Hawaiian Half Dollar, MS66  
Very Rare Any Finer

**4100 1928 Hawaiian MS66 PCGS.** CAC. From a small distribution of 9,958 business-strike examples, the 1928 Hawaiian half dollar is one of the keys to the silver commemorative series. The issue is scarce in MS66 condition, and finer coins are very rare. This delightful Premium Gem displays sharply detailed design elements and well-preserved lustrous surfaces, with a few hints of pale gold and lavender toning. PCGS has graded four numerically finer examples (7/17). NGC ID# BYGR, PCGS# 9309

1926-S Oregon Trail Half, MS68  
Beautiful Rainbow Toning

**4101 1926-S Oregon MS68 PCGS.** CAC. The 1926-S Oregon Trail commemorative half dollar is rare in MS68 and unknown finer. This CAC-approved coin displays satiny, pristine surfaces with lovely rainbow toning in the margins and champagne color in the centers. The rear of the covered wagon is weakly struck, but the remainder of the design is boldly brought up. Population: 8 in 68, 0 finer. CAC: 7 in 68, 0 finer (7/17). NGC ID# BYH7, PCGS# 9341

COMMEMORATIVE GOLD

1903 Jefferson Gold Dollar, MS67+  
None Finer at PCGS

**4103 1903 Louisiana Purchase, Jefferson Gold Dollar MS67+ PCGS.** Struck to commemorate the 100th anniversary of the Louisiana Purchase, this popular gold commemorative was issued with two obverses, one depicting Thomas Jefferson (president at the time of the purchase) and the other recently assassinated President William McKinley. This Plus-graded Superb Gem represents the Jefferson variant, with sharply detailed design elements and impeccably preserved lustrous surfaces. PCGS has graded no numerically finer examples (7/17). NGC ID# BYLD, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS68 ★  
Finest Certified Jefferson Variant

**4104 1903 Louisiana Purchase, Jefferson Gold Dollar MS68 ★ NGC.** Only 17,500 Louisiana Purchase gold dollars were struck with the bust of Thomas Jefferson, who was president at the time the vast land deal was consummated. An equal number of commemorative gold dollars were issued with the bust of recently assassinated president, William McKinley. This magnificent specimen is the single finest certified example of the Jefferson variant, with virtually pristine yellow-gold surfaces that radiate vibrant mint luster throughout. The design elements are razor-sharp and eye appeal is terrific. Census: 1 in 68 (1 in 68★), 0 finer (7/17). NGC ID# BYLD, PCGS# 7443

**1904 Lewis and Clark Gold Dollar, MS67**  
Only Two Finer Coins at PCGS

- 4105 1904 Lewis and Clark Gold Dollar MS67 PCGS.** In MS66, the 1904 Lewis and Clark gold dollar is somewhat more plentiful than its 1905 counterpart, but in MS67, both dates are genuine rarities. This Superb Gem 1904 boasts sharp detail with rich honey-gold luster and partially reflective fields. Close study with a loupe fails to reveal any mentionable flaws. This issue had a distribution of 10,025 coins, including assay pieces. Examples were sold in conjunction with the Lewis and Clark Centennial Exposition, held in Portland, Oregon, in 1905. Charles Barber prepared the double-headed design. Population: 22 in 67, 2 finer (7/17). NGC ID# BYLF, PCGS# 7447

**1905 Lewis and Clark Gold Dollar, MS65**  
Smooth, Satiny Fields

- 4106 1905 Lewis and Clark Gold Dollar MS65 PCGS.** The 1905 Lewis and Clark Exposition gold dollar is scarcer than its 1904 counterpart in high grade. This Gem example has the added appeal of smooth, satiny fields that do not show the usual metal flowlines within the border legends. The strike is good, and both sides exhibit exceptional preservation. Finer 1905 coins are scarce. NGC ID# BYLG, PCGS# 7448

**1905 Lewis and Clark Gold Dollar, MS65**  
Semiprooflike, Early Die State

- 4107 1905 Lewis and Clark Gold Dollar MS65 PCGS.** This Gem Lewis and Clark Exposition gold dollar has semiprooflike fields without the usual metal flowlines toward the borders. The portraits are a trifle soft but are mostly brought up. Each side has warm straw-gold color and is devoid of contact marks. Finer examples of this 1905 Lewis and Clark Centennial Exposition souvenir coin are scarce. NGC ID# BYLG, PCGS# 7448

**1915-S Pan-Pac Quarter Eagle, MS66+**  
Exceptional CAC-Approved Example

- 4108 1915-S Panama-Pacific Quarter Eagle MS66+ PCGS. CAC.** The Panama-Pacific quarter eagle is available for a price through MS66, but finer examples are scarce, particularly in PCGS holders. This Plus-graded, CAC-approved PCGS Premium Gem is immensely attractive with frosty yellow-gold luster and unabraded surfaces. The strike is sharp throughout both sides. PCGS lists 45 finer submissions (8/17). NGC ID# BYLP, PCGS# 7450

**MODERN BULLION COINS**

**1992 Silver Eagle, MS70**  
A Top-Grade Rarity

- 4109 1992 Silver Eagle MS70 PCGS.** The PCGS Basic Registry Set of Silver Eagles is extremely difficult to assemble in MS70, as many dates from the 1990s are very rare in this top grade. The 1992 in this condition has a PCGS population of only 17 coins (8/17). This example is fully struck and brilliant, showing pristine silver surfaces and satiny mint luster. NGC ID# 26JG, PCGS# 9856

**1992 Silver Eagle, MS70**  
Few Known So Fine at PCGS

- 4110 1992 Silver Eagle MS70 PCGS.** In the PCGS Basic Registry Set of Silver Eagles, the 1992 is among the most challenging acquisitions in MS70. PCGS has certified only 17 such coins, and it is a rare occurrence when one is seen available at any venue. We are privileged to offer the present piece here, with its pristine surfaces and silver mint luster. Full design elements beautifully showcase the design, derived from Adolph Weinman's Walking Liberty half dollar of 1916-1947. NGC ID# 26JG, PCGS# 9856

## TERRITORIAL GOLD

1999 Silver Eagle, MS70  
Challenging Issue in the Ultimate Grade

- 4111** 1999 Silver Eagle MS70 NGC. From a mintage of 7.4 million pieces, the 1999 Silver Eagle is surprisingly difficult to locate in MS70 condition. This magnificent specimen exhibits fully struck design elements and vibrant, satiny mint luster on both sides. Even under magnification, the technically perfect surfaces reveal no flaws. Overall eye appeal is terrific. NGC ID# 26JX, PCGS# 9947

2000 Silver Eagle, MS70  
Only 20 Coins So Fine at PCGS

- 4112** 2000 Silver Eagle MS70 PCGS. The 2000 Silver Eagle is the final issue in the series that is a major rarity in MS70 at PCGS. Only 20 such coins are certified, and these are in high demand among Registry Set collectors. The present example is fully struck and perfectly preserved, showing brilliant satin luster and beautiful eye appeal. NGC ID# 26JZ, PCGS# 9949 Base PCGS# 9969

2009 Ultra High Relief Twenty, MS70  
Perfect Deep Prooflike Specimen

- 4113** 2009 Ultra High Relief Twenty Dollar, MS70 Deep Prooflike NGC. Mint Director Edmund Moy was the driving force behind the production of the 2009 Ultra High Relief double eagle. Based on the extremely rare Judd-1917 patterns in the Smithsonian Institution, the 2009 issue features sculptor Augustus Saint-Gaudens' design for the twenty dollar gold piece struck on a double-thick 27 mm planchet of .999 pure gold. This technically perfect specimen displays deeply reflective fields and fully struck design elements throughout. Census: 103 in 70 Deep Proof like. PCGS# 519757

1851 Humbert Fifty Dollar, K-7, VF35  
Reeded Edge, 887 Thous.  
Iconic Octagonal Slug

- 4114** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous., VF35 NGC. K-7, R.4. Diagnostics include the eagle below the date, the reeded edge, and the outer ribbon of the reverse relatively close to the engine turning. These large Gold Rush-era slugs not only served a vital role in commerce out West before the opening of the San Francisco Mint, but they would leave a lasting legacy as an iconic issue in American numismatics. This example has pleasing violet and reddish-gold coloration. The design elements remain plainly visible for the most part, the sole exception being the date at the lower obverse. Myriad marks should be expected. Collectors looking for an example of this classic U.S. Assay Office emission would do well to consider the piece here-offered. NGC ID# ANH9, PCGS# 10214

1852 Augustus Humbert Ten, AU58  
K-10a, 'IUNITED' Variety

1852 U.S. Assay Office of Gold Fifty, XF40  
K-14, .900 Fineness  
Impressive Gold Rush Relic

- 4115** 1852 Humbert Ten Dollar AU58 PCGS. K-10a, Low R.4. Kagin's "IUNITED" variety, a later state of K-10. The U in UNITED has the appearance of two Is due to advanced die crumbling, as coined. This is actually an earlier die state, although extensive die crumbling is evident. Permission was granted to strike these 1852-dated coins in February, and they were only struck for four days, from February 11 to 14. This is a better-grade honey-gold example with moderately marked surfaces and ample mint luster. Listed on page 397 of the 2018 *Guide Book*. Population: 3 in 58, 7 finer (7/17). NGC ID# ANGG, PCGS# 10187

- 4116** 1852 Assay Office Fifty Dollar, 900 Thous. XF40 PCGS. K-14, High R.5. The August 31, 1852 bill passed by Congress that prohibited acceptance of gold coins for customs duties of less than .900 fineness effectively robbed California of most of its circulating coinage and was a disaster for the regional economy. Ultimately, it was a political maneuver (largely supported by California politicians) to force the government to approve an official branch mint in California, rather than a quasi-official United States Assay Office.

The crisis was averted with the emergency mintage of 23,800 1852-dated fifty dollar octagonal slugs delivered in January, 1853, followed by large quantities of ten and twenty dollar gold pieces within a few months — all with .900 fineness, albeit without the proper copper alloy. Few of the octagonal gold pieces survive today, since most of the cumbersome fifty dollar ingots served as a convenient source of gold bullion in the early days of the San Francisco Mint. This attractive XF example displays numerous marks from handling and moderate high point wear, yet it retains the undeniable allure of what is surely the most recognizable relic of California Gold Rush days. Population: 15 in 40, 49 finer (7/17). NGC ID# ANHH, PCGS# 10019

1852 Assay Office Ten, AU58  
K-12a, Moderately Reflective Fields

- 4117** 1852 Assay Office Ten Dollar AU58 PCGS. K-12a, R.4. Middle die state. Portions of the reverse border are weak, but most is strong. The obverse border is sharp. Some semiprooflike mirroring is visible in the fields amid attractive orange-gold patina. Sharp design elements show almost no discernible wear. K-12a is from the later period of the United States Assay Office's existence in San Francisco, when it was managed by the private coinage firm Curtis, Perry & Ward. This followed Moffat's retirement in February, 1852. Ten dollar pieces of this variety are scarce in high grade and highly sought-after. Population: 12 in 58, 23 finer (7/17). NGC ID# ANGV, PCGS# 10001

1853 Assay Office Twenty, AU55  
K-18, 900 Thous.

- 4118** 1853 Assay Office Twenty Dollar, 900 Thous., AU55 PCGS. K-18, R.2. This twenty dollar issue by the United States Assay Office forms a denomination-and-fineness bridge to the first double eagles of the San Francisco Mint, which were struck in 1854. Orange-kissed yellow-gold surfaces remain luminous despite light wear. The surfaces are moderately abraded, including reed marks below the free end of the obverse ribbon. Listed on page 398 of the 2018 Guide Book.  
*Ex: Philadelphia Signature (Heritage, 8/2012), lot 4855. NGC ID# ANHD, PCGS# 10013*

1861 Clark, Gruber Ten Dollar, K-7, AU58  
Snowden Complimentary of Issue

- 4119** 1861 Clark, Gruber & Co. Ten Dollar AU58 PCGS. K-7, R.4. According to a brief notice in the July 19, 1861 issue of the *Denver Rocky Mountain News*, Mint Director James Ross Snowden was complimentary of the Clark, Gruber & Co. gold coins:

"The ten dollar pieces vary from 273 to 283 1/2 grains. On the average, and adding the value of the silver alloy, and deducting the mint charges, the pieces are found to be of professed value, or slightly over."

One of those full value ten dollar pieces is offered here. Subtle green overtones appear over the light yellow-gold surfaces of this lustrous near-Mint example. The strike is a trifle weak, and high-point rub is evident on both sides. This is an exceptional example with excellent eye appeal. NGC ID# ANK4, PCGS# 10141

## PATTERNS

1850 Restrike Cent in Billon, PR64  
Rare Judd-120 Variety

- 4120** 1850 One Cent, Judd-120 Restrike, Pollock-135, High R.7 PR64 PCGS. The so-called "ring cent" of 1850 was an early attempt by the Mint to reduce the size of the large cent. This piece is an unperforated restrike produced with cracked dies, struck in billon (an alloy of 90% copper and 10% silver) with a plain edge, and is one of fewer than a dozen such pieces known. The obverse exhibits the denomination CENT at the top with the date below and blossoms on each side; the reverse exhibits USA at the top and the legend ONE TENTH SILVER along the bottom. This particular piece displays pale olive-gold patina overall, with deeper gray-brown toning in the central reverse. Well-struck with no significant distractions. Housed in an old green label holder. NGC ID# 2984, PCGS# 11514

1855 Hook-Neck Eagle Cent in Copper  
Judd-172, PR65 Brown

- 4121** 1855 Flying Eagle Cent, Judd-172, Pollock-198, Low R.6, PR65 Brown PCGS. Eagle Eye Photo Seal. Flying Eagle cent pattern with hook-neck eagle on the obverse, paired with a reverse that has a smaller wreath than seen on the Judd-167 to 171 variants. Also, two leaves are located beneath the E in STATES. Struck in copper with a plain edge. According to USPatterns.com, "Both originals and restrikes are known and are extremely rare showing any red color." This particular piece may give some indication why this is so. The surfaces have a woodgrain pattern, similar to the surfaces sometimes seen on 1909-S VDB cents. We conclude this is a problem inherent in the planchets for this issue, rather than careless preservation. Sharply detailed on the eagle, less so on the wreath on the reverse. NGC ID# 29AR, PCGS# 11740

1856 Flying Eagle Cent in Nickel Alloy  
Judd-183, Snow-4, PR62

- 4122** 1856 Flying Eagle Cent, Judd-183, Pollock-217, Snow-4, High R.7 PR62 PCGS. Snow-4 is identified by the pointed U in UNITED and the die scratch in the dentils below the right ribbon end. The die marriage is rare regardless of alloy, listed as R.7 by Snow in either copper-nickel (88% copper, 12% nickel) or nickel alloy (75% copper, 25% nickel) with a plain edge. For the latter alloy, Rick Snow states just four specimens are known. Various alloy combinations are known for this pattern. The surfaces are bright and resemble German silver. Each side shows evidence of shallow pitting. NGC ID# 5CD8, PCGS# 11805

1858 Flying Eagle Cent Pattern, PR65  
Judd-198, Pollock-229

- 4123** 1858 Flying Eagle Cent, Judd-198, Pollock-229, Low R.6, PR65 PCGS. The adopted Flying Eagle cent design with large letters on the obverse, while the reverse has a wide oak wreath with a broad, ornamental shield at the top. Struck in copper-nickel with a plain edge from slightly rotated dies. This well-struck Gem proof displays attractive chestnut-gold and olive color amid some streaky patina. A small mint-made planchet flaw appears below the eagle's claw, and the otherwise immaculate surfaces show a few minuscule carbon flecks. Certified in a green-label holder. Population: 5 in 65, 1 finer (7/17). NGC ID# 29BG, PCGS# 11856

1863 Regular Dies Dollar in Aluminum  
Judd-347, PR66 Cameo

- 4124** 1863 Seated Dollar, Judd-347, Pollock-419, High R.7, PR66 Cameo NGC. Ex: Share. A so-called transitional issue that uses the dies of the regular Seated Liberty dollar of the year, but it bears the addition of the motto IN GOD WE TRUST on the reverse scroll, of the type introduced on regular-issue coinage in 1866. Struck in aluminum with a reeded edge. According to USPatterns.com: "These and the other 'with motto' patterns of this date and also 1864 and possibly 1865 are actually restrikes made circa 1869 and into the early 1870s and were offered with restrikes of the other denominations in complete sets." Pieces were struck in silver, copper and aluminum, with aluminum the rarest composition with only five pieces traced. This dollar is unoxidized but shows light haziness over each side. As usually seen on aluminum patterns, there is strong contrast between the fields and devices. PCGS# 860509 Base PCGS# 60509

1864 With Motto Seated Dollar in Silver  
Judd-396, PR62

- 4125** 1864 Dollar, Judd-396, Pollock-464, Low R.7, PR62 NGC. The obverse die is that of the regular issue 1864 Seated dollar. The reverse is also similar to that issue, but the motto IN GOD WE TRUST is present on a scroll over the eagle. Struck in silver with a reeded edge. This is another backdated With Motto issue that was created for sale to collectors, probably in 1869 and into the 1870s. The reverse die used on these pieces is from the same regular proof dies and that also used on some 1871 patterns that shows scribe lines just below the dentils above the E in UNITED and above the ST of STATES. USPatterns.com shows excellent enlargements that feature this side-by-side comparison of the two dates. Probably a dozen pieces are known that were struck in silver. Examples are also known in copper, aluminum, and nickel. The fields are nicely mirrored and each side exhibits even, slightly variegated rose-lilac toning. NGC ID# 29HJ, PCGS# 60567

1870 Indian Princess Dollar in Silver  
Judd-1014, PR64 Cameo

- 4126** 1870 Judd-1014, Pollock-1148, Low R.7, PR64 Cameo NGC. The obverse features Liberty, as an Indian princess, facing left. One hand rests on a globe with LIBERTY inscribed, while the other supports a Liberty pole. Behind her are two flags, one displaying 22 stars. An arc of 13 stars surrounds the central figure, with the date below. Longacre's signature is located below the base. The reverse die is from the same design used in regular-issue coinage for 1870. Struck in silver with a reeded edge. This obverse / reverse die pairing was struck in silver, copper, and aluminum and in both plain and reeded edge variants. Fewer than a dozen examples are believed known of this pattern. This is a magnificent example whose surfaces are all-brilliant. The fields are deeply reflective and the devices noticeably frosted, yielding a stark cameo contrast. PCGS# 535216

1873 Bailly-Designed Seated Dollar in Silver  
Judd-1315, PR63 Cameo

- 4127** 1873 Trade Dollar, Judd-1315, Pollock-1458, R.4, PR63 Cameo NGC. Bailly's Liberty design is seated left on the obverse with cotton bales, tobacco plants, and wheat sheaves around her. Her right (facing) hand supports a globe inscribed with LIBERTY while her left holds high a pileus cap. A small eagle atop a shield dominates the reverse with the inscriptions UNITED STATES OF AMERICA and E PLURIBUS UNUM above and 420 GRAINS, 900 FINE and TRADE DOLLAR below. Struck in silver with a reeded edge. The reeded edge variant of this pattern is by far the most obtainable of the silver, copper, and aluminum pieces struck. The fields are deeply reflective and establish the "black" background necessary for a Cameo designation against the white, frosted devices. Lightly hairlined. NGC ID# 2A8V, PCGS# 388540

1878 Dollar Pattern in Silver  
Judd-1554, Pollock-1733, PR66 Cameo

- 4128** 1878 Silver Dollar, Judd-1554, Pollock-1733, R.5, PR66 Cameo NGC. CAC. The head of Liberty is large and faces left with IN GOD WE TRUST at the top and the date below, similar to the pattern fifty dollar gold pieces from 1877. The reverse has a spread-winged eagle with E PLURIBUS UNUM in Gothic lettering above. UNITED STATES OF AMERICA is at the top and ONE DOLLAR on the bottom rim. This is the Pollock variety with star 13 close to the curl and the upright of the B in PLURIBUS beneath the right foot of the second T in STATES. Struck in silver with a reeded edge. A rare pattern that enjoys considerable popularity due to the kinship in obverse design with the famous half union patterns. Light golden overtones drape the considerable mirrors and the modestly frosted devices. NGC ID# 2AF5, PCGS# 408903 Base PCGS# 61915

1878 Dollar Pattern in Copper  
Judd-1554b, PR65 Red and Brown

**4129** 1878 Dollar, Judd-1554b, Pollock-1733, R.7, PR65 Red and Brown PCGS. CAC. A head of Liberty faces left, wearing a coronet inscribed LIBERTY. The motto IN GOD WE TRUST is above with the date below. The left obverse field has seven stars near the border with six more along the right border. The reverse has an eagle with wings spread, holding an olive branch and three arrows. The statutory legend is above and the denomination is below, with E PLURIBUS UNUM in the field above the eagle. Struck in copper with a reeded edge. The Pollock subvariety with the B in PLURIBUS beneath the left edge of the E in STATES. At least three copper examples are known according to USPatterns.com. Technically the color designation is correct, but the slight lime-green iridescence present in the fields does little to impede the overall visual appeal of this magnificent pattern.

Ex: Milton G. Cohen Collection (Bowers and Merena, 1/1985), lot 514; Russell Logan and Gilbert Steinberg Collections (Bowers and Merena, 11/2002), lot 4430; Bob Simpson Collection (Heritage, 8/2010), lot 5717; Central States Signature (Heritage, 4/2017), lot 4429. PCGS# 12236

1878 Morgan Dollar in Copper  
'Drooped Wing' Eagle  
Judd-1565, PR67 Brown Cameo

**4130** 1878 Morgan Dollar, Judd-1565, Pollock-1732, High R.7, PR67 Brown Cameo NGC. This is a muling of the obverse of Judd-1550A/1550B (Pollock-1725/1726) with the reverse of Judd-1554/1555 (Pollock-1733/1734). The obverse is similar to the adopted Morgan dollar, with the point of the bust truncation nearer to star 1 than to the 1 in the date. The wheat ear in Liberty's cap is distant from the R in PLURIBUS. On the reverse an eagle with drooping wings occupies the center, with UNITED STATES OF AMERICA and ONE DOLLAR, the latter in minuscules, at the rim. E PLURIBUS UNUM appears arcing in a Gothic font above the eagle. The upright of the B in PLURIBUS is centered under the tip of the right bottom serif on the second T of STATES, and the M in UNUM is slightly left of center of the M in AMERICA. Struck in copper with a reeded edge.

Pollock notes that this is "a muling of incongruously matched dies having the motto E PLURIBUS UNUM on each side." This piece was struck at or near the zenith of Mint clandestine pattern production for profit. It almost appears that any obverse was paired with any available reverse in the search for new varieties with which to satiate the collecting public. At least the Mint — usually — drew the line at pairing two obverses or two reverses together. The surfaces are brightly reflective and primarily blue, giving the piece a not-so-obvious copper appearance. As stated in the grade, the devices are noticeably frosted and set off against the deeply reflective proof fields. PCGS# 61927

1879 Stella in Copper  
Judd-1636, PR66 Brown  
Ex: Eliasberg

**4131** 1879 Flowing Hair Four Dollar, Judd-1636, Pollock-1834, Low R.7, PR66 Brown PCGS. Ex: Eliasberg. In an effort to provide yet another outlet for the vast quantities of silver being mined in the western United States, John Adam Kasson proposed a four dollar gold piece, or stella, which would be struck in a metric alloy containing 10% silver. The stella was also one in a long line of ultimately futile attempts to create an international monetary unit. Kasson believed that the stella would be readily accepted in Europe as well as the United States because its value approximated those of the Spanish 20 peseta, Dutch 8 florin, Austrian 8 florin, Italian 20 lire, and French 20 franc.

Enthusiastically responding to Kasson's proposal, Alexander H. Stephens, Chairman of the Committee of Coinage, Weights, and Measures, requested that the Mint supply Congress with several patterns of Kasson's proposed stella. These presentation pieces were struck in gold (allegedly in metric alloy) using a design created by Charles E. Barber. The obverse depicts a head of Liberty facing left with flowing hair and a coronet inscribed LIBERTY. The inscription \* 6 \* G \* .3 \* S \* .7 \* C \* 7 \* G \* R \* A \* M \* S \* is around the periphery, and the date 1879 is below. The denomination ONE STELLA 400 CENTS is inscribed on a five-pointed star in the center of the reverse. The mottoes E PLURIBUS UNUM and DEO EST GLORIA are around the star, and the legend UNITED STATES OF AMERICA and another rendition of the denomination FOUR DOL. are around the periphery.

Before producing the 25 gold examples of the 1879 Flowing Hair stella that were ultimately sent to Congressional leaders, the Mint apparently struck a few coins in copper as trial pieces. All of these coins have reeded edges, and a few have been gilt. According to USPatterns.com "over a dozen are believed to be known." This piece has lovely subdued iridescence. It qualifies as Brown for certain, but there is also a significant presence of deep red and blue over each side. The fields are brightly reflective and enliven the deeply patinated surfaces. A major rarity in this interesting and short-lived four dollar denomination.

*From the Chapman Brothers (4/1897); J.M. Clapp; Clapp Estate; Clapp Estate to Louis E. Eliasberg, Sr., 1942; Eliasberg Collection, Part One (Bowers and Merena, 5/1996), lot 310. NGC ID# 2AHR, PCGS# 62014*

1879 Flowing Hair Stella in Aluminum  
 Judd-1637, PR67  
 Only a Half Dozen Pieces Believed Known  
 Ex: Bass

**4132** 1879 Flowing Hair Four Dollar, Judd-1637, Pollock-1835, High R.7, PR67 PCGS. CAC. Ex: H.W. Bass, Jr. Collection. The Charles Barber design features a head of Liberty with flowing hair facing left, with the inscription \* 6 \* G \* .3 \* S \* .7 \* C \* 7 \* G \* R \* A \* M \* S \* around and the date, 1879 below. A coronet in Liberty's hair is inscribed LIBERTY. The reverse has a five-pointed star inscribed in incuse lettering ONE STELLA 400 CENTS. Around the star are the mottos DEO EST GLORIA and E PLURIBUS UNUM. At the border above is the legend UNITED STATES OF AMERICA, and below is the denomination FOUR DOL. Struck in aluminum with a reeded edge. The name, stella, comes from the Latin word for star on the reverse.

In 1879, the Honorable John A. Kasson, United State Representative, proposed a four dollar coin of "metric gold" (containing 10% silver) to be internationally acceptable and compete with European coins. A bill was passed authorizing the issue and coins were struck in 1879 and 1880. When Congress noticed that the metric gold was indistinguishable from ordinary coin gold, they killed the authorizing bill.

This Superb specimen has bright surfaces with the mirrored fields slightly subdued by a light, milky haze. For identification purposes we note three small obverse planchet flaws: in the upper left field below the first 7; in the upper left field to the left of the C; and in the upper right field running from Liberty's hair to the star between G and R. There are three small dark spots on the reverse: on the right portion of the star; on the denticles at 4 o'clock; and on the denticles between 5 and 6 o'clock. The reverse has a similar planchet flaw in the lower right field below the second A in AMERICA. The aluminum strikings are estimated to be fifty times rarer than their gold counterparts and, over the years, many have had post-minting gilding applied. Only a half dozen or so are known in aluminum. Of the greatest rarity and importance to the pattern collector.

Ex: ANA Signature (Heritage, 8/1999), lot 7777. NGC ID# 3B4U, PCGS# 62015

Back Cover Lot: 4230

## A Few Words from Robert Padula...

I began collecting coins in 1958 at the age of twelve in my father's neighborhood Variety store in Warwick, Rhode Island. It was in a village called East Natick, which was predominantly made up of immigrants from Italy. During those years, one could still find Indian cents, V nickels, and Morgan dollars in circulation.

While Pop was hoarding the Morgan dollars, I began saving Indian cents and V nickels from the cash register. I eventually built three sets of each, and I still have some of those sets today. It was during my quest to complete an Indian cent collection that I first became interested in large cents.

My interest started while at a 1977 State of Rhode Island liquidation auction of assets from the Bonded Vault Heist in Providence, RI. The robbery was of a New England Mafia family storage facility, carried out by a rival mob. Claims were never made for the recovered valuables (for obvious reasons). I bought several rare Indian cents at the auction including two 1877s, and my friend bought all the large cents – mostly middle and late dates. The story of this robbery is chronicled in the book, *The Last Good Heist* by Tim White. It is a good read for those interested in one of the largest robberies in American history.

In about 1979, I bought all of the large cents from my friend (approximately 70 coins) and began a date set of large cents from 1793 to 1857, which I completed within a few years. In the mid-1980s I decided to build a Sheldon die variety collection after purchasing and reading Dr. William Sheldon's book, *Penny Whimsy*. Dr. Sheldon was born and raised in Warwick, my hometown. The majority of coins acquired were from major auction houses until 2000, when I joined EAC to learn more and make contact with like-minded peers – many of whom I count as friends today.

I completed the Early Date Collection in June 2015 with the acquisition of the S-37 at Heritage's Exman sale. In December 2015 I donated my Early Date Collection to the Padula Family Charitable Foundation as a means to raise capital to fund its mission, and to help support children of economically distressed families. As the youngest of seven children of immigrant parents, I still remember the difficult times of the past.

I would like to thank those large cent dealers who helped build my collection: Chris McCawley, COL Steven Ellsworth, Tom Reynolds, Doug Bird, Greg Hannigan, and many others for their advice, and for sharing knowledge of the Early Dates. Coin collecting has been a lifelong pursuit that I plan to continue, the Lord willing.

## Comments from the Cataloger

We are pleased to present the collection of Robert Padula, offered by the Padula Family Charitable Foundation. Since Dr. William H. Sheldon wrote *Early American Cents* in 1949, and published its revision, *Penny Whimsy*, in 1958, collectors have aspired to form complete "Sheldon Number" collections of the early date large cents from 1793 to 1814. Despite the forward thinking of Dr. Sheldon who enumerated the rarest varieties as "Non-Collectible," fewer than 20 people have completed the set of collectible early large cent varieties. One of those to accomplish the task is Mr. Padula. Unlike several other collections offered in the past that concentrated on high grade, condition census pieces, the Padula Family Charitable Foundation collection contains a variety of pieces that are best described as affordable. This means that many collectors who are faced with limited budgets will have an opportunity to add one or several items to their collection. In addition to the complete Sheldon numbered set, this collection contains several of the Sheldon NC varieties, some that are still Non-Collectible, and others that are Now-Collectible. As you formulate your bids, please keep in mind that the money raised from the sale of this collection is earmarked for charity to aid underprivileged youth through the generosity of Mr. and Mrs. Robert Padula and their family.

- Mark Borckardt

The Padula Family Charitable Foundation is a 501c3 non-profit funding organization for children of economically distressed families. The funding is provided through a grant application process, selecting those charities that directly support health, education or social welfare programs while supporting financially distressed children's needs. Over the years, the Foundation has supported many Charter Schools serving inner-city children with both grants and scholarships, as well as funding Food Banks, medical programs, and housing for children of need. The donation of the Early Date Large Cent Collection of Robert G. Padula, the Foundation founder, will help provide funds to continue the Foundation's mission in future years. The Board of Directors of the Foundation would like to thank all of those participating in the auction for their support.

## SESSION THREE

### LARGE CENTS

1793 S-1, B-1 Chain Cent, Good Details

- 4133** 1793 Chain, AMERI., S-1, B-1, R.4 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 5, net AG3. Early Die State. Uniform microscopic corrosion covers the cleaned and retoned bluish olive-brown surfaces of this important cent. Minimal handling marks are evident with no verdigris or planchet flaws. The date and all lettering are readable with AMERI and the period fully visible.  
Ex: EAC Sale (5/2006), lot 67.  
From The Padula Family Foundation Collection.

1793 Chain Cent, Poor/Fair Details  
AMERICA, S-2, B-2

- 4134** 1793 Chain, AMERICA, S-2, B-2, High R.4 — Environmental Damage — PCGS Genuine. Poor/Fair Details. Our EAC grade: sharpness of AG3, net Fair 2. Semi-glossy chocolate-brown surfaces exhibit areas of porosity with a heavy obverse rim mark at 2:30. While the date is mostly absent (9 is partially visible), LIBERTY is readable and the chain is strong.  
Ex: EAC Sale (3/2001), lot 150.  
From The Padula Family Foundation Collection.

1793 Chain Cent, VG Details  
AMERICA, S-3, B-4

- 4135** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 6. The dark steel and olive-brown surfaces show extensive corrosion, but the date, LIBERTY, and the bust remain mostly intact. On the reverse, the central details remain bold and the peripheral legend is legible, but weak in places.  
Ex: Chris Victor-McCawley (1/2013).  
From The Padula Family Foundation Collection.

1793 Chain Cent, VF25  
S-4, B-5, Periods Obverse

- 4136** 1793 Chain, AMERICA, Periods, S-4, B-5, High R.3, VF25 PCGS. Our EAC grade: sharpness of VF25, net Fine 15. The small periods following the date and LIBERTY immediately identify this popular variety that carries its own listing in the *Guide Book*, adding additional demand. As usual for the Chain cents, the reverse is considerably sharper than the obverse, with a bold chain and lettering. A well-centered impression with a thin but complete border on each side. A small arc of maroon patina is evident on the reverse. A glass will reveal slight roughness on the intermingled steel-brown and tan surfaces.  
Purchased from Butternut. Ex: McLaughlin and Robinson (Sale 4229, 2/1987), lot 198; COL Steven Ellsworth.  
From The Padula Family Foundation Collection. NGC ID# 223F, PCGS# 35444 Base PCGS# 91341

1793 S-5, B-6 Cent, VF Details  
Large LIBERTY

- 4137** 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF30, net Fine 12. Breen Die State I. Medium chocolate-brown surfaces exhibit even porosity over both sides that fails to diminish the eye appeal of this nicely detailed Wreath cent. The large letters in LIBERTY appears only on the S-5, an important sub-type of the Vine and Bars style.  
Ex: *Stack's-Bowers* (11/2012), lot 385.  
From *The Padula Family Foundation Collection*.

1793 Wreath Cent, VG Details  
Vine and Bars Edge, S-6, B-7

- 4138** 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 4. Although the PCGS holder identifies this coin as S-5, the correct Sheldon number for this variety is S-6. The glossy olive-brown and smokey gray surfaces show several long scratches on the obverse and three prominent rim bruises between 6 and 7 o'clock. An irregularly shaped planchet void is located near the center of the obverse. All lettering and the date remain legible, but detail is sharper on the reverse.  
Ex: *Bowers and Merena* (5/1997), lot 134.  
From *The Padula Family Foundation Collection*.

1793 Wreath Cent, Fine Details  
Rare Sheldon-7 Die Pair

- 4139** 1793 Wreath, Vine and Bars Edge, S-7, B-8, R.6 — Corrosion — NGC Details. Fine. Our EAC grade: sharpness of Fine 12, net VG7. Die State indeterminate due to moderate corrosion of the surfaces that leaves them uniformly granular and porous. Both sides are the same chocolate-brown hue. Distinctive broad leaves leaning left on the obverse of Sheldon-7 quickly identify the variety. On this piece, the entire date is readable, although the 3 is weak. The rims are complete and all other legends are clear. The devices show bold definition. Sheldon-7 was discovered by Sylvester S. Crosby in 1878 and is very rare in any condition. A XF coin and a VF example are at the top of the Condition Census.  
From *The Padula Family Foundation Collection*.

1793 S-8, B-13 Cent, Fine Details

- 4140** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3 — Corrosion — NGC Details. Fine. Our EAC grade: sharpness of Fine 15, net Good 5. Die State undetermined. The major details are all clear on this dark brownish-gray piece but a loupe reveals extensive microscopic corrosion on both sides. Still a collectible example of this popular one-year type.  
Ex: *Heritage* (1/2012), lot 4065.  
From *The Padula Family Foundation Collection*.

1793 S-9, B-12 Cent  
Nearly Terminal

- 4141** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, PCGS Genuine. Our EAC grade: sharpness of Fine 12, net VG7. Breen Die State VIII with the area between two reverse cracks raised, obliterating the leaves near CA in AMERICA. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen. Both sides exhibit scattered handling marks on olive-brown surfaces with minor corrosion on the reverse.  
Ex: *Royalty Coins* (Chicago, 6/24/2000); *COL Steven Ellsworth* (5/2014); *Butternut*.  
From The Padula Family Foundation Collection.

1793 Wreath Cent, Good 6  
Vine and Bars Edge, S-10, B-10

- 4142** 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4, Good 6 PCGS. Our EAC grade: sharpness of VG7, net Good 6. The smooth chocolate-brown surfaces show a few hints of olive and are remarkably free of abrasions, aside from some minor pinscratches in the field near Liberty's chin. A central die bulge on the reverse has weakened the letters in ONE CENT, but the date and peripheral legends remain legible.  
Ex: *Mike Iatesta* (Superior, 9/2005), lot 239; *Doug Bird*; *Scott Barrett*; *Thomas D. Reynolds* (5/2012).  
From The Padula Family Foundation Collection. NGC ID# 223H, PCGS# 35462 Base PCGS# 1347

1793 Wreath Cent, Fine Details  
Vine and Bars Edge, S-11a, B-16a

- 4143** 1793 Wreath, Vine and Bars Edge, S-11a, B-16a, R.4 — Rim Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG7. Late Die State. The glossy chocolate-brown and olive surfaces are slightly porous and a number of small planchet voids are present on both sides. The date and all lettering remain bold, but the fraction is missing, due to die failure.  
Ex: *Rod Burress* (7/2011).  
From The Padula Family Foundation Collection.

1793 Wreath Cent, XF Details  
Lettered Edge, S-11b, B-16b

- 4144** 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — Plugged — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF30, net VG7 (plugged). Breen Die State II, with considerable sharpness, and nicely plugged with the IB in LIBERTY expertly engraved. The fraction is absent on the reverse. Both sides are smooth and glossy chocolate-brown with olive accents, and the plug contrasts with the surrounding surface. This is a great opportunity to acquire a nicely detailed 1793 Wreath cent at an anticipated affordable price.  
Ex: *EAC Sale* (4/2010), lot 135.  
From The Padula Family Foundation Collection.

1793 Wreath Cent, AG3  
Lettered Edge, S-11c, B-16c

- 4145** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3, AG3 PCGS. Our EAC grade: sharpness of AG3, net Fair 2. The chocolate-brown surfaces of this piece are slightly porous and a few digs show in the left obverse field. The bust is complete in outline and the date and LIBERTY are partially legible, but most detail on the reverse has been worn smooth.  
Ex: *Bowers and Merena* (5/1997), lot 138.  
From The Padula Family Foundation Collection. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

---

1793 S-12 Cent, Uncertified  
Smooth Surfaces

**4146** 1793 Liberty Cap, S-12, B-21, Low R.6, Uncertified. Our EAC grade: sharpness of AG3, net Fair 2. Die State indeterminate due to the advanced state of wear. The surfaces are smooth with a distinct reddish-brown hue. LIBERTY and the date are weak but discernible, and the portrait is weakly present in outline form. Most of UNITED STATES is visible, but the remainder of the reverse is worn smooth.

Ex: Chris Victor-McCawley (12/2011).

From The Padula Family Foundation Collection. PCGS# 35486  
Base PCGS# 1359

---

1793 Liberty Cap Cent, Fine Details  
S-13, B-20

**4147** 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net AG3. The dark steel-brown surfaces of this Liberty Cap specimen show evidence of corrosion on both sides. The date, LIBERTY, and some letters in the reverse legend remain legible. The bust, pole, cap, and lower wreath can be distinguished, but ONE CENT has been effaced by the corrosion.

Ex: Greg Hannigan (5/2011).

From The Padula Family Foundation Collection.

---

1793 S-14, B-17 Liberty Cap Cent, VF Details  
The Bisecting Crack

**4148** 1793 Liberty Cap, S-14, B-17, Low R.5— Repaired — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net VG10. Breen Die State II. Deep olive-brown surfaces exhibit splashes of maroon patina on this lovely and extremely important 1793 Liberty Cap cent, known as the Bisecting Crack for its constant vertical obverse die crack that is known on all surviving examples. Although a glass reveals extensive tooling on the obverse, that workmanship is not obvious to the unaided eye, and this piece has the appearance of an outstanding example that retains considerable design definition.

Ex: Gemini Numismatics (4/2011); COL Steven Ellsworth (5/2011); Butternut.

From The Padula Family Foundation Collection.

---

1793 S-15, B-22 Cent, VG10  
'The Aristocrat'  
Fifth Finest Known per Neiswinter

**4149** 1793 Liberty Cap S-15, B-22, High R.6, VG10 NGC. Our EAC grade: sharpness of Fine 12, net VG7. Ex: Mervis Collection. The sharpness grade is five points finer than our EAC grade with delicate to coarse hairline scratches on Liberty's portrait and elsewhere on the obverse. The mahogany, chestnut, and blue-steel surfaces show old corrosion with a few lamination defects on the reverse. The date is bold with a small obverse rim bruise at 5 o'clock. All known examples are in the same die state, although this piece is a later die stage with advanced reverse swelling.

Although this variety was discovered before 1869 when it appeared on the Leveck plate, few have been discovered since then. Only recently, the S-15 fell out of the lofty Rarity-7 rating, as a 13th example was discovered in the summer of 2013. A remarkably well-researched and comprehensive history of the Sheldon-15 cent was compiled by Jim Neiswinter. *The Aristocrat: The Story of the 1793 Sheldon 15*, was published by the author in the Spring of 2013. It is a remarkable study, one of few book-length projects that focuses on a single pair of dies. Regarding this specimen, Neiswinter writes:

"Charles Williams was the Cincinnati collector that Dr. Sheldon wrote about in *Early American Cents* in 1949. At that time, Sheldon believed this cent and the French cent were two different coins. By 1958, Sheldon had realized his mistake, and he did not mention the Cincinnati collector's S15 in *Penny Whimsy*."

Bland identifies this piece as the fourth finest known, while Noyes grades it Good 6 and sixth finest known. Neiswinter lists it as the fifth finest known example. The present offering is the 31st auction appearance of any example of the 1793 S-15 cent, and the seventh appearance of the present specimen. A period of several years usually goes by between offerings.

Ex: W.B. Guy (*Henry Chapman*, 11/1911), lot 350; Dr. George P. French (B. Max Mehl, 1929 FPL), lot 17; Charles M. Williams (privately, via Abe Kosoff); Floyd T. Starr (*Stack's*, 6/1984), lot 23; Jack H. Robinson (*Superior*, 1/1989), lot 20; Daniel W. Holmes, Jr. (*Goldberg Coins*, 9/2009), lot 26; Greg Hannigan; Adam Mervis (*Heritage*, 1/2014), lot 2424.

From *The Padula Family Foundation Collection*. PCGS# 35495 Base PCGS# 1359

1793 S-16, B-19 Cent, Good Details  
Elusive Liberty Cap Variety

**4150** 1793 Liberty Cap S-16, B-19, R.6 — Environmental Damage — NGC Details. Good. Our EAC grade: sharpness of VG7, net AG3. The 1997 Superior catalog offering this piece provides information about the coin: “two small holes in the central area of the coin have been plugged with such consummate skill that the repair is almost undetectable.” In fact, the workmanship was done so well that even NGC failed to detect the repair. This piece combines ebony fields with tan devices.

Ex: Michael Matthews; James E. Long, Jr., who had Larry Hartley plug the holes; Larry Briggs Rare Coins; James E. Long, Jr.; Early Copper Auction #9 (7/1993), lot 533; Chris Victor-McCawley (10/1993); Dr. Willard J. Carmel, Jr. (Superior, 9/1997), lot 154; Philip Clover (Heritage, 9/2012), lot 3017.

From The Padula Family Foundation Collection.

**4151** 1794 Head of 1793, S-17a, B-1a, Low R.5 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net Fair 2. The dark steel-brown surfaces are heavily corroded on both sides. The bust, cap, pole, and date are weak, but partially visible on the obverse and parts of the wreath and OF AMERICA can be distinguished on the reverse.

Ex: James E. Long, Jr. (3/2011).

From The Padula Family Foundation Collection.

1794 S-18a, B-2a Cent, VF Details  
Head and Edge of 1793  
The Fourth Finest Known

**4152** 1794 Head of 1793, S-18a, B-2a, R.6 — Rim Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net VG10. This is the fourth finest of 18 examples recorded in the Noyes Condition Census photo book that was published in 2006, and it is fifth finest out of 28 in the Bland Census that is posted at 1794largecents.com. The pleasing olive-brown surfaces exhibit splashes of steel patina on each side. Trivial marks and minor rim bruises are evident. This is an extremely important opportunity for the advanced collector to obtain a Condition Census Head of 1793 cent.

Ex: Douglas F. Bird (11/9/2004); M. Scott Barrett (5/3/2012); Thomas D. Reynolds.

From The Padula Family Foundation Collection.

1794 S-18b, B-2b Cent, VG8  
Head of 1793, Edge of 1794

- 4153** 1794 Head of 1793, S-18b, B-2b, R.4, VG8 ANACS. Our EAC grade: sharpness of Fine 12, net Good 6. The chocolate-brown surfaces of this nicely detailed cent exhibit microscopic porosity and minor patches of green corrosion. Trivial rim bruises are evident with slight rim filing on the reverse. This piece is finer than the obligatory description suggests.  
Ex: COL Steven Ellsworth (3/2011); Butternut.  
From The Padula Family Foundation Collection. NGC ID# 223N, PCGS# 35513 Base PCGS# 1362

1794 Liberty Cap Cent, VG Details  
Head of 1793, S-19a, B-3a

- 4154** 1794 Head of 1793, S-19a, B-3a, High R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net AG3. Both obverse and reverse of this bluish steel-brown cent exhibit noticeable corrosion with several small rim nicks and faint hairline scratches.  
Ex: Doug Bird (1983); Tom Wolf; Goldberg Coins (9/2010), lot 766; Greg Hammigan (11/2011).  
From The Padula Family Foundation Collection.

1794 S-19b, B-3b Cent, VF Details  
Head and Edge of 1793

- 4155** 1794 Head of 1793, S-19b, B-3b, R.4 — Environmental Damage — NGC Details. VF. Our EAC grade: sharpness of VF20, net VG8. Breen Die State II. Del Bland grades this piece VG8, while Bill Noyes assigns a sharpness grade of Fine 15 and a net grade of VG7, with average minus surfaces. In our opinion, the sharpness grade is VF20 and the net grade is VG8. The dark brown surfaces show some porosity on both sides but most lettering is legible and some interior detail remains intact on the devices.  
Ex: 1957 ANA (via Dorothy Paschal); Eugene Exman (Heritage, 6/2015), lot 3037.  
From The Padula Family Foundation Collection.

- 4156** 1794 Head of 1793, S-19b, B-3b, R.4 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 4. Rich olive-brown exhibit a few splashes of gold toning. Both sides have lightly corroded surfaces. The primary devices are visible, with Liberty especially sharp for the grade. The date is weak and the obverse lettering is complete. The reverse lettering is mostly visible with the exception of AMERICA. The edge lettering is especially bold.  
Ex: Doug Bird; EAC Sale (5/2011), lot 118.  
From The Padula Family Foundation Collection.

1794 S-20b, B-4b Cent, Fine Details  
Head of 1793, Edge of 1794

- 4157** 1794 Head of 1793, S-20b, B-4b, High R.4 — Surfaces Smoothed — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 5. Steel-brown and pinkish-maroon with minor surface roughness that has been carefully smoothed on the obverse. A small patch of heavy corrosion appears over AMERICA. Both sides exhibit excellent detail and complete lettering.  
Ex: Doug Bird (4/2010).  
From The Padula Family Foundation Collection.

1794 S-21 Cent, Fine Details

- 4158** 1794 Head of 1794, S-21, B-5, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG8, net Good 5. The die state of this piece is undetermined. The dusky olive-brown surfaces exhibit moderate corrosion that is evenly distributed across both surfaces.  
From The Padula Family Foundation Collection.

- 4159** 1794 Head of 1794, S-21, B-5, R.3 — Improperly Cleaned — NGC Details. VG. Our EAC grade: sharpness of VG7, net Good 4. The sharpness is best described as VG8 on the obverse and Good 5 on the reverse. Pleasing olive-brown surfaces show very slight roughness. The date and LIBERTY are complete, and the reverse lettering is readable but weak.  
From The Padula Family Foundation Collection.

1794 S-22, B-6 Cent, Fine Details  
Terminal Mounds Reverse

- 4160** 1794 Head of 1794, S-22, B-6, R.1 — Tooled — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. Breen Die State VIII, the latest die state recorded, with advanced reverse mounds. Olive-brown surfaces exhibit splashes of maroon patina with light scratches and a small mark at the center of the reverse. Evidence of tooling is minimal.  
Ex: Mark Schwartz (9/11/2010); COL Steven Ellsworth; Butternut (5/2011).  
From The Padula Family Foundation Collection.

1794 S-23, B-7 Cent, Fine Details

- 4161** 1794 Head of 1794, S-23, B-7, High R.4 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VF20, net VG8. The die state is undetermined due to moderate corrosion that is evenly distributed across both sides of this chestnut and greenish steel-brown cent.  
Ex: Chris Victor-McCawley (5/2011).  
From The Padula Family Foundation Collection.

1794 S-24, B-8 Cent, XF Details

- 4162** 1794 Head of 1794, S-24, B-8, R.1 — Improperly Cleaned — NGC Details. XF. Our EAC grade: sharpness of VF35, net Fine 15. Breen Die State IV. The light diagonal obverse die crack between 5 o'clock and 10:30 is familiar to the specialist. This surprisingly unabraded medium brown large cent was burnished to minimize the effect of minor surface granularity. A small flan flaw is noted on Liberty's forehead  
Ex: Heritage Auctions (4/2011), lot 3989; Chris Victor-McCawley (5/2011).  
From The Padula Family Foundation Collection.

1794 S-25, B-15 Cent, AG3

- 4163** 1794 Head of 1794, S-25, B-15, R.3, AG3 PCGS. Our EAC grade: sharpness of VG8, net Good 4. A glass reveals microscopic roughness on the olive and steel-brown surfaces of this attractive cent that exhibits considerable sharpness with the net grade reduced primarily due to its peripheral weakness. The date is weak but LIBERTY and all of the reverse lettering is fully readable.  
Ex: Chris Victor-McCawley (12/2011).  
From The Padula Family Foundation Collection. NGC ID# 223P, PCGS# 35540 Base PCGS# 901374

1794 S-26, B-16 Cent, VF Details

- 4164** 1794 Head of 1794, S-26, B-16, R.2 — Repaired — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net Good 5. An early die state with a thin crack through the E of STATES but no evidence of the additional crack through the first S of that word. Cleaned and recolored with reddish steel-brown surfaces that exhibit moderate corrosion on both sides.  
Ex: Superior (2/1999), lot 1972.  
From The Padula Family Foundation Collection.

1794 S-27, B-9 Cent, Fine Details  
The 13th Finest  
Detailed Provenance

- 4165** 1794 Head of 1794, S-27, B-9, R.5 — Tooled — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State III, with a crack in the left obverse field. The olive-brown surfaces of this near-Condition Census cent, the 13th finest in both the Bland and Noyes lists, exhibits considerable maroon and steel patina with light scratches in the left and right obverse fields, and with minor handling marks and dents on the reverse. The eye appeal of this piece outweighs its grading trivialities. We agree with both Bill Noyes and Del Bland that the sharpness is Fine 15, and disagree with both about the net grade. Noyes calls this piece VG7 and Bland suggests it is VG10. We are between those two extremes.  
Ex: Consignor with initial "M;" Samuel H. Chapman (6/1913), lot 426; J.P. Hale Jenkins; Henry Chapman (7/1922), lot 1518; S.H. Chapman; George H. Clapp; Howard R. Newcomb (J.C. Morgenthau, 2/1945), lot 42; Milton A. Holmes (Stack's, 10/1960), lot 1366; C. Douglas Smith (1965); Alfred L. Bonard; French's (privately, 5/1967); R.E. Naftzger, Jr. (6/1970); Denis W. Loring (6/1970); Dr. Edward R. "Ned" Bush; John D. Wright; Daniel W. Holmes, Jr.; Chris Victor-McCawley (5/2011).

1794 S-28, B-10 Cent, Fine Details

- 4166** 1794 Head of 1794, S-28, B-10, R.2 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VF20, net VG10. An intermediate die state. Although the reverse has several small dents and scrapes, this cent has otherwise exceptional olive and mahogany surfaces, especially on the nearly flawless obverse.  
Ex: Chris Victor-McCawley (5/2011).  
From The Padula Family Foundation Collection.

1794 S-29, B-11 Cent, Fine Details

- 4167** 1794 Head of 1794, S-29, B-11, R.2 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 5. Uniformly porous surfaces are inconsequential on this attractive bluish steel-brown large cent that exhibits diagonal die flaws on the obverse that are similar to scratches except they are almost certainly as struck.  
Ex: Rod Burrell (7/2010).  
From The Padula Family Foundation Collection.

1794 S-30, B-12 Cent, VF Details

- 4168** 1794 Head of 1794, S-30, B-12, R.1 — Repaired — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net VG10. Breen Die State II. Some smoothing of the steel-brown surfaces is noted in the right obverse field of this yet attractive 1794 cent.  
Ex: Chris Victor-McCawley (11/2011).  
From The Padula Family Foundation Collection.

1794 S-31, B-13 Cent, VF Details

**4169** 1794 Head of 1794, S-31, B-13, R.1 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net Fine 12. Breen Die state I. This pleasing cent has golden-tan and steel-brown surfaces with light corrosion and myriad, trivial reverse marks.

Ex: Garbe and Sebring Collections (Bowers and Merena, 3/1996), lot 34.

From The Padula Family Foundation Collection.

1794 S-32, B-18 Cent, VG Details

**4170** 1794 Head of 1794, S-32, B-18, R.2 — Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 15, net VG8. This pleasing two-tone cent exhibits light chocolate devices and steel-brown fields with old scratches and slight surface roughness on each side. An obverse rim nick is noted at 3 o'clock and a reverse edge bruise is visible under the PCGS tab at 1:30.

Ex: COL Steven Ellsworth (11/2010); Butternut.

From The Padula Family Foundation Collection.

1794 S-33, B-19 Cent, Good Details  
The Wheelspoke Variety

**4171** 1794 Head of 1794, S-33, B-19, R.6 — Graffiti — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net AG3. Breen Die State V, with six radial breaks on the reverse. The central reverse is bulged with the lettering and interior wreath absent. A few minor rim breaks are evident on the smooth olive surfaces with minor scratches on the cap and inside the absent wreath, forming a W.

Ex: Kagin's; Gordon J. Wrubel; Dr. Robert J. Shalowitz; Darwin B. Palmer, Jr.; Dr. Robert J. Shalowitz; Tom Morley; Cape Kennedy Medals (12/1975), lot 24; D.F. Gordon (4/1979); Thomas P. Wolf; EAC Sale (5/2008), lot 169; Jon Alan Boka; Walter J. Husak; Chris Victor-McCawley (6/2011).

1794 S-34, B-20 Cent, Fine Details  
Important Single Berry Variety

**4172** 1794 Head of 1794, S-34, B-20, High R.5 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. Breen Die State I. An early die state, this piece shows evidence of fine porosity on both obverse and reverse. Light brown color is seen over most of each side with darker accents around the reverse devices. A short mark and rim bump are located at 3 o'clock on the obverse with another at 9:30. A few old obverse scratches are visible, and there are a couple of tiny rim nicks on the reverse. Two reverse dies, known as the "Single Berry" reverses, have just one berry inside the wreath immediately left of the ribbon bow. All die combinations from either of these two reverse dies are rarities. Bill Noyes grades this piece Good 6 and tied for 11th finest in his Condition Census.

Ex: James R. McGuigan (12/1976); Roger Cohen, Jr. (Superior, 2/1992), lot 690; Wes A. Rasmussen (Heritage, 1/2005), lot 3040; Jon Alan Boka (1/24/2006); M. Scott Barrett (5/3/2012); Thomas D. Reynolds. Possibly earlier from Dr. William H. Sheldon to Dorothy I. Paschal.

From The Padula Family Foundation Collection.

1794 S-35, B-21 Cent, VG Details  
Late Die State

- 4173** 1794 Head of 1794, S-35, B-21, R.5 — Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net VG8. Breen Die State VI, a late state of the dies with multiple obverse die cracks. These cracks are faint, but present. This is a rare die state as are all states of the variety. Only about 50 examples of the variety are known, yet Breen described eight die states in his reference. An excellent example, this olive-brown cent exhibits a few dents or digs with a reverse rim nick at 7 o'clock. The trivial grading details fail to diminish the overall eye appeal of this rare cent.

Ex: Dan Trollan (2004 EAC); Walter Reed (2006 EAC); COL Steven Ellsworth; Butternut (8/2010).

From The Padula Family Foundation Collection.

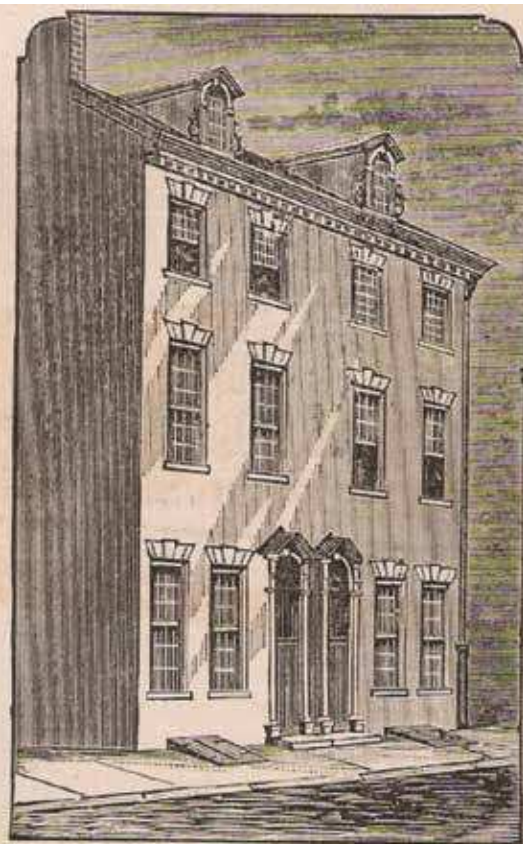

1794 S-36, B-23 Cent, VG Details  
Second Single Berry Reverse

- 4174** 1794 Head of 1794, S-36, B-23, R.5 — Environmental Damage, Rim Damage — NGC Details. VG. Our EAC grade: sharpness of VG8, net Good 5. This tan-brown Liberty cap cent has evenly granular fields. All legends are legible, although the base of the date is faint. The reverse has a rim bruise at 5 o'clock and minor dings at 2:30 and 8:30. A much better die marriage.

Ex: Denis W. Loring; Robert J. Shalowitz; Jack Stickel Collection (Heritage, 4/2011), lot 3968; Chris Victor-McCawley (EAC bourse, 5/2011).

From The Padula Family Foundation Collection.

THE FIRST MINT IN THE UNITED STATES, ERECTED IN 1792.

---

1794 S-37, B-24 Large Cent, VF Details  
From the Exman Collection

**4175** 1794 Head of 1794, S-37, B-24, High R.6 — Corrosion — NGC Details. VF. Our EAC grade: sharpness of VF25, net VG8. Ex: Exman Collection. Breen Die State II. The widely spaced 1 in the date and the single berry left of the bow on the reverse identify this rare variety. The obverse die failed quickly, accounting for the elusive nature of the S-37. Del Bland graded this coin VG8 in 1991, and we concur with both him and Bill Noyes in assigning that as the net grade. Noyes grades this piece VF25 for sharpness, and we agree, with average minus surfaces. It ranks tied for seventh finest per Bland, and eighth best according to Noyes.

The obverse die was heavily polished, resulting in some incomplete detail, and the dark brown surfaces are extensively corroded. This variety is often called the Steigerwalt variety, as it was discovered by Charles Steigerwalt in 1900, and it is frequently the last of the 1794 cent varieties that most collectors acquire. The S-37 is clearly a member of large cent nobility. The envelope accompanying this piece is apparently from Dorothy Paschal, using Dr. Sheldon's typewriter. The handwritten notes on the envelope are probably from Eugene Exman, who noted that Dorothy Paschal requested first right of refusal if the coin was ever sold. However, this piece remained in the Exman estate for 34 years after Ms. Paschal passed away.

Ex: J.J. Teaparty (10/1968); Denis W. Loring (12/1968); Dorothy Paschal; Roy E. Naftzger, Jr.; Eugene Exman (*Heritage*, 6/2015), lot 3760; Robert Padula.

**From The Padula Family Foundation Collection.**

---

1794 S-38, B-25 Cent, Fine Details  
Early Die State

- 4176** 1794 Head of 1794, S-38, B-25, R.5 — Edge Damaged — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. This is an early die state, as the outer field chip on the obverse is extremely weak. Steel and golden-brown surfaces with considerable moderate to heavy porosity on both sides. Minor rim bruises are visible as well. The reverse is rotated about 45 degrees clockwise.  
Ex: Edward H. Schwartz (*Abe Kosoff*, 10/1961), lot 41; Admiral Worthington S. Bitler (*A-Mark*, 3/1973), lot 24; Jules Reiver (*Heritage*, 1/2006), lot 19199; Douglas F. Bird (4/2010).

1794 Liberty Cap Cent, XF Details  
Head of 1794, S-40, B-28

- 4178** 1794 Head of 1794, S-40, B-28, High R.5 — Damage — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF20, net VG8. Delightful light olive-brown color with darker mahogany, from old corrosion that was carefully removed. The surfaces have numerous tiny digs and scrapes, but most are of little consequence. This is a late die state with both reverse cracks developed, but without the obverse crack of the terminal die state. In terms of importance, it ranks high on the list of 1794s, with only about 30 to 35 coins known. Graded Good 6 and 21st finest in the extended Del Bland Condition Census, but we feel that VG8 or even VG10 is a more appropriate EAC grade that would place this piece in the top 15 examples known.  
Ex: Colonial Coin Co. (6/8/1972); Jules Reiver (*Heritage*, 1/2006), lot 19201; Rod Burrell; Terry S. Denman (5/14/2012).  
From The Padula Family Foundation Collection.

---

1794 S-41, B-30 Cent, VF Details  
Late Die State

- 4179** 1794 Head of 1794, S-41, B-30, R.3 — Rim Damage — NGC Details. VF. Our EAC grade: sharpness of Fine 15, net VG10. Breen Die State VII, with bold reverse die cracks and central bulging. Smooth olive-brown surfaces exhibit inconsequential handling marks and myriad trivial rim bruises on each side. A pleasing example of the near-terminal die state.  
Ex: Jack Stickel Collection (*Heritage*, 4/2011), lot 9070.  
From The Padula Family Foundation Collection.

1794 Liberty Cap Cent, Fine 12  
Head of 1794, S-42, B-29

- 4180** 1794 Head of 1794, S-42, B-29, R.4, Fine 12 PCGS. Our EAC grade: sharpness of VF20, net VG10. The slightly porous, dark steel-brown surfaces of this Fine 12 specimen are lightly abraded, with lighter patina on the high points of the design elements. Most of the lettering remains legible, but the date and STATES OF are weak.  
Ex: Del N. Bland; Jack H. Beymer; Sol Varon; Gilbert Steinberg Collection (Superior, 9/1996), lot 1621.  
From The Padula Family Foundation Collection. NGC ID# 223P, PCGS# 35591 Base PCGS# 901374

1794 S-43, B-32 Cent, Fine Details  
Early Die State

- 4181** 1794 Head of 1794, S-43, B-32, R.2 — Environmental Damage — NGC Details. Fine. Our EAC grade: sharpness of VG10, net Good 6. Breen Die State I, with no evidence of the obverse die crack through the 17 that forms in Die State II. Deep olive surfaces exhibit a large area of emerald and maroon patina on the obverse. The reverse has a diagonal scratch from the N in UNITED to the E in ONE.  
Ex: Jack Stickel Collection (Heritage, 4/2011), lot 9064.  
From The Padula Family Foundation Collection.

1794 S-44, B-33 Cent, AU Details  
Advanced Die Cracks

- 4182** 1794 Head of 1794, S-44, B-33, R.1 — Damage or Tooling — PCGS Genuine. AU Details. Our EAC grade: sharpness of XF40, net Fine 15. Breen Die State V, with all obverse and reverse cracks advanced. Glossy and smooth chocolate-brown surfaces exhibit splashes of lighter golden-brown on the obverse, and olive-brown on the reverse. Old scratches are evident through ERTY and along Liberty's profile with the bust showing evidence of burnishing. Many of the hair strands are delicately engraved. The reverse is untouched and exceptional.  
Ex: Stack's-Bowers (3/2013), lot 1054.  
From The Padula Family Foundation Collection.

- 4183** 1794 Head of 1794, S-44, B-33, R.1, AG3 NGC. Our EAC grade: sharpness of Good 4, net AG3. Breen Die State uncertain. Chestnut-brown surfaces exhibit bluish overtones on the obverse of this pleasing piece that exhibits Good 5 sharpness on the obverse and AG3 sharpness on the reverse. Trivial handling marks only slightly affect the grade.  
Ex: Lou Whitaker; Jack Stickel Collection (Heritage, 4/2011), lot 9054.  
From The Padula Family Foundation Collection. NGC ID# 223P, PCGS# 35597 Base PCGS# 901374

- 4184** 1794 Head of 1794, S-44, B-33, R.1 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Good 6, net AG3. Cleaned and retoned with reddish-brown and chocolate-brown intermingled across both surfaces. Slight roughness is noted, with several trivial rim bruises.  
From The Padula Family Foundation Collection.

1794 Liberty Cap Cent, VG Details  
Head of 1794, S-45, B-35

- 4185** 1794 Head of 1794, S-45, B-35, High R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VF20, net Good 5. The steel-brown surfaces of this early large cent are heavily corroded, but the date and ERTY remain legible on the obverse. The corrosion is less severe on the reverse, where ONE CENT, the wreath, and the peripheral legends remain intact, if slightly weak in some places.  
Ex: Greg Hannigan (3/2011).  
From The Padula Family Foundation Collection.

1794 Liberty Cap Cent, Fine 15  
Head of 1794, S-46, B-36

- 4186** 1794 Head of 1794, S-46, B-36, R.2, Fine 15 PCGS. Our EAC grade: sharpness of Fine 12, net VG8. Breen Die State II. Graded Fine 12 in the Goldberg catalog, and "several points sharper." A pleasing chocolate-brown cent with steel toning and peripheral granularity on each side. The remainder of the surfaces are smooth and attractive.  
Ex: Goldberg Coins (1/2011), lot 777; Greg Hannigan (3/2011).  
From The Padula Family Foundation Collection. NGC ID# 223P, PCGS# 35603 Base PCGS# 901374

**1794 Liberty Cap Cent, VF Details  
Head of 1794, S-47, B-39**

- 4187** 1794 Head of 1794, S-47, B-39, R.5 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG7. The steel and olive-brown surfaces are slightly porous in some areas (primarily on the obverse), but all lettering and the date remain easily legible. Some interior detail remains intact on Liberty's hair and the wreath, as well.  
*Ex: Chris Victor-McCawley (1/2011).*  
*From The Padula Family Foundation Collection.*

**1794 S-48, B-38 Cent, AG Details  
Famous Starred Reverse**

- 4188** 1794 Starred Reverse, S-48, B-38, R.5 — Environmental Damage — PCGS Genuine. AG Details. Our EAC grade: sharpness of Good 4, net Fair 2. The famous Starred Reverse cent, a highly popular variety since the day it was discovered in 1878. While this steel and chocolate-brown example has been cleaned and recolored, exhibiting light surface corrosion, it retains nearly half of the stars from 5 o'clock to 11 o'clock. While the date is gone, LIBERTY remains mostly visible with traces of hair detail on the obverse. PCGS graded Fair 2 in its 2010 appearance.  
*Ex: Goldberg Coins (9/2010), lot 775.*  
*From The Padula Family Foundation Collection.*

- 4189** 1794 Head of 1794, S-49, B-41, R.2 — Cleaned — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. Middle Die State, with a heavy crack through E in LIBERTY. The glossy olive-brown surfaces are lightly abraded and much interior detail remains intact on the central design elements. The date and LIBERTY are bold, but the reverse legend is worn flat in many places.  
*Ex: Chris Victor-McCawley (1/2011).*  
*From The Padula Family Foundation Collection.*

- 4190** 1794 Head of 1794, S-50, B-43, R.5 — Improperly Cleaned — NGC Details. VG. Our EAC grade: sharpness of VG7, net Good 4. This rare-variety 1794 cent has generally even wear, with indistinctness limited to OF AMERICA and the fraction. LIBERTY and the date are the key legends, since their placement distinguishes S-50 from the much more prevalent S-49. The moderately porous surfaces exhibit sea-green and mahogany undertones, and the reverse has a small rim ding at 12 o'clock.  
*Ex: Dennis Mendelson; Rod Burrese; Jack Stickel Collection (Heritage, 4/2011), lot 3967.*  
*From The Padula Family Foundation Collection.*

**1794 S-51, B-42 Cent, AU Details  
Tied For Sixth Finest**

- 4191** 1794 Head of 1794, S-51, B-42, Low R.5 — Environmental Damage — PCGS Genuine. AU Details. Our EAC grade: sharpness of XF45, net VF30. Breen Die State I, with perfect dies, the usual die state encountered for this variety. This piece is nicely detailed and attractive with mahogany surfaces, having been cleaned and recolored. Gossamer porosity is evident on both sides. This recently discovered example is unrecorded in the Noyes photo book but would occupy the sixth position in his Census.  
*Ex: Alabama vest-pocket dealer; Mark Alberici; COL Steven Ellsworth; Butternut (2/2013).*  
*From The Padula Family Foundation Collection.*

- 4192** 1794 Head of 1794, S-51, B-42, Low R.5 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7/3, net Good 4. Aside from myriad handling marks, a blended scrape on the hair, and a few small dents, there is no obvious damage on either side of this pleasing chocolate-brown cent.  
*Ex: Superior (2/1999), lot 1981.*  
*From The Padula Family Foundation Collection.*

- 4193** 1794 Head of 1794, S-52, B-44, Low R.6 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Fair 2. This piece is included in the present collection as S-52, but is identified by PCGS as S-53. Due to the heavily corroded emerald-green surfaces, the exact identification is uncertain and we invite careful inspection.  
*Ex: Doug Bird (4/2010).*  
*From The Padula Family Foundation Collection.*

**1794 S-53, B-45 Cent, Fine Details  
Near-Condition Census**

- 4194** 1794 Head of 1794, S-53, B-45, R.6 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG8, net Good 5. All examples of this variety known today are approximately the same die state. Equal to 10th finest known, based on the Census data kept by Del Bland, or 15th finest according to Bill Noyes. Just 21 examples of this variety are currently known, an important rarity for the large cent specialist to pursue. At the time *Penny Whimsy* was published, Dr. Sheldon was only aware of eight examples. The surfaces have deep steel color with slightly lighter grayish devices. Light corrosion is visible on both sides.  
*Ex: Wes A. Rasmussen (Heritage, 1/2005), lot 3062; Doug Bird; Scott Barrett (5/2012); Thomas D. Reynolds.*  
*From The Padula Family Foundation Collection.*

- 4195** 1794 Head of 1794, S-54, B-46, R.3, VG10 NGC. Our EAC grade: sharpness of VG8/3, net Good 5. Incorrectly attributed in the 1999 EAC sale as S-55. We agree with the sharpness and net grades presented there. This piece has minor handling marks and trivial rim bruises on otherwise pleasing olive-brown surfaces.  
Ex: 1999 EAC Sale, lot 149; Jack Stickel Collection (Heritage, 4/2011), lot 9063.  
From The Padula Family Foundation Collection. NGC ID# 223P, PCGS# 35624 Base PCGS# 901374

**4212** 1794 Head of 1795, S-67, B-59, R.3 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG10, net AG3. Light olive-brown surfaces exhibit splashes of steel on this moderately corroded Head of 1795 cent.

Ex: Gainsborough, Part II (Superior, 2/1997), lot 67.

From The Padula Family Foundation Collection.

1794 S-68, B-60 Cent, VG Details  
Head of 1795, Ex: Bland-Reiver

**4213** 1794 Head of 1795, S-68, B-60, R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 6. Terminal die state with the obverse bisected by a die crack along the bulge in the lower left field, across Liberty's hair, cheek, and nose, and out to the right obverse border. Central and lower reverse details are weaker than the balance, almost appearing to be related to the die crack on the obverse. Deep steel surfaces with light corrosion and wisps of lighter tan on the obverse devices. An important and desirable example.

Ex: Joseph Adamski (3/1956); John A. Schreuder; Del Bland (5/27/1970); Jules Reiver (Heritage, 1/2006), lot 19239; Greg Hannigan (5/2011).

1794 Liberty Cap Cent, Fine Details  
Head of 1795, S-69, B-61

- 4214** 1794 Head of 1795, S-69, B-61, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net Good 6. Breen Die State II, with the reverse die reground, resulting in a thin tail of R in AMERICA and an attenuated right wreath stem. This specimen retains much original design detail on the reverse, but the dark steel-brown surfaces are heavily pitted on the obverse.  
*Ex: Heathgate Collection (Superior, 6/1997), lot 45.*  
*From The Padula Family Foundation Collection.*

1794 Liberty Cap Cent, Fine Details  
Head of 1795, S-70, B-62

- 4215** 1794 Head of 1795, S-70, B-62, R.2 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. Middle die state. Cleaned and recolored, this cent exhibits deep steel-brown color with lighter brown around the devices and through the letters. There are no distracting marks among the myriad original planchet marks on each side.  
*Ex: EAC Sale (4/2010), lot 160; Greg Hannigan (3/2011).*  
*From The Padula Family Foundation Collection.*

1794 Liberty Cap Cent, VG8  
Head of 1795, S-71, B-63

- 4216** 1794 Head of 1795, S-71, B-63, R.2, VG8 PCGS. Our EAC grade: sharpness of VG7, net Good 4. The natural steel and olive-brown surfaces are lightly abraded, with some faint pinscratches before Liberty's mouth. The obverse is sharper than the reverse. The date, LIBERTY, and STATES OF AMERICA remain legible, but UNITED is very weak.  
*Ex: Doug Bird (8/2010).*  
*From The Padula Family Foundation Collection.* NGC ID# 223R, PCGS# 35696 Base PCGS# 1365

1794 Large Cent, XF45  
Head of 1795, S-72, B-65

- 4217** 1794 Head of 1795, S-72, B-65, R.2, XF45 NGC. Our EAC grade: sharpness of VF35, net VF30. Breen Die State III. The lowest lock of Liberty's hair is short and points straight down without curling, and the leaves above N in ONE are narrow and bent, identifying the S-72 variety. The S-72 obverse die employs the same bust punch used on cents in 1795, and the variety was probably included in the 20,021 coins that were delivered on December 30, 1794. The chocolate-brown surfaces of this example are lightly abraded and there is a minor obverse rim bruise at 9 o'clock. The design elements were sharply impressed and retain most interior detail intact.  
*Ex: Eric P. Newman Numismatic Education Society (Heritage, 11/2014), lot 3095; Chris Victor-McCawley (1/2015).*  
*From The Padula Family Foundation Collection.* NGC ID# 223R, PCGS# 35699 Base PCGS# 1365

- 4218** 1794 Head of 1795, S-72, B-65, R.2, Good 6 PCGS. Our EAC grade: sharpness of VG7, net Good 4. Late die state. This lightly corroded cent has a few insignificant hairline scratches and trivial handling marks on its chocolate-brown and steel surfaces.  
*Ex: Garvin Collection; EAC Sale (4/2005), lot 121.*  
*From The Padula Family Foundation Collection.* NGC ID# 223R, PCGS# 35699 Base PCGS# 1365

- 4219** 1794 Head of 1795, S-72, B-65, R.2, PCGS Genuine. Our EAC grade: sharpness of VG7, net AG3. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that has been burnished, resulting in indistinct details. Both sides are intermingled chestnut and steel-brown.  
*Ex: Walter Reed; COL Steven Ellsworth; Butternut.*  
*From The Padula Family Foundation Collection.*

1795 Liberty Cap Cent, VG Details  
Lettered Edge, S-73, B-1

- 4220** 1795 Lettered Edge, S-73, B-1, Low R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 5. The "hyphen" die chip between ER in LIBERTY is present, but no reverse die cracks are evident. The olive-brown surfaces are mostly smooth and the date and all lettering remains bold.  
Ex: Thomas D. Reynolds (4/2010).  
From The Padula Family Foundation Collection.

1795 Liberty Cap Cent, Good 4  
Lettered Edge, S-74, B-2

- 4221** 1795 Lettered Edge, S-74, B-2, R.4, Good 4 PCGS. Our EAC grade: sharpness of AG3, net Fair 2. The dark chocolate and olive-brown surfaces are glossy and lightly abraded. The Bust, cap, and pole are boldly outlined, and the date, LIBERTY, and some of the reverse legend remain legible. ONE CENT and STATES OF are very weak.  
Ex: Douglas F. Bird (5/2014).  
From The Padula Family Foundation Collection. NGC ID# 223S, PCGS# 35714 Base PCGS# 1377
- 4222** 1795 Lettered Edge, S-74, B-2, Low R.4 — Damage — PCGS Genuine. AG Details. Our EAC grade: sharpness of AG3, net Fair 2. Cleaned and retoned to dark brown with most design details indistinct, although the date is bold.  
Ex: Craig Hamling (12/2010).  
From The Padula Family Foundation Collection.

1795 S-75, B-3 Cent, VF Details  
Lettered Edge

- 4223** 1795 Lettered Edge, S-75, B-3, R.3 — Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VG10, net Good 5. Several green pit marks are evident on the light to medium brown surfaces of this example that shows areas of light to moderate corrosion on each side.  
Ex: Dr. Gerald Maas (Superior, 2/1998), lot 852.  
From The Padula Family Foundation Collection.

1795 S-76a, B-4a Cent, VF30  
Lettered Edge  
Tied for Ninth Finest

- 4224** 1795 Lettered Edge, S-76a, B-4a, R.5, VF30 PCGS. Our EAC grade: sharpness of VF30, net Fine 15. Breen Die State I. This piece exhibits natural olive-brown surfaces with traces of tan in the protected areas. Bill Noyes grades this piece Fine 12 and tied for ninth finest known in his 1795-97 photo book where the image suggests reddish-orange color. Our EAC grade would place this in a 10th place tie in Del Bland's Condition Census.  
Ex: John D. Wright; Chris Victor-McCawley (EAC bourse, 4/2015).  
From The Padula Family Foundation Collection. NGC ID# 223S, PCGS# 35720 Base PCGS# 1377
- 4225** 1795 Lettered Edge, S-76a, B-4a, R.6 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net AG3. The sharpness is better expressed as Good 6 obverse, AG3 reverse, with slight deductions for minor roughness and trivial marks on the olive-brown surfaces.  
Ex: EAC Sale (4/2010), lot 161.  
From The Padula Family Foundation Collection.

1795 Liberty Cap Cent, VF Details  
Plain Edge, S-78, B-8

- 4229** 1795 Plain Edge, S-78, B-8, R.1 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF35, net Fine 12. Middle die state. A magnifier will reveal the uniform porosity that nets a substantial deduction for this olive and steel-brown cent. A few minor marks are not obvious, all but disappearing in the surrounding patina.  
*Ex: EAC Sale (4/2010), lot 166.*  
*From The Padula Family Foundation Collection.*

---

1795 S-79, B-9 Reeded Edge Cent  
Fifth Finest of 10 Known  
Extremely Rare *Guide Book Variety*

**4230** 1795 Reeded Edge, S-79, B-9, Low R.7, PCGS Genuine. Our EAC grade: sharpness of VG7, net Good 4. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. There are 10 known 1795 Reeded Edge cents, and this offering is only the 34th auction appearance of any known example since the variety was first described in 1862.

This example is a recent discovery that was first seen in the numismatic world just seven years ago. In fact, four of the 10 examples known have made their debut in the last two decades. The surfaces are lightly corroded, accounting for the net grade of this piece that exhibits intermingled steel, olive, and tan on each side. The major obverse and reverse design elements are clearly visible, and the date and lettering are intact. Much of the edge reeding is clearly visible on this piece.

All we know about the 1795 Reeded Edge cents is told by the coins themselves, and they are saying little. Only two of the 10 known examples have recorded weights, at 169.4 grains and 153.4 grains. Those weights tell us that the Reeded Edge cents were coined at the new thin-planchet weight standard of 168 grains. Documentary evidence indicates that the first thin-planchet coins were struck on December 27, 1795, and most were minted in 1796.

The obverse die was used exclusively for the S-79 cent. However, the reverse was used later for six different 1796 Draped Bust varieties, S-106 through S-111. Although the low grade of all known examples precludes a specific die state determination, both dies appear to be perfect. The continued use of the reverse die in 1796 proves beyond doubt that the 1795 Reeded Edge cent is a genuine Philadelphia Mint product.

*Discovered by John Baker in a group of unattributed coins given to him by his father years ago; Greg Hannigan; Goldberg Coins (9/2010), lot 796.*

**From The Padula Family Foundation Collection.**

1795 S-80, B-11b Cent, VF Details  
Nicely Pedigreed Jefferson Head Cent

- 4231** 1795 Jefferson Head, Plain Edge, S-80, B-11b, Low R.5 — **Damaged** — PCGS Genuine. VF Details. Our EAC grade: **sharpness of Fine 12, net VG7**. Sharp-eyed numismatists have turned up quite a number of these privately made large cents in recent years. Dr. William H. Sheldon wrote in 1949 that he had seen about 15 examples. The variety carried a High R.5 rating when Walter Breen's *Large Cent Encyclopedia* was published in 2000, and today the rarity is Low R.5.

This example appears tied for 17th finest in the Noyes Condition Census. The medium olive-brown surfaces are somewhat glossy and the obverse is nearly problem-free, showing only a few slight rim disturbances. The reverse has an old scratch through the left branch of the wreath and down to the fraction.

Ex: Thomas P. Warfield (*Associated Coin Auction Co.*, 10/1955), lot 199; C. Douglas Smith; *Stack's* (4/1957), lot 43; Frank H. Masters, Jr. (*RARCOA*, 5/1971), lot 90; Dr. Edward R. Bush; William R.T. Smith; Bowers and Ruddy (11/1977), lot 2077; Denis W. Loring (12/1977); Robinson S. Brown, Jr. (*Superior*, 1/1996), lot 115; M. Scott Barrett (via Thomas D. Reynolds, 5/2012).

1796 Liberty Cap Cent, Fine 15  
S-83, B-4

- 4234** 1796 Liberty Cap, S-83, B-4, R.4, Fine 15 PCGS. Our EAC grade: **sharpness of VF20, net Fine 12**. Breen Die State II, with scaling before Liberty's mouth, a crack from the bust tip to the pole, and another crack from the rim through the top of ERTY. The steel-brown surfaces are slightly porous, but the date and all lettering remain legible and the major design elements retain some interior detail.

Ex: Chris Victor-McCawley.

From The Padula Family Foundation Collection. NGC ID# 223V, PCGS# 35756 Base PCGS# 1392

- 4235** 1796 Liberty Cap, S-83, B-4, R.4 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net AG3. Even corrosion is distributed across both surfaces of this greenish steel-brown cent. The devices are outlined with a few hair strands visible behind Liberty's neck.  
Ex: Douglas F. Bird (4/2005).  
From The Padula Family Foundation Collection.

1796 Liberty Cap Cent, Fine Details  
S-84, B-5

- 4236** 1796 Liberty Cap, S-84, B-5, R.3 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VF25, net VG8. Breen Die State II. Three scratches on Liberty's cheek constitute the noted damage. The dark olive-brown surfaces are lightly corroded, and some verdigris was buffed off in the past, but all lettering and the date remain completely legible and major design detail remains intact.  
Ex: 1978 ANA; G. Lee Kuntz (Superior, 10/1991), lot 96; Gilbert Steinberg Collection (Superior, 9/1996), lot 1629.  
From The Padula Family Foundation Collection.

- 4237** 1796 Liberty Cap, S-85, B-6, Low R.5, Good 4 PCGS. Our EAC grade: sharpness of Good 5, net AG3. A thin scratch is noted through the cap, and a trivial planchet lamination is evident at OF. The semi-glossy surfaces host chocolate and steel-brown toning. The date is present, and the devices and lettering are mostly clear, although portions of the reverse legend are weak due to an inadequate strike.  
Ex: EAC Sale (4/2003), lot 327.  
From The Padula Family Foundation Collection. NGC ID# 223V, PCGS# 35762 Base PCGS# 1392

1796 Liberty Cap Cent, Good 4  
S-86, B-7

- 4238** 1796 Liberty Cap, S-86, B-7, R.5, Good 4 PCGS. Our EAC grade: sharpness of Good 4, net AG3. Although the PCGS holder identifies the variety as S-87, this coin really represents the S-86 variety, with the leaf at the toe of E in UNITED. The steel-brown surfaces show slight granularity and the obverse is sharper than the reverse. A rim nick is evident on the obverse at 9 o'clock. Most of the reverse legend is weak but legible.  
Ex: Superior (2/1999), lot 2017.  
From The Padula Family Foundation Collection. NGC ID# 223V, PCGS# 35765 Base PCGS# 1392

1796 Liberty Cap Cent, VG Details  
S-87, B-8

- 4239** 1796 Liberty Cap, S-87, B-8, R.3 — Altered Surfaces — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net VG7. Breen Die State II, with a bulge at 96 and a light die crack through 7 to the bust. The final digit in the date is almost effaced at the bulge and the dark olive-brown surfaces show evidence of corrosion, especially on the reverse.  
Ex: Bay State Coin Show (8/2001).  
From The Padula Family Foundation Collection.

- 4240** 1796 Liberty Cap, S-88, B-9, R.4, Fair 2 PCGS. Our EAC grade: sharpness of Good 4, net Fair 2. Well-worn olive-brown surfaces exhibit a complete date and clearly visible LIBERTY with an outlined bust. About half of the reverse detail remains visible on this piece.  
Ex: John Keyes (4/2005).  
From The Padula Family Foundation Collection. NGC ID# 223V, PCGS# 35771 Base PCGS# 1392

1796 S-89, B-10 Cent, VG Details

- 4241** 1796 Liberty Cap, S-89, B-10, R.3 — Scratch — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net AG3. Old scratches are evident at the center of the reverse on this example that exhibits light to moderate roughness on its chestnut and steel-brown surfaces.  
Ex: Douglas F. Bird (4/2005).  
From The Padula Family Foundation Collection.

1796 Liberty Cap Cent, VG Details  
S-90, B-11

- 4242** 1796 Liberty Cap, S-90, B-11, High R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net AG3. Enough design detail remains to easily identify the Sheldon variety (double leaf under E in AMERICA, etc.), but the olive-brown surfaces are heavily corroded on both sides and there is some dark discoloration inside the wreath. The reverse die was rotated about 170 degrees counter clockwise.  
Ex: Evan Kopald, via Chris Victor-McCawley (4/2006).  
From The Padula Family Foundation Collection.

1796 Liberty Cap Cent, VG10  
S-91, B-1

- 4243** 1796 Liberty Cap, S-91, B-1, R.3, VG10 PCGS. Our EAC grade: sharpness of VG10, net VG7. The date and all lettering is fully visible on this pleasing steel and olive-brown cent that exhibits faint granularity under a glass. Only minor abrasions are evident and some interior detail remains intact on Liberty's hair.

1796 S-97, B-20 Cent  
Reverse of 1795

- 4252** 1796 Reverse of 1795, S-97, B-20, R.3, PCGS Genuine. Our EAC grade: sharpness of XF40, net VG8. Breen Die State II. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a XF specimen that has been damaged. Both sides of this olive and steel-brown cent exhibit light granularity, and the surfaces are covered in fine scratches.  
Ex: James E. Long; COL Steven Ellsworth (9/1/2014); Butternut (4/2015).  
From The Padula Family Foundation Collection.

- 4253** 1796 Reverse of 1795, S-97, B-20, R.3 — Damage — PCGS Genuine. Poor/Fair Details. Our EAC grade: sharpness of Good 6, net AG3. Scattered surface marks accumulate on both sides of this cent. A few rim bruises are noted, but no damage is immediately evident.  
Ex: James E. Long (1/2005).  
From The Padula Family Foundation Collection.

1796 Draped Bust Cent, Fine Details  
Reverse of 1795, S-98, B-21

- 4254** 1796 Reverse of 1795, S-98, B-21, R.4 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG7. Middle die state. Microscopic porosity evenly covers both sides of this chocolate and olive-brown cent. Faint horizontal scratches are noted within the wreath.  
Ex: Superior (2/1999), lot 2024; J.R. Frankenfield (Superior, 2/2001), lot 312; EAC Sale (4/2002), lot 196.  
From The Padula Family Foundation Collection.

1796 Reverse of 1795 Cent, Good Details  
S-99, B-22, Three Triplet Leaves on Left Branch

- 4255** 1796 Reverse of 1795, S-99, B-22, R.5 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net AG3. Early die state. Light diagonal scratches cross the center of the bust on this uniformly granular cent. The rich steel-brown and olive surfaces exhibit lighter brown highlights with trivial pinpricks and other insignificant handling marks.  
Ex: W.E. Johnson; EAC Sale (2/1978), lot 17; EAC Sale (4/1997), lot 128; EAC Sale (4/2002), lot 198.  
From The Padula Family Foundation Collection.

1796 NC-4, B-23 Cent, VG8  
Reverse of 1795, 'Non-Collectible' Variety

- 4256** 1796 Reverse of 1795, NC-4, B-23, High R.5, VG8 PCGS. Our EAC grade: sharpness of VG7, net Good 5. Breen Die State I. Graded Good 4+ in the EAC catalog, this piece has faint hairlines on the very slightly granular surfaces that show only trivial handling marks. Slightly glossy dark olive-brown surfaces exhibit lighter brown on the devices. The date and all lettering is weak but complete.  
Ex: Jim Long; Dan Holmes; EAC Sale (5/2006), lot 127.  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35840 Base PCGS# 1401

1796 S-100, B-24 Cent, Good 6  
Reverse of 1797

- 4257** 1796 Reverse of 1797, S-100, B-24, R.5, Good 6 PCGS. Our EAC grade: sharpness of VG7, net Good 5. Dark-brown throughout with a few minor scrapes on the obverse, one under Liberty's nose toward the right rim. The reverse is weak along the lower edge.  
Ex: Early Copper Auction #9 (7/1993), lot 568; Mac MacDonald (Heritage (9/1997), lot 5098).  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35846 Base PCGS# 1407

1796 S-101, B-25 Cent, Fine Details  
Reverse of 1794, Early Die State

- 4258** 1796 Reverse of 1794, S-101, B-25, Low R.5 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net AG3. Early die state. Moderate green patina is visible on the lightly corroded surfaces of this cent that was likely buried for a period of time. A minor scrape is noted at the U in UNITED. All lettering is clear and the date is visible.  
Ex: Fred Borchardt (4/1988); J.R. Frankenfield (*Superior*, 2/2001), lot 319; EAC Sale (4/2002), lot 203.  
From The Padula Family Foundation Collection.

- 4259** 1796 Reverse of 1794, S-102, B-26, R.4, Good 4 PCGS. Our EAC grade: sharpness of Good 5, net Good 4. Smooth problem-free chocolate-brown surfaces are evident on this well-worn but highly attractive cent that shows only trivial handling marks.  
Ex: Thomas D. Reynolds (5/2013).  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35786 Base PCGS# 1404

- 4260** 1796 Reverse of 1794, S-102, B-26, R.4 — Damage — PCGS Genuine. AG Details. Our EAC grade: sharpness of VG7, net AG3. Breen Die State II, a later middle die state representative with a strong dent at 10 o'clock on the obverse that causes the flan to be slightly bent.  
Ex: Dr. Wallace Lee (*Superior*, 5/2003), lot 404.  
From The Padula Family Foundation Collection.

1796 Cent, Fine Details  
Scarce S-103, B-27 LIHERTY Variety

- 4261** 1796 LIHERTY, S-103, B-27, R.4 — Surfaces Smoothed — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. The LIHERTY die blunder is clearly visible with a full date and reverse legends on this lightly granular copper. Deep-brown fields contrast with tan highpoints for ample eye appeal.  
Ex: Clay Everhart; EAC Sale (4/2002), lot 205.  
From The Padula Family Foundation Collection.

1796 LIHERTY Draped Bust Cent, Good Details  
S-104, Die State II

- 4262** 1796 LIHERTY, S-104, B-45, R.3 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net Good 5. Breen Die State II. The popular LIHERTY variety, where the B was first entered upside down, then corrected. Several small planchet flaws or old digs exist on each side. The smoothly worn surfaces are faintly iridescent with an overall reddish-brown hue. The rims show intermittent weakness but the devices are mostly outlined, with slight blending at the bust drapery and the lower date numerals.  
Ex: Thomas Sebring; Bowers and Merena (3/1996), lot 102.  
From The Padula Family Foundation Collection.

1796 S-105, B-44 Cent, VF Details  
Scarce Reverse of 1797 Variety

- 4263** 1796 Reverse of 1797, S-105, B-44, Low R.5 — Edge Damaged — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net VG7. Breen Die State II. Abnormally high, compressed rims surround both sides of this granular, lightly porous S-105 cent. The 6 in the date is repunched north. The devices are well-defined for the grade, with fewer marks and less wear than expected, although the elevated rims show several minor irregularities. We note a small nick on the bust. Deep-brown shades surround medium-brown raised elements.  
Ex: John Keyes (4/2005).  
From The Padula Family Foundation Collection.

1796 S-106, B-14 Cent, AG Details  
Reverse of 1794

- 4264** 1796 Reverse of 1794, S-106, B-14, High R.4 — Environmental Damage — PCGS Genuine. AG Details. Our EAC grade: sharpness of VG8, net AG3. The sharpness is finer than the PCGS determination, in our opinion. Light roughness is evident on the slate surfaces with the right side of the reverse a trifle weak. All other design elements are visible with some of the lower hair detail evident.  
Ex: Evan Kopald (via Chris Victor-McCawley (4/2006)).  
From The Padula Family Foundation Collection.

1796 Large Cent, Fine Details  
Elusive S-107, B-13 Variety

- 4265** 1796 Reverse of 1794, S-107, B-13, R.5 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. Breen Die State I. One of the early "Straight Date" varieties, and a scarce one at that. Despite moderate corrosion throughout both sides, the devices are well outlined except for TES in STATES. A few small marks include a minor bump below 9 in the date. Glossy surfaces show chocolate-brown patina beneath deep-toned granularity.  
*Ex: James E. Long (1/2005).*  
*From The Padula Family Foundation Collection.*

1796 Draped Bust Cent, VF Details  
Reverse of 1794, S-108, B-12

- 4266** 1796 Reverse of 1794, S-108, B-12, R.4 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net Fine 12. The uniformly rough obverse and reverse surfaces preclude die state determination on this dark greenish-brown example. Both sides show considerable design definition with a somewhat glossy appearance with remarkably few visible marks.  
*Ex: Thomas D. Reynolds; Chris Victor-McCawley.*  
*From The Padula Family Foundation Collection.*

- 4267** 1796 Reverse of 1794, S-108, B-12, R.4, AG3 PCGS. Our EAC grade: sharpness of Good 6, net AG3. Breen Die State V. The chocolate and steel-brown surfaces are slightly glossy with minor greenish verdigris below the O in OF.  
*Ex: Dr. Wallace Lee (Superior, 5/2003), lot 407.*  
*From The Padula Family Foundation Collection.* NGC ID# 223W, PCGS# 35795 Base PCGS# 1404

1796 S-109, B-15 Cent, VG8  
Reverse of 1794, Nice Eye Appeal

- 4268** 1796 Reverse of 1794, S-109, B-15, R.3, VG8 PCGS. Our EAC grade: sharpness of Fine 12, net VG8. Breen Die State II. The reverse of this S-109 variety was used with five other 1796 Draped Bust obverse dies to produce six different die marriages. Earlier, this same reverse was used with a 1795-dated obverse to produce the famous 1795 Reeded Edge cents. This is a two-tone cent with dark brown fields and lighter tan devices. There are no imperfections of any serious nature, just the usual random circulation marks expected at this grade level. The reverse is weakly defined in relation to the obverse. The date or type collector would do well to consider this variety. It is relatively common in comparison to other 1796 Draped Bust cents, and the present example has excellent eye appeal.  
*Ex: Del Bland; Jack H. Robinson; Wes A. Rasmussen (Heritage, 1/2005), lot 3125.*  
*From The Padula Family Foundation Collection.* NGC ID# 223W, PCGS# 35798 Base PCGS# 1404

1796 Liberty Cap Cent, VF Details  
Reverse of 1794, S-110, B-16

- 4269** 1796 Reverse of 1794, S-110, B-16, R.3 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG10. Breen Die State V. L and I of LIBERTY are recut on the left uprights, and 96 of the date are joined. A large die chip beneath E in UNITED confirms the middle die state. Light porosity on the obverse includes a few rough patches in the right field. The reverse is evenly porous and reground. Steel-brown surfaces show strong central definition with slight weakness at the edges. A rim ding at 8 o'clock on the obverse is the primary die marker for this well-pedigreed piece.  
*Ex: Thomas D. Reynolds; Robinson S. Brown, Jr. (Superior, 1/1996), lot 151.*  
*From The Padula Family Foundation Collection.*

1796 S-111, B-17 Cent, VG Details  
Scarce Reverse of 1794 Variety

- 4270** 1796 Reverse of 1794, S-111, B-17, Low R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net VG7. A small die break beneath the E in UNITED helps identify this much better variety 1796 cent. All legends are crisp, but the dark brown fields are granular and contrast with the tan-brown high points.  
Ex: Thomas D. Reynolds (5/2013).  
From The Padula Family Foundation Collection.

- 4271** 1796 Reverse of 1794, S-111, B-17, Low R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Good 6, net AG3. The obverse exhibits light porosity with heavier porosity on the reverse. Light brown highlights appear on dark brown surfaces. A full date and readable legends are noted.  
Ex: EAC Sale (4/2002), lot 212.  
From The Padula Family Foundation Collection.

1796 NC-5, B-18 Cent, VG Details  
Just 10 Examples Known

- 4272** 1796 Reverse of 1794, NC-5, B-18, Low R.7 — Damaged — NGC Details. VG. Our EAC grade: sharpness of VG7, net AG3. There appears to be a die crack through the D of UNITED to the wreath that is an unlisted die state. This piece has the sharpness of VG, with corroded brick-red and olive-brown surfaces, and it is very slightly bent. This piece will rank seventh or eighth of the 10 known examples.  
Ex: EAC Sale (5/2012), lot 123; Greg Hannigan; Adam Mervis (Heritage, 1/2014), lot 2580.  
From The Padula Family Foundation Collection.

1796 S-112, B-19 Cent, Fine Details

- 4273** 1796 Reverse of 1794, S-112, B-19, High R.4 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. An early-to-mid die state, lacking the central die bulge seen in later states. A single outer leaf below IT in UNITED helps confirm the Sheldon-112 variety. Intense walnut-brown color covers the granular surfaces of this deeply patinated cent. Steel-brown high points help define the motifs.  
Ex: James E. Long (1/2008).  
From The Padula Family Foundation Collection.

- 4274** 1796 Reverse of 1794, S-112, B-19, High R.4 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 6, net Fair 2. Breen Die State IV. The upper wreath and ONE CENT are no longer visible, a combination of die bulge and wear. The obverse motifs are present and outlined, with the date visible although not sharp. Deep, ebony-brown and steel color covers the surfaces, which show moderate-to-heavy roughness from corrosion.  
Ex: Goldberg Coins (9/2008), lot 338.  
From The Padula Family Foundation Collection.

1796 S-113, B-41 Cent, AG3  
Prominent Die Failure

- 4275** 1796 Reverse of 1797, S-113, B-41, R.5, AG3 PCGS. Our EAC grade: sharpness of Good 6, net AG3. Breen Die State V, with heavy obverse die failure below the 17. This is the latest die state recorded in the Breen *Large Cent Encyclopedia*. Reddish chestnut-brown surfaces exhibit insubstantial roughness with trivial scratches at the lower left reverse.  
Ex: Rod Burrell (4/2007).  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35855 Base PCGS# 1407

1796 S-114, B-42 Cent, Good 4  
Early Die State

- 4276** 1796 Reverse of 1797, S-114, B-42, Low R.5, Good 4 PCGS. Our EAC grade: sharpness of VG8, net Good 4. Breen Die State I before any cracks or breaks developed on the obverse. Both sides of this dark olive cent exhibit fine granularity with a blended scrape down through the B of LIBERTY.  
Ex: EAC Sale (3/2001), lot 198.  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35858 Base PCGS# 1407

1796 Draped Bust Cent, Fair 2  
Reverse of 1797, S-115, B-43

- 4277** 1796 Reverse of 1797, S-115, B-43, R.3, Fair 2 PCGS. Our EAC grade: sharpness of AG3, net Fair 2. An arcing die crack through the date is still visible despite extensive circulation on this smooth, medium-brown Sheldon-115 example. The Breen Die State is indeterminate due to wear, but it is Die State IV or later with the date cracked. Few marks remain on the well-worn surfaces, which lack any remnants of LIBERTY on the obverse. The reverse is worn smooth on its lower half.  
Ex: James E. Long (1/2005).  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35861 Base PCGS# 1407

1796 S-116, B-36 Cent, Fine Details  
Reverse of 1795

- 4278** 1796 Reverse of 1795, S-116, B-36, Low R.5 — Surfaces Smoothed — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. Breen Die State II, with clash marks above the hair ribbon and at the neck. Glossy olive-brown surfaces result from careful smoothing on each side to diminish the appearance of porosity or other imperfections, resulting in a pleasing appearance.  
Ex: Homer K. Downing; Robinson S. Brown, Jr.; Chris Victor-McCawley (4/2015).  
From The Padula Family Foundation Collection.

- 4279** 1796 Reverse of 1795, S-116, B-36, Low R.5, Good 6 PCGS. Our EAC grade: sharpness of Good 6, net AG3. Rich olive-brown surfaces with a full date and LIBERTY, and with nearly complete reverse lettering. This is an elusive variety that is typically encountered in low grades.  
Ex: EAC Sale (4/1992), lot 192; Mac MacDonald (Heritage, 9/1997), lot 5106.  
From The Padula Family Foundation Collection. NGC ID# 223W, PCGS# 35834 Base PCGS# 1401

1796 S-117, B-37 Cent, Good Details  
Early Die State

- 4280** 1796 Reverse of 1797, S-117, B-37, High R.5 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net AG3. Early die state. Tan and steel-brown surfaces exhibit emerald corrosion with fine diagonal scratches on the obverse.  
Ex: Bowers & Ruddy (9/19/1975); Dr. Wallace Lee (Superior, 5/2003), lot 413.  
From The Padula Family Foundation Collection.

1796 S-118, B-39 Cent, Good Details  
Reverse of 1797

- 4281** 1796 Reverse of 1797, S-118, B-39, High R.5 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 5, net AG3. The die state is undetermined. This important cent has light olive and steel-brown surfaces with fine, uniform porosity on both sides.  
Ex: Christopher B. Young; COL Steven Ellsworth (4/2005); Butternut.  
From The Padula Family Foundation Collection.

1796 S-119, B-40 Cent, Good 6  
Reverse of 1797

- 4282** 1796 Reverse of 1797, S-119, B-40, R.3, Good 6 PCGS. Our EAC grade: sharpness of VG8, net Good 6. The Breen die state is uncertain on this piece that exhibits light olive and chestnut surfaces. Slight surface roughness is evident but the overall appearance is quite acceptable for a cent of this grade.  
Ex: Chris Victor-McCawley; COL Steven Ellsworth; Butternut (4/2014).  
**From The Padula Family Foundation Collection.** NGC ID# 223W, PCGS# 35870 Base PCGS# 1407

- 4283** 1796 Reverse of 1797, S-119, B-40, R.3 — Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Good 6, net Fair 2. Glossy, medium-brown surfaces are finely granular with smoothly worn devices. All of the lettering and motifs are fully visible, but somewhat blurry from a combination of circulation and the microporous surfaces. The PCGS 'Damage' designation relates to a heavy, bar-like indent across Liberty's portrait from nose to shoulder, and a resultant bulge on the reverse.  
Ex: Douglas Bird (5/2006).  
**From The Padula Family Foundation Collection.**

1797 NC-1, B-1 Cent, Good Details  
Eight or Nine Known

- 4284** 1797 Reverse of 1795, Plain Edge, S-NC-1, B-1, R.7 — Rim Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net AG3. Eight examples of the 1797 NC-1 cent appear in the Noyes Census, and this example is one of the two non-photographed pieces, or it is a ninth known example. This piece has pleasing light to medium olive surfaces with a rim dent at the upper reverse that slightly disfigures the obverse below the date. LIBERTY is bold and the date is readable, with most of the reverse design clear. This piece might be the example that Noyes calls Good 5 sharpness, net AG3, and fifth finest known.  
Ex: Chris Victor-McCawley.  
**From The Padula Family Foundation Collection.**

1797 S-120a, B-2a Cent, Fine 15  
Reverse of 1795, Plain Edge

- 4285** 1797 Reverse of 1795, Plain Edge, S-120a, B-2a, R.3, Fine 15 PCGS. Our EAC grade: sharpness of VF20, net Fine 12. Breen Die State III, and here struck slightly off center toward 1:30, although not enough so to call a mint error. Glossy surfaces exhibit intermingled chestnut-brown and steel, with olive-brown on the reverse.  
Ex: Norm Pullen (4/1972); John D. Wright; EAC Sale (4/2009), lot 97.  
**From The Padula Family Foundation Collection.** NGC ID# 2U55, PCGS# 35894 Base PCGS# 1419

1797 S-120b, B-2b Cent, XF Details  
Gripped Edge

- 4286** 1797 Reverse of 1795, Gripped Edge, S-120b, B-2b, R.2 — Environmental Damage — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF30, net Fine 12. An intermediate die state, this piece offers sharp design definition with finely granular olive surfaces. A small obverse rim nick is noted at 1:30. The surface roughness also obscures some edge details but enough remains for positive identification.  
Ex: Southern Coin; COL Steven Ellsworth; Butternut (11/2009).  
**From The Padula Family Foundation Collection.**

1797 S-121a, B-3a Cent, Good 4  
Subject of Mixed Opinions

- 4287** 1797 Reverse of 1795, Plain Edge, S-121a, B-3a, High R.6, Good 4 PCGS. Our EAC grade: sharpness of Good 6, net AG3. The Plain Edge S-121a sub-variety presents collectors with a challenge, as the variety has long been controversial. Noted large cent expert John D. Wright, whose opinion the cataloger values highly, held this coin in his collection as an S-121a since he acquired the piece in April 1981. Chris Victor-McCawley sold the coin to Mr. Padula as an S-121a. William C. Noyes, on the other hand, believes the coin is an altered S-121b. The date and LIBERTY are both fully visible, while the reverse retains most of the legends and wreath. Greenish steel-brown surfaces exhibit microscopic corrosion, with light brown on the bust of Liberty.  
*Ex: John D. Wright; Chris Victor-McCawley (1/2010).*  
**From The Padula Family Foundation Collection.** PCGS# 35897 Base PCGS# 1419

1797 S-121b, B-3b Cent, VF Details  
Gripped Edge

- 4288** 1797 Reverse of 1795, Gripped Edge, S-121b, B-3b, R.3 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State IV with multiple cracks in the left obverse field. Greenish-steel-brown surfaces exhibit light roughness, while the date, lettering, and main devices are all bold.  
*Ex: Jack Beymer (1/1997).*  
**From The Padula Family Foundation Collection.**

1797 S-122, B-9 Cent, VG10  
Tied for Sixth Finest

- 4289** 1797 Reverse of 1797, Stems, S-122, B-9, High R.5, VG10 PCGS. Our EAC grade: sharpness of Fine 12, net VG10. Breen Die State I with no reverse cracks. Hard and pleasing steel and chocolate-brown surfaces exhibit bluish overtones on both sides with scattered pit marks at the upper obverse. Our EAC grade agrees with Bob Grellman's view in the Holmes catalog, and places this recent discovery in a tie for sixth finest in both the Bland and Noyes Condition Census records.  
*Ex: Chris Victor-McCawley (1/5/2005); Daniel W. Holmes, Jr. (Goldberg Coins, 9/2009), lot 214.*  
**From The Padula Family Foundation Collection.** NGC ID# 2242, PCGS# 35906 Base PCGS# 1422

1797 NC-2, B-10 Large Cent, Good Details

- 4290** 1797 Reverse of 1797, Stems, NC-2, B-10, R.6 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 6, net AG3. Apparently an early die state although the surface corrosion prevents an exact determination. Both sides have intermingled medium brown and deep green patina. About 20 examples of this *Now-Collectible* variety are known.  
*Ex: Scott Barrett; Thomas D. Reynolds (5/2012).*  
**From The Padula Family Foundation Collection.**

1797 NC-3, B-11 Cent, Fine Details  
Condition Census

- 4291** 1797 Reverse of 1797, Stems, NC-3, B-11, Low R.6 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG8, net Good 6. Breen Die State I, the usual die state for this elusive variety, struck before the reverse die cracked and eventually broke. The dark olive surfaces are slightly glossy, with good overall eye appeal. A few insignificant marks include a trivial obverse rim nick at 2 o'clock. There is no reason for the collector to wait for a nicer example, as the finest example outside of the ANS grades just one point finer according to Bill Noyes.  
*Ex: Goldberg Coins (1/2011), lot 822; Chris Victor-McCawley (1/2011).*  
**From The Padula Family Foundation Collection.**

1797 S-123, B-12 Cent, VF20  
Early Die State

- 4292** 1797 Reverse of 1797, Stems, S-123, B-12, R.4, VF20 PCGS. Our EAC grade: sharpness of VF25, net Fine 15. Breen Die State II, a scarce early die state of this variety associated with the famed Nichols Find of Mint State 1796 and 1797 large cents. This piece has splendid olive-brown and chestnut surfaces with exceptional eye appeal. A few trivial marks on each side are inconsequential. Ex: Chris Victor-McCawley (11/2010).  
**From The Padula Family Foundation Collection.** NGC ID# 2242, PCGS# 35909 Base PCGS# 1422

1797 NC-5, B-13 Cent, VG Details  
Bland's 12th Finest Known

- 4293** 1797 Reverse of 1797, Stems, NC-5, B-13, R.6 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 6. This variety, NC-5, was the last of the NC varieties of 1797 recorded by Dr. Sheldon in *Early American Cents*. Numismatist A.C. Gies was the first to identify this variety in 1935, and from that time until the 1958 publication of *Penny Whimsy* was published, only eight examples had been attributed. Today, nearly 60 years after *Penny Whimsy* was published, there are approximately 25 to 30 examples of NC-5 known, meaning one discovery about every three years. The Padula specimen is considered Good 6 and 12th finest known according to Del Bland, or Good 4 and 15th best per Bill Noyes. In either scenario, this is an important opportunity for large cent specialists. Pleasing olive-brown on the obverse, with some hints of steel color, and bright reddish-orange patina. The reverse is similar but with more generous portions of dark steel color. Ex: Robert C. Sheffer (Glenville Coins, 2/1984); James E. Long (3/7/1984); Jules Reiver (Heritage, 1/2006), lot 19353; Daniel W. Holmes (Goldberg Coins, 9/2009), lot 258.  
**From The Padula Family Foundation Collection.**

1797 S-124, B-14 Cent, VG Details  
Late Die State

- 4294** 1797 Reverse of 1797, Stems, S-124, B-14, High R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 4. Breen Die State VI, or possibly State VII, with severe buckling that obscures OF A and the upper right wreath. Chestnut-brown and steel surfaces exhibit greenish patina and patches of corrosion on the reverse. The low grade and rough surfaces are typical of the variety. Ex: Joe Tomasko; Ed Kucia (9/3/1988); Daniel W. Holmes, Jr.; San Diego Cent Jar & Table Top Collections; Chris Victor-McCawley; Thomas D. Reynolds (4/2010).  
**From The Padula Family Foundation Collection.**

1797 S-125, B-15 Cent, VF Details  
Middle Die State

- 4295** 1797 Reverse of 1797, Stems, S-125, B-15, R.5 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF30, net VG10. Breen Die State II, with a bulge in the right obverse field through the drapery. Deep olive surfaces exhibit fine, uniform porosity on both sides. This piece is tied for 11th finest per the Bland Condition Census, and it is tied for 13th finest in the Noyes Census, although not specifically recorded in either list. Ex: EAC Sale (4/2009), lot 100.  
**From The Padula Family Foundation Collection.**

1797 S-126, B-16 Cent, VG10  
Early Die State

- 4296** 1797 Reverse of 1797, Stems, S-126, B-16, R.3, VG10 PCGS. Our EAC grade: sharpness of VG10, net Good 6. Breen Die State III, with a crack from the rim to the throat. Rather glossy steel-brown surfaces exhibit lighter olive devices with only the slightest surface roughness and trivial imperfections. Ex: Irving Goodman Collection (Superior, 5/1996), lot 318.  
**From The Padula Family Foundation Collection.** NGC ID# 2242, PCGS# 35918 Base PCGS# 1422

1797 S-127, B-17 Cent, Fine Details  
From the Daniel W. Holmes Collection

- 4297** 1797 Reverse of 1797, Stems, S-127, B-17, R.4 — Repaired — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG10, net Good 6. Breen Die State VI, the latest recorded with minor buckling and cracks. Both sides of this olive and chocolate-brown cent have light scratches, some that have been smoothed away through careful tooling. Called VG8 Plus in the Holmes catalog, a trifle too high in our opinion.  
*Ex:* Commercial Coin Co. (Camp Hill, Pennsylvania, 10/1976); John D. Wright (1/18/2006); Bob Grellman and Chris Victor-McCawley; Daniel W. Holmes, Jr. (Goldberg Coins, 9/2009), lot 232.  
*From The Padula Family Foundation Collection.*

1797 S-128, B-23 Cent, Fine 12  
Stems, Reverse of 1797

- 4298** 1797 Reverse of 1797, Stems, S-128, B-23, R.3, Fine 12 PCGS. Our EAC grade: sharpness of VG10, net VG8. Breen Die State IV. The date crowds the portrait, and M is struck over an errant E of AMERICA. This is a uniformly deep-brown example with pleasing lightly marked surfaces and nice definition for the assigned grade. We note a pair of small obverse pinpricks and a tiny, oval void near D in UNITED.  
*Ex:* Douglas F. Bird (4/2010).  
*From The Padula Family Foundation Collection.* NGC ID# 2242, PCGS# 35924 Base PCGS# 1422

1797 S-129, B-24 Cent, Fine Details  
Near-Condition Census

- 4299** 1797 Reverse of 1797, Stems, S-129, B-24, R.5 — Tooled — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG10, net VG7. Breen Die State I, with no evidence of the obverse die cracks. Glossy steel-brown surfaces exhibit extremely fine granularity on both sides of this near-Condition Census example that is recorded as the 14th finest example in the Noyes Condition Census. Noyes grades this piece VG7.  
*Ex:* Carvin Goodridge (2/12/1982); Jack H. Robinson (Superior, 1/1989), lot 254; J.R. Frankenfield (Superior, 2/2001), lot 358; Terry Denman; Chris Victor-McCawley (11/2009).  
*From The Padula Family Foundation Collection.*

1797 S-130, B-25 Cent, VF Details  
Late Die State

- 4300** 1797 Reverse of 1797, Stems, S-130, B-25, R.2 — Tooled — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net Fine 12. Breen Die State IV or V, with the break behind the head solid to the rim. Mahogany and olive-brown surfaces exhibit scattered marks with no apparent tooling on either side.  
*Ex:* Chris Victor-McCawley (2/2010).  
*From The Padula Family Foundation Collection.*

1797 S-131, B-27 Cent, VG Details  
No Stems, Reverse of 1797

- 4301** 1797 Reverse of 1797, No Stems, S-131, B-27, R.2 — Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 6. Breen Die State III. A solid, crooked die break behind the ribbon and no stems on the wreath are keys for Sheldon-131. A leaf tip points near the upright of D in UNITED. The dies on this example were misaligned with resultant weakness along the right edge of both obverse and reverse. Numerous small marks and lines dot the surfaces. Glossy, rich-brown surfaces add substantial eye appeal.  
*Ex:* Springfield Collection (Bowers and Ruddy, 12/1981), lot 5050.  
*From The Padula Family Foundation Collection.*

1797 S-132, B-28 Cent, VF Details  
Scarce No Stems Variety

- 4302 1797 Reverse of 1797, No Stems, S-132, B-28, High R.5 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net Good 5. Breen Die State I. Steel-brown and muted tan surfaces exhibit moderate corrosion on both sides with other trivial flaws. The majority of survivors from this die pair have imperfections far worse than on this example. In fact, Walter Breen wrote that the variety is “often banged up or even mutilated.”  
Ex: Martin Carpenter; EAC Sale (5/2008), lot 271; Goldberg Coins (9/2008), lot 335.  
From The Padula Family Foundation Collection.

- 4303 1797 Reverse of 1797, No Stems, S-132, B-28, High R.5 — Bent — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG7, net AG3. Breen Die State undetermined. This piece is slightly bent, and exhibits intermingled steel, rose, and chocolate-brown color on its rough surfaces.  
Ex: Goldberg Coins (9/2008), part of lot 338.  
From The Padula Family Foundation Collection.

1797 S-133, B-29 Cent, VF Details  
Important Stemless Variety

- 4304 1797 Reverse of 1797, No Stems, S-133, B-29, R.5 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net VG8. Breen Die State III, showing the five-dentil rim break over IC on the reverse, but without evidence of the V-shaped obverse break between RT. Moderate corrosion appears on the olive and steel-brown surfaces with an old scratch along the jaw and neck.  
Ex: Goldberg Coins (5/2009), lot 171.  
From The Padula Family Foundation Collection.

1797 S-134, B-4 Cent, VF Details

- 4305 1797 Reverse of 1797, Stems, S-134, B-4, R.4 — Scratch — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State I, with no evidence of the reverse crack through the E of AMERICA. The scratch mentioned by PCGS is not apparent. The steel-brown and olive surfaces exhibit moderate corrosion that has been smoothed on the obverse.  
Ex: Carl Senn; Mac MacDonald (Heritage, 9/1997), lot 5106.  
From The Padula Family Foundation Collection.

1797 S-135, B-5 Cent, XF Details

- 4306 1797 Reverse of 1797, Stems, S-135, B-5, R.3 — Graffiti — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF20, net Good 6. Breen Die State III. The chestnut, mahogany, and steel obverse has been lightly smoothed to diminish corrosion, and exhibits several long, thin scratches in various orientations. The tan and steel-brown reverse is lightly corroded.  
Ex: Chris Victor-McCawley (4/2010).  
From The Padula Family Foundation Collection.

1797 S-136, B-7 Cent, XF Details  
Blunt Strike, Choice Surfaces

- 4307 1797 Reverse of 1797, Stems, S-136, B-7, R.3 — Altered Surfaces — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF35, net VF30. Breen Die State V, the latest described in that reference. This piece has chestnut brown surfaces with evidence of blunt striking on the hair ribbon and on the reverse that is apparently the reason PCGS assigned the “altered surfaces” designation. Called VF35 net 30 in the 2010 EAC catalog, and we agree completely. Many would call the surfaces choice, and in no way are they altered.  
Ex: EAC Sale (4/2010), lot 197.  
From The Padula Family Foundation Collection.

**1797 S-137, B-8 Cent, XF Details  
Tied for Ninth Finest per Bland**

- 4308** 1797 Reverse of 1797, Stems, S-137, B-8, R.2 — Environmental Damage — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF35, net VF30. Breen Die State II with no cracks and only the slightest bulge at ICA. While bluntly struck, this piece has outstanding tan and steel-brown surfaces with myriad planchet marks that were not struck out, but with few post-strike imperfections. The “environmental damage” is nothing more than maroon patina. Conservatively graded VF20 by Bill Noyes in the 1989 EAC catalog and called VF30 in the Halpern catalog. Del Bland grades this piece VF35 and tied for ninth finest, while Noyes omitted this piece from his 2005 “Official” Condition Census. Ex: C. Douglas Smith; Herman Halpern (*Stack’s* 3/1988), lot 138; Don Valenziano, Jr.; EAC Sale (4/1989), lot 82; Fred Lochary; Thomas D. Reynolds (4/2010).

*From The Padula Family Foundation Collection.*

**1797 S-138, B-20 Cent, Fine Details  
Reverse Die Bulge**

- 4309** 1797 Reverse of 1797, Stems, S-138, B-20, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. Middle die state. The later die states exhibit moderate to heavy die sinking on the reverse, resulting in a bulged surface at the upper right. Myriad trivial nicks cover both sides of this chocolate-brown cent. Ex: EAC Sale (5/2013), lot 166.

*From The Padula Family Foundation Collection.*

- 4310** 1797 Reverse of 1797, Stems, S-138, B-20, R.1 — Repaired — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net VG7. Late die state, with heavy bulges on the reverse at S OF A and the leaves on the left side of the wreath. The steel-brown surfaces are lightly abraded and the date and legends are bold in areas not affected by the bulges.

Ex: Rod Burrress (12/2006).

*From The Padula Family Foundation Collection.*

**1797 S-139, B-21 Cent, VF Details  
Terminal Die State**

- 4311** 1797 Reverse of 1797, Stems, S-139, B-21, R.1 — Cleaned — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net Fine 15. Breen Die State V. This is the latest die state recorded in the Breen reference, with advanced die cracks and obverse swelling. Minor corrosion appears on the still attractive olive-brown surfaces.

Ex: Dr. Robert Shalowitz; Jack Beymer; Ed Kucia (9/3/1988); Daniel W. Holmes, Jr. (*Goldberg Coins*, 9/2009), lot 252.

*From The Padula Family Foundation Collection.*

**1797 S-140, B-22 Cent, VG10  
Reverse of 1797, Stems**

- 4312** 1797 Reverse of 1797, Stems, S-140, B-22, R.1, VG10 PCGS. Our EAC grade: sharpness of Fine 12, net VG8. Breen Die State IV. Several die bulges represent the middle die state — one at the drapery extends above and below the bust tip, another swells the left obverse field, and yet another obscures the lower half in OF on the reverse. An old dig at L in LIBERTY is of note. The deep-brown surfaces are smooth and glossy.

Ex: Jack Beymer (1/1997).

*From The Padula Family Foundation Collection.* NGC ID# 2242, PCGS# 35951 Base PCGS# 1422

**1797 S-141, B-18 Cent, VF Details**

- 4313** 1797 Reverse of 1797, Stems, S-141, B-18, R.4 — Damaged, Repaired — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net Fine 12. Breen Die State III, with a straight crack from the border to the left ribbon end, the wreath, and the C in CENT. This olive-green example has been bent, and the surfaces are lightly burnished, especially noticeable on the reverse.

Ex: Chris Victor-McCawley (4/2010).

*From The Padula Family Foundation Collection.*

1797 S-142, B-32 Cent, Fine Details

- 4314** 1797 Reverse of 1797, Stems, S-142, B-32, High R.5 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. The surface quality prevents a die state determination of this olive and chocolate-brown cent. The design motifs are smooth with roughness in the fields on each side. A minuscule rim nick is noted over the E in LIBERTY. Ex: *Walter Reed (1/17/2004)*; *COL Steven Ellsworth*; *EAC Sale (4/2009)*, lot 110.  
*From The Padula Family Foundation Collection.*

1797 S-143, B-31 Cent, Fine Details  
No Stems

- 4315** 1797 Reverse of 1797, No Stems, S-143, B-31, R.5 — Cleaned — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. Microscopic hairlines suggest that this piece has been cleaned and recolored. Pleasing light brown surfaces with a few scattered marks on each side. This is an attractive example and the variety is challenging, regardless of condition. Ex: *Henry Hettger*; *Gary Ruttenberg (McCawley & Grellman, 8/1996)*, lot 148; *Thomas D. Reynolds (5/2013)*.  
*From The Padula Family Foundation Collection.*

- 4316** 1797 Reverse of 1797, No Stems, S-143, B-31, R.5 — Environmental Damage — PCGS Genuine. AG Details. Our EAC grade: sharpness of AG3, net Fair 2. Moderate corrosion appears on the steel and tan surfaces. Ex: *Goldberg Coins (9/2008)*, part of lot 338.  
*From The Padula Family Foundation Collection.*

1798 S-144, B-1 Cent, Fine Details

- 4317** 1798 First Hair Style, S-144, B-1, High R.5 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VF20, net Good 5. Breen Die State III. An olive and steel-brown cent, this piece has scrapes across the cheek, nose, and neighboring field, with heavy digs and dents at the lower right reverse. This piece would be third finest if the surfaces with smooth and problem free. As it is, this S-144 cent is tied for 18th best of the variety. Ex: *Thomas D. Reynolds (3/21/1991)*; *Daniel W. Holmes, Jr.; Goldberg Coins (2/2008)*, lot 1154.  
*From The Padula Family Foundation Collection.*

1798 S-145, B-2 Cent, Fine Details  
First Hair Style

- 4318** 1798 First Hair Style, S-145, B-2, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State V. Slightly glossy chocolate and olive-brown surfaces are finely granular, with some thin scratches behind the hair and a few specks of verdigris. The date is bold and all lettering is legible. Ex: *Thomas Wolf; Goldberg Coins (2/2008)*, lot 1156.  
*From The Padula Family Foundation Collection.*

1798 S-146, B-3 Cent, VG8

- 4319** 1798 First Hair Style, S-146, B-3, Low R.5, VG8 PCGS. Our EAC grade: sharpness of VG10, net VG7. A late die state, although the specific die state remains undetermined. A pleasing piece, this cent exhibits tan, steel, and olive-brown surfaces with a few trivial red corrosion spots. Ex: *Douglas F. Bird (5/2008)*.  
*From The Padula Family Foundation Collection.* NGC ID# 2244, PCGS# 36017 Base PCGS# 1431

1798 S-147, B-4 Cent, Good 6

- 4320** 1798 First Hair Style, S-147, B-4, Low R.5, Good 6 PCGS. Our EAC grade: sharpness of VG8, net Good 5. Breen Die State I, the usual die state of this variety. Both sides display intermingled emerald-green, chestnut, and reddish-tan color. The date and LIBERTY are bold while the reverse lettering lacks some detail.  
Ex: EAC Sale (5/2006), lot 146.  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36020 Base PCGS# 1431

1798 Cent, S-148, B-11, XF45  
First Hair Style

- 4321** 1798 First Hair Style, S-148, B-11, R.2, XF45 PCGS. Our EAC grade: sharpness of XF40, net VF25. Breen Die State I. The Horned 9 variety with a spur from the back of the 9 in the date. This Style One Hair cent has olive-brown fields and deeper lavender toning on the motifs. A lens reveals distributed small marks with the most evident at 9:30 on the reverse.  
Ex: Heritage (7/2013), lot 4629.  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36023 Base PCGS# 1431

- 4322** 1798 First Hair Style, S-148, B-11, R.2, Good 4 PCGS. Our EAC grade: sharpness of VG7, net Good 4. A spur on 9 in the date is visible on this solid Good 4 example. Some fine granularity exists on both sides, yet most of the devices are present. Some merging of the reverse legend at AMERICA and a nick at the eyebrow are of minor importance at the assigned grade.  
Ex: Thomas Sebring; Bowers and Merena (3/1996), lot 170.  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36023 Base PCGS# 1431

- 4323** 1798 First Hair Style, S-148, B-11, R.2 — Scratch — PCGS Genuine. VG Details. Our EAC grade: sharpness of Good 6, net AG3. Die State indeterminate due to heavy corrosion in the fields, with some pitting around LIBERTY. All legends are clear, including the fraction, and the central devices are boldly outlined. The elevated portrait and wreath show smooth medium brown surfaces. The strike is well-centered, and wear is even.  
Ex: Douglas F. Bird (5/2013).  
From The Padula Family Foundation Collection.

1798 S-149, B-5 Cent, VG Details  
Elusive Die Marriage

- 4324** 1798 First Hair Style, S-149, B-5, R.5 — Tooled — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 5. Breen Die State III. Greenish steel-brown surfaces are finely porous with a small mark in Liberty's drapery.  
Ex: Del Bland (6/1977); G. Lee Kuntz (Superior, 10/1991), lot 169; Early Copper Auction #11 (1/1994), lot 177; Superior (9/1997), lot 225; COL Steve Ellsworth; Clay Everhart (7/1998); James E. Long; Clay Everhart (11/2004).

1798/7 S-150, B-6 Cent, VG Details

- 4325** 1798/7 First Hair Style, Overdate, S-150, B-6, R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG7, net Good 6. Breen Die State II. Despite the PCGS description, this semi-glossy overdate cent has pleasing tan and greenish-steel surfaces.  
Ex: Douglas F. Bird (4/2007).  
From The Padula Family Foundation Collection.

1798/7 S-151, B-7 Cent, VG Details  
Clear Overdate, Late Die State

- 4326** 1798/7 First Hair Style, Overdate, S-151, B-7, R.3 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 5. Breen Die State VIII. The late die state, with die buckle in the left obverse field accompanied by a die cracks in the same area. The reverse is heavily cracked as well. Struck slightly off-center as often seen on Sheldon-151, here to the northeast with wide dentils at the lower edge. A tiny rim bump at 3 o'clock and some rim damage between STATES and OF do not detract from the overall appeal.  
Ex: Rod Burrell (12/2006).  
From The Padula Family Foundation Collection.

1798/7 S-152, B-13 Cent, Good 6  
Second Overdate Obverse

- 4327 1798/7 First Hair Style, Overdate, S-152, B-13, R.2, Good 6 PCGS. Our EAC grade: sharpness of VG8, net Good 5. Breen Die State II. Light-brown and steel patina alternates with some deep-gray build up, accompanied by granularity and minor pitting. The left serif of an underdigit 7 protrudes from the upper-left curve of 8 on the S-152 variety, confirmed by a blundered E in AMERICA. Ex: Thomas Sebring; Bowers and Merena (3/1996), lot 170. From The Padula Family Foundation Collection. NGC ID# 2245, PCGS# 35999 Base PCGS# 1440

1798 NC-1, B-14 Cent, Fine Details  
Only Seven Known

- 4328 1798 First Hair Style, NC-1, B-14, R.7 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. This example, the seventh known 1798 NC-1 cent, was a recent discovery prior to the 2009 EAC sale. While both sides are significantly corroded, the overall appearance is acceptable with steel and olive-brown toning. The date and legends are readable with excellent detail of the devices. Ex: EAC Sale (4/2009), lot 141; Chris Victor-McCawley (6/2009). From The Padula Family Foundation Collection.

1798 S-153, B-12 Cent, VF Details  
First Hair Style

- 4329 1798 First Hair Style, S-153, B-12, R.3 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net VG10. Breen Die State V with a crack and bulge in the left obverse field. This deep olive and tan cent exhibits minor verdigris with a small planchet indentation (as struck) over STA. Ex: Lawrie Rhoads Collection (Goldberg Coins, 1/2012), lot 221; Chris Victor-McCawley. From The Padula Family Foundation Collection.

- 4330 1798 First Hair Style, S-153, B-12, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 4. Die State indeterminate due to heavy corrosion. The design elements show good detail and the legends are readable. The borders are well-defined with some dentils showing. Ex: Thomas Sebring; Bowers and Merena (3/1996), lot 170. From The Padula Family Foundation Collection.

1798 S-154, B-8 Cent, VF Details  
First Hair Style

- 4331 1798 First Hair Style, S-154, B-8, High R.4 — Devices Outlined — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 12, net Good 5. Mid-to-late die state, with buckling on the reverse at ED and AM. The date and lettering are bold, except for the areas affected by the buckling. The portrait has been outlined in places and some deep scratches are evident in the right obverse field. Ex: Jules Reiver (Heritage, 1/2006), lot 28053. From The Padula Family Foundation Collection.

1798 S-155 Cent, XF Details  
Reverse of 1795

- 4332 1798 Reverse of 1795, S-155, B-9, R.3 — Environmental Damage — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF30, net Fine 12. Breen Die State VI with all die cracks advanced. Despite its flaws, this piece has a good overall appearance. Minor corrosion is evident on the maroon and chocolate-brown surfaces with diagonal hairline scratches on the obverse. Ex: Superior Galleries (1/1983), lot 17; Charles Coin Company (2/1983); G. Lee Kuntz (Superior, 10/1991), lot 176; Gilbert Steinberg Collection (Superior, 9/1996), lot 1633. From The Padula Family Foundation Collection.

1798 S-156, B-10 Cent, VG8  
Rare Reverse of 1795 Variety

- 4333** 1798 Reverse of 1795, S-156, B-10, High R.5, VG8 PCGS. Our EAC grade: sharpness of VG10, net VG8. Breen Die State II with a trace of the crack from the obverse rim at 5 o'clock to the drapery. This piece has smooth and pleasing light brown surfaces and shows slight evidence of an uneven strike with weakness at the upper right obverse and lower right reverse. Among the top dozen examples known. Del Bland grades this piece VG8 and tied for 11th finest in his Condition Census. Bill Noyes assigns a lower VG7 grade, but a higher Census ranking at eighth finest known. This quality of this piece is well above average for the variety.

1798 S-157, B-15 Cent, VF Details  
First Hair Style

- 4334** 1798 First Hair Style, S-157, B-15, R.2 — Repaired — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net VG8. The dark steel-brown surfaces are lightly corroded and show a few small pits before Liberty's throat, in her hair, and the left obverse field. The date and all lettering remain legible, but ONE CENT is weak.  
*Ex:* Jules Reiver (Heritage, 1/2006), lot 28053.  
**From The Padula Family Foundation Collection.**

1798 NC-2, B-16 Cent, Good 4  
Sixth Finest of Seven Known

- 4335** 1798 First Hair Style, NC-2, B-16, High R.7, Good 4 NGC. Our EAC grade: sharpness of VG7, net Good 4. The late die state of NC-2, with rim breaks over R and Y of LIBERTY, connected by a heavy die crack through the base of the T. Until recently, this was the only known die state for the variety, represented by five pieces that were located between the initial 1931 discovery and 1978. Since then, a perfect dies piece was discovered in 2008, and an intermediate sale, offered elsewhere in the present sale, was discovered earlier this year.  
This important example has pleasing two-tone surfaces with steel-brown fields, and lighter chestnut-brown devices. The surfaces show faint roughness, but are exceptionally nice for the grade. This is the sixth finest of seven known specimens.  
*Ex:* Thomas D. Reynolds (12/2003); Phillip Clover Collection (Heritage, 9/2012), lot 3174; Greg Hannigan (EAC Bourse, 5/2013).

1798 S-158, B-17 Cent, VF Details  
First Hair Style

- 4336** 1798 First Hair Style, S-158, B-17, R.4 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net VG10. Breen Die State II or III, struck before the vertical obverse die cracks appeared. Considerable sharpness is evident on this greenish-steel brown cent that exhibits lightly corroded surfaces.  
Ex: Douglas F. Bird (5/2006).  
From The Padula Family Foundation Collection.

1798 S-159, B-18 Cent, Fine Details  
First Hair Style

- 4337** 1798 First Hair Style, S-159, B-18, R.3 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG10, net Good 5. One of the long vertical die cracks has a horizontal extension through LI in LIBERTY. The olive and steel-brown surfaces are moderately abraded and the date and legends are all legible. Some deep scratches through ONE CENT constitute the noted damage.  
Ex: Thomas Sebring; Bowers and Merena (3/1996), lot 170.  
From The Padula Family Foundation Collection.

1798 S-160, B-21 Cent, VG Details  
From the Reiver Collection

- 4338** 1798 First Hair Style, S-160, B-21, R.3 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 5. This dark-brown coin with lighter highpoints has uneven, advanced pitting and corrosion that prevents die state determination. The major design details are clear on the obverse, with the reverse slightly better and showing about one-quarter of the dentilation. The bust of Liberty is smooth, except for the deepest hair details.  
Ex: W.E. Johnson (1960); John A. Schreuder; Del Bland (5/27/1970); Jules Reiver Collection (Heritage, 1/2006), lot 19384; COL Steven Ellsworth; Butternut (5/2006).

1798 S-165, B-31 Cent, VG10  
Second Hair Style, Large 8

- 4344** 1798 Second Hair Style, S-165, B-31, R.4, VG10 PCGS. Our EAC grade: sharpness of Fine 12, net VG8. Middle die state. The glossy medium brown surfaces show deep olive-brown patina around the devices of this smooth cent. The date is bold and the lettering is mostly complete.  
Ex: EAC Sale (4/2007), lot 225.  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36065 Base PCGS# 1434

---

1798 S-166, B-32 Cent, VG Details  
Constant Reverse Die Crack

- 4345** 1798 Second Hair Style, S-166, B-32, R.1 — Altered Surfaces — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net VG8. Breen Die State II. The reverse is rotated about 30 degrees counterclockwise on this pleasing cent. Rich steel-brown and chocolate surfaces host a number of handling marks and minor roughness.  
Ex: EAC Sale (5/2006), lot 161.  
From The Padula Family Foundation Collection.

---

1798 S-167, B-33 Cent, VF Details  
Second Hair Style

- 4346** 1798 Second Hair Style, S-167, B-33, R.1 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net VF20. Breen Die State VI with the obverse crack from the rim to Liberty's eye extending through the hair to the ribbon. Pleasing dark olive surfaces with very slight roughness visible only with a glass.  
Ex: Chris Victor-McCawley (EAC bourse, 5/2008).  
From The Padula Family Foundation Collection.

- 4347** 1798 Second Hair Style, S-168, B-27, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VF25, net Good 6. Considerable detail is visible despite the heavily corroded olive-brown surfaces.  
Ex: COL Steven Ellsworth; Butternut (5/2006).  
From The Padula Family Foundation Collection.

---

1798 S-169, B-28 Cent, Fine Details  
Second Hair Style

- 4348** 1798 Second Hair Style, S-169, B-28, R.3 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 5. The dark steel-brown surfaces are moderately corroded, but the date and legends remain legible. Several prominent rim bruises are evident.  
Ex: COL Steven Ellsworth; Butternut (5/2008).  
From The Padula Family Foundation Collection.

1798 Cent, S-170, B-29, VG Details  
Second Hair Style

- 4349** 1798 Second Hair Style, S-170, B-29, R.3 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net Good 6. Light to medium-brown surfaces display pitting throughout. The fine points of Liberty's portrait are largely worn away, and the date is partly visible. All other motifs and legends are evident, if obscured by wear.  
Ex: Thomas Wolf; Goldberg Coins (2/2008), lot 1187.  
From The Padula Family Foundation Collection.

- 4350** 1798 Second Hair Style, S-171, B-30, R.4, PCGS Genuine. Our EAC grade: sharpness of VG8, net AG3. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen. Light brown surfaces exhibit a small patch of green corrosion and a scrape on Liberty's neck and drapery.  
Ex: COL Steven Ellsworth; Butternut (4/2014).  
From The Padula Family Foundation Collection.

- 4351** 1798 Second Hair Style, S-171, B-30, R.4 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net AG3. The steel-brown surfaces of this popular Sheldon variety show several long, thin scratches on the obverse, along with a few minor planchet flaws. The date is legible, but much of the peripheral legends are indistinguishable.  
Ex: Helwig Collection; Bowers and Ruddy (2/1979), lot 51.  
From The Padula Family Foundation Collection.

- 4352** 1798 Second Hair Style, S-171, B-30, R.4, Good 4 PCGS. Our EAC grade: sharpness of Good 6, net Good 4. Late Die State, the rare obverse rim cud is evident near LIBERTY. The smooth, light brown surfaces show some moderate contact marks on the bust and there is a small rim dent at 4 o'clock on the reverse. The date is legible and the central design elements have good sharpness.  
Ex: COL Steven Ellsworth; Butternut (5/2012).  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36083 Base PCGS# 1434

1798 S-172, B-34 Cent, VF Details  
Middle Die State

- 4353** 1798 Second Hair Style, S-172, B-34, R.2 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF35, net VF25. Breen Die State IV or later, although imperfect centering obscures certain die state details. Pleasing olive-brown surfaces are hardly deserving of the PCGS designation. A glass reveals very slight roughness on the semi-glossy surfaces.  
Ex: Jules Reiver (Heritage, 1/2006), lot 28056.  
From The Padula Family Foundation Collection.

1798 S-173, B-38 Cent, Fine Details  
Second Hair Style

- 4354** 1798 Second Hair Style, S-173, B-38, R.3 — Tooled — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG10, net VG7. Early die state. The slightly roughened surfaces feature dark steel-brown fields and lighter devices, with some patches of minor corrosion. Some repair is evident at Liberty's mouth. The reverse is rotated 60 degrees.  
Ex: WR; James E. Long; COL Steven Ellsworth; Butternut (5/2006).  
From The Padula Family Foundation Collection.

1798 S-174, B-35 Cent, Fine Details  
Semi-Glossy Surfaces

- 4355** 1798 Second Hair Style, S-174, B-35, R.2 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 5. The slightly glossy steel and olive-brown surfaces are generally smooth and attractive with a minor scrape through the hair ribbon and lower left obverse field.  
Ex: COL Steven Ellsworth; Butternut (5/2008).  
From The Padula Family Foundation Collection.

1798 S-175, B-36 Cent, VG10  
Near-Terminal Die State

- 4356** 1798 Second Hair Style, S-175, B-36, R.3, VG10 PCGS. Our EAC grade: sharpness of VG10, net VG8. Breen Die State VI. A late die state with a strong rim break above U in UNITED, plus other reverse die cracks. Medium olive-brown surfaces show a few areas of light porosity, especially at Liberty's neck. The legends are sharp for the assigned grade.  
Ex: Jerry Wyson; Rod Burrell (4/2007).  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36095 Base PCGS# 1434

1798 S-176, B-24 Cent, Good Details  
Second Hair Style

- 4357** 1798 Second Hair Style, S-176, B-24, R.4 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net Good 4. Moderate corrosion is more apparent over the reverse than the obverse. Numerous small planchet voids are seen over the obverse. Steel and olive-brown color.  
Ex: COL Steven Ellsworth; Butternut (1/2008).  
From The Padula Family Foundation Collection.

1798 S-177, B-25 Cent, VG Details  
Second Hair Style

- 4358** 1798 Second Hair Style, S-177, B-25, High R.4 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 4. Late die state, with a vertical die crack from the drapery up through the field near Y, and horizontal crack from the rim through the date. The dark steel and olive-brown surfaces are lightly porous, but the date and most lettering remain legible, although UNITED is weak.  
Ex: Jack Beymer (12/2007).  
From The Padula Family Foundation Collection.

1798 S-178, B-26 Cent, VG Details  
Rare Late Die State

- 4359** 1798 Reverse of 1795, S-178, B-26, High R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net AG3. Breen Die State IV with extensive obverse die cracks. The green and reddish-tan surfaces show considerable corrosion as almost always encountered on this elusive variety. The late die state, with parallel cracks through the date and other extensive die cracks, is extremely rare.  
Ex: Chris Victor-McCauley (12/2007).  
From The Padula Family Foundation Collection.

1798 S-179, B-37 Cent, XF Details  
Second Hair Style

- 4360** 1798 Second Hair Style, S-179, B-37, R.2 — Cleaned — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF20, net Fine 12. Middle die state, with a die flaw from the hair to the space between I and B in LIBERTY. The smooth dark steel and chocolate-brown surfaces are slightly glossy, despite the noted cleaning. The date, lettering, and lines in the drapery are bold.  
Ex: Rod Burress (12/2007).  
From The Padula Family Foundation Collection.

1798 S-180, B-41 Cent, AG Details  
Single Reverse Rim Break

- 4361** 1798 Second Hair Style, S-180, B-41, High R.5 — Scratch — PCGS Genuine. AG Details. Our EAC grade: sharpness of Good 6, net AG3. Breen Die State III with a rim break over ATE in STATES. This piece was struck before the second reverse rim break appeared over UN. Faint scratches are evident on each side, but they are blended with the surrounding surface and not immediately obvious. This piece has smooth olive-brown surfaces with the obverse sharper than the reverse.  
Ex: EAC Sale (4/2007), lot 245.  
From The Padula Family Foundation Collection.

1798 Cent, Fine Details  
S-181, B-42, Second Hair Style

- 4362** 1798 Second Hair Style, S-181, B-42, R.3 — Cleaned — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG10, net VG7. The large 100 in the denomination is punched over smaller digits. A rim break occurs over LIBERTY. The centers exhibit considerable blending on this Fine Details example with rich brown color. Moderately rough.  
Ex: Jack Beymer (12/2007).  
From The Padula Family Foundation Collection.

1798 Cent, VG Sharpness  
Scarce S-182, B-43 Variety, Second Hair Style

- 4363** 1798 Second Hair Style, S-182, B-43, R.4 — Cleaned — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net Good 6. Breen rated this variety High R.3 in his *Encyclopedia of Early United States Cents*, but the die marriage is now regarded as a slightly scarcer R.4. The outlines of light-brown devices are mostly clear. Scattered marks throughout.  
Ex: McCawley and Grellman; Superior (2/1999), lot 2078.  
From The Padula Family Foundation Collection.

1798 S-185, B-46 Cent, Good Details  
Second Hair Style

- 4366** 1798 Second Hair Style, S-185, B-46, R.2 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG8, net Good 5. Traces of greenish patina visit the medium brown surfaces of this cent that exhibits hard corrosion on each side. A glass reveals several old scratches that are not immediately evident.  
Ex: COL Steven Ellsworth; Butternut (1/2008).  
From The Padula Family Foundation Collection.

1798 S-183, B-44 Cent, VG Details

- 4364** 1798 Second Hair Style, S-183, B-44, R.5 — Cleaned — PCGS Genuine. VG Details. Our EAC grade: sharpness of Good 6, net Good 4. Breen Die State undetermined but probably early. The obverse exhibits orange-tan surfaces with olive and steel, while the reverse is olive and pale gold. Undoubtedly cleaned and recolored but still acceptable for this elusive variety.  
Ex: Tom Deck (5/2006).  
From The Padula Family Foundation Collection.

1798 S-186, B-39 Cent, VG10  
Bold Reverse Die Crack

- 4367** 1798 Second Hair Style, S-186, B-39, R.2, VG10 PCGS. Our EAC grade: sharpness of VG8, net VG7. A pleasing medium brown example that exhibits trivial handling marks as expected for the grade, but without impairments of consequence. All design elements are intact and the constant reverse die crack is boldly evident.  
Ex: Thomas D. Reynolds (3/2008).  
From The Padula Family Foundation Collection. NGC ID# 2244, PCGS# 36125 Base PCGS# 1434

1798 S-184, B-45 Cent, Fine Details  
Second Hair Style, Early Die State

- 4365** 1798 Second Hair Style, S-184, B-45, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG7. Struck from an early state of the dies, with little evidence of die chips around the 7 in the date, although a few small chips are visible between RT and the hair. This is a microgranular, "circulation cameo" example with two-tone color. Deep-brown fields contrast with reddish-tan high points. As always, the rims lack their dentils.  
Ex: Rod Burress (4/2007).  
From The Padula Family Foundation Collection.

1798 Cent, Good Details  
Second Hair Style, S-187, B-40

- 4368** 1798 Second Hair Style, S-187, B-40, R.1 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG8, net Good 5. Two thin pinscratches form an "X" across Liberty's portrait, and a small circular dig occurs above EN in CENT. These account for the noted damage. Various planchet flaws appear over well-worn, deep brown surfaces.  
Ex: COL Steven Ellsworth; Butternut (1/2008).  
From The Padula Family Foundation Collection.

**4369** 1799/8 Overdate S-188, B-2, R.4, VF Details Uncertified. Our EAC grade: sharpness of VF25, net AG3. This coin has been carefully conserved since it was offered in May 2009. Although the corrosion is still present, the surfaces now exhibit a pleasing medium brown, with some hard green patina adhering to the reverse. The date is weak, but visible, and both sides retain considerable detail that permits proper attribution. Few 1799 cents of any variety will exhibit as much detail as this example for the price range we anticipate.

Ex: Goldberg Coins (5/2009), lot 182.

Near-Terminal Die State

**4376** 1800/79 Style Two Hair, S-194, B-8, R.3 — Cleaned — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF25, net Fine 15. Breen Die State VII, or possibly VIII, with the lower reverse rim breaks appearing like “a mountain panorama” according to Walter Breen. Smooth olive-brown surfaces with splashes of maroon patina on the reverse. We are unable to detect any signs of cleaning on this wholesome cent.

Ex: Chris Victor-McCawley (1/10/2009); Daniel W. Holmes, Jr. (Goldberg Coins, 9/2009), lot 363.

**From The Padula Family Foundation Collection.**

1800 S-195, B-9 Cent, Fine 12  
80 over 79, Second Hair

**4377** 1800/79 Style Two Hair, S-195, B-9, R.5, Fine 12 PCGS. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State III with a crack through RTY and another through ICA to the final 0. Both sides exhibit pleasing surfaces with intermingled tan, olive, steel, and maroon patina. A lovely example for the date collector or variety specialist.

Ex: COL Steven Ellsworth; Butternut (3/2009).

**From The Padula Family Foundation Collection.** NGC ID# 2U57, PCGS# 36164 Base PCGS# 1455

**4378** 1800/79 Style Two Hair, S-196, B-10, R.1, Fine 12 PCGS. Our EAC grade: sharpness of Fine 15, net VG8. Trivial handling marks and rim bumps are expected at this grade. Both sides have smooth, olive-brown surfaces with good eye appeal.

Ex: Bill Yates; Rod Burrell (4/2009).

**From The Padula Family Foundation Collection.** NGC ID# 2U57, PCGS# 36167 Base PCGS# 1455

1800/79 S-196, B-10 Cent, Good Details

**4379** 1800/79 Style Two Hair, S-196, B-10, R.1 — Scratch — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG8, net Good 4. Several well-blended scratches are noted on the obverse of this cent that represents a popular overdate variety. Both sides are pleasing tan, olive, and steel-brown with microscopic surface roughness.

Ex: Thomas D. Reynolds (11/2009).

**From The Padula Family Foundation Collection.**

1800/79 NC-2, B-11 Cent, Good 6  
Condition Census

- 4380** 1800/79 Style Two Hair, NC-2, B-11, High R.6, Good 6 PCGS. Our EAC grade: sharpness of VG8, net Good 6. The obverse has a thin but prominent rim break from 3 o'clock to 5 o'clock. Only two die states are recorded, with and without this slender cud. **The Noyes Plate Coin** (obverse only) in his 1991 reference, illustrating the late die state. Bill Noyes grades this piece Good 6 and tied for fourth finest known, while Del Bland grades the piece Good 5 and tied for seventh finest. The rarity of this variety was incorrectly listed in the Breen *Large Cent Encyclopedia*, and should have been recorded as High Rarity 6. At the time, just 13 examples were recorded. Two more have been discovered since. Of the 15, only one is better than VG. Like so many other rarities, many more collectors are searching for these coins than ever before. In 1958, when *Penny Whimsy* was published, only four examples were known. With just one example discovered every four years since 1958, the odds are slim that any individual collector will be so fortunate. A better choice would be to bid on this coin as it crosses the auction block.  
Ex: Donald H. Boller (2/1984); Del Bland (2/18/1984); Jules Reiver (Heritage, 1/2006), lot 19453; Chris Victor-McCawley (4/2009).

1800 S-197, B-12 Cent, VF25  
The 'Q' Variety

- 4381** 1800 S-197, B-12, R.1, VF25 PCGS. Our EAC grade: sharpness of Fine 15, net VG10. Breen Die State II. A lovely example of the popular "Q" variety with die chips through the first 0 that digit give the appearance of an uppercase Q. This olive-brown cent has well-blended scratches below the bust but otherwise smooth and pleasing surfaces.  
Ex: G. Lee Kuntz; Del Bland; Robinson S. Brown, Jr. (Superior, 1/1996), lot 273.  
From **The Padula Family Foundation Collection**. NGC ID# 2248, PCGS# 36179 Base PCGS# 1449

1800 S-198, B-19 Cent, Good Details  
Rare Terminal Die State

- 4382** 1800 S-198, B-19, High R.5 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 6, net AG3. Breen Die State VI. Walter Breen stated that he only knew of four terminal die states examples of this variety, but it is not clear if he knew about this example or not. So, perhaps there are five such coins in existence. Either way, it is an extremely rare and highly desirable example. The surfaces are mostly dark brown and steel, with lighter tan on the reverse devices. A slight bend at the lower left part of the obverse appears to be the only defect.  
Ex: Joseph Kane (3/12/1982); Jules Reiver (Heritage, 1/2006), lot 19456; EAC Sale (5/2006), lot 184.  
From **The Padula Family Foundation Collection**.

1800 S-199, B-14 Cent, AG3  
Severe Reverse Die Bulges

- 4383** 1800 S-199, B-14, R.4, AG3 PCGS. Our EAC grade: sharpness of Good 5, net Good 5. Breen Die State IX, with severe bulges that affect many of the letters, rendering the assignment of a numerical grade nearly impossible. A lovely example with smooth chocolate-brown surfaces, virtually free of handling marks.  
Ex: Thomas D. Reynolds (11/2008).  
From **The Padula Family Foundation Collection**. NGC ID# 2248, PCGS# 36185 Base PCGS# 1449

1800 S-200, B-15 Cent, Good Details  
Late Intermediate Die State

- 4384** 1800 S-200, B-15, R.3 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 6, net Good 5. Breen Die State VI. Prominent obverse and reverse die bulges are noted with a heavy die crack through OF. Intermingled olive and steel-brown surfaces are generally smooth with slight granularity visible under a loupe.  
Ex: Douglas F. Bird (4/2009).  
From The Padula Family Foundation Collection.

1800 NC-3, B-16 Cent, Good 6  
Condition Census

- 4385** 1800 NC-3, B-16, High R.5, Good 6 PCGS. Our EAC grade: sharpness of VG7, net Good 6. Steel-brown surfaces are smooth and somewhat glossy, with lighter brown devices creating an attractive two-tone appearance that is popular with many collectors. Minor marks are noted on each side, so nicely blended that they nearly disappear in the surrounding surface. A small but bold spike from the top of the I in AMERICA identifies this important variety. Noyes considers this piece tied for fourth finest and Bland has the coin tied for fifth finest.  
Ex: Thomas D. Reynolds; Chris Victor-McCawley (4/2009).  
From The Padula Family Foundation Collection. PCGS# 36227 Base PCGS# 1449

1800 S-201, B-17 Cent, VG Details  
Ex: Sheldon; Rasmussen; Husak

- 4386** 1800 S-201, B-17, High R.4 — Tooled — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net VG7. Deep steel-brown with lighter olive on the obverse device. The surfaces have been burnished to remove old corrosion. Probably an intermediate die state, but the burnishing has also diminished the appearance of cracks and bulges, rendering an exact die state determination nearly impossible. Rated R-7 in *Early American Cents*, Sheldon lowered the rating to R-6 in *Penny Whimsy*, based on his knowledge of 15 different examples. Today, its High R-4 rating suggests that nearly 100 are known, yet the finest of those grades VF20, no different than in 1958.  
Ex: Henry C. Hines; Dr. William H. Sheldon; Dorothy Paschal (4/1978); Richard Punchard (6/1989); Wes Rasmussen (Heritage, 1/2005), lot 3237; Walter Husak (Heritage, 2/2008), lot 2104.  
From The Padula Family Foundation Collection.

1800 S-202, B-18 Cent, Good Details

- 4387** 1800 S-202, B-18, High R.4 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 6, net Good 4. Middle Die State. A glass reveals fine granularity on the otherwise pleasing surfaces of this chestnut and steel-brown cent. The toning pattern presents an attractive two-tone appearance.  
Ex: Chris Victor-McCawley (4/2009).  
From The Padula Family Foundation Collection.

1800 S-203, B-29 Cent

- 4388** 1800 S-203, B-29, R.3, PCGS Genuine. Our EAC grade: sharpness of VF20, net VG10. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been burnished. The chestnut and olive-brown surfaces have an unnatural gloss due to burnishing.  
Ex: Huddaway; COL Steven Ellsworth; Butternut (5/2014).  
From The Padula Family Foundation Collection.

- 4389** 1800 S-203, B-29, R.3 — Damage — PCGS Genuine. AG Details. Our EAC grade: sharpness of Good 6, net AG3. This middle die state cent has light brown and steel patina on the obverse and steel-brown across the reverse. A glass reveals myriad fine scratches on each side.  
*Ex: Jules Reiver Collection (Heritage Auctions, 1/2006), lot 28068.*  
*From The Padula Family Foundation Collection.*

1800 S-204, B-25 Cent, Good Details

- 4390** 1800 S-204, B-25, R.4 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Fine 12, net VG7. The detail is substantially finer than PCGS suggests on this rich steel-brown and olive cent that exhibits fine granularity on each side.  
*Ex: COL Steven Ellsworth; Butternut (3/2009).*  
*From The Padula Family Foundation Collection.*

1800 S-205, B-26 Cent, VG8  
Early Die State

- 4391** 1800 S-205, B-26, R.4, VG8 PCGS. Our EAC grade: sharpness of VG10, net VG8. An early die state with no evidence of obverse or reverse die cracks, and doubtless quite rare as such. Deep olive-brown with hints of lighter brown on the devices. This is a pleasing, problem-free example of the scarce variety.  
*Ex: Chris Victor-McCawley (4/2009).*  
*From The Padula Family Foundation Collection.* NGC ID# 2248, PCGS# 36203 Base PCGS# 1449

1800 S-206, B-27 Cent, VG Details

- 4392** 1800 S-206, B-27, R.3 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 15, net VG10. Both dies are delicately cracked on this early die state cent. The steel-brown and olive surfaces are lightly granular with thin, blended scratches on the obverse. The design details are finer than PCGS suggests, in our opinion.  
*Ex: COL Steven Ellsworth; Butternut (3/2009).*  
*From The Padula Family Foundation Collection.*

1800 S-207, B-28 Cent, VF Details

- 4393** 1800 S-207, B-28, R.3 — Surfaces Smoothed — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF35, net VF20. Breen Die State III. A crack from the rim break at the bottom of the reverse is heavy to the ribbon. This is the latest die state normally encountered. Both sides of this piece have sharp details with even roughness on the rich greenish-steel surfaces. Slight tooling to diminish the surface roughness is only obvious with magnification.  
*Ex: Chris Victor-McCawley (4/2009).*  
*From The Padula Family Foundation Collection.*

1800 S-208, B-21 Cent, XF Details

- 4394** 1800 S-208, B-21, R.3 — Environmental Damage — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF25, net Fine 12. Breen Die State II, with clash marks over TY and to the right. Pleasing light brown surfaces with slight greenish verdigris. The surfaces show areas of fine roughness but the overall eye appeal is strong.  
*Ex: Goldberg Coins (9/2008), lot 365.*  
*From The Padula Family Foundation Collection.*

1800 NC-4, B-22 Cent, AG3  
Fifth Finest of Eight Known  
Breen Encyclopedia Plate Coin

- 4395** 1800 NC-4, B-22, R.7, AG3 PCGS. Our EAC grade: sharpness of Good 4, net AG3. The plate coin in Breen's *Large Cent Encyclopedia*. This amazing intermediate die state has two separate die breaks at the left obverse, the lower break behind the lowest curls massive. A few light scratches on the obverse are expected for the low grade. Pleasing olive-brown surfaces. Eight examples of this variety are known and the present piece is tied for fifth place in the Bland census.  
*Ex: Herbert A. Silberman; Robinson S. Brown, Jr. (Superior, 9/1986), lot 305; Richard C. Dempsey (Superior, 9/2004), lot 469; Philip Clover (Heritage, 9/2012), lot 3230; Chris Victor-McCawley (1/2013).*

1800 S-209, B-23 Cent, Fine 15

**4396** 1800 S-209, B-23, R.3, Fine 15 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State III with heavy clash marks near the hair ribbons. This pleasing example has intermingled olive and steel-brown surfaces with no evidence of corrosion or other imperfections.

Ex: Thomas D. Reynolds (11/2009).

From The Padula Family Foundation Collection. NGC ID# 2248, PCGS# 36215 Base PCGS# 1449

1800 S-210, B-24 Cent, VG Details  
Key 1800 Sheldon Number

**4397** 1800 S-210, B-24, High R.5 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG7, net Good 4. Breen Die State VI. The 1800 cent series consists of 23 Sheldon numbers and six NC varieties. Among the Sheldon numbered varieties, only the S-198 is rarer than the S-210 and S-195 that are tied at High R.5. This example has smooth olive and tan surfaces with a circular steel-brown area on the reverse.

Ex: Douglas F. Bird (4/2009).

From The Padula Family Foundation Collection.

1800 S-211, B-13 Cent, VF20  
Late Die State

**4398** 1800 S-211, B-13, R.3, VF20 PCGS. Our EAC grade: sharpness of Fine 12, net Fine 12. Breen Die State VII, with extensive bulges and other die defects. This impressive olive-brown and steel cent has above average surfaces with trivial handling marks expected for the grade.

Ex: March Wells; Goldberg Coins (2/2009), lot 597.

From The Padula Family Foundation Collection. NGC ID# 2248, PCGS# 36221 Base PCGS# 1449

1800 S-212, B-20 Cent, Fine 15  
Latest Known Die State

**4399** 1800 S-212, B-20, R.3, Fine 15 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State VI, the latest die state recorded. A pleasing cent with light brown surfaces that exhibit scattered handling marks as expected for the grade. Light maroon patina is evident at the lower obverse of this piece.

Ex: Stuart Jones; Rod Burrell (4/2009).

From The Padula Family Foundation Collection. NGC ID# 2248, PCGS# 36224 Base PCGS# 1449

1801 S-213, B-1 Cent, XF Details  
Late Die State

**4400** 1801 S-213, B-1, R.2 — Repaired — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF30, net VF20. All of the die cracks are advanced on this late die state example that exhibits glossy surfaces with intermingled olive and steel-brown patina. Minor roughness is noted along the rims, and slight tooling is evident on the obverse.

Ex: Chris Victor-McCawley (4/2009).

From The Padula Family Foundation Collection.

1801 S-214, B-2 Cent, Good 4

**4401** 1801 S-214, B-2, R.3, Good 4 PCGS. Our EAC grade: sharpness of VG7, net Good 5. Smooth dark brown surfaces exhibit hard olive patina on this example. There are no noteworthy imperfections on either side of this wholesome example.

Ex: COL Steven Ellsworth; Butternut (3/2009).

From The Padula Family Foundation Collection. NGC ID# 224B, PCGS# 36239 Base PCGS# 1458

---

1801 NC-1, B-3 Cent, Fine Details

- 4402** 1801 NC-1, B-3, High R.5 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. Breen Die State II, with advanced die damage at the top of the reverse. Dark steel and olive-brown surfaces exhibit moderate roughness on this important cent. Old scratches on the reverse are fully blended into the surrounding surfaces.  
*Ex: Darwin Palmer; Chris Victor-McCawley (4/2009).*  
*From The Padula Family Foundation Collection.*

---

1801 S-215, B-4 Cent, AG3

- 4403** 1801 S-215, B-4, High R.4, AG3 PCGS. Our EAC grade: sharpness of Good 4, net AG3. Light olive-brown surfaces exhibit steel toning on the reverse and splashes of maroon patina. While a glass reveals typical handling marks, granularity, and trivial rim bumps, this is a pleasing example of the scarce variety.  
*Ex: Douglas F. Bird (4/2009).*  
*From The Padula Family Foundation Collection.* NGC ID# 224B, PCGS# 36242 Base PCGS# 1458

---

1801 S-216, B-6 Cent, VF30  
Early Die State

- 4404** 1801 S-216, B-6, R.1, VF30 PCGS. Our EAC grade: sharpness of VF20, net VF20. This is an early die state of the S-216 with no evidence of die defects that may be lost to wear. Splendid olive-brown surfaces exhibit lighter tan in the protected areas. While a glass reveals trivial marks, none lead to a point reduction of the grade.  
*Ex: Douglas F. Bird (4/2009).*  
*From The Padula Family Foundation Collection.* NGC ID# 224B, PCGS# 36245 Base PCGS# 1458

1801 S-221, B-5 Cent, VG Details  
100/000 Reverse

- 4411** 1801 100/000, S-221, B-5, R.2 — Scratch — PCGS Genuine. VG Details Our EAC grade: sharpness of Fine 12, net VG7. The obverse is pleasing light brown and the reverse has deep steel patina. The obverse is scratched from the border to the forehead and both sides exhibit microscopic roughness.  
Ex: Tom Hyland; Rod Burrell (6/2007).  
From The Padula Family Foundation Collection.

---

1801 S-222, B-16 Cent, Fine 15

- 4412** 1801 S-222, B-16, R.1, Fine 15 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State II, with a narrow rim break above IB in LIBERTY. The smooth dark chocolate-brown surfaces show a few minor abrasions in the obverse fields. The date and all lettering remain legible, aside from some weakness on OF.  
Ex: Thomas D. Reynolds (11/2009).  
From The Padula Family Foundation Collection. NGC ID# 224B, PCGS# 36251 Base PCGS# 1458

- 
- 4413** 1801 1/000, S-223, B-17, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VF30, net Good 6. Although considerable detail is present, this piece exhibits heavy green and light brown corrosion that substantially reduced the net grade.  
Ex: Warwick Coin Shop; Spicer Auctions (2000).  
From The Padula Family Foundation Collection.

---

1801 S-223, B-17 Cent, Fine Details  
1/000 Error Fraction

- 4414** 1801 1/000, S-223, B-17, R.1 — Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG8, net Good 5. Although the olive-brown surfaces are generally smooth, both sides exhibit several small digs or dents that challenge the grade.  
Ex: Richard Ariagno; Bowers and Ruddy (1/1980), lot 890.  
From The Padula Family Foundation Collection.

---

1801 S-224, B-13 Cent, VG10  
Normal Dies

- 4415** 1801 S-224, B-13, R.1, VG10 PCGS. Our EAC grade: sharpness of Fine 12, net VG8. Early die state, before the rim break above AME in AMERICA. The dark chocolate and steel-brown surfaces show a number of minor abrasions and planchet voids on both sides. The date is bold, but LIBERTY is weak at the top.  
Ex: Tom Deck (10/2006).  
From The Padula Family Foundation Collection. NGC ID# 224D, PCGS# 36254 Base PCGS# 1458

1801 NC-4, B-14 Cent, VF Details  
Discovery Specimen, Breen Plate Coin

- 4416** 1801 NC-4, B-14, R.7 — Surfaces Smoothed — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net VG7. In the Dupont catalog, written by Dr. Sheldon, this was described as a “possible new variety,” although Sheldon described it in other terms: “Until another example of this apparent obverse shows up, in unaltered condition, we will have to regard the coin as probably a clever imposition like dozens of other similar examples coming almost constantly to numismatic attention.” The second example was found by Walter Breen nine years later, and six more have been located since, for a total of eight known examples today. This coin is either tied for finest known or is second finest, depending on who does the observation. Although cleaned and recolored, and also noticeably burnished with a corresponding diminished detail, this is a pleasing example with gold, olive, and iridescent toning. Plated in the Breen book.  
Ex: Dupont Collection (Stack’s, 2/54), lot 344; Dorothy Nelson; Stack’s (2/76), lot 59; R.E. Naftzger, Jr. (2/92); Eric Streiner (1/94); Wes Rasmussen Collection (Heritage, 1/2005), lot 3264; Goldberg Coins (9/2009), lot 424.

1802 S-225, B-1 Cent, Fine Details  
Die State II

- 4418** 1802 S-225, B-1, R.3 — Cleaned — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State II. The leaf tips left of (STATE)S and the normal T in LIBERTY are diagnostic. The denticles are indistinct from 6 o’clock to 11 o’clock on the obverse, and at the lower reverse. Well-detailed with scattered marks over medium brown surfaces.  
Ex: Tom Hyland; Rod Burrell (4/2007).  
From The Padula Family Foundation Collection.

1802 S-226, B-2 Cent, VF30  
Normal Dies

- 4419** 1802 S-226, B-2, R.3, VF30 PCGS. Our EAC grade: sharpness of VF30, net VF20. Breen Die State III, with a light crack through the tops of AMER. The slightly glossy chocolate-brown surfaces show some minor abrasions, mostly in the left obverse field. Much interior detail remains intact on Liberty’s hair.  
Ex: John D. Wright; Daniel W. Holmes, Jr.; Chris Victor-McCawley (5/2008).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36293 Base PCGS# 1470

1802 NC-1, B-3 Cent, Fine Details  
Normal Dies

- 4420** 1802 NC-1, B-3, High R.5 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net Good 6. Breen Die State I. This steel and chocolate-brown cent exhibits uniform porosity but no handling marks of any significance. The early die state attribution markers are prominently visible on this piece.  
Ex: EAC Sale (5/2008), lot 366.  
From The Padula Family Foundation Collection.

1802 S-227, B-5 Cent, VG10  
Normal Dies

- 4421** 1802 S-227, B-5, R.2, VG10 PCGS. Our EAC grade: sharpness of Fine 12, net VG10. Middle die state, with obverse clash marks below the ribbon and at Liberty's throat. The slightly glossy chocolate-brown surfaces are lightly abraded. The date and reverse lettering remain bold, but LIBERTY is weak at the top.  
Ex: Rod Burrell (4/2007).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36296 Base PCGS# 1470

1802 S-228, B-4 Cent, Poor/Fair Details  
1/000

- 4422** 1802 1/000, S-228, B-4, R.2 — Cleaned — PCGS Genuine. Poor/Fair Details. Our EAC grade: sharpness of AG3, net Fair 2. The dark chocolate-brown surfaces show a few minor planchet voids in the obverse field. The bust and wreath are largely complete in outline and the date and AMERICA remain legible.  
Ex: Warwick Coin Shop; Spicer Auctions (2000).  
From The Padula Family Foundation Collection.

1802 S-229, B-6 Cent, VG10

- 4423** 1802 S-229, B-6, R.2, VG10 PCGS. Our EAC grade: sharpness of Fine 12, net VG10. Breen Die State I. The slightly glossy chocolate and steel-brown surfaces show a thin scratch on the neck and a small planchet void in the right obverse field. The date and legends are easily legible.  
Ex: Robert Shalowitz; Thomas Wolf; Pre-Long Beach Auction (Goldberg, 2/2008), lot 1270; Rod Burrell (6/2008).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36299 Base PCGS# 1470

1802 NC-2, B-7 Cent, Good Details

- 4424** 1802 NC-2, B-7, R.6 — Rim Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net AG3. The obverse and reverse surfaces are pleasing with only trivial handling marks on this glossy steel and olive-brown cent. The rims are merged into the bottom of the date and the lettering at the upper reverse, the edge having been carefully tooled to create a wire rim.  
Ex: Frank Plennert; EAC Sale (4/2009), lot 179.  
From The Padula Family Foundation Collection.

1802 S-230, B-8 Cent, Good Details

- 4425** 1802 S-230, B-8, R.1 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG10, net Good 6. The die state is indeterminate, but a heavy crack below STATES is evident. The dark chocolate-brown surfaces are heavily corroded, but the date and legends are legible, if weak in places.  
Ex: Douglas F. Bird (5/2008).  
From The Padula Family Foundation Collection.

1802 S-231, B-9 Cent, Fine 15  
No Stems

- 4426** 1802 No Stems, S-231, B-9, R.1, Fine 15 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State II, with a crack through RT in LIBERTY and on into the field in front of Liberty's face. The date and LIBERTY are legible, but 02 is weak at the bottom. The reverse legend is also legible, but OF A is very weak. The smooth chocolate-brown surfaces are lightly abraded.  
Ex: Chris Victor-McCawley (5/2008).  
From The Padula Family Foundation Collection. NGC ID# 224F, PCGS# 36344 Base PCGS# 1476

1802 S-232, B-12 Cent, Good 6

- 4427** 1802 S-232, B-12, R.1, Good 6 PCGS. Our EAC grade: sharpness of VG8, net Good 6. The dark steel and olive-brown surfaces are smooth and lightly abraded and the central design elements are complete in outline. The date and all lettering remain legible.  
Ex: Helwig Collection; Bowers and Ruddy (2/1979), lot 51.  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

1802 S-233, B-13 Cent, Fine 12

- 4428** 1802 S-233, B-13, R.2, Fine 12 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Early die state, with a rim break below 18 in the date. The smooth olive and steel-brown surfaces are lightly marked and about half the lines in the drapery are intact. The date and all lettering remain bold.  
Ex: Walter Reed; COL Steven Ellsworth; Butternut (5/2008).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36308 Base PCGS# 1470

1802 S-234, B-14 Cent, VF Details

- 4429** 1802 S-234, B-14, R.3 — Cleaned — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG10. Middle die state, with rim break above B in LIBERTY. The slightly porous steel and olive-brown surfaces are lightly abraded and about three quarters of the lines in the drapery remain intact. The date and all legends are bold.  
Ex: Chris Victor-McCawley (5/2008).  
From The Padula Family Foundation Collection.

1802 S-235, B-15 Cent, AU Details  
Normal Dies

- 4430** 1802 S-235, B-15, R.3 — Environmental Damage — PCGS Genuine. AU Details. Our EAC grade: sharpness of VF30, net VF20. Early die state. The smooth olive-brown surfaces are lightly abraded, with some slight porosity at AMERICA. Only a trace of wear shows on the sharply detailed design elements.  
Ex: Walter Husak; Chris Victor-McCawley (8/2008).  
From The Padula Family Foundation Collection.

1802 S-236, B-16 Cent, Good 6  
Normal Dies

- 4431** 1802 S-236, B-16, R.1, Good 6 PCGS. Our EAC grade: sharpness of VG7, net Good 5. The dark chocolate and olive-brown surfaces are slightly glossy, with uniform minor porosity. The date and LIBERTY are bold but the reverse legend is weak, though still legible. The central design elements are complete in outline.  
Ex: Tom Deck (2/2008).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36317 Base PCGS# 1470

1802 S-237, B-10 Cent, VF20  
Normal Dies

- 4432** 1802 S-237, B-10, R.2, VF20 PCGS. Our EAC grade: sharpness of Fine 12, net VG10. The smooth olive-brown surfaces show only minor abrasions, and the date and all lettering are bold. Much interior detail remains intact on the central design elements, but the rims are weak in many areas.  
Ex: Rod Burress (4/2007).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470

1802 S-238, B-11 Cent, Fine Details  
Normal Dies

- 4433** 1802 S-238, B-11, R.4 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. Middle die state, with clash marks under Liberty's chin and a crack from U in UNITED through the left ribbon end. The dark steel-brown surfaces are lightly corroded and the date and all lettering are still legible.  
Ex: Chris Victor-McCawley (5/2008).  
From The Padula Family Foundation Collection.

1802 S-239, B-17 Cent, VF20  
Late Die State

- 4434** 1802 S-239, B-17, R.3, VF20 PCGS. Our EAC grade: sharpness of VF20, net Fine 12. Late die state, with heavy clash marks on the fraction and prominent die cracks from the E and R in LIBERTY into the field before the face. The smooth chocolate-brown surfaces are lightly abraded and the date and all lettering remain bold.  
Ex: Jules Reiver Collection (Heritage Auctions, 1/2006).  
From The Padula Family Foundation Collection. NGC ID# 224E, PCGS# 36326 Base PCGS# 1470

1802 S-240, B-18 Cent, Fine Details  
Normal Dies

- 4435** 1802 S-240, B-18, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG10. Early Die State, with the arcing reverse crack from the rim above A in STATES, across the wreath, to the rim above the first A in AMERICA. The dark steel and olive-brown surfaces are lightly corroded throughout. The date and all lettering remain bold, aside from OF, which is very faint due to striking.  
Ex: Kissner Collection (Stack's, 6/1975), lot 240; Thomas D. Reynolds (3/2008).  
From The Padula Family Foundation Collection.

1802 S-241, B-20 Cent, VF Details  
No Stems

- 4436** 1802 No Stems, S-241, B-20, R.1 — Cleaned — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG10. Breen Die State III, with a die crack above OF and obverse clash marks below the ribbon and Liberty's chin. The pleasing chocolate and olive-brown surfaces are lightly abraded and the date, all lettering, and the lines in the drapery are bold.  
Ex: Rod Burress (4/2007).  
From The Padula Family Foundation Collection.

- 4437** 1802 No Stems, S-241, B-20, R.1 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net VG7. Breen Die State V, with two rim cud on the reverse, one above TATE and the other above F. The dark steel-brown surfaces are moderately corroded. The date is bold, but LIBERTY is weak and UNITED is almost smooth.  
Ex: EAC Sale (4/2013), lot 220.  
From The Padula Family Foundation Collection.

1802 S-242, B-19 Cent, VF Details  
Normal Dies

- 4438** 1802 S-242, B-19, R.2 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF30, net VG10. Breen Die State II, with a crack through NITE. Finely granular surfaces exhibit rich steel-brown and chocolate color with trivial greenish verdigris. No significant handling marks are evident on either side.  
Ex: EAC Sale (5/2008), lot 365.  
From The Padula Family Foundation Collection.

1803 S-243, B-1 Cent, VF Details  
No Stems Reverse

- 4439** 1803 No Stems, S-243, B-1, R.2 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net VG8. Early die state. All diagnostic features of this blundered die are clearly visible on this example. The olive and steel-brown surfaces exhibit light corrosion that is most noticeable at the left obverse.  
Ex: John D. Wright; EAC Sale (4/2005), lot 237.  
From The Padula Family Foundation Collection.

1803 S-244, B-3 Cent, VF Details  
Small Date, Small Fraction

- 4440** 1803 Small Date, Small Fraction, S-244, B-3, R.4 — Scratch — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 12, net VG7. Late die state, with some buckling at RTY and clash marks at the throat. Several long, thin scratches in the obverse field, above the ribbon, constitute the noted damage. The dark olive-brown surfaces are slightly glossy, with some light porosity in selected areas.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
From The Padula Family Foundation Collection.

1803 S-245, B-2 Cent, Fine 15  
Small Date, Small Fraction

- 4441** 1803 Small Date, Small Fraction, S-245, B-2, R.3, Fine 15 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Middle die state, with "Unicorn" clash marks at Liberty's brow and a die crack through the top of ERICA. The smooth dark chocolate and olive-brown surfaces are lightly abraded and the date and all lettering remain bold. About half the lines in the drapery remain intact.  
Ex: COL Steven Ellsworth; Butternut (11/2009).  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36353 Base PCGS# 1482

1803 Cent, Sheldon-246, B-4, Good 4  
Small Date, Small Fraction

- 4442** 1803 Small Date, Small Fraction, S-246, B-4, R.3, Good 4 PCGS. Our EAC grade: sharpness of VG8, net VG7. Both sides are well-centered with only the right obverse lacking complete dentils. The portrait outline is clear, while LIBERTY and the date are readable. The reverse is relatively strong for the grade. Granular with pleasing olive-brown coloration.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36356 Base PCGS# 1482

1803 S-247, B-5 Cent, VF Details  
Small Date, Small Fraction

- 4443** 1803 Small Date, Small Fraction, S-247, B-5, R.3 — Cleaned — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net Fine 12. Middle die state, with clash marks from the dentils from U through 100 on the reverse and a lump under Liberty's chin (Mumps variety). The dark chocolate-brown surfaces are slightly glossy and the date and all lettering remain bold.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
From The Padula Family Foundation Collection.

---

1803 S-248, B-6 Cent, VG Details  
Small Date, Small Fraction

**4444** 1803 Small Date, Small Fraction, S-248, B-6, R.4 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net VG7. Each side of this rich chocolate-brown S-248 cent exhibits signs of corrosion that prevent a numeric grade. The date is strong, as are the wreath, denomination, and fraction.  
*Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.*  
**From The Padula Family Foundation Collection.**

**4445** 1803 100/000, S-249, B-7, R.2, AG3 PCGS. Our EAC grade: sharpness of Good 4, net AG3. A pleasing example with choice olive-brown surfaces, this example has a strong date and most of the lettering visible except at the tops. The devices are outlined without internal detail.  
*Ex: Douglas F. Bird (4/2005).*  
**From The Padula Family Foundation Collection.** NGC ID# 224G, PCGS# 36416 Base PCGS# 911501

---

1803 S-250, B-10 Cent, Fine Details  
Small Date, Small Fraction

**4446** 1803 Small Date, Small Fraction, S-250, B-10, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. The corroded chocolate and steel-brown surfaces show moderate corrosion on both sides. The date and all lettering are bold and the central design elements retain much interior detail.  
*Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.*  
**From The Padula Family Foundation Collection.**

---

1803 S-251, B-8 Cent, VG8  
Small Date, Small Fraction

**4447** 1803 Small Date, Small Fraction, S-251, B-8, R.2, VG8 PCGS. Our EAC grade: sharpness of VG10, net VG8. The dark chocolate-brown surfaces are slightly granular and a small planchet void is evident near the ribbon. The date and all legends remain legible and some lines in the drapery remain intact.  
*Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.*  
**From The Padula Family Foundation Collection.** NGC ID# 224G, PCGS# 36368 Base PCGS# 1482

**4448** 1803 Small Date, Small Fraction, S-251, B-8, R.2, Good 6 PCGS. Our EAC grade: sharpness of VG8, net Good 6. The chocolate-brown surfaces of this well-worn specimen show just a trace of granularity in the left obverse field, but only minor abrasions are present. The date and all lettering remain legible, if a trifle weak in places.  
*Ex: Warwick Coin Shop; Spicer Auctions (2000).*  
**From The Padula Family Foundation Collection.** NGC ID# 224G, PCGS# 36368 Base PCGS# 1482

---

1803 NC-1, B-9 Cent, VG8  
Important Sheldon NC Variety

**4449** 1803 Small Date, Small Fraction, NC-1, B-9, High R.5, VG8 PCGS. Our EAC grade: sharpness of VG10, net VG7. The point of the highest leaf in the wreath is below the space between the E and S of STATES and that feature is diagnostic for this variety that has a population of just over 30 examples, mostly in low grades. Fairly smooth surfaces exhibit rich olive patina and trivial grade-consistent handling marks. An insignificant edge bruise over the D in UNITED will serve to identify this example.  
*Ex: EAC Sale (4/2006), lot 227.*  
**From The Padula Family Foundation Collection.** NGC ID# CSKP, PCGS# 36392 Base PCGS# 1482

1803 S-252, B-11 Cent, VG10  
Small Date, Small Fraction

- 4450** 1803 Small Date, Small Fraction, S-252, B-11, R.2, VG10 PCGS. Our EAC grade: sharpness of VG10, net VG10. Early die state. The dark olive-brown surfaces are slightly granular in the left obverse field and lightly abraded on both sides. The date and all lettering remain bold and the lines in the drapery are sharp.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36371 Base PCGS# 1482

- 4451** 1803 Small Date, Small Fraction, S-252, B-11, R.2, Fair 2 PCGS. Our EAC grade: sharpness of Good 4, net AG3. The steel-brown surfaces of this Fair 2 specimen show no large or unsightly abrasions, but a few small planchet voids are evident on the reverse. The date remains legible and the central devices are complete in outline, but the peripheral legends are incomplete and the rim has worn flat.  
Ex: Warwick Coin Shop; Spicer Auctions (2000).  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36371 Base PCGS# 1482

1803 S-253, B-12 Cent, XF45  
Small Date, Small Fraction

- 4452** 1803 Small Date, Small Fraction, S-253, B-12, R.2, XF45 PCGS. Our EAC grade: sharpness of VF35, net VF30. Late die state, with the break through NITED and the leaves, and another through the first S in STATES, into the field, and back through E. The smooth dark chocolate-brown surfaces are lightly abraded and the devices are lightly worn.  
Ex: Douglas F. Bird (4/2005).  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36374 Base PCGS# 1482

1803 Cent, S-254, B-13, VG8  
Small Date, Small Fraction

- 4453** 1803 Small Date, Small Fraction, S-254, B-13, R.1, VG8 PCGS. Our EAC grade: sharpness of VG10, net VG8. IB in LIBERTY are closely spaced, and the 3 touches the drapery. This attractive, well-circulated early cent has clear legends and tan-gold accents over smooth devices. The fields are minimally abraded.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36377 Base PCGS# 1482

1803 S-255, B-14 Cent, Fine Details  
Small Date, Small Fraction

- 4454** 1803 Small Date, Small Fraction, S-255, B-14, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG7. Early die state. The chocolate-brown surfaces are lightly corroded and show the usual number of minor abrasions. The date and all lettering remain legible and the central design elements retain much interior detail intact.  
Ex: EAC Bourse (2005).  
From The Padula Family Foundation Collection.

1803 S-256, B-15 Cent, VG10  
Small Date, Small Fraction

- 4455** 1803 Small Date, Small Fraction, S-256, B-15, R.3, VG10 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State VI, with a rim cud above the first T in STATES and several extensive die cracks on both sides. Buckling is evident behind the ribbon. The glossy chocolate-brown surfaces are lightly abraded and the date and all lettering are bold, with fine sharpness on the devices.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36383 Base PCGS# 1482

1803 S-257, B-16 Cent  
Small Date, Large Fraction

- 4456** 1803 Small Date, Large Fraction, S-257, B-16, R.2 — PCGS Genuine. Our EAC grade: sharpness of Fine 12, net VG7. The PCGS number ending in .97 suggests Environmental Damage as the reason, or one of the reasons, PCGS deemed this coin not gradable. We believe this coin has environmental damage on the surfaces, with Fine Details. Late die state, with a bulge at STATES and lightly corroded olive-brown surfaces.  
*Ex: COL Steven Ellsworth; Butternut (5/2014).*  
*From The Padula Family Foundation Collection.*

- 4457** 1803 Small Date, Large Fraction, S-257, B-16, R.2 — Tooled — PCGS Genuine. AG Details. Our EAC grade: sharpness of VG8, net Good 5. Late Die State. Liberty remains legible and the central devices have VG sharpness, but a cud has obliterated STATES on the reverse and weakened 180 and the lower curls on the obverse.  
*Ex: Warwick Coin Shop; Spicer Auctions (2000).*  
*From The Padula Family Foundation Collection.*

1803 S-258, B-17 Cent, Fine Details  
Small Date, Large Fraction

- 4458** 1803 Small Date, Large Fraction, S-258, B-17, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 12, net VG8. The steel and olive-brown surfaces show moderate corrosion and light abrasions on both sides. The date and all lettering remain bold and the central devices are sharp.  
*Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.*  
*From The Padula Family Foundation Collection.*

1803 S-259, B-18 Cent, VF Details  
Small Date, Large Fraction

- 4459** 1803 Small Date, Large Fraction, S-259, B-18, R.4 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 12, net VG7. Breen Die State I. Both sides of this rich steel-brown cent are somewhat glossy with an absence of verdigris or handling marks.  
*Ex: Kagin's (10/1979), lot 982; EAC Sale (1981), lot 204; EAC Sale (4/2004), lot 254.*  
*From The Padula Family Foundation Collection.*

- 4460** 1803 Small Date, Large Fraction, S-260, B-19, R.1 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Fine 12, net VG10. The steel-brown surfaces of this available Sheldon variety are lightly corroded but show no mentionable abrasions or planchet voids. The date is legible and the central design elements have Fine sharpness.  
*Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.*  
*From The Padula Family Foundation Collection.*

1803 S-260, B-19 Cent, VG8

- 4461** 1803 Small Date, Large Fraction, S-260, B-19, R.1, VG8 PCGS. Our EAC grade: sharpness of VG7, net Good 5. This pleasing cent exhibits walnut and chestnut-brown surfaces with a few trivial dents that only slightly diminish the grade.  
*Ex: Thomas Sebring; Bowers and Merena (3/1996), lot 362.*  
*From The Padula Family Foundation Collection. NGC ID# 224G, PCGS# 36404 Base PCGS# 1485*

1803 S-261, B-20 Cent, Good 4  
Small Date, Large Fraction

- 4462** 1803 Small Date, Large Fraction, S-261, B-20, R.2, Good 4 PCGS. Our EAC grade: sharpness of VG8, net Good 6. Late die state with a heavy crack between 8 and 0 in the date and some bulging at the lower curls. The dark chocolate-brown surfaces are slightly glossy, with many minor abrasions on both sides. The date is legible but most of the legends are weak.  
Ex: Thomas Sebring (Bowers and Merena, 3/1996), lot 362.  
**From The Padula Family Foundation Collection.** NGC ID# 224G, PCGS# 36407 Base PCGS# 1485

1803 Draped Bust Cent, VF Details  
Small Date, Small Fraction, S-262, B-21

- 4463** 1803 Small Date, Small Fraction, S-262, B-21, R.3 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 12, net VG7. The dark steel surfaces are slightly glossy with uniform, microscopic roughness, and with minor pitting on the obverse, most noticeably near the bust tip. A small rim bruise shows at 2 o'clock on the reverse.  
Ex: EAC Sale (4/2003), lot 484.  
**From The Padula Family Foundation Collection.**

1803 S-263, B-22 Cent, XF40  
Small Date, Small Fraction

- 4464** 1803 Small Date, Small Fraction, S-263, B-22, R.3, XF40 PCGS. Our EAC grade: sharpness of VF30, net VF30. Breen Die State V. A rim break below the date and a die crack across the upper obverse are seen. Moderately rough with shades of chocolate and lighter golden-brown color. This well-detailed cent shows a pinscratch below the lowest curl.  
Ex: Chris Victor-McCawley (EAC bourse, 4/2015).  
**From The Padula Family Foundation Collection.** NGC ID# 224G, PCGS# 36389 Base PCGS# 1482

- 4465** 1803 Small Date, Small Fraction, S-263, B-22, R.3 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net Good 4. Middle Die State, with a break at the rim below the date. The corroded steel-brown surfaces are relatively smooth, with no outstanding abrasions or planchet voids. The date and LIBERTY are legible, but the peripheral reverse legend is incomplete.  
Ex: EAC Bourse (2005).  
**From The Padula Family Foundation Collection.**

Late State 1803 S-264, B-24 Cent, VF Details  
Large Date, Small Fraction Rarity

- 4466** 1803 Large Date, Small Fraction, S-264, B-24, High R.4 — Damage — Genuine PCGS. VF Details. Our EAC grade: sharpness of Fine 15, net Good 6. Breen Die State III, the latest recorded for the variety, with a retained cud that obliterates STA on the reverse. At one time this variety was considered a major rarity, and it is still highly popular with a wide range of collectors for its individual listing in the *Guide Book*. Such pieces, like the Starred Reverse cent, the 1795 Reeded Edge cent, and many others, enjoy great demand from collectors who seek one example of each variety recorded in that reference, now in its 71st edition. This example displays pleasing chestnut-brown surfaces with marks evident on Liberty's face and at the lower reverse. Other minor marks are noted on each side. We agree with Bob Grellman's comments from a decade ago: "A cent that's difficult to grade given the number of marks. The net grade assigned may be a bit low, and the eye appeal probably is better than you might expect from the description."  
Ex: EAC Sale (4/2007), lot 333.  
**From The Padula Family Foundation Collection.**

- 4467** 1803 Large Date, Large Fraction, S-265, B-23, R.4 — Rim Filing — NGC Details. VF. Our EAC grade: sharpness of Fine 15, net Good 6. After two coins were found to be mis-attributed, Mr. Padula acquired this piece and the NGC-certified S-192 in the sale to insure that the complete Sheldon-numbered collection is indeed complete. This piece has strong detail with olive and chestnut-brown surfaces. Multiple rim bruises are evident, and several have been filed to diminish their appearance.  
Ex: *Butternut* (8/2017).  
**From The Padula Family Foundation Collection.**

- 4468** 1804 S-266, B-1, R.2 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of Good 6, net AG3. Breen Die State I or II, with even porosity over both sides of this dark brown cent that obscures the obverse die crack, if it is present. While the date is weak, all of the obverse and reverse lettering is visible.  
Ex: COL Steven Ellsworth; *Butternut* (11/2008).  
**From The Padula Family Foundation Collection.**

1804 S-266b, B-1 Cent, VG Details  
Middle Die State

- 4469** 1804 S-266, B-1, R.2 — Repaired — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net VG8. Breen Die State III, also known as S-266b, has an obverse rim break over RTY but no reverse rim break. Golden-olive surfaces exhibit scattered marks. The obverse and reverse surfaces have been tooled to diminish porosity.  
Ex: *Mid-American* (1/1988), lot 56; *March Wells*; *Goldberg Coins* (2/2009), lot 607.  
From *The Padula Family Foundation Collection*.

- 4470** 1804 S-266, B-1, R.2, AG3 PCGS. Our EAC grade: sharpness of Good 4, net AG3. Breen Die State IV, with obverse and reverse rim breaks, also known as S-266c. Relatively smooth olive-brown surfaces with splashes of steel and maroon patina. The date and LIBERTY are full, and about half of the reverse design and lettering is visible.  
Ex: *Rossi Collection* (*Bowers and Merena*, 5/1997), lot 138.  
From *The Padula Family Foundation Collection*. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

1804 Restrike Cent, AU Details  
The Usual Late Die State

- 4471** 1804 Restrike, R.3 — Damage — PCGS Genuine. AU Details. Our EAC grade: sharpness of AU50, net XF45. Breen Die State II, as usual, showing heavy die lapping and rust. Sharpness is good, and each side displays glossy patina with reddish-brown and deep ebony hues. The reverse has mild granularity under magnification.  
Ex: *COL Steven Ellsworth*; *Butternut* (4/2009).  
From *The Padula Family Foundation Collection*.

1805 S-267, B-1 Cent, VF20  
Smooth Surfaces

- 4472** 1805 S-267, B-1, R.1, VF20 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State II. Mildly glossy walnut-brown surfaces are mostly smooth and problem-free, save for a few small pits near the lower-left obverse rim and in the reverse wreath to the right of ONE. A defined rim is apparent on both sides, but dentils are weak or nonexistent.  
Ex: *Warwick Coin Shop*; *Spicer Auctions* (2000).  
From *The Padula Family Foundation Collection*. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

1805 S-268, B-2 Cent, Fine 15  
Early Die State

- 4473** 1805 S-268, B-2, R.3, Fine 15 PCGS. Our EAC grade: sharpness of Fine 15, net VG10. Breen Die State I. The surfaces are deep chocolate-brown and the devices show good detail. Slight granularity in portions of the obverse fields is noted. LIBERTY fades into the rim at the top, and a lone rim mark is seen just left of the L.  
Ex: *Richard Ariagno*; *Bowers and Ruddy* (1/1980), lot 890.  
From *The Padula Family Foundation Collection*. NGC ID# 224K, PCGS# 36430 Base PCGS# 1510

1805 S-269, B-3 Cent, VG Details

- 4474** 1805 S-269, B-3, R.1 — Scratch — PCGS Genuine. VG Details. Our EAC grade: sharpness of Fine 12, net Good 4. Early Die State, showing no crack at the base of the date. The devices are well-detailed and the rims are complete, but moderate corrosion is seen on each side and there are numerous old pinscratches across the centers.  
Ex: *Richard Ariagno*; *Bowers and Ruddy* (1/1980), lot 890.  
From *The Padula Family Foundation Collection*.

1806 S-270, B-1 Cent, VG10  
Excellent Sharpness and Color

**4475** 1806 S-270, B-1, R.1, VG10 PCGS. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State II, clashed. Remarkably smooth and appealing chocolate-brown surfaces complement excellent detail on the Liberty portrait. A few very minor rim bumps appear around the obverse, and on the reverse there is an old scratch that intersects the CE in CENT — none of which are significantly detracting.

Ex: John Dimbauer (5/2013).

From The Padula Family Foundation Collection.

**4476** 1806 S-270, B-1, R.1 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net VG10. Breen Die State III. Sharply detailed with complete rims and bold legends. The fraction and date are clear. Moderate corrosion on each side includes a few singular pits seen under a loupe.

Ex: Ocala Coin Show (4/2015).

From The Padula Family Foundation Collection.

**4477** 1806 S-270, B-1, R.1, AG3 PCGS. Our EAC grade: sharpness of Good 4, net AG3. Die State indeterminate due to wear and corrosion in the fields. The central devices are medium brown in color and well-outlined, while the fields are deeper ebony. LIBERTY and portions of the reverse border legend blend into the rims.

Ex: Richard Ariagno; Bowers and Ruddy (1/1980), lot 890.

From The Padula Family Foundation Collection. NGC ID# 224L, PCGS# 36436 Base PCGS# 1513

**4478** 1806 S-270, B-1, R.1 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net AG3. Die State indeterminate due to wear and granularity in the fields. Some shallow pitting is visible on the reverse. Despite the impairments, this piece shows pleasing medium brown color and has mostly readable legends and outlined devices.

Ex: Richard Ariagno; Bowers and Ruddy (1/1980), lot 890.

From The Padula Family Foundation Collection.

**4479** 1806 S-270, B-1, R.1 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net AG3. Die State indeterminate due to wear and field granularity. Wear is uneven on the obverse, but the reverse shows complete rims. All legends are at least mostly readable. The surfaces are uniformly deep chocolate-brown.

Ex: Richard Ariagno; Bowers and Ruddy (1/1980), lot 890.

From The Padula Family Foundation Collection.

1807 S-271, B-1 Cent, Fine 12  
Comet Variety

**4480** 1807 Comet, S-271, B-1, R.1, Fine 12 PCGS. Our EAC grade: sharpness of VG8, net VG8. Breen Die State IV. The surfaces are smooth and display pleasing walnut-brown color. Scattered light marks are not distracting to the unaided eye. Both sides are well-centered and boldly struck.

Ex: Jack Beymer (7/1996).

From The Padula Family Foundation Collection. NGC ID# 224M, PCGS# 36454 Base PCGS# 1531

1807/6 S-272, B-2 Cent, Good 4  
Important Small 7 over 6 Cent

**4481** 1807/6 Blunt 1, Small 7 over 6, S-272, B-2, High R.4, Good 4 PCGS. Our EAC grade: sharpness of Good 6, net Good 4. A highly popular variety, the 1807 Small 7 over 6 cent, S-272, enjoys a separate listing in the Guide Book that enhances demand for all surviving examples. A few handling marks and other imperfections appear on the slightly rough, medium brown surfaces of this example that exhibits a full and sharp date. LIBERTY is partially visible while all of the reverse lettering and details are complete. A faint hairline scratch is noted above the hair ribbon. Called Good 5 in the 2007 EAC catalog, this piece is better described as AG3 obverse, Good 6 reverse.

Ex: John Pijewski; EAC Sale (4/2007), lot 342.

From The Padula Family Foundation Collection. NGC ID# 224N, PCGS# 36439 Base PCGS# 1525

1807/6 Cent, S-273, B-3, XF40  
Pointed 1, Collectible *Guide Book* Entry

- 4482** 1807/6 Pointed 1, Large 7 over 6 S-273, B-3, R.1, XF40 PCGS. Our EAC grade: sharpness of VF25, net VF25. Breen Die State II, with prominent parallel flaws from IC in AMERICA to the leaves. The 7 in the date is punched over a clear underlying 6. Denticles are mostly indistinct, and the upper obverse and lower reverse legends are incomplete. The curls, denomination, and wreath exhibit good detail over smooth chocolate-brown surfaces. Ex: Chris Victor-McCawley (EAC bourse, 4/2015).  
*From The Padula Family Foundation Collection.*

- 4483** 1807/6 Pointed 1, Large 7 over 6 S-273, B-3, R.1, Good 4 PCGS. Our EAC grade: sharpness of Good 6, net Good 4. Breen Die State III. Uniformly granular with more or less even wear and deep chocolate-brown color. The overdate feature is plain. Ex: Warwick Coin Shop; Spicer Auctions (2000).  
*From The Padula Family Foundation Collection.* NGC ID# 224N, PCGS# 36442 Base PCGS# 1528

1807 S-274, B-4 Cent, Good 4  
Small Fraction

- 4484** 1807 Small Fraction, S-274, B-4, R.2, Good 4 PCGS. Our EAC grade: sharpness of VG8, net Good 6. Breen Die State IV, STA obliterated by the die bulge. The remainder of the coin is well-defined and evenly worn. Faintly granular ebony-brown surfaces show boldly outlined central devices. Ex: Chris Victor-McCawley (4/2005).  
*From The Padula Family Foundation Collection.* NGC ID# 224M, PCGS# 36445 Base PCGS# 1534

1807 S-275, B-5 Cent, XF Details  
Large Fraction

- 4485** 1807 Large Fraction, S-275, B-5, R.3 — Environmental Damage — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF30, net VG10. Breen Die State I. A pleasing deep olive and steel-brown cent, despite the granular obverse surface. There are no significant handling marks on this example. Ex: Peachtree Coins (3/1963); John D. Wright; EAC Sale (4/2005), lot 270.  
*From The Padula Family Foundation Collection.*

1807 S-276, B-6 Cent, AU Details  
Large Fraction

- 4486** 1807 Large Fraction, S-276, B-6, R.1 — Cleaned — PCGS Genuine. AU Details. Our EAC grade: sharpness of VF30, net VF25. Breen Die State I, or possibly later but improper centering prevents exact determination. This pleasing cent has chestnut and steel toning with bluish overtones on the reverse. Unlike so many examples of the variety, this one has normal die rotation. Ex: Goldberg Coins (9/2010), lot 934.  
*From The Padula Family Foundation Collection.*

- 4487** 1807 Large Fraction, S-276, B-6, R.1, Fair 2 PCGS. Our EAC grade: sharpness of AG3, net AG3. Die State indeterminate due to the advanced state of wear. Liberty's portrait is mostly outlined and the date is readable; on the reverse, the wreath and ONE CENT are clear while the border legend is occasionally weak. The surfaces are finely granular with uniform deep brown color. Ex: Bowers and Ruddy (1/1980), lot 51.  
*From The Padula Family Foundation Collection.* NGC ID# 224M, PCGS# 36451 Base PCGS# 1516

1808 S-277, B-1 Cent, Good Details  
Middle Die State

- 4488** 1808 S-277, B-1, R.2 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net Good 4. Breen Die State IV, cracked from the D in UNITED, through the wreath, to the rim above the final S in STATES. The strike is a trifle uneven, resulting in uneven wear on the rim, which is weak in spots. The central devices are better-defined. Medium brown surfaces show heavy abrasions and some small hits, accounting for the Damage noted by PCGS.  
Ex: *Bowers and Ruddy* (1/1980), lot 51.  
From The Padula Family Foundation Collection.

1808 S-278, B-2 Cent, VF Details  
Early Die State

- 4489** 1808 S-278, B-2, R.3 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net Good 6. Die State II, in the very early stages, showing the beginning of a metal flowline connecting star 11 to the rim; star 10 is not yet connected. This piece displays excellent detail and deep chocolate-brown color. Heavy corrosion on each side is most prominent in the upper-right obverse margin.  
Ex: *Warwick Coin Shop; Spicer Auctions* (2000).  
From The Padula Family Foundation Collection.

1808 S-279, B-3 Cent, VF Details

- 4490** 1808 S-279, B-3, R.1 — Environmental Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of Fine 15, net Fine 12. Breen Die State II. Fine granularity covers the obverse in accordance with the PCGS Details designation, although this deep chocolate-brown example retains strong definition for the VF level. The reverse is smoother with only microscopic stippling in the fields.  
Ex: *COL Steven Ellsworth; Butternut* (5/2013).  
From The Padula Family Foundation Collection.

- 4491** 1808 S-279, B-3, R.1 — Tooled — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 5, net Good 4. Breen Die State IV, clashed with buckling at the right-hand stars. The date and all reverse legends are readable, and the devices are boldly outlined. Deep olive-brown surfaces show light granularity and scattered abrasions. Some old tool marks are evident at the central reverse.  
Ex: *Bowers and Ruddy* (1/1980), lot 51.  
From The Padula Family Foundation Collection.

1809 S-280, B-1 Cent, Fine Details  
Middle Die State

- 4492** 1809 S-280, B-1, R.2 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State III. An intermediate die state, with ridges from star 11 and die cracks at E in STATES. The outer devices are a bit blurry from mild granularity, but pleasing deep brown color shows a hint of underlying brick-red and the centers are bold for the grade.  
Ex: *Douglas F. Bird* (8/2010).  
From The Padula Family Foundation Collection.

- 4493** 1809 S-280, B-1, R.2 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 4, net Fair 2. Die State indeterminate due to the advanced state of wear and to moderate corrosion in the fields. LIBERTY is entirely visible, and the portrait and wreath are both well-outlined. The date and most reverse legends are clear.  
Ex: *Helwig Collection; Bowers and Ruddy* (2/1979), lot 51.  
From The Padula Family Foundation Collection.

1810/09 S-281, B-1 Cent, Fine Details  
Early Die State

- 4494** 1810/09 S-281, B-1, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG8, net Good 6. Breen Die State II, unclashed. The dentils are sharp where the die alignment allows their visibility, and the central devices are bold with just honest wear. Uniformly granular surfaces are in harmony with deep chocolate-brown color. There is a minor rim bump above the U in UNITED and another above the first A in AMERICA.  
Ex: *Jack Beymer* (1/1996).  
From The Padula Family Foundation Collection.

1810 S-282, B-3 Cent, XF Details  
Middle Die State

- 4495** 1810 S-282, B-3, R.2 — Scratch — PCGS Genuine. XF Details. Our EAC grade: sharpness of VF20, net Fine 12. Breen Die State III. Sharply defined devices show little wear, although small areas of granularity are visible on the obverse, mostly on Liberty's neck. A thin, vertical scratch across Liberty's cheek is almost unseen at certain angles. The color is deep burgundy-brown. The reverse die is slightly out of alignment toward 1 o'clock.  
Ex: Gainsborough Collection (Superior, 2/1997), lot 84.  
From The Padula Family Foundation Collection.

1810 S-283, B-4 Cent, VG Details  
Normal Date

- 4496** 1810 S-283, B-4, R.2 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG8, net Good 6. The dark steel-brown surfaces are heavily corroded, making it impossible to identify the die state, but the date and all lettering remain legible. A die dot shows on the upright of Y in LIBERTY.  
Ex: Rod Burrell (11/2006).  
From The Padula Family Foundation Collection.

1810 S-284, B-5 Cent, Fine 12 Details

- 4497** 1810 S-284, B-5, R.3 — Environmental Damage — PCGS Genuine. Fine 12 Details. Our EAC grade: sharpness of VG10, net Good 5. The expectantly deep surfaces show pebbly traces of corrosion over each side. Struck from misaligned dies with weak definition at the bottom of the obverse and top of the reverse.  
Ex: Helwig Collection; Bowers and Ruddy (2/1979), lot 51.  
From The Padula Family Foundation Collection.

1810 Classic Cent, VG8  
S-285, B-2, Problem-Free Surfaces

- 4498** 1810 S-285, B-2, R.2, VG8 PCGS. Our EAC grade: sharpness of VG8, net VG8. An especially pleasing Classic Head cent, this 1810 has smooth, attractive steel-brown surfaces with a splash of maroon patina on the obverse.  
Ex: EAC Sale (4/2005), lot 285.  
From The Padula Family Foundation Collection. NGC ID# 224S, PCGS# 36484 Base PCGS# 1549

1811/0 S-286, B-2 Cent, VF30  
Popular Guide Book Listing

- 4499** 1811/0 S-286, B-2, R.3, VF30 PCGS. Our EAC grade: sharpness of VF20, net VF20. Breen Die State I. The underdigit 0 is plainly visible around the final 1 in the date. Breen wrote of this popular Guide Book variety: "Usually dark and on rough or defective planchets." This problem-free example has relatively smooth glossy brown and steel-blue surfaces with blending over Liberty's hair and the stars.  
Ex: David Bloom (10/2011); Butternut.  
From The Padula Family Foundation Collection.

- 4500** 1811/0 S-286, B-2, R.3 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of VG10, net VG7. A sharp overdate is noted on this lightly granular 1811/10 cent that exhibits a few trivial hairlines on its finely granular olive-brown surfaces.  
Ex: EAC Sale (4/2005), lot 286.  
From The Padula Family Foundation Collection.

- 4501** 1811 S-287, B-1, R.2 — Environmental Damage — PCGS Genuine. VG Details. Our EAC grade: sharpness of VG10, net VG8. Late Die State. The obverse die is slightly out of alignment toward 9 o'clock. Both sides are moderately well-detailed with uniform chocolate-brown color. Corrosion appears in the fields along with a few scattered contact marks.  
Ex: Superior Galleries (2/1997).  
From The Padula Family Foundation Collection.

1812 Large Date Cent, VF Details  
S-288, B-3, Late Die State

- 4502** 1812 Large Date, S-288, B-3, R.2 — Damage — PCGS Genuine. VF Details. Our EAC grade: sharpness of VF20, net Fine 12. Late die state. This coin has had just two owners for the last 47 years. A tiny reverse rim bruise is evident along with minor handling marks, most noticeably at the left obverse. Microscopic hairlines are evident on the bluish steel-brown and maroon surfaces.  
Ex: John Hamrick (3/1970); John D. Wright; EAC Sale (4/2005), lot 288.  
From The Padula Family Foundation Collection.

1812 S-289, B-4 Cent, Fine 12  
Large Date

- 4503** 1812 Large Date, S-289, B-4, R.1, Fine 12 PCGS. Our EAC grade: sharpness of VG10, net VG10. Late die state, with heavy obverse flow lines. Struck slightly off-center to the left, the smooth dark steel-brown surfaces are lightly abraded and the date and all lettering are bold.  
Ex: J. Keyes; Superior (9/1997), lot 351.  
From The Padula Family Foundation Collection. NGC ID# 224W, PCGS# 36508 Base PCGS# 1564

1812 Small Date Classic Cent, AU Details  
S-290, B-2

- 4504** 1812 Small Date, S-290, B-2, R.1 — Altered Surfaces — PCGS Genuine. AU Details. Our EAC grade: sharpness of VF35, net VF25. The fields show evidence of smoothing, but the color is unaffected. The strike details are strong throughout.  
Ex: Abe Kosoff; Phil Moore (5/2014).  
From The Padula Family Foundation Collection.

- 4505** 1812 Small Date, S-290, B-2, R.1 — Environmental Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 5, net AG3. Die State indeterminate due to heavy corrosion on each side. The surfaces are deep ebony-brown and uniformly granular. The date and legends are readable, and the primary devices are outlined.  
Ex: Superior Galleries (9/1997).  
From The Padula Family Foundation Collection.

1812 Small Date Cent, Good 6  
S-291, B-1

- 4506** 1812 Small Date, S-291, B-1, R.2, Good 6 PCGS. Our EAC grade: sharpness of Good 6, net Good 6. Die State II. Even wear over each side. Attractive chestnut-brown surfaces. For the grade, this piece is remarkably problem-free.  
Ex: BCC Coin (1/2006).  
From The Padula Family Foundation Collection. NGC ID# 224W, PCGS# 36502 Base PCGS# 1561

**4507** 1813 S-292, B-2, R.2, AG3 PCGS. Our EAC grade: sharpness of Good 4, net AG3. A smooth olive-brown cent, this piece has the devices outlined with the date and lettering weak but visible.  
*Ex: Richard Ariagno; Bowers and Ruddy (1/1980), lot 890.*  
**From The Padula Family Foundation Collection.** NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

**4508** 1813 S-292, B-2, R.2 — Damage — PCGS Genuine. Good Details. Our EAC grade: sharpness of Good 6, net AG3. A light brown and steel example, this piece has rough surfaces with two small punch marks at the date.  
*Ex: Warwick Coin Shop; Spicer Auctions (2000).*  
**From The Padula Family Foundation Collection.**

---

1813 S-293, B-1 Cent, Fine Details

**4509** 1813 S-293, B-1, R.2 — Environmental Damage — PCGS Genuine. Fine Details. Our EAC grade: sharpness of Fine 15, net VG8. Breen Die State IV. Spots of emerald patina appear on the reverse of this slightly rough steel and olive-brown Classic Head cent. Trivial handling marks include a small nick near star 7.  
*Ex: EAC Sale (5/2006), lot 273.*  
**From The Padula Family Foundation Collection.**

---

1814 Crosslet 4 Cent, VG8  
S-294, B-1, Still Showing the 'Ridge'

**4510** 1814 Crosslet 4, S-294, B-1, R.1, VG8 PCGS. Our EAC grade: sharpness of VG8, net VG7. Die State II. Wear has eliminated the tell-tale die clashing characteristic of this state, but the "ridge" is still apparent above TES OF A. Attractive deeper brown fields establish the background for the much lighter reddish-brown high points of the design.  
*Ex: Jack Beymer (1996).*  
**From The Padula Family Foundation Collection.** NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

---

**4511** 1814 Plain 4, S-295, B-2, R.1 — Cleaned — PCGS Genuine. Good Details. Our EAC grade: sharpness of VG7, net Good 6. Hints of coppery-orange color are visible on the predominately steel-brown surfaces of this still attractive Classic Head cent.  
*Ex: Douglas F. Bird (4/2001).*  
**From The Padula Family Foundation Collection.**

# SESSION FOUR

## MORGAN DOLLARS

- 4601 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** The obverse displays mottled champagne and lavender hues, while the reverse is more uniformly light gold. The strike is bold, and minimal abrasions are discernible. A vibrant cartwheel effect accentuates the eye appeal. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4602 1878 7/8TF 7/3 Weak, VAM-32, MS64 Prooflike PCGS.** A Top 100 Variety. Numerous prominent die marks exist for this variety, making attribution quick. The present example has heavily polished fields that deliver a modest cameo effect on each side. No toning is present, and abrasions are minimal. The strike is sharp throughout except on the eagle's talons. PCGS# 40205 Base PCGS# 7075
- 4603 1878 7/8TF Doubled Legs, VAM-33A, MS65 PCGS.** The late die state variant of VAM-33, clashed at Liberty's profile. A loupe reveals a shallow, almost invisible void-like strike-through on Liberty's chin. Softly frosted luster is brilliant and free of any major abrasions. The strike is sharp. VAM-33A is most notable for the bold die doubling on the eagle's leg. NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7074
- 4604 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS.** Four underlying tailfeathers are strongly visible at the bottom of the primary seven. This sharp, frosty Gem is brilliant aside from a few crescents of amber and green toning at the rims. A few light surface grazes are not distracting. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078
- 4605 1878 7/8TF Strong, VAM-38, MS65 PCGS.** LIBERTY is doubled, and five remaining tailfeathers from the original eight are apparent beneath the reimpresed seven tailfeathers. Complete brilliance and frosty luster characterize each side. A bit soft over the ear and breast, but the talons are notably sharp. Rarely seen finer. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078
- 4606 1878 7/8TF Strong, VAM-38, MS65+ PCGS. CAC.** Peripheral gunmetal-blue, cherry-red, and golden toning surrounds brilliant centers with sharp strike detail. The resulting eye appeal accounts for the CAC endorsement. Liberty's cheek and the adjoining fields are notably devoid of flaws. Five strong tailfeathers and doubling on LIBERTY are diagnostic. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

### 1878 7TF Morgan, Beautiful MS66 Reverse of 1878 Condition Rarity

- 4607 1878 7TF Reverse of 1878 MS66 NGC.** This is among the finest 1878 seven tailfeathers Morgan dollar of the Reverse of 1878 subtype. The strike is sharp, and each side displays mostly untuned, frosty mint luster with a halo of gold and aquamarine around part of the obverse periphery. The hair curls around Liberty's face do not show any high-point abrasions, and only a few light grazes on the jaw prevent an even finer grade. Census: 28 in 66 (1 in 66 ★), 1 finer; 5 in 66 Prooflike, 0 finer; 1 in 66 ★ Deep Prooflike, 0 finer (8/17). NGC ID# 2TY3, PCGS# 7074

### 1878 Dollar, MS64+ Deep Mirror Prooflike 7 Tailfeathers, Reverse of 1878

- 4608 1878 7TF Reverse of 1878 MS64+ Deep Mirror Prooflike PCGS. CAC.** The estimated 7.8 million 1878 7 Tailfeathers, Reverse of 1878 dollars struck are thought to have been produced between roughly April 4 and June 28. Prooflike coins are somewhat available, but Deep Mirror Prooflike examples are decidedly less accessible, particularly in this quality. A needle-sharp strike defines the motifs on each side of this brilliant near-Gem dollar. The fields showcase marked reflectivity, resulting in bold contrast against lightly frosted devices. NGC ID# 253K, PCGS# 97075
- 4609 1878 7TF Reverse of 1879 MS65 PCGS.** Both sides of this conditionally rare issue exhibit intense olive and gold toning with frosty underlying luster. This is an exceptional attractive dollar from an issue that is seldom seen in finer grades. There are only 25 better-graded examples at PCGS (7/17). NGC ID# 253L, PCGS# 7076
- 4610 1878 7TF Reverse of 1879 MS65 PCGS.** Frosty silver-gray luster shows irregular splashes of sun-orange, amber, and sea-green toning over well-preserved surfaces. The strike is bold on the obverse but weak on the eagle's breast and legs. The originality of the surfaces is unmistakable. NGC ID# 253L, PCGS# 7076
- 4611 1878-CC MS65 PCGS.** This Gem 1878-CC Morgan dollar is frosty and razor-sharp with nearly pristine surfaces. The reverse alone could grade two points higher, but a few faint grazes on Liberty's cheek limit the PCGS designation to "only" MS65. This issue is challenging in finer condition. Brilliant interiors cede to amber-gold, olive, and lavender-gray border toning on each side. A high-end coin for the grade. NGC ID# 253M, PCGS# 7080
- 4612 1878-CC MS65 PCGS.** This Gem is sharp and undipped, showing semiprooflike fields and frosty design elements. A splash of vivid electric-blue toning over the right-hand side of the reverse is rimmed by violet and orange-gold. No major abrasions are seen. NGC ID# 253M, PCGS# 7080
- 4613 1878-CC MS65 PCGS.** Brilliant, frosty devices reside amid semiprooflike fields on this Gem 1878-CC Morgan dollar, which shows no distracting abrasions or toning. The Liberty portrait is razor-sharp, although we note softness on the eagle's talons and the arrowheads. Finer 1878-CC Morgans will be elusive for many collectors. NGC ID# 253M, PCGS# 7080
- 4614 1878-CC MS65 PCGS. CAC.** This unusual Gem, representing the first Morgan dollar of the Carson City Mint, has frosty luster on the obverse that shines through intense gold and iridescent toning. The reverse is prooflike and brilliant without toning, save for delicate peripheral gold. NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66  
Intense Natural Toning**

- 4615 1878-CC MS66 PCGS.** A popular first-year, branch mint issue, the 1878-CC Morgan dollar becomes very rare in grades above the MS66 level. This impressive Premium Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under intense shades of lavender-gray and golden-tan toning. PCGS has graded six numerically finer examples (7/17). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66  
Attractive Multicolor Toning**

- 4616 1878-CC MS66 PCGS.** The 1878-CC Morgan is occasionally available in MS66, but finer coins are extremely rare. This toned Premium Gem displays attractive lavender, sky-blue, amber-orange, and yellow-gold toning over each side, masking a few insignificant abrasions. The strike is sharp and luster is satiny. PCGS reports only a half dozen numerically finer representatives (7/17). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66+  
Condition Rarity in Finer Grades**

- 4617 1878-CC MS66+ PCGS.** The Carson City Mint produced more than 2.2 million silver dollars in 1878, the first year of the Morgan design. The issue is always in demand from branch mint type collectors and date collectors alike. Many high-grade coins have survived, but the population thins out drastically above the MS66 grade level, making this Plus-graded Premium Gem an excellent balance of quality and value. The design elements exhibit razor-sharp definition throughout, and the impeccably preserved surfaces radiate vibrant mint luster on both sides. An interesting die crack runs through the base of the letters in dollar. PCGS has graded only six numerically finer examples (8/17). NGC ID# 253M, PCGS# 7080

- 4618 1879 MS66 PCGS.** This sharply detailed Premium Gem exhibits well-preserved brilliant surfaces that show a mix of satiny mint luster and prooflike reflectivity at selected angles. Overall eye appeal is terrific. NGC ID# 253S, PCGS# 7084

**1879 Morgan Dollar, Radiant MS66+  
Extremely Rare Any Finer**

- 4619 1879 MS66+ PCGS.** The Premium Gem level is a transitional grade where the 1879 goes from plentiful in Gem condition to extremely rare in Superb Gem condition. This high-end MS66+ is clearly closer to the latter in terms of its technical quality. Marks are essentially unseen, save for a fleck under the left wing. Each side is radiantly brilliant with peripheral golden accents. There are merely five finer examples at PCGS (7/17). NGC ID# 253S, PCGS# 7084

- 4620 1879-CC AU50 NGC.** Normal Mintmark. The surfaces are largely silver-gray with a hint of gold on this lightly circulated 1879-CC, the first of the Morgan dollar keys from Carson City. A loupe reveals a few thin scrapes from a short spate in circulation, none overt. NGC ID# 253U, PCGS# 7086

**1879-CC Morgan Dollar, MS61  
Capped Die, VAM-3**

- 4621 1879-CC Capped Die, VAM-3, Top 100, MS61 NGC.** A Top 100 Variety. The date is doubled and the mintmark shows the remnants of a partially effaced small CC below the larger primary mintmark. This sharply detailed Mint State specimen exhibits lightly toned surfaces that show the minimum number of minor contact marks for the grade. Cartwheel mint luster is present, but slightly muted. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

- 4622 1879-O MS64+ PCGS. CAC.** This frosty, brilliant CAC coin displays sharp design elements and outstanding cartwheel luster. A few linear grazes around Liberty's chin are all that deny a full Gem grade. The 1879-O is a popular issue seldom seen this fine below MS65. NGC ID# 253X, PCGS# 7090

**1879-O Dollar, MS65  
Rarely Found in Better Condition**

**4623 1879-O MS65 PCGS.** Often, the 1879-O is found in circulated and lower Uncirculated grades. Comparable Gems are the highest reasonably obtainable examples of this New Orleans issue, representing the resurrection of the long-out-of-commission Southern facility. Shimmering luster over surprisingly well-defined and wholly brilliant surfaces delivers pleasing eye appeal. The PCGS *Population Report* lists 25 high grading events (7/17). NGC ID# 253X, PCGS# 7090

**4624 1879-S Reverse of 1878, VAM-43, MS64+ PCGS. CAC.** A Top 100 Variety. A diagonal die line in the eagle's right (facing) wing and the Reverse of 1878 hub type are the chief attributes of VAM-43. This high-end near-Gem displays sharp design elements and shows minimal abrasions. The fields are semiprooflike and each side has appreciable cameo contrast. A dash of amber-gold toning along the upper-right obverse border is the only coloration present. NGC ID# 253W, PCGS# 133864 Base PCGS# 7094

**4625 1879-S MS66+ Prooflike PCGS. CAC.** The devices are sharp and thickly frosted with silver-white luster. The fields display deep mirroring and only a few microscopic ticks. Cameo contrast appears on each side, and the overall eye appeal is outstanding. Finer Prooflike coins are scarce. NGC ID# 253X, PCGS# 7093

**4626 1879-S MS65 Deep Mirror Prooflike PCGS.** Each side boasts fully brilliant surfaces and profound field-device contrast. The motifs are razor-sharp and coated in a thick layer of frost. Clean mirrors are deeply reflective. The 1879-S is very scarce in this quality. NGC ID# 45PS, PCGS# 97093

**4627 1879-S MS65+ Deep Mirror Prooflike PCGS.** A stunning Gem, this Plus designated 1879-S Morgan is fully brilliant and highly lustrous with deeply mirrored fields around frosty silver devices. There is no toning visible on either side. NGC ID# 45PS, PCGS# 97093

**4628 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS65 NGC.** Delicate champagne and gold toning visit the surfaces of this essentially brilliant Gem that displays frosty silver luster and sharp design definition. The former 79 is clearly visible beneath the 80 in the date. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**4629 1880-CC 8 Over Low 7, VAM-6, MS65+ PCGS. CAC.** A Top 100 Variety. This piece is boldly struck and brilliant, showing softly frosted design elements and semiprooflike fields. A few marks near Liberty's nose limit the grade. VAM-6 is scarce and popular in high grade. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

**4630 1880-CC 8/7, Reverse of 1878, VAM-7, MS65 PCGS. CAC.** A Hit List 40 Variety. Clash marks below the chin, a dash under the second 8, and the parallel top fletching attribute VAM-7. This is a brilliant Carson City Gem with frosty luster and an area of golden patina is seen at the upper-left of the obverse. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

**4631 1880-O MS64 PCGS.** The 1880-O Morgan is conditionally rare in MS65, although this near-Gem example remains accessible by most collectors. The surfaces are satiny and brilliant, and only a few light grazes on the cheek limit the grade. The strike sharpness is above average for the issue. PCGS lists 45 finer non-Prooflike coins and one finer Prooflike (8/17). NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, MS64+  
Well-Preserved and Lustrous**

**4632 1880-O MS64+ NGC. CAC.** More than 5.3 million Morgan dollars were struck at the New Orleans Mint in 1880, all with the Reverse of 1879 that features the slanting top arrow feather. This Plus-graded Choice example exhibits sharply detailed design elements and lightly marked, lustrous surfaces that show only minor signs of contact. Eye appeal is outstanding. NGC ID# 2543, PCGS# 7114

**4633 1880/79-O Crossbar, VAM-4, Top 100, MS64 PCGS.** A Top 100 Variety. Metal in the upper loop of the second 8 is the remnant of an underlying 7. The small O mintmark distinguishes VAM-4 from VAM-5. This strongly struck Choice Uncirculated dollar is brilliant with glints of pale gold around the borders. Minor field chatter. Population: 13 in 64, 0 finer (8/17). NGC ID# 2543, PCGS# 133880 Base PCGS# 7116

**4634 1880-O 8 Over 7 Ear, VAM-6A, MS64 PCGS.** A Top 100 Variety. A thin "ear" of an earlier 7 at the top-left corner of the second 8 is the only remnant of the 8/7 overdate feature on this popular VAM variety. This near-Gem example is frosty and lightly toned in warm golden hues. The usual touch of strike weakness is seen at the central high points. Abrasions are minimal. NGC ID# 2543, PCGS# 133883 Base PCGS# 7114

**4635 1880-S MS67+ PCGS. CAC.** This blazing, high-end Superb Gem type coin displays razor-sharp detail and brilliant, beautiful surfaces. Were it not for a few microscopic ticks in the field behind Liberty's portrait, a full MS68 grade might have been achieved. The fields are semiprooflike. Liberty's cheek is virtually pristine. NGC ID# 2544, PCGS# 7118

**1880-S Silver Dollar, MS68  
Eye-Catching Type Coin**

**4636 1880-S MS68 NGC.** As the grade suggests, this brilliant 1880-S Morgan dollar is extremely well-preserved, including a perfect cheek and semiprooflike obverse fields. The reverse is thoroughly frosty. Well-struck design elements complete the visual attributes. The 1880-S is a favorite type coin in high grade, as its combination of availability, affordability, and generous eye appeal is unmatched by all but a handful of other Morgan dollar issues. NGC lists five finer non-Prooflike coins (8/17). NGC ID# 2544, PCGS# 7118

**4637 1880-S MS67 Prooflike NGC. CAC.** This brilliant Superb Gem type coin displays sharp, frosty design elements and fields that have a blend of cartwheel luster and mirrorlike reflectivity. Cameo contrast is apparent on each side. Liberty's cheek is pristine. NGC lists only eight finer Prooflike representatives. NGC also lists 19 Deep Prooflike coins in this and finer grades (8/17). NGC ID# 2544, PCGS# 7119

- 4638 1881-CC MS66+ PCGS. CAC. VAM-2.** A small tine appears in the upper loop of the first 8, and a die scratch occurs between the olive leaves and stem above the fletchings. This fully struck Carson City Premium Gem is entirely brilliant with cartwheel luster. Exceptionally preserved and even better than the grade suggests. NGC ID# 2549, PCGS# 7126
- 4639 1881-CC MS66 Prooflike PCGS.** Prooflike 1881-CC Morgan dollars are rare in MS66 and prohibitively so any finer. Interestingly, they are rarer in this condition than Deep Mirror Prooflike coins. The present example is sharply struck with frosty motifs and reflective fields. A few faint grazes appear on the obverse, and the reverse has scattered tiny olive specks. Population: 32 in 66 (3 in 66+) Prooflike, 1 finer (7/17). NGC ID# 2547, PCGS# 7127
- 4640 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC.** This near-Gem is sharply struck and displays deep reflectivity in the fields, producing appreciable cameo contrast. The coin is brilliant, and a few light grazes on Liberty's cheek are all that limit the grade. NGC ID# 2547, PCGS# 97127
- 4641 1881-O MS65 PCGS. CAC.** The entire reverse and right obverse maintain their brilliance, while the left obverse displays magnificent toning in shades of fire-orange, magenta, violet, and pastel-blue. Strike detail is incredibly sharp for a Louisiana Morgan dollar. Unimprovable eye appeal and rare in higher grades. NGC ID# 2548, PCGS# 7128
- 4642 1881-S MS67+ PCGS. CAC.** A Plus-graded Superb Gem representative of this popular type issue, with razor-sharp definition on all design elements and impeccably preserved brilliant surfaces that radiate vibrant mint luster throughout. Eye appeal is terrific. NGC ID# 2549, PCGS# 7130
- 4643 1881-S MS67+ PCGS. CAC.** The 1881-S is available in all grades, making it the number one favorite choice of type collectors. This Plus-graded Superb Gem is sharply detailed and impeccably preserved, with vibrant mint luster and brilliant surfaces. NGC ID# 2549, PCGS# 7130
- 4644 1881-S MS67 Prooflike PCGS. CAC.** The deeply mirrored fields produce cameo contrast against the frosty, sharp design elements on this beautifully preserved 1881-S dollar. The eye appeal is outstanding. An exceptional Morgan type coin. Population: 80 in 67 (3 in 67+) Prooflike, 5 finer; 6 in 67 Deep Mirror Prooflike, 1 finer. CAC: 24 in 67, 2 finer (7/17). NGC ID# 26G7, PCGS# 7131
- 4645 1882 MS66 PCGS.** Premium Gem condition is essentially the highest collectible grade for the 1882 Morgan dollar, which claims a healthy production of 11.1 million coins. There are only 10 finer submissions at PCGS (8/17). This example is extraordinarily clean and well-struck. Luster rolls over brilliant surfaces with daubs of peripheral gold. NGC ID# 254A, PCGS# 7132
- 4646 1882-CC MS66+ PCGS. CAC.** An extraordinary Carson City Morgan dollar for the advanced Set Registry collector or Carson City type set collector. This piece has pristine surfaces with faint gold toning on brilliant and highly lustrous silver surfaces. A beauty. PCGS has certified just 87 finer pieces (7/17). NGC ID# 254S, PCGS# 7134
- 4647 1882-O MS65+ PCGS. CAC.** Where strike is usually a problem for New Orleans dollars, this Gem displays crisp detail that, in part, qualifies it for the high-end assessment. Remarkably lively luster and original mint brilliance prove readily appealing. From a mintage of 6 million coins. NGC ID# 254C, PCGS# 7136
- 4648 1882-O MS65+ PCGS. CAC.** A Plus-graded Gem representative of this popular date, with sharply detailed design elements and vibrant mint luster on both sides. Well-preserved surfaces show some subtle hints of greenish-gold and lavender-gray toning. The 1882-O is very scarce in finer grades. NGC ID# 254C, PCGS# 7136
- 4649 1882-S MS67+ PCGS. CAC.** A sensational early S-Mint dollar that is destined for a top Registry Set of Morgan silver dollars or a high-end 19th century type set. Both sides are brilliant and untuned with frosty silver luster. NGC ID# 254F, PCGS# 7140
- 4650 1883 MS65 Deep Mirror Prooflike NGC.** A tiny fraction of all 1883 Morgan dollars display enough field-device contrast to merit a Deep Mirror Prooflike designation. Further, few DMPL coins have achieved a Gem assessment, and only a handful are known finer. This thickly frosted MS65 dollar is entirely brilliant with reflective mirrors. Census: 37 in 65 Deep Mirror Prooflike, 8 finer (7/17). NGC ID# 254G, PCGS# 97143
- 4651 1883-O MS66+ PCGS. CAC.** The 1883-O is a plentiful issue even in MS66, but the Plus designation on this piece and the vivid rainbow toning across the reverse make it exceptional for the grade and issue, as CAC recognizes. Liberty's cheek is nearly pristine, and only a few microscopic grazes in the left obverse field prevent a full MS67 grade. The strike is slightly weak above Liberty's ear, as usual. NGC ID# 254J, PCGS# 7146
- 4652 1883-O MS67 PCGS.** Unsurpassable as a New Orleans type coin. This coin has it all. The surfaces are brilliant, the mint luster is atypically thick and frosted for a New Orleans dollar, and there are no noticeable abrasions on either side. NGC ID# 254J, PCGS# 7146
- 4653 1884-CC MS65 Deep Mirror Prooflike PCGS.** The sharply detailed design elements of this impressive Gem have a rich coat of mint frost that contrasts profoundly with the deeply reflective fields. The surfaces show only minor contact marks and hair lines and eye appeal is outstanding. NGC ID# 254M, PCGS# 97153
- 4654 1884-O MS67 NGC.** A virtually pristine, softly frosted Superb Gem example of this usually plentiful New Orleans issue. The strike is above-average, and both sides are brilliant. Examples are scarce in this grade, and PCGS and NGC each report only one coin numerically finer (7/17). NGC ID# 254N, PCGS# 7154
- 4655 1884-S AU58 PCGS.** This is a well-struck, undipped near-Mint example of the better 1884-S date. The strike is good, and substantial luster cartwheels in the fields. Both sides have mottled gold and mint-green toning that attests to the originality of the surfaces. NGC ID# 254P, PCGS# 7156
- 4656 1884-S AU58 PCGS.** The 1884-S and 1901-P are the foremost condition rarities in the Morgan series. Each is very scarce in mint condition. This piece has almost complete mint luster with just the faintest trace of friction in the fields. Russet and blue toning surrounds the devices, more so on the reverse. NGC ID# 254P, PCGS# 7156

#### 1884-S Morgan Dollar, AU58+ Nice Color and Luster

- 4657 1884-S AU58+ PCGS. CAC.** A Plus-graded near-Mint representative of this popular issue, with strongly impressed design elements that show just a trace of high-point wear. The brightly lustrous surfaces display a large number of very minor contact marks and attractive shades of champagne-gold toning enhance the considerable eye appeal. NGC ID# 254P, PCGS# 7156
- 4658 1885 MS67 NGC.** Particularly frosty, brilliant, and unabraded, this Superb Gem 1885 Morgan dollar showcases a rarely seen level of quality and eye appeal for the issue. The strike is sharp in the centers. NGC lists only five numerically finer submissions (7/17). NGC ID# 254R, PCGS# 7158

- 4659 1885 MS67 NGC.** Of the more than 17.7 million Morgan dollars struck at Philadelphia in 1885, only a handful of coins are graded finer, including five submissions at NGC (8/17). Totally brilliant with swirling cartwheel luster. The strike is slightly incomplete over the centers. Smooth fields with a single tick on the cheek and another on the breast. NGC ID# 254R, PCGS# 7158

**1885 Morgan, MS65 Deep Mirror Prooflike  
A Mostly Brilliant Cameo**

- 4660 1885 MS66 Deep Mirror Prooflike PCGS.** The 1885 Morgan dollar is an available date in most grades, but the Deep Mirror Prooflike population thins considerably at the Premium Gem level, and finer examples are prohibitively rare. This piece is brilliant across the interiors with yellow-gold border toning emerging from the upper obverse and lower reverse peripheries. The frosty, well-struck design elements provide appreciable cameo contrast with the mirrored fields. Population: 94 in 66 (3 in 66+) Deep Mirror Prooflike, 1 finer (8/17). NGC ID# 45WM, PCGS# 97159

- 4661 1885-CC MS65 PCGS.** The widespread distribution of the 1885-CC during the GSA release of the 1970s explains its availability in high grades. This is a totally brilliant Gem with needle-sharp strike detail over the centers. Smooth fields with a couple of minute cheek grazes. NGC ID# 254S, PCGS# 7160

- 4662 1885-CC MS65 ★ NGC. CAC.** An attractive, upper-end Gem example of this sought-after Carson City issue. The reverse is primarily brilliant, while a wide, vivid rainbow crescent encompasses nearly the entire obverse. The surfaces exhibit a razor-sharp strike with frosty luster beneath the patina. NGC ID# 254S, PCGS# 7160

- 4663 1885-CC MS66 NGC.** Lustrous and frosty with warm golden toning over the obverse and full silver brilliance on the reverse. Neither side exhibits distracting abrasions. The 1885-CC Morgan is occasionally seen in this grade but is scarce finer (7/17). NGC ID# 254S, PCGS# 7160

- 4664 1885-CC MS65+ Prooflike PCGS.** This CC-mint issue has a low mintage of 228,000 coins, and few coins exhibit stark contrast that merits a formal Prooflike designation. This thickly frosted Gem dollar is well-struck at the centers with mirrorlike fields. Minor roller marks occur on the chin, as often seen. NGC ID# 254S, PCGS# 7161

- 4665 1885-CC MS64 Deep Mirror Prooflike PCGS. CAC.** This brilliant near-Gem displays stark cameo contrast and deeply mirrored fields. The strike is razor-sharp. A few small field marks define the grade but are not overly obtrusive. Deep Mirror Prooflike examples of this popular Carson City issue are in high demand. NGC ID# 254S, PCGS# 97161

- 4666 1885-CC MS65 Deep Mirror Prooflike NGC.** This dramatically contrasted Gem Deep Mirror Prooflike example displays stark cameo contrast with no major toning to disrupt it. Some minor strike weakness occurs on the central high points, and the scattered light marks are a familiar sight on Gem-graded DMPL Morgans. This is an 1885-CC Morgan with a high degree of "pop." NGC ID# 254S, PCGS# 97161

- 4667 1885-O MS65 Deep Mirror Prooflike PCGS. CAC.** This beautiful CAC-approved displays full prooflike cameo contrast on each side, with a clean cheek and mostly unmarked fields. The mirroring in the fields glimmers like mercury, and the frosty design elements are untuned. Finer Deep Mirror Prooflike examples are scarce. Housed in an old doily label holder. NGC ID# 254T, PCGS# 97163

- 4668 1885-S MS65 NGC. CAC.** To the untrained eye, it will be almost impossible to determine what kept this piece from an even finer grade, although careful examination with a loupe reveals a few faint interruptions in the luster of the obverse. The CAC green label endorses the exceptional quality for the MS65 level. Daubs of blue and orange-gold border toning accent brilliant, satiny interiors. NGC has seen only 14 finer coins, all non-Prooflike examples (8/17). Housed in a prior generation holder. NGC ID# 254U, PCGS# 7164

**1885-S Morgan Dollar, MS64  
Scarce Prooflike Specimen**

- 4669 1885-S MS64 Prooflike PCGS.** The 1885-S Morgan dollar claims a mintage of nearly 1.5 million pieces and specimens in MS64 condition are not difficult to locate. However, Choice specimens with prooflike surfaces are much more elusive. This delightful MS64 example offers well-detailed design elements and deeply reflective fields that show a few minor hair lines and contact marks. PCGS has graded 13 numerically finer Prooflike examples and one Deep Mirror Prooflike specimen in MS65 (7/17). NGC ID# 254U, PCGS# 7165

**1885-S Dollar, MS64 Prooflike  
Borderline Deep Mirror**

- 4670 1885-S MS64 Prooflike PCGS. CAC.** This Choice Prooflike Mint State 1885-S Morgan dollar borders on the Deep Mirror Prooflike designation, in our opinion, with fully mirrored fields that surround the frosty and fully lustrous devices. A lovely example with brilliant surfaces and no evidence of toning on either side. Population: 57 in 64 (1 in 64+) Prooflike, 14 finer, including a single Deep Mirror Prooflike example. CAC: 9 in 64, 0 finer (8/17). NGC ID# 254U, PCGS# 7165

- 4671 1886 MS67+ PCGS.** This Plus-graded Superb Gem exhibits creamy, virtually pristine surfaces, with sharply detailed design elements and vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 254V, PCGS# 7166

- 4672 1886 Doubled Arrows, VAM-17, MS67 PCGS.** A Top 100 Variety. Cartwheel luster beams across the smooth, minimally marked surfaces of this splendid 1886 Morgan. Fully brilliant with an extra-sharp strike, this Superb Gem is a prize for both the variety specialist and non-specialized silver dollar collector alike. NGC ID# 254V, PCGS# 133904 Base PCGS# 7166

- 4673 1886-O MS62 PCGS.** This attractive MS62 Morgan dollar is sharply detailed throughout, with lustrous surfaces that show a scattering of minor contact marks and highlights of greenish-gold and lavender patina. The eye appeal is outstanding for the grade. Ex: *Central States Signature* (Heritage, 4/2015), lot 5672. NGC ID# 254W, PCGS# 7168

- 4674 1886-O MS62 PCGS.** Lustrous with a light golden hue, this Mint State 1886-O Morgan dollar displays relatively appealing surfaces for the grade. Study with a loupe reveals expected strike softness on the central high points, but there are no other imperfections of note. NGC ID# 254W, PCGS# 7168
- 4675 1886-O MS62 PCGS.** Satiny and lustrous with a dusky champagne hue over each side. This Uncirculated 1886-O Morgan dollar displays light handling marks but no severe distractions. A better date in high grade. NGC ID# 254W, PCGS# 7168
- 4676 1886-O MS62 ANACS.** A frosty Mint State example of the conditionally scarce New Orleans dollar issue produced in 1886, this example has original frosty silver luster with hints of gold and iridescent toning at the borders. NGC ID# 254W, PCGS# 7168
- 4677 1887 MS67 PCGS.** A virtually pristine Superb Gem example of this available Philadelphia issue, showing warm golden toning on the obverse and silvery brilliance on the reverse. Slight weakness on the hair above Liberty's ear is normal for the issue. PCGS has seen only a single coin numerically finer (7/17). NGC ID# 27Y3, PCGS# 7172
- 4678 1887-O MS65+ PCGS.** Ex: California. This high-end Gem is frosty and well-struck for the issue, showing a faint suggestion of light golden toning over otherwise brilliant surfaces. Liberty's cheek is clean. PCGS has seen 12 finer representatives (7/17). NGC ID# 2547, PCGS# 7176

**1887-O Morgan, MS65 Prooflike  
Rare So Fine With Reflective Fields**

- 4679 1887-O MS65 Prooflike PCGS.** Delicate champagne toning graces the mirrored fields and frosty design elements of this Gem Prooflike 1887-O Morgan dollar. A few faint grazes in the left obverse field limit the numeric grade but are largely unseen at most angles. The usual strike softness occurs on the central high points of this New Orleans dollar. Prooflike coins are rare this fine. Population: 19 in 65 Prooflike, 2 finer; 6 in 65 Deep Mirror Prooflike, 1 finer (8/17). NGC ID# 2552, PCGS# 7177
- 4680 1887-S MS65 PCGS.** Vivid shades of golden-brown and magenta toning blanket the well-preserved surfaces of this attractive Gem. The design elements are well-detailed and vibrant, satiny mint luster shines through the patina. NGC ID# 2554, PCGS# 7180
- 4681 1888 MS66+ PCGS. CAC.** Both sides of this high-end Premium Gem 1888 dollar are softly frosted and well-preserved. The obverse is brilliant, but the reverse shows a wide crescent of beautiful rainbow toning from 4 to 10 o'clock in the margin. Slight strike weakness is seen on the central devices. NGC ID# 26KF, PCGS# 7182
- 4682 1888-O MS66 PCGS.** This beautifully preserved Premium Gem shows the usual satin luster of the 1888-O Morgan, along with the familiar strike weakness on the central high points. However, the pristine surfaces produce strong eye appeal, and no numerically finer coins are reported at PCGS (7/17). NGC ID# 2556, PCGS# 7184

- 4683 1888-O Hot Lips, Doubled Die Obverse, VAM-4, Top 100, AU58 NGC. CAC.** Top 100 Variety. The 'Hot Lips' variety, which shows clear die doubling on Liberty's mouth and nose. The bases of ERT in LIBERTY are absent, as made because of a lapped die. Lightly toned with extensive luster and attractive surfaces. Census: 21 in 58, 7 finer (7/17). NGC ID# 2556, PCGS# 133919 Base PCGS# 7308
- 4684 1888-S MS65 PCGS.** Aside from roller marks across the chin and ear, where detail is slightly soft, this Gem Uncirculated Morgan dollar displays crisp detail. There are a couple of minor field grazes, but they do not distract from the eye-catching brilliance and frosty mint luster. The 1888-S has a relatively low mintage and is rarely found in better condition. NGC ID# 2557, PCGS# 7186
- 4685 1888-S MS65 PCGS.** The 1888-S Morgan dollar is seldom encountered in grades above the Gem level. This well-detailed MS65 example offers well-preserved brilliant surfaces with vibrant mint luster throughout. PCGS has graded 36 numerically finer examples (7/15). NGC ID# 2557, PCGS# 7186

**1889 Morgan, MS65 Deep Mirror Prooflike  
Attractively Toned**

- 4686 1889 MS65 Deep Mirror Prooflike PCGS.** Toned in warm champagne-gold hues with violet and blue border coloration, this Gem Deep Mirror Prooflike 1889 Morgan does not have obvious cameo contrast, although when tilted beneath a light the fields gleam with liquidlike mirroring. The strike is bold, and neither side exhibits distracting abrasions. Many finer non-Prooflike coins exist, but Prooflike and Deep Mirror Prooflike pieces are rare in this condition. Population: 38 in 65 Deep Mirror Prooflike, 4 finer (8/17). NGC ID# 3VWX, PCGS# 97189
- 4687 1889-CC VF35 NGC.** This circulated 1889-CC Morgan dollar is well-detailed and displays original gunmetal-gray patina with lighter coloration seen on the worn high points. The surfaces are smooth and problem-free. A collectible midgrade example of this key Carson City issue. NGC ID# 2559, PCGS# 7190
- 4688 1889-CC — Scratch — PCGS Genuine. XF Details.** This well-detailed 1889-CC Morgan displays bright silver surfaces with small areas of semiprooflike mirroring visible in the obverse fields. A cluster of scratches around OF on the reverse prevents a numeric grade, although both sides have other scattered abrasions as well.
- 4689 1889-CC XF40 NGC.** Traces of luster remain on the light gray surfaces of this important Carson City key. Grade-consistent marks on each side are inconsequential, and delicate peripheral gold toning enhances the eye appeal. The 1889-CC Morgan dollar enjoys strong demand in all grades. NGC ID# 2559, PCGS# 7190
- 4690 1889-O MS63 Deep Prooflike NGC. CAC.** A well-struck, cameo-contrasted Select example of this conditionally challenging New Orleans issue. Both sides are brilliant and show a good strike with light, scattered contact marks. CAC-approved Deep Prooflike coins are major rarities. Census: 28 in 63 (1 in 63+) Deep Prooflike, 21 finer. CAC: 2 in 63, 7 finer (7/17). NGC ID# 45YN, PCGS# 97193
- 4691 1890-CC MS64 PCGS.** Minimally toned with vibrant luster and a degree of flash on each side. While the obverse shows a hint of softness at the hair over the ear, the eagle is boldly impressed with frosty high points. NGC ID# 255D, PCGS# 7198

### 1890-CC Dollar, Untoned MS65

**4692 1890-CC MS65 PCGS.** This solid Gem 1890-CC dollar is devoid of heavy abrasions, and it must be studied at careful angles beneath a loupe to discern a few light surface grazes that prevent an even higher designation from PCGS. The coin is brilliant and satiny with excellent visual appeal. NGC ID# 255D, PCGS# 7198

**4693 1890-CC MS63 Deep Mirror Prooflike NGC.** A brilliant, deeply reflective Select example of this popular Carson City Morgan, showing modest cameo contrast on each side. The strike is far above average, and scattered abrasions are in harmony with the grade. Finer Deep Prooflike 1890-CC dollars will be difficult for budget-conscious collectors to acquire. NGC ID# 45YV, PCGS# 97199

### 1890-CC Dollar, MS63 Deep Mirror Prooflike Top 100, Tail Bar, VAM-4 Variety

**4694 1890-CC Tail Bar, VAM-4, MS63 Deep Mirror Prooflike PCGS. CAC.** A Top 100 Variety. A huge die gouge extends from the eagle's tail to the wreath, identifying this popular VAM variety. The design elements of this impressive Select specimen are sharply detailed throughout, and the deeply reflective prooflike fields contrast boldly with the frosty devices. A few highlights of sea-green and violet toning visit the peripheries of this lightly marked example. Population: 10 in 63 Deep Mirror Prooflike, 6 finer. CAC: 8 in 63, 5 finer (7/17). NGC ID# 255D, PCGS# 987199

**4695 1890-O MS65 PCGS.** Vivid shades of golden-brown and magenta toning blanket the well-preserved obverse surfaces of this delightful Gem, while the reverse remains essentially brilliant. The design elements are well-detailed, with a touch of the usual softness on the hair above the ear and the eagle's breast. NGC ID# 255E, PCGS# 7200

**4696 1890-O MS65 PCGS.** This Gem 1890-O Morgan displays thick, frosty mint luster and well-preserved surfaces. Light golden toning over each side includes tiny additions of amber and olive at the borders. The usual strike weakness is seen on the central high points. PCGS lists 29 finer non-Prooflike examples; four finer Prooflike and Deep Mirror Prooflike coins are reported (8/17). NGC ID# 255E, PCGS# 7200

**4697 1890-O MS65 PCGS.** Attractive shades of medium intensity golden-tan and lavender toning blanket the well-preserved surfaces of this impressive branch mint Gem. The design elements are well-detailed and vibrant mint luster shines through the patina. PCGS has graded 29 numerically finer examples (7/17). NGC ID# 255E, PCGS# 7200

**4698 1890-S MS66 PCGS.** An outstanding Premium Gem, this 1890-S Morgan dollar has brilliant silver luster and frosty mint surfaces with no evidence of toning on either side. It is sharply struck and highly attractive. PCGS has only certified seven numerically finer examples (8/17). NGC ID# 255F, PCGS# 7202

### 1891 Morgan Dollar, MS65 Very Rare Any Finer

**4699 1891 MS65 PCGS.** Despite the large mintage of 8.6 million pieces, the 1891 Morgan dollar is a very rare issue in grades above the MS65 level. This impressive Gem exhibits well-detailed design elements, with just a touch of softness on the hair above the ear and the eagle's breast. Dappled shades of lavender-gray and sea-green toning visit the well-preserved surfaces. NGC ID# 255G, PCGS# 7204

### 1891-CC Morgan Dollar, MS65 Superior Mint Luster

**4700 1891-CC MS65 PCGS.** The 1891-CC Morgan dollar claims a mintage of 1.6 million pieces, generous for a Carson City emission, but examples are rarely encountered above the Gem level. This delightful specimen is well-detailed, with vibrant cartwheel mint luster and creamy surfaces that show few signs of contact. PCGS has graded 37 numerically finer coins (8/17). NGC ID# 255H, PCGS# 7206

**4701 1891-CC Spitting Eagle, VAM-3, Top 100, MS64+ PCGS. CAC.** A Top 100 Variety. A small die chip near the eagle's beak attributes this popular VAM variety. The strike is sharp, and each side displays frosty, golden-toned mint luster. A few light grazes on the cheek limit the grade but none are individually significant. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**4702 1891-S MS65 PCGS. CAC.** A solidly struck and attractive silver-white Gem, frosty and essentially untoned, showing minimal marks. Powerful luster and undeniable eye appeal appear on each side. Finer 1891-S Morgan dollars are scarce.  
*Ex: ANA Signature (Heritage, 3/2008), lot 1094; Rosemont Signature (Heritage, 8/2013), lot 4460; Long Beach Signature (Heritage, 6/2015), lot 4931.* NGC ID# 255K, PCGS# 7210

**4703 1892-CC MS61 PCGS.** The fields are faintly reflective but without the mirror quality necessary for a Prooflike designation. This well-struck 1892-CC Morgan dollar is brilliant and lightly abraded with a satiny look. No major distractions are seen. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64**  
**Few Examples in the Treasury Hoard**

- 4704 1892-CC MS64 PCGS.** Only one example of the 1892-CC Morgan dollar remained in government storage at the time of the GSA sales, and only limited numbers were included in the earlier Treasury releases. This impressive Choice specimen exhibits sharply detailed design elements and lightly marked surfaces with vibrant mint luster on both sides. NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS64**  
**Popular Branch Mint Issue**

- 4705 1892-CC MS64 PCGS.** The 1892-CC Morgan dollar enjoyed a fairly generous Carson City mintage of 1.3 million pieces, but the date was not as well-represented as some other issues in the Treasury releases of the 1960s, making it a better date in high grade. This attractive Choice specimen offers well-detailed design elements and well-preserved surfaces, with slightly dimmed mint luster. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64**  
**Semiprooflike, Peripherally Toned**

- 4706 1892-CC MS64 NGC.** Significant reflectivity is seen in the fields and each side is surrounded by deep russet and blue toning with more or less brilliant centers. Fully struck throughout. The 1892-CC is a popular CC dollar with a mintage of only 1.3 million pieces. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS64**  
**VAM-4B, Recut Mintmark**

- 4707 1892-CC MS64 PCGS. VAM-4B.** The mintmark is recut on this reverse. Both dies are heavily clashed, and the reverse is peripherally cracked. Frosty luster is brilliant across the interiors with light golden toning at the borders. Slight strike weakness occurs on the central high points. Eye appeal is excellent for the grade. NGC ID# 255M, PCGS# 7214

**1892-S Morgan Dollar, AU55**  
**Important Condition Rarity**

- 4708 1892-S AU55 PCGS.** Although the 1893-S Morgan dollar is recognized as the key-date among circulation strikes, the 1892-S is one of the most important condition rarities in the series. This Choice AU example has pleasing surfaces with inconsequential marks that are hidden beneath the gray-gold and iridescent toning. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, AU55+**  
**Semiprooflike Fields**

- 4709 1892-S AU55+ PCGS.** Semiprooflike fields no doubt granted this piece its Plus designation, although there is only a brush of high-point friction on the devices. A touch of light golden toning on each side attests to the originality of the surfaces. The 1892-S is the second-scarcest date in the series in Mint State, creating strong demand for high-end AU coins. NGC ID# 255P, PCGS# 7218

- 4710 1893 MS63 NGC.** The 1893 is a scarce Philadelphia issue in Mint State, coming from a mintage reported at 378,000 coins. This Select example is brilliant and satiny with clean fields and only a few light surface grazes on Liberty's cheek. There is a touch of strike softness on the hair above the ear. NGC ID# 255R, PCGS# 7220

**4711 1893-CC XF45 PCGS.** Declining yields from the Comstock Lode, the onset of the Panic of 1893, and the subsequent repeal of the Sherman Silver Purchase Act resulted in the closure of the CC-mint after only 677,000 dollars were struck in 1893. This Choice XF coin shows bright steel-gray surfaces with softness at the extreme centers. Lightly abraded from brief circulation. NGC ID# 255S, PCGS# 7222

**4712 1893-CC XF45 PCGS.** Always in demand as the final year of production from the Carson City mint, the '93-CC also has a low mintage. This is a richly toned example with deeper russet and orange toning on the obverse with a much lighter reverse. Slight, even wear over the high points.

**4713 1893-CC XF45 PCGS.** The final year of Carson City coinage operation saw the production of 677,000 Morgan silver dollars. This Choice XF example from that coinage displays light silver-gray surfaces with traces of prooflike luster and hints of gold toning. NGC ID# 255S, PCGS# 7222

**4714 1893-O AU58+ PCGS. CAC.** Substantial luster remains on this high-end near-Mint coin, and the surfaces are original. Light golden toning graces the worn high points. The 1893-O is a better date in all grades but is rarely seen this close to the Mint State grade level with original surfaces. The usual strike weakness occurs at the centers. NGC ID# 255T, PCGS# 7224

#### 1893-O Silver Dollar, MS60 Semireflective Fields

**4715 1893-O MS60 PCGS.** This moderately abraded 1893-O Morgan is undeniably Mint State, showing fresh, frosty devices and semiprooflike fields. The coin is essentially brilliant. The usual strike weakness is seen on the central high points. Uncirculated 1893-O Morgan dollars are scarce and in high demand. Prooflike coins are genuinely rare, making this semiprooflike piece highly appealing. NGC ID# 255T, PCGS# 7224

**4716 1893-S — Obverse scratched — NGC Details. Good.** A macabre scratch across Liberty's neck accounts for the Details grade. This San Francisco key date dollar spent considerable time in circulation, and may have served as a pocket piece. All major design elements show clear outlines, and the legends are intact.

**4717 1893-S — Cleaned — PCGS Genuine. VG Details.** Here is an important opportunity to acquire an example of the rarest date of all circulation-strike Morgan dollars. This example splashes of steel toning and minor verdigris on its light silver surfaces, with scattered marks as expected on both sides.

**4718 1893-S — Cleaned — ANACS. VG10 Details.** ANACS notes a slightly milky hue to the patina that suggests an old cleaning. However, the pewter-gray surfaces are fairly appealing for the VG grade level, and only a few minor contact marks are seen on each side. A collectible and pleasing example of this key San Francisco issue. NGC ID# 255U, PCGS# 7226

#### 1893-S Morgan Dollar, Fine 12 Highly Collectible Grade

**4719 1893-S Fine 12 PCGS.** The 1893-S Morgan dollar is elusive and highly collectible in all grades, and lower circulated grade pieces such as this one are always in great demand from a large collector base. This piece has light silver-gray surfaces with wispy iridescence along the obverse border. NGC ID# 255U, PCGS# 7226

#### 1893-S Morgan Dollar, Fine 12 Attractive, Problem-Free Surfaces

**4720 1893-S Fine 12 PCGS.** A pleasing battleship-gray example of this key San Francisco issue, showing deeper gunmetal-gray toning in the protected portions of the fields. The surfaces are generally smooth, and the devices show good detail for the Fine grade level. Problem-free circulated 1893-S dollars are in high demand among date and mintmark collectors. NGC ID# 255U, PCGS# 7226

#### 1893-S Dollar, VF Details Undisputed Series Key

**4721 1893-S — Environmental Damage — PCGS Genuine. VF Details.** A series-low production of 100,000 coins makes this the undisputed key to the Morgan dollar set. All examples, from heavily circulated coins to those in the highest grades of Mint State, are widely desired. This VF Details coin was subjected to unknown environmental damage, leaving an unnatural charcoal-gray patina over each side. Design detail is still good.

**4722 1894 AU55 NGC.** This challenging Philadelphia issue is in high demand at the AU level with original luster. This Choice AU example displays lustrous fields and has good detail on the devices. Liberty's cheek and the fields are pleasantly smooth and problem-free. A hint of light golden toning appears on each side. NGC ID# 255V, PCGS# 7228

- 4723 1894 AU58 PCGS.** A trace of rub appears on the high points of this attractive Morgan dollar key that survives from a circulation-strike mintage of only 110,000 coins. This piece is brilliant and essentially untoned with virtually full mint luster and a trace of gold at the reverse border. NGC ID# 255V, PCGS# 7228
- 4724 1894 AU58 PCGS.** The 1894 is a key Philadelphia Mint issue in the circulation-strike Morgan dollar series. This example has original silver luster and light golden toning with a trace of rub on the design high points. NGC ID# 255V, PCGS# 7228
- 4725 1894-O MS61 PCGS.** A better New Orleans issue, highly sought-after in Mint State. This piece is moderately abraded, as the grade suggests, but possesses vibrant luster and brilliant surfaces. The strike is a trifle weak on the central high points, as usual. NGC ID# 255W, PCGS# 7230

---

**1895-O Dollar, AU58  
Great Uncirculated Alternative**

- 4726 1895-O AU58 PCGS.** This popular New Orleans semikey proves more accessible than the dollars struck at San Francisco that same year. However, the 1895-O becomes scarce in near-Mint condition, and truly Uncirculated representatives are very scarce. This baggy, untoned example is well-struck with a hint of softness over the ear and eagle's breast. Still, this coin would fit well in an otherwise Mint State set. NGC ID# 255Y, PCGS# 7236
- 4727 1895-S AU50 PCGS.** The 1895-S has a low mintage of 400,000 coins and is one of only two available issues for the date. Both factors contribute to its popularity and scarcity relative to demand. Glints of original luster remain amid antique-gray patina. Light merging over the centers but well-detailed overall and attractive. NGC ID# 255Z, PCGS# 7238
- 4728 1895-S AU55 PCGS.** This partially lustrous 1895-S Morgan dollar displays excellent detail with little high-point wear. The surfaces are brilliant and moderately abraded. The 1895-S is a semikey date in all grades with a low mintage of 400,000 coins. NGC ID# 255Z, PCGS# 7238

---

**1895-S Silver Dollar, AU58  
Some Luster Remains**

- 4729 1895-S AU58 PCGS.** Cartwheel luster remains in the protected regions of the fields on this brilliant near-Mint example, while the design elements show almost no wear and only a touch of high-point strike weakness. A few light handling marks are unobtrusive. The 1895-S is a semikey date in all grades due to its low mintage of 400,000 pieces. NGC ID# 255Z, PCGS# 7238

- 4730 1896-O MS61 PCGS.** An Uncirculated example of this conditionally challenging issue, showing smooth satin luster and lightly marked surfaces. The usual strike weakness is seen on the central high points. Housed in an old green label holder. NGC ID# 277U, PCGS# 7242
- 4731 1896-O MS62 PCGS.** From a mintage of 4.9 million pieces, the 1896-O Morgan dollar is a surprisingly challenging issue in high grade. This MS62 example offers well-detailed design elements and lustrous, lightly marked surfaces under shades of lavender-gray and golden-tan toning, with most of the color on the obverse. NGC ID# 277U, PCGS# 7242
- 4732 1897-O MS62 PCGS.** This attractive MS62 Morgan dollar displays vibrant mint luster and well-detailed design elements throughout, and the pleasing surfaces show only minor signs of contact, with subtle hints of golden-tan toning.  
*Ex: Houston Signature (Heritage, 12/2014), lot 4351.* NGC ID# 2565, PCGS# 7248
- 4733 1897-S MS66 Prooflike PCGS.** This is sharp Premium Gem displays brilliant surfaces and reflective fields. A hint of cameo contrast is apparent on each side. The fields are nearly pristine, and Liberty's cheek has only unimportant light grazes. Population: 29 finer non-Prooflike; 44 in 66 (5 in 66+) Prooflike, 4 finer; 7 in 66 Deep Mirror Prooflike, 1 finer (7/17). NGC ID# 267S, PCGS# 7251
- 4734 1898-S MS65 PCGS.** A band of peach-gold patina endows the margins of this otherwise brilliant Gem. The strike is good, the reverse is exceptionally smooth, and both sides teem with cartwheel luster. The left obverse displays faint grazes.  
*Ex: ANA Signature (Heritage, 8/2014), lot 4849.* NGC ID# 256A, PCGS# 7256
- 4735 1899-S MS65 PCGS.** Wisps of champagne and light russet toning grace the satiny surfaces of this Gem 1899-S Morgan dollar. The hair above Liberty's ear is a trifle soft as usual. The 1899-S is an available date in MS65 but is seldom seen finer. NGC ID# 256D, PCGS# 7262

---

**1899-S Dollar, MS66+  
Lightly Toned, Rarely Seen Finer**

- 4736 1899-S MS66+ PCGS.** Blushes of golden-orange and violet toning grace the obverse, while the reverse is largely brilliant with traces of similar patination. Blending occurs over Liberty's ear and the eagle's breast feathers, typical of most Morgan dollar issues. Frosty mint luster illuminates each minimally marked side. The 1899-S is elusive in Gem condition and decidedly scarce in Premium Gem. Anything finer than the coin offered here is a prime condition rarity. PCGS reports just 11 submissions finer from a mintage exceeding 2.5 million coins, and there are also two Prooflike coins graded higher (8/17). NGC ID# 256D, PCGS# 7262
- 4737 1900-O/CC VAM-11 MS64 PCGS.** A Top 100 Variety. This pleasing Choice example shows the O mintmark clearly punched over an underlying CC and some diagnostic die cracks on the obverse. Sharply defined overall, with vibrant mint luster and some delicate golden-tan toning. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268
- 4738 1900-S MS65 PCGS.** Uncirculated 1900-S dollars were released from the late 1930s through the mid-1960s. Nevertheless, examples are elusive in Gem condition. The obverse is softly struck with roller marks across the cheek and ear. The reverse displays stronger detail. Frosty and bright with pale gold accents. NGC ID# 256H, PCGS# 7270

**1901 Morgan Dollar, MS60  
Attractive Multicolor Toning**

- 4739 1901 MS60 ANACS.** Vivid shades of sea-green and magenta toning visit the peripheries of this attractive Mint State Morgan dollar, while the centers remain mostly brilliant. The well-detailed design elements show just the slightest softness on the hair above Liberty's ear and the lustrous surfaces display the minimum number of minor contact marks for the grade. NGC ID# 256J, PCGS# 7272

- 4740 1901 Doubled Die Reverse, VAM-3, AU50 PCGS.** A Top 100 Variety. Strong doubling is easily noticed on the eagle's tail feathers, identifying the *Guide Book* "Shifted Eagle" variety. This lightly worn and lightly abraded example will be a welcome addition to a fine specialized collection. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

- 4741 1901 Doubled Die Reverse, VAM-3, AU53 PCGS Secure.** A Top 100 Variety. A bright silver example of this Morgan dollar that does double duty as a scarce date and an important variety. This piece has traces of light tan patina on the high points of the otherwise bright silver surfaces. Substantial luster remains visible. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

**1901-O Morgan Dollar, MS66+  
Conditionally Rare Any Finer**

- 4742 1901-O MS66+ PCGS.** From a large mintage of over 13 million pieces, the 1901-O Morgan dollar is a condition rarity in grades above the MS66 level. This Plus-graded Premium Gem exhibits sharply detailed design elements and well-preserved creamy surfaces, with vibrant mint luster on both sides. PCGS has graded six numerically finer examples (7/17). NGC ID# 256K, PCGS# 7274

- 4743 1901-O MS65+ Prooflike PCGS. CAC.** Surprisingly for a New Orleans dollar, this prooflike Gem has nearly a full strike, showing slight merging of the hair strands over the ear, but otherwise bold definition. Both sides have mirrored fields with subtle champagne toning that few would mention. NGC ID# 256K, PCGS# 7275

- 4744 1901-S MS65 PCGS.** This impressive Gem Morgan dollar exhibits well-detailed design elements, with a touch of the typical softness on the hair above Liberty's ear. Shades of lavender and sea-green toning visit the well-preserved, lustrous surfaces. NGC ID# 256L, PCGS# 7276

- 4745 1902 MS66+ PCGS. CAC.** The 1902 is not all that difficult to locate in lower grades, but it is challenging in higher grades. This example displays the bright satiny mint luster this issue is so well known for. The strike definition is uncommonly bold and there are no reportable abrasions. Just the lightest hint of color can be seen. NGC ID# 256M, PCGS# 7278

- 4746 1902-O MS66+ PCGS. CAC.** Dusky russet-gold toning appears on each side in varying shades and intensities, allowing frosty luster to shine through in the fields. There are no distracting abrasions, although the eagle's breast and the hair above Liberty's ear show the usual touch of strike weakness. Few finer examples are reported. NGC ID# 256N, PCGS# 7280

- 4747 1902-O MS66+ PCGS. CAC.** A high-end Premium Gem with softly frosted mint luster and above-average design sharpness. A blush of light golden toning warms each side, and there are no distracting abrasions. Finer 1902-O Morgan dollars are rare. NGC ID# 256N, PCGS# 7280

- 4748 1902-S MS65 PCGS.** The 1902-S was paid out from the San Francisco Mint from the 1920s through the 1950s, accounting for its collectibility in Mint State. The centers are incomplete with prominent diagonal roller marks on the reverse. A brilliant, mint-fresh Gem. NGC ID# 256P, PCGS# 7282

**1903 Morgan Dollar, MS67+  
Only Two Finer Certified**

- 4749 1903 MS67+ NGC. CAC.** The 1903 Morgan dollar claims a mintage of more than 4.6 million pieces, but few examples can match the quality and eye appeal of this high-end Superb Gem. The design elements are sharply rendered and the impeccably preserved surfaces radiate vibrant mint luster. NGC has certified two numerically finer examples (7/17). NGC ID# 256R, PCGS# 7284

- 4750 1903-S AU50 PCGS.** This About Uncirculated 1903-S Morgan displays satiny, lightly marked surfaces with light golden toning. The central devices show some strike softness on the high points, but no other distractions are reported. The 1903-S is a better date among 20th century Morgan dollars. NGC ID# 256T, PCGS# 7288

- 4751 1903-S AU50 PCGS.** The fields retain partial mint luster on this About Uncirculated example, and each side has warm golden toning and satiny patina. Light high-point wear defines the grade, although some of the weakness on the eagle's breast and legs is due instead to strike. An appealing example of this better San Francisco issue. NGC ID# 256T, PCGS# 7288

- 4752 1903-S Micro S, VAM-2, Top 100, XF45 PCGS.** A Top 100 Variety. It is believed that a mintmark punch intended for a Barber quarter was erroneously employed, creating a widely sought-after variety that is very difficult to locate in XF or better condition. This bright steel-gray offering presents solid detail for the grade. Wispy marks across each side are unimportant relative to the overall rarity. NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

- 4753 1921 MS66+ PCGS. CAC.** An incredibly high-end, frosty example of this plentiful final-year Morgan, showing brilliant surfaces and a clean cheek. The wreath and the eagle's breast show the usual strike weakness that is a diagnostic of this issue. PCGS lists only 14 coins finer (7/17). NGC ID# 256X, PCGS# 7296

**4754 1921-D TRU\_T Variety, VAM-1A2, MS65 PCGS.** A Top 100 Variety. The S in TRUST is missing because grease on the die filled the letter during striking. The die gouge in the eagle's tail identifies the VAM-1A2 variety. This well-detailed Gem is Well-preserved and lustrous. NGC ID# 256Y, PCGS# 133970 Base PCGS# 7298

## PROOF MORGAN DOLLARS

### 1878 Morgan Dollar, PR62 First-Year 8TF Variety

**4755 1878 8TF PR62 NGC.** Struck early in the first year of the Morgan design, this attractive proof Morgan dollar shows eight feathers in the eagle's tail, a feature that was modified to seven feathers later in the year. This PR62 specimen exhibits sharply detailed design elements and the deeply reflective fields show only minor hair lines and contact marks. From a small proof mintage of 500 pieces. NGC ID# 2572, PCGS# 7311

### 1884 Morgan Dollar, PR64 Collectible Proof Date Representative

**4756 1884 PR64 NGC.** Light golden toning appears on each side of this near-Gem 1884 proof Morgan dollar, preventing a Cameo designation but still allowing the mirrored fields to fully gleam when tilted beneath a light. The strike is sharp and there are no distracting marks. Although 10 proof Trade dollars are known of this date, only the Morgan proof was officially issued to collectors. The Mint struck 875 proof Morgans in 1884. NGC ID# 272B, PCGS# 7319

**4757 1894 PR55 PCGS. CAC.** Mirrored proof fields complement full detail on the devices on this Choice AU proof 1894 dollar. Colorful lavender and pale orange hues appear in the fields amid dominant olive-green and gold toning. Quite an appealing proof for this affordable grade level. NGC ID# 2577, PCGS# 7329

**4758 1898 — Cleaning — PCGS Proof Genuine. Unc Details.** Hairlined and retoned a uniform russet-gold hue with deeply reflective fields and satiny design elements. PCGS denies this coin a numeric grade, although its visual appearance is akin to most low-end toned proofs of this date.

## PEACE DOLLARS

**4759 1921 MS65 NGC.** A thin veneer of pale gold toning fails to mask the vivid underlying brilliance that each side exhibits. This Gem High Relief Peace dollar is fully struck, including complete date and legends. Numerous die polish lines appear in the fields. Ticks are few and far between. NGC ID# 2U4E, PCGS# 7356

**4760 1921 MS65 NGC.** The ever-popular first-year Peace dollar issue, this Gem example displays notably well-preserved, satiny luster with the often-seen light golden hue. The eagle's feathers and the hair over Liberty's ear are particularly well-defined. Ex: *Central States Signature (Heritage, 4/2015)*, lot 5876. NGC ID# 2U4E, PCGS# 7356

**4761 1921 MS65 PCGS.** This Gem High Relief Peace dollar displays frosty original mint luster with smokey olive-gold and bone-white toning. The usual softness is seen on the center of the devices, but the strike is better than on many other examples of this one-year type. No abrasions are worthy of note. NGC ID# 2U4E, PCGS# 7356

**4762 1921 MS65 PCGS. CAC.** A spectacular Gem example of this first-year issue, with well-detailed design elements struck in high relief. This coin exhibits well-preserved, lustrous surfaces with highlights of golden-tan toning. NGC ID# 2U4E, PCGS# 7356

**4763 1922-D MS66 PCGS.** The average 1922-D Peace dollar falls just shy of MS63, though examples can be obtained through MS66. Anything finer than this lightly toned Premium Gem will prove extremely challenging; PCGS reports merely three finer submissions (7/17). The patina includes shades of violet-gray, orange, and almond-gold. NGC ID# 257D, PCGS# 7358

**4764 1923 MS67 NGC.** The 1923 is a favorite Peace dollar issue among type collectors, although it is not common in Superb Gem condition. This MS67 coin is among the finest known (7/17). The strike is sharp and the frosty surfaces display beautiful preservation. The coin is brilliant aside from a few wisps of russet and lavender toning near the rims. NGC ID# AMPA, PCGS# 7360

**4765 1923-D MS65+ PCGS. CAC.** The 1923-D Peace dollar is scarce in grades finer than MS65. This Plus-graded, CAC-approved example displays good sharpness and satiny mint luster. Mottled amber, gold, mint-green, and russet hues appear on each side, with the deeper colors clustered toward the borders. NGC ID# 257G, PCGS# 7361

**4766 1925 MS67 NGC.** Potent, frosty mint luster illuminates brilliant surfaces on this pristine 1925 Peace dollar. The strike is sharp. This issue is available through MS66 but is scarce at the Superb Gem level. NGC and PCGS each report only a single coin numerically finer than the present. Census: 91 in 67 (3 in 67+, 1 in 67 ★), 1 finer (7/17). NGC ID# 257L, PCGS# 7365

**4767 1925-S MS64+ PCGS.** The 1925-S is a key Peace dollar issue in Gem condition. This high-end Choice coin is much more collectible but exhibits nearly as fine quality. Luster is satiny on the obverse and slightly more frosted on the reverse, cast in light golden toning overall. Some minor strike weakness is seen on the central devices. No distracting abrasions are present. NGC ID# 257M, PCGS# 7366

**4768 1925-S MS64+ PCGS. CAC.** Available in Choice condition, the 1925-S Peace dollar becomes scarce at the Gem level. This Plus-designated MS64 coin shows well-preserved, satiny luster, with lightly mottled amber-gold and pale russet toning. PCGS shows just 41 numerically finer representatives (8/17). NGC ID# 257M, PCGS# 7366

**4769 1926-D MS66 PCGS.** The vast majority of 1926-D dollars survive in MS63 to MS64. From there, the certification totals decline markedly to the point where only eight examples finer than this MS66 are listed in the PCGS *Population Report* (7/17). Smooth, satiny surfaces are brilliant with strongly impressed motifs. Pale golden accents. NGC ID# 257P, PCGS# 7368

**1926-D Peace Dollar, MS66  
Only Eight Finer at PCGS**

**4770 1926-D MS66 PCGS. CAC.** An outstanding Premium Gem that is rarely found in finer grades, this 1926-D Peace dollar features an exceptional strike and brilliant, frosty silver luster with splashes of gold and iridescent toning on the obverse. The reverse is fully brilliant and untuned. PCGS has only certified eight finer examples (8/17). CAC: 63 in 66, 2 finer (8/17). NGC ID# 257P, PCGS# 7368

**4771 1927-D MS64+ NGC. CAC.** Few issues in the Peace dollar series provide as great a challenge in high grades as the 1927-D. This Choice Uncirculated example with brilliant surfaces is undeniably high-end for the grade. Speckled patina adorns each side. NGC ID# 257T, PCGS# 7371

**4772 1928-S MS64+ PCGS.** A Plus-graded Choice example of this popular better date, with sharply detailed design elements and vibrant mint luster on both sides. The surfaces are well-preserved and eye appeal is outstanding. NGC ID# 257W, PCGS# 7374

**4773 1934 MS66 PCGS.** Finding a finer example of the 1934 would prove exceedingly challenging. Acquiring one would be impossible for most collectors. Strike is strong, as can be, with a touch of softness at the upper reverse. The cheek and fields are impressively free of contact. Frosty and brilliant. PCGS reports only three finer coins (8/17). NGC ID# 257Y, PCGS# 7375

**4774 1934 MS66 PCGS.** A spectacular Premium Gem representative of this low-mintage key, with sharply detailed design elements and well-preserved lustrous surfaces, under subtle shades of golden-tan toning. PCGS has graded three numerically finer examples (8/17). NGC ID# 257Y, PCGS# 7375

**EISENHOWER DOLLARS**

**1971 Eisenhower Dollar, MS66+  
Tied for the Finest Certified**

**4775 1971 MS66+ PCGS. CAC.** Only nine examples of the 1971 Ike dollar are graded PCGS MS66+, and they are tied for the finest of the issue that have been certified. This Premium Gem has satiny nickel-gray luster and delicate champagne toning over pristine surfaces. Population: 100 in 66 (9 in 66+), 0 finer. CAC: 31 in 66, 0 finer (8/17). NGC ID# 2584, PCGS# 7406

**4776 1976 Type Two MS67 PCGS.** Type Two coins have thin letters, and the U in UNUM is centered under the I in PLURIBUS. This spectacular Superb Gem displays sharply detailed design elements and impeccably preserved lustrous surfaces, under pleasing shades of golden-tan toning. Population: 14 in 67, 0 finer (8/17). NGC ID# B76M, PCGS# 7419

**PROOF EISENHOWER DOLLARS**

**4777 1973-S Clad PR70 Deep Cameo PCGS.** This top-grade clad proof is one of only 30 pieces so-graded at PCGS (7/17). The coin is pristine and brilliant, showing stark cameo contrast and a full strike. An impressive Registry candidate and conditionally rare in this grade. Population: 30 in 70 Deep Cameo (7/17). NGC ID# 258U, PCGS# 97430

**4778 1976-S Clad, Type Two, PR70 Deep Cameo PCGS.** A technically perfect specimen of the popular Type Two issue, with slender letters in the reverse legend. This coin exhibits razor-sharp design elements and deeply reflective fields that contrast profoundly with the frosty devices. Population: 25 in 70 Deep Cameo (8/17). NGC ID# B77T, PCGS# 97435

**SACAGAWEA DOLLAR**

**2000-P Sacagawea Dollar, MS68  
FS-901, Wounded Eagle Variety**

**4779 2000-P Wounded Eagle, FS-901, MS68 PCGS.** The Wounded Eagle moniker is apt. This variety shows a die gouge piercing the lower portion of the eagle's breast. Most examples can be found in MS64 to MS66. This near-flawless brassy-gold representative ranks among the three finest submissions at PCGS (8/17). A conditionally rare example of this dramatic modern die variety. PCGS# 147883 Base PCGS# 506153

**GOLD DOLLARS**

**1849-D Gold Dollar, AU55  
Original Surfaces**

**4780 1849-D AU55 PCGS. Variety 1-A.** First year of issue for the gold dollar from Dahlonega. Even though only 21,588 pieces were struck, the 1849-D is the most frequently encountered of all D-mint gold dollars. Noticeable friction is seen over the high points of Liberty's hair. The surfaces are original with a significant presence of reddish patina in the fields.  
*From The Morgan Hill Collection.* NGC ID# 25BD, PCGS# 7507

- 4781 1849-O Open Wreath MS61 NGC. Variety 3.** The wreath and date are weakened by die lapping on this variety, although the mintmark remains clear. This Mint State 1849-O gold dollar displays medium yellow-gold luster and satiny surfaces. Light handling marks limit the grade. NGC ID# 25BE, PCGS# 7508

**1850-C Gold Dollar, AU50  
Variety 1, the Usual Die Pair**

- 4782 1850-C AU50 PCGS. Variety 1.** An impressively detailed Charlotte Mint gold dollar with lovely pumpkin-orange toning. Minor retained laminations are noted near star 6 and the AM in AMERICA. The reverse field has a few faded thin marks. Housed in a green-label holder. Population: 10 in 50, 65 finer (8/17). NGC ID# 25BG, PCGS# 7510

- 4783 1850-O AU58 NGC. Variety 1.** This is a near-Mint specimen of the low-mintage antebellum O-mint production, with a few grade-consistent scrapes and field chatter. Lustrous orange-gold surfaces show a better-than-expected strike.  
*Ex: Central States Signature (Heritage, 4/2008), lot 3184; ANA Signature (Heritage, 7-8/2008), lot 2767.* NGC ID# 25BJ, PCGS# 7512

- 4784 1851-D — Harshly Cleaned — PCGS Genuine. AU Details. Variety 3-E.** An affordable Dahlonega gold dollar, showing slightly strike weakness as usual on the Liberty portrait and the LA in DOLLAR. Both sides are vigorously cleaned with bright yellow-gold patina and hairlines. This is the most collectible 1851-D gold dollar variety, identified by date position.

- 4785 1852-D — Cleaned — PCGS Genuine. AU Details. Variety 4-F.** A scarce Type One Dahlonega dollar, the 1852-D exists to the extent of 125 to 175 pieces in all grades. PCGS notes the coin is cleaned, although luster remains and any signs of cleaning are lessened by heavy die clashing on the obverse. Bright medium-gold color on both sides adds to the appeal.

**1852-D Gold Dollar, AU55  
Variety 4-F**

- 4786 1852-D AU55 NGC. Variety 4-F.** The only known die pair was used to strike 6,360 gold dollars at the Dahlonega, Georgia Mint in 1852. This Choice AU representative has yellow-gold surfaces that host inconspicuous hairlines on each side. Several radial die cracks are evident on the reverse. Census: 20 in 55, 63 finer (8/17). NGC ID# 25BS, PCGS# 7519

**1853-D Gold Dollar, AU53  
Rotated Reverse**

- 4787 1853-D AU53 NGC. Variety 5-G,** the sole recorded variety for the year. This issue is most often found in XF to low AU grades, with Mint State examples proving elusive. This AU53 coin has rich yellow-gold color with substantial liquid luster remaining in the fields. Softly struck in the centers, as usual. The reverse is rotated approximately 90 degrees counterclockwise. NGC ID# 25BW, PCGS# 7523

**1854 Type One Gold Dollar, MS65+  
A Type Coin of Outstanding Eye Appeal**

- 4788 1854 Type One MS65+ PCGS.** The year 1854 was transitional for the gold dollar design. The Philadelphia Mint struck more than 855,000 Type One gold dollars and then followed up with nearly 784,000 Type Two coins, which had a slightly larger diameter and a thinner planchet. Both issues are suitable representatives of their respective types. This frosty Type One example is sharply struck and frosty with excellent yellow-gold mint luster. Population: 45 in 65 (4 in 65+), 21 finer (7/17). NGC ID# 25BY, PCGS# 7525

- 4789 1854-D — Scratch — PCGS Genuine. AU Details. Variety 6-H.** The 1854-D gold dollar is scarce in all grades, coming from a mintage of only 2,935 pieces. Dahlonega gold specialist Doug Winter estimates that just 100-125 pieces are known in all grades. The present coin is satiny with yellow-gold color and expectedly soft central detail. A few short scratches in the reverse fields prevent a numeric grade.

- 4790 1854-S AU55 PCGS.** This is a well-struck example of the first gold dollar struck at the San Francisco Mint. Large denomination gold was the primary product of the new branch mint in 1854, and only 14,632 gold dollars were coined. This issue is scarce in AU grades and rare in Mint State. Original orange-gold luster remains in the fields on this Choice About Uncirculated example. The surfaces are smooth and the details are bold. NGC ID# 25C2, PCGS# 7527

**1854-S Type One Gold Dollar, MS61  
Inaugural S-Mint Issue**

**4791 1854-S MS61 NGC.** The San Francisco Mint began coinage operations in 1854 and produced a mintage of 14,632 Type One gold dollars. This attractive Mint State example displays sharply detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Vibrant mint luster adds to the outstanding eye appeal. Census: 24 in 61, 35 finer (7/17). NGC ID# 25C2, PCGS# 7527

**4792 1854 Type Two, Doubled Die Obverse, FS-101, MS61 PCGS.** The border legend and the beads of the headdress are die doubled on this variety. The current coin is Uncirculated and displays satiny yellow-gold mint luster with minimal abrasions. Some strike weakness is noted on the center of the portrait, as expected for this type. NGC ID# 4EDZ, PCGS# 145701 Base PCGS# 7531

**1855 Gold Dollar, MS63  
Three-Year Type Two Design**

**4793 1855 Type Two MS63 PCGS.** An attractive Select specimen of the short-lived Type Two design, from a mintage of 758,269 pieces. This coin exhibits sharply detailed design elements, with some dramatic clash marks on the reverse. The lustrous orange-gold surfaces show only scattered minor signs of contact. Overall eye appeal is quite strong. NGC ID# 25C4, PCGS# 7532

**4794 1855-O AU53 NGC. Variety 1.** In an unlapped state of the reverse die. The Type Two design was limited to three years of production, but the O-mint only struck coins in 1855. A total of 55,000 pieces were made. This pale wheat-gold dollar is typically defined and lightly marked. NGC ID# 25C7, PCGS# 7535

**4795 1856 Slanted 5 MS65 PCGS.** The Slanted 5 variety is the more plentiful type coin among 1856 gold dollars. This Gem displays a bold strike save for the O in DOLLAR and the 8 in the date, which are not fully brought up. Frosty mint luster shows warm rose-gold hues. Population: 22 in 65 (2 in 65+), 15 finer (8/17). NGC ID# 25CB, PCGS# 7540

**4796 1856-D — Repaired — PCGS Genuine. AU Details. Variety 8-K.** Just 1,460 pieces were struck of this challenging Dahlonega issue. Sharply struck at the centers, the present coin shows weakness at U in UNITED and O in DOLLARS. Areas of the obverse fields are smoothed with the resultant hairlines, and a suspicious rough spot exists at the back of the headdress. Some pleasing luster remains on this AU Details example.

**4797 1857-C XF45 PCGS. Variety 1.** Original orange-gold patina warms the remarkably smooth and appealing surfaces of this Choice XF 1857-C gold dollar. There is a planchet depression in the fields below the STA in STATES (mint-made), but there are no other distinctive surface characteristics. NGC ID# 25CE, PCGS# 7545

**1857-D Gold Dollar, XF45  
Collector-Grade Dahlonega Issue**

**4798 1857-D XF45 PCGS.** The 1857-D ranks about in the middle of the rarity scale among all Dahlonega gold dollars, but it is considerably scarcer than some of its more highly touted counterparts, including the 1858-D and 1859-D. The lettering on this Choice XF example is a bit heavy-handed, with several filled letters on both sides and an up-and-down strike on the wreath. Those are minor factors, since the overall quality is good for a Dahlonega dollar. The smooth, greenish-gold surfaces retain glimpses of mint luster near the edges. Population: 12 in 45, 88 finer (7/17). NGC ID# 25CF, PCGS# 7546

**1858-D Gold Dollar, AU55  
Only 3,477 Pieces Produced**

**4799 1858-D AU55 NGC. Variety 10-M.** The 1858-D is curiously available for a coin whose production was a mere 3,477 pieces. The devices are evenly worn over the high points, and there is noticeable reddish patina present. A single shallow scratch is noticed on the back of Liberty's face and an X-shaped scratch is located between the wreath ends at the top of the reverse. *From The Morgan Hill Collection.* NGC ID# 25CJ, PCGS# 7549

**1859-C Gold Dollar, AU55  
Low 5,235-Coin Mintage**

**4800 1859-C AU55 NGC. Variety 1,** the only known dies. This nearly unmarked Charlotte gold dollar is iridescently toned in peach-gold and ice-blue. Liberty's hair shows some merging of detail, but the strike is generally sharp. Only 5,235 pieces were struck, and examples with ample remaining luster are elusive. Census: 16 in 55, 53 finer (8/17). NGC ID# 25CM, PCGS# 7552

**4801 1860-D — Repaired — PCGS Genuine. AU Details. Variety 12-P.** The 1861-D is one of the scarcest gold dollars from the Dahlonega Mint, struck to the extent of only 1,566 coins. The surviving population is estimated at 100-125 pieces in all conditions. This example is tooled in the central reverse and vigorously cleaned on both sides with bright yellow-gold surfaces. Considerable strike weakness is normal for the issue. An affordable example of an otherwise challenging issue.

**4802 1861 MS64 PCGS.** A sharply struck, satiny near-Gem with partially reflective fields and minimal abrasions. Both sides show prominent clash marks, as normal for the type. Uncirculated 1861 gold dollars are occasionally available in this grade, but finer pieces will be challenging to acquire.

*From The Morgan Hill Collection.* NGC ID# 25CU, PCGS# 7558

#### 1861-D Gold Dollar, XF Details Rarest Dahlonega Dollar

**4803 1861-D — Plugged — PCGS Genuine. XF Details. Variety 12-Q.** The 1861-D is the rarest Dahlonega gold dollar and the one true stopper for budget-conscious collectors. Only 65-75 pieces are believed extant. This XF-level coin is tooled overall with evidence of a plugged hole at the AT in STATES. The surfaces are bright and vigorously cleaned. The strike is well-executed on the Liberty portrait but weak on the wreath and UNITED.

**4804 1863 — Damage — PCGS Genuine. Unc Detail.** Several small digs on the reverse of this Civil War era gold dollar account for the Damage, with evidence of a light cleaning, but no other problems are visible on the lustrous, sharply defined surfaces. The 1863 claims a mintage of just 6,250 pieces.

**4805 1866 MS62 PCGS.** Uncirculated examples of the 1866 gold dollar are scarce, with the population scattered across the grade spectrum. This lower-end example is sharply struck and satiny with medium yellow-gold color. Scattered light abrasions do not overly detract. Population: 13 in 62, 64 finer (8/17). NGC ID# 25D2, PCGS# 7565

**4806 1868 MS62 NGC.** All 10,500 1868 gold dollars were delivered on February 25 of that year. Mint State examples are exceedingly scarce, usually found in MS62 to MS63 condition. This deep orange-gold dollar is sharply struck everywhere, save for CA in AMERICA. Light, wispy marks throughout. NGC ID# 25D4, PCGS# 7567

**4807 1870-S AU58 PCGS. CAC.** The final S-Mint gold dollar, and the first such issue in 10 years, this near-Mint example has nearly full luster and wispy bluish toning on its light yellow surfaces. Population: 10 in 58, 45 finer. CAC: 2 in 58, 11 finer (8/17). *From The Morgan Hill Collection.* NGC ID# 25D7, PCGS# 7570

**4808 1875 — Repaired — PCGS Genuine. XF Details.** The 1875 gold dollar is a classic rarity, from a mintage of just 400 pieces. This lightly worn specimen shows evidence of repair on the upper obverse rim, from 10 to 12 o'clock, and the corresponding area on the reverse.

**4809 1880 MS64 NGC.** Only 1,600 pieces were struck, but there is a high survivorship of 1880 gold dollars, primarily because of hoarding, especially by Virgil Brand. This is a lovely near-Gem that displays rich reddish-gold and lilac patina. Fully struck. *From The Morgan Hill Collection.* NGC ID# 25DJ, PCGS# 7581

#### 1880 Gold Dollar, MS67 Gorgeous Orange-Gold Luster

**4810 1880 MS67 PCGS.** This glittering Superb Gem is a sensational gold dollar from an extremely small mintage of 1,600 circulation strikes in 1880. The mintage was low enough that virtually all examples have reflective or fully mirrored fields. This gorgeous orange-gold example is pristine with blue toning accents. NGC ID# 25DJ, PCGS# 7581

#### 1883 Gold Dollar, MS67 A High-End Type Coin

**4811 1883 MS67 PCGS.** A lovely semiprooflike Type Three gold dollar with warm orange-gold luster and unabraded surfaces. The design elements are fully struck. The 1883 is occasionally available in this grade as it was heavily saved at the time of issue. But only 16 numerically finer pieces are reported at PCGS (8/17). NGC ID# 25DM, PCGS# 7584

**4812 1887 MS65 NGC. CAC.** A lovely CAC-approved Gem with satiny wheat-gold luster and no distracting contact marks. The strike is solid, and both sides are thoroughly luminous. The CAC green label is infrequently seen on Gem gold dollars of this date. Census: 84 in 65 (1 in 65+), 63 finer. CAC: 23 in 65, 36 finer (7/17). *From The Morgan Hill Collection.* NGC ID# 25DS, PCGS# 7588

**4813 1887 MS66+ PCGS.** The 1887 gold dollar is a popular date from the later years of the series, with a low reported mintage of 7,500 pieces. Two or three shades of yellow-gold patina drape the lustrous surfaces of this high-end Premium Gem. This is a well-struck and nicely preserved piece. Population: 73 in 66 (2 in 66+), 31 finer (8/17). NGC ID# 25DS, PCGS# 7588

**4814 1889 MS66 PCGS.** A delightful Premium Gem, from a mintage of 29,000 pieces, this coin offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 25DU, PCGS# 7590

**4815 1889 MS67 PCGS.** This is about as nice a final-year gold dollar as one could hope to find. The portrait, wreath, and denomination are fully struck over thickly frosted rose-gold surfaces devoid of mentionable marks. The reverse is slightly rotated. Only nine higher grading events at PCGS (8/17). NGC ID# 25DU, PCGS# 7590

- 4816 1889 MS67 PCGS.** While the Philadelphia Mint ramped up production of gold dollars in the final year of issue for the denomination, coining 28,950 circulation-strike examples, few if any actually entered circulation, so Mint State coins are the norm for this issue. However, Superb Gem or finer pieces are rarely encountered. This example is sharply struck with frosty and brilliant yellow luster and pristine surfaces that show a few splashes of copper toning. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, MS67+  
Shimmering Mint Frost**

- 4817 1889 MS67+ PCGS. CAC.** The 1889 was struck to the extent of 29,950 coins, considerably more than the ultra-low mintage dates that preceded it. While those earlier issues tend to show prooflike surfaces, the 1889 usually comes lustrous and frosty. Such is the case with this seemingly immaculate Superb Gem. Rose-gold surfaces shimmer when rotated and feature pinpoint detail on the relief elements. An ideal type coin with nine higher grading events at PCGS (7/17). NGC ID# 25DU, PCGS# 7590

**PROOF GOLD DOLLAR**

- 4818 1888 — Ex-Jewelry — PCGS Proof Genuine. AU Details.** This piece is fully struck and deeply reflective with bright yellow-gold color. Both sides have extensive hairlines from repeated cleanings as a jewelry component, and the central reverse appears to show the remnant of a mount in the fields. Any wear on the coin is from the cleaning, not actual circulation.

**CLASSIC QUARTER EAGLES**

- 4819 1834 Large Head, Breen-6140, Variety 2, R.3, AU55 NGC.** A pleasing Choice AU specimen of this important first-year issue, with just a touch of wear on the well-detailed design elements and lightly abraded orange-gold surfaces that retain traces of original mint luster in sheltered areas. NGC ID# 25FS, PCGS# 7692
- 4820 1836 Script 8 AU55 NGC. Breen-6143, Variety 13, R.4.** Head of 1835. Diagnostic markers for the variety include a berry between the leaves and the close AM in AMERICA. Softness is limited to Liberty's curls and the left juncture of the feathers and shield. The stars and legends are bold over moderately lustrous surfaces. NGC ID# 25FU, PCGS# 7694
- 4821 1838 AU53 PCGS. Breen-6146, Variety 19, R.2.** Even yellow-gold color coupled with a strong strike and small, scattered abrasions make this an excellent choice for the collector assembling an AU set of Classic quarter eagles. NGC ID# 25FY, PCGS# 7696
- 4822 1838 AU55 NGC. Breen-6146, Variety 19, R.2.** A Choice AU specimen of this Classic Head issue, from a mintage of 47,030 pieces, this coin offers well-detailed design elements, with just a trace of wear on the high points, and lightly abraded orange-gold surfaces. NGC ID# 25FY, PCGS# 7696

**1839-O Quarter Eagle, XF45  
Only O-Mint Classic Head Issue**

- 4823 1839-O Low Date, Close Fraction, Breen-6153, Variety 28, R.4, XF45 PCGS.** Some light wear is evident on the top of Liberty's hair and the eagle's wings, but most interior design detail remains intact on this impressive Choice XF specimen. The antique-gold surfaces are lightly abraded and two die cracks are observed on the reverse, one from the eagle's head to the right (facing) wing, and the other from R in AMERICA to the top Arrow head. The 1839-O is the first quarter eagle from the New Orleans Mint, and it is a one-year Classic Head type with that mintmark. NGC ID# 25G7, PCGS# 7701

**LIBERTY QUARTER EAGLES**

- 4824 1845-D XF45 NGC. Variety 6-J. Formerly Variety 6-I.** A single pair of dies was used to strike 19,460 quarter eagles at the Dahlonega Mint in 1845. Perhaps 200 to 250 pieces survive, mostly in VF and XF condition. This orange-gold Choice XF quarter eagle has a well-struck obverse, while the other side displays soft detail on the eagle. Minor flecks throughout. NGC ID# 25GX, PCGS# 7738
- 4825 1856 MS63 PCGS. CAC.** A few hundred 1856 quarter eagles survive, many of them in AU55 through MS62 condition. Comparable representatives are exceedingly scarce. This reddish-gold example has a fully struck obverse with softness on the eagle's talons and leg. The reverse is lightly clashed. Population: 41 in 63 (1 in 63+), 29 finer. CAC: 13 in 63, 8 finer (7/17). NGC ID# 25J7, PCGS# 7777
- 4826 1856-S AU55 NGC.** With a mintage of 72,120 coins, this is the first collectible quarter eagle from the San Francisco Mint, as just 246 pieces were coined in 1854 and none in 1855. Bright yellow-gold surfaces exhibit delicate marks and faint wispy flecks on this attractive Choice AU quarter eagle. NGC ID# 25KL, PCGS# 7781

**1859 Quarter Eagle, MS62  
Rare Old Reverse Variant**

- 4827 1859 Old Reverse, Type One, MS62 NGC.** The Old Reverse is identified by the large arrowheads. Type Two coins are more available by an estimated rate of 2 to 1. PCGS suggests a Type One survivorship of merely 75 coins across all grade levels. This bright yellow-gold offering enjoys strong stars with the exception of the first two. The eagle is well-defined, except for the left leg. Census: 15 in 62, 5 finer (8/17). NGC ID# 25JK, PCGS# 97788

- 4828 1872 AU55 PCGS.** David Akers noted this was a very rare and underrated issue. Today, PCGS estimates only 70 pieces survive, though 121 submissions are reported at both services combined. Minimal friction is apparent on this well-struck coin. A planchet flake near the nose and a thin pinscratch at the upper reverse are seen. Population: 9 in 55, 17 finer (7/17). NGC ID# 25KK, PCGS# 7815

**1874 Quarter Eagle, MS62**  
**Ultra-Low Mintage and Survival Rate**

- 4829 1874 MS62 PCGS.** Quarter eagle output at the Philadelphia Mint dropped precipitously in 1874 to merely 3,920 pieces — down from 178,000 coins the year before. PCGS CoinFacts estimates 125 examples survive. This is one of the very few in Mint State, with semireflective orange-gold surfaces and needle-sharp detail on the devices. Small abrasions explain the grade. Population: 10 in 62, 12 finer (7/17). NGC ID# 7JS4, PCGS# 7821

- 4830 1879 MS64+ PCGS.** The stars are fully raised, the curls boldly rendered, and the eagle feathers strongly delineated on this clean near-Gem quarter eagle. The rims are equally broad around frosty, rose-gold surfaces. In 1879, quarter eagle output reached 88,990 coins. PCGS shows 29 higher grading events (7/17). NGC ID# 25L2, PCGS# 7830

- 4831 1888 MS65 NGC.** According to Mint records, 16,001 Liberty quarter eagles were struck at the Philadelphia Mint in 1888, a small total in absolute terms, but actually quite generous in the context of the series. This attractive Gem displays well-preserved peach-gold surfaces, with vibrant satiny mint luster and sharply detailed design elements. Eye appeal is terrific. Census: 28 in 65 (2 in 65+), 6 finer (7/17). NGC ID# 25LC, PCGS# 7840

- 4832 1889 MS64 PCGS.** The 1889 quarter eagle is a slightly more challenging date in high grade. This near-Gem is conditionally scarce, and finer pieces are rarely encountered. The strike is uniformly sharp aside from the eagle's left (facing) leg, which is weak as usual. Frosty peach-gold luster is original from the mint. Population: 64 in 64 (2 in 64+), 12 finer (7/17). NGC ID# 7JTT, PCGS# 7841

- 4833 1896 MS65 NGC.** A delightful Gem from a mintage of just 19,000 pieces, this coin exhibits sharply detailed design elements and lustrous orange-gold surfaces with no mentionable distractions. Census: 62 in 65 (1 in 65+, 1 in 65★), 36 finer (8/17). NGC ID# 25LL, PCGS# 7848

- 4834 1899 MS65 PCGS.** David Akers called this a “very underrated” issue that is usually considered on par with far more available dates from later in the series. Examples are very scarce in Gem condition. Razor-sharp motifs, pleasing apricot-gold coloration, and frosty luster are hallmarks. A small alloy spot occurs near AM. NGC ID# 25LP, PCGS# 7851

- 4835 1906 MS66 PCGS.** The design elements of this delightful Premium Gem show razor-sharp definition throughout, and the well-preserved orange-gold surfaces display vibrant, satiny mint luster on both sides. PCGS has graded 75 numerically finer examples (7/17). NGC ID# 7JW8, PCGS# 7858

## PROOF LIBERTY QUARTER EAGLE

**1907 Quarter Eagle, PR61**  
**Pleasing for the Grade**

- 4836 1907 PR61 PCGS.** Proof Liberty gold issues are often out of reach for collectors who would otherwise be interested in them. This 1907 proof quarter eagle, however, may be more accessible due to its low numeric grade. Both sides are lightly marked and hairlined, but the proof eye appeal is still present in the mirrored fields and sharp, satiny design elements. Both sides show bright yellow-gold color. NGC ID# 7KG7, PCGS# 7933

## INDIAN QUARTER EAGLES

- 4837 1908 MS65 PCGS. CAC.** This is a particularly satiny, well-preserved first-year type coin with strong eye appeal. The eagle's wing feathers show incompleteness due to improper engraving of the die, not from strike; the coin as a whole is sharply struck and beautifully preserved. The obverse alone is almost worthy of a finer grade, while a 10x loupe reveals trivial imperfections on the reverse. NGC ID# 288Y, PCGS# 7939

- 4838 1908 MS65 PCGS. CAC.** This is a deep reddish-gold representative of the collectible first-year 1908 Pratt quarter eagle. Each side offers a good strike with typical softness on the eagle's shoulder. Gem condition is an optimal grade for the issue, whose population dwindles significantly in MS66. NGC ID# 288Y, PCGS# 7939

- 4839 1909 MS63 PCGS.** An average grade fractionally shy of MS61 attests to the scarcity of the 1909 quarter eagle in high grades. This pinpoint example has minimal buckling around the borders and a partial wire rim. Softly lustrous with bright yellow-gold color and a minor wispy marks. NGC ID# 288Z, PCGS# 7940

- 4840 1909 MS63 NGC. CAC.** A satiny Select Mint State example of the popular 1909 Indian quarter eagle. This piece exhibits bright yellow-gold surfaces and minimal marks for the grade. NGC ID# 288Z, PCGS# 7940

- 4841 1909 MS64+ NGC.** Sharp and satiny with warm wheat-gold color and unabraded fields, this high-end near-Gem Indian Head type coin shows only a few faint slide marks on the Indian's cheek that prevent a full Gem designation. This is about as much quality as a collector can realistically expect to acquire for a sub-MS65 coin. NGC ID# 288Z, PCGS# 7940

- 4842 1909 MS64+ PCGS. CAC.** This glistening CAC coin appears fine enough to be a Gem to the naked eye, but a loupe reveals a few trivial lines in the fields that limit the grade. The strike is sharp, and each side displays bright straw-gold luster. The 1909 Indian quarter eagle in this condition is an outstanding type coin candidate. NGC ID# 288Z, PCGS# 7940

**1911-D Indian Quarter Eagle, AU53  
Low-Mintage Series Key**

- 4843** 1911-D AU53 PCGS. The 1911-D Indian quarter eagle is a sought-after key, from a series-low business-strike mintage of 55,680 pieces. This attractive AU53 specimen shows just a touch of wear on the sharply detailed design elements, and the vivid orange-gold surfaces are minimally abraded for the grade. Housed in a green label holder. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU55  
Bold Mintmark**

- 4844** 1911-D AU55 PCGS. The D mintmark is strong enough on this example that it can be seen without a glass, and that is not always the case. On some examples, the mintmark is completely absent and the coin has to be identified as a Denver Mint product through observation of other die characteristics. This Choice AU piece has light yellow-gold surfaces with trivial marks. Fully struck with nearly complete luster. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, Bold AU58**

- 4845** 1911-D AU58 NGC. Each side features even, orange-gold coloration and bold design detail. The eagle's shoulder tip is the only point of incompleteness. The fields are smooth and minimally abraded, showing a couple of tiny color specks near the claws. A partial wire rim encircles the borders. This a terrific near-Mint example of the most famous date in the series. NGC ID# 7KR7, PCGS# 7943
- 4846** 1913 MS64+ PCGS. This satiny straw-gold example displays sharp detail and original mint luster. Only a few minor grazes in the left obverse field prevent a full MS65 designation. The 1913 is an available date in near-Gem condition but is scarce in better grades and out of reach for the casual collector on a budget. NGC ID# 7KR9, PCGS# 7945

- 4847** 1914-D MS64 PCGS. Sharp feather details on the eagle's wing and the headdress complement a bold mintmark on this near-Gem 1914-D quarter eagle. The well-preserved surfaces display luminous straw-gold luster. A rare key date just one point finer. NGC ID# 2899, PCGS# 7947

**THREE DOLLAR GOLD PIECES**

- 4848** 1854-O XF45 NGC. Variety 2, lapped reverse. A lightly circulated example of this lone New Orleans issue, showing straw-gold coloration and mostly smooth surfaces. The design elements retain good detail for the grade. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU50  
Necessary New Orleans Type**

- 4849** 1854-O AU50 PCGS Secure. Variety 2. The 1854-O is essential for a New Orleans gold type set, since the facility never struck the denomination thereafter. This canary-gold example displays bright luster within the obverse legends. Liberty's shoulder curl shows only slight wear. The scattered small abrasions are consistent with brief antebellum circulation. NGC ID# 25M5, PCGS# 7971

- 4850** 1855-S VF35 NGC. Coppery-gold patination displays whispers of lavender and purple along the borders. The design elements retain relatively sharp definition, though portions of Liberty's hair and some of the reverse leaves lack central detail. The surfaces are quite clean, revealing just a few minute marks on the cheek, in the right obverse field, and on the first 5 of the date. Light greenish spots are visible in the upper loops of the 3 and the 8.  
*Ex: Central States Signature (Heritage, 4/2006), lot 2564.* NGC ID# 7K5D, PCGS# 7973

**1855-S Three Dollar, XF45  
First San Francisco Issue in the Series**

- 4851** 1855-S XF45 PCGS. This is the first of five S-mint issues in the three dollar gold series, only four of which are collectible. A single 1870-S is part of the Bass Foundation Collection. Just 6,600 1855-S representatives were minted, and all survivors are widely desired no matter their condition. This deep orange-gold example is lightly circulated with blending over the upper portions of the curls and wreath. Still, the design elements remain bold. NGC ID# 7K5D, PCGS# 7973

- 4852** 1857 AU55 NGC. Partial luster remains in the fields of this Choice About Uncirculated 1857 three dollar gold piece. Light high-point wear defines the grade, and there is some expected chatter in the fields. The availability of this issue makes it a good choice for type collecting.  
**From The Morgan Hill Collection.** NGC ID# 7K5G, PCGS# 7976

**1858 Three Dollar, AU53  
Seldom-Encountered Issue**

- 4853 1858 AU53 PCGS. CAC.** Several scarce and rare issues came out of Philadelphia in 1858, including the proof-only Seated dollar and the ten dollar gold rarity. Among those rare issues is the three dollar gold piece. This attractive AU example has wispy green toning over its still partially lustrous yellow surfaces. Population: 24 in 53, 47 finer. CAC: 5 in 53, 8 finer (7/17).  
*Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4245.*  
*From The Morgan Hill Collection.* NGC ID# 7K5J, PCGS# 7978

- 4854 1859 AU55 NGC. CAC.** The 1859 three-dollar gold piece had the ninth highest mintage for the denomination, yet only 15,558 coins were minted, illustrating the rarity and importance of the denomination. This Choice AU example has lovely greenish-gold surfaces with nearly full mint luster.  
*From The Morgan Hill Collection.* NGC ID# 7K5K, PCGS# 7979

- 4855 1861 VF35 NGC.** Splashes of rose in the margins accent the mostly yellow-gold patina that drapes both sides. Myriad abrasions limit the grade, but none merit specific mention. A lovely, well-defined example with tiny areas of prooflike mirroring still visible in the protected portions of the fields.  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 3498.* NGC ID# 7K5N, PCGS# 7982

**1867 Three Dollar Gold, AU55  
Low Mintage, Low Survival Rate**

- 4856 1867 AU55 PCGS.** The 1867 three dollar gold piece claims a modest mintage of 2,600 pieces and few high-quality examples were saved by contemporary collectors, making the issue scarce-to-rare in all grades today. This Choice AU specimen shows only a touch of wear on the strongly impressed design elements and the lustrous orange-gold surfaces are lightly abraded, with strong eye appeal. Population: 26 in 55, 35 finer (7/17). NGC ID# 25MN, PCGS# 7988

**1867 Three Dollar, Nearly Uncirculated  
150 to 200 Pieces Survive**

- 4857 1867 AU58 NGC.** With a mintage of only 2,600 circulation strikes, the 1867 three dollar is a very scarce issue in the absolute sense. Probably 150 to 200 examples survive, usually in AU condition. This well-impressed, semiprooflike representative has yellow-gold coloration and a touch of rub over the highest points.  
*From The Morgan Hill Collection.* NGC ID# 25MN, PCGS# 7988

- 4858 1868 AU50 NGC.** Sandy-gold surfaces on each side of this low-mintage three dollar issue show light contact marks and a touch of the expected wear, but major abrasions or any other distractions are absent. The eye appeal is good on this well-struck coin, a survivor from the mintage of 4,850 pieces. NGC ID# 25MP, PCGS# 7989

- 4859 1868 AU50 PCGS.** This AU 1868 three dollar gold piece is sharply struck and exhibits only slight high-point wear. Original olive-gold patina retains some luster in the protected regions, and the surfaces are devoid of heavy abrasions. Visual appeal is outstanding for the grade.  
*From The Morgan Hill Collection.* NGC ID# 25MP, PCGS# 7989

**1868 Three Dollar, Near-Mint  
Just 4,850 Pieces Struck**

- 4860 1868 AU58 NGC.** Examples of this date are more available than of preceding years, although the 1868 three dollar is scarce in the absolute sense, perhaps unsurprising given a mintage of 4,850 coins. A trace of cabinet friction over well-struck relief elements explains the grade. Both sides retain much luster and show small abrasions. NGC ID# 25MP, PCGS# 7989

**1871 Three Dollar, Semireflective AU58  
Mintage of Only 1,300 Coins**

- 4861** 1871 AU58 NGC. Bowers and Winter suggest Thomas Elder is responsible for the relative collectibility of such a low mintage (1,300 coins). Elder offered a premium over face value to bank tellers and others who could furnish examples of this scarce date. Coins are often seen in lightly circulated condition, as here. Decidedly semiprooflike and well-struck, qualities synonymous with the issue. *From The Morgan Hill Collection.* NGC ID# 25MU, PCGS# 7993

- 4862** 1878 AU58 PCGS. Barely a touch of high-point friction keeps this near-Mint coin from an Uncirculated grade. Moderate luster remains in the fields, and there are no distracting abrasions. The lower portion of the wreath is poorly struck as normal. *From The Morgan Hill Collection.* NGC ID# 25MZ, PCGS# 8000

- 4863** 1878 MS62 PCGS. A mix of reddish patina within the hidden areas and green-gold color over the exposed regions adorns this Uncirculated three dollar gold piece from a sizeable production of 82,304 coins. The 1878 is the most widely available date in the series and a perfect option for type collectors. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS63+  
Second Die Pair**

- 4864** 1878 MS63+ NGC. CAC. A November 1983 issue of *The Numismatist* contained a report from ANACS about diagnostics of genuine three dollar gold pieces. The article identified two die pairs, the second having a horseshoe-shaped die line between the E and R of LIBERTY that is clearly visible on this Select Mint State piece. Trivial marks appear on the brilliant rose-gold surfaces of this brilliant and satiny representative. NGC ID# 25MZ, PCGS# 8000

**1879 Three Dollar, Semiprooflike AU58**

- 4865** 1879 AU58 NGC. CAC. After the Mint vastly overestimated demand for three dollar coins when gold and paper currency reached parity, it returned to normal levels of ultra-low production in 1879. Only 3,000 pieces were struck that year. This reflective, nearly Uncirculated example offers lustrous, well-struck surfaces with pleasing rose-gold coloration.

*From The Morgan Hill Collection.* NGC ID# 25N2, PCGS# 8001

**1879 Three Dollar Gold, MS61  
Mintage Drastically Reduced**

- 4866** 1879 MS61 NGC. Mintage of three dollar gold pieces declined drastically in 1879 to a mere 3,000 pieces, after the resumption of specie payments failed to produce a large demand for gold coinage. This impressive Mint State specimen displays well-detailed design elements and lustrous orange-gold surfaces that are lightly marked for the grade. NGC ID# 25N2, PCGS# 8001

**1882 Three Dollar, AU58  
Overtly Prooflike**

- 4867** 1882 AU58 PCGS. Overtly prooflike surfaces with yellow-gold coloration are unsurprising given the issue's tiny production of 1,500 coins. The strike is good with a touch of blending on the curls and wreath bow. Light field chatter is seen, but evidence of rub is essentially undetectable.

*From The Morgan Hill Collection.* NGC ID# 25N5, PCGS# 8004

1886 Three Dollar Gold, AU58  
Only 1,000 Examples Struck

- 4868** 1886 AU58 NGC. Always a popular date with collectors with its conspicuously low mintage of 1,000 pieces, the 1886 was not hoarded exclusively in Mint condition but actually entered the channels of commerce and can be found in XF-AU grades. This piece shows very slight friction over the highpoints and the surfaces are a rich orange-gold with an intermixture of pale lilac in the fields. There are no obvious abrasions on either side of this impressive coin. Census: 45 in 58, 47 finer (7/17).

*From The Morgan Hill Collection.* NGC ID# 25N9, PCGS# 8008

1888 Three Dollar, MS62  
Late-Date, Low-Mintage Issue

- 4869** 1888 MS62 NGC. The 5,000 three dollar gold coins struck at the Mint in 1888 were shielded from circulation and instead held by the public as gifts and mementos. Rose-gold tones and frosty luster blanket each side. The strike displays softness over the usual areas, namely the forecurls, cotton bolls, and wreath bow. NGC ID# 25NB, PCGS# 8010

- 4870** 1889 AU58 PCGS. An attractive near-Mint specimen from a mintage of just 2,300 pieces, this coin exhibits just a trace of wear on the well-detailed design elements, with lightly abraded orange-gold surfaces that display traces of satiny mint luster. NGC ID# 7KDU, PCGS# 8011

EARLY HALF EAGLE

1805 BD-2 Half Eagle, XF Details

- 4871** 1805 BD-2, R.4 — Repaired — PCGS Genuine. XF Details. The bright greenish-gold surfaces of this early half eagle exhibit myriad tooling marks that represent an attempt to smooth out previous marks from sweating, an old-time process that was intended to accumulate small flakes of gold from the coin's surface. This piece should prove affordable for a wide audience.

CLASSIC HALF EAGLE

1838-C Half Eagle, XF Details  
Only C-Mint Classic Head Five

- 4872** 1838-C — Reverse Scratched, Cleaned — NGC Details. XF. Breen-6517, Normal 5, Variety 1, R.4 From a modest mintage of 17,179 pieces struck during the first year of operations at the Charlotte Mint, the 1838-C is the only Classic Head half eagle from the famous Southern facility. This coin exhibits the sharpness of an XF40 specimen, with orange-gold surfaces that show the typical number of minor abrasions for that grade, plus a long scratch through E in UNITED and into the field on the reverse. The luster is somewhat dimmed by the noted cleaning.

LIBERTY HALF EAGLES

- 4873** 1839 AU55 PCGS. From a mintage of 118,143 pieces, struck during the first year of the design, this coin exhibits just a trace of wear on the well-detailed design elements, and the lustrous orange-gold surfaces are lightly abraded. Population: 19 in 55, 43 finer (8/17). NGC ID# 25S7, PCGS# 8191

- 4874** 1845-O — Filed Rims — PCGS Genuine. AU Details. Variety 1. A scarce New Orleans issue with a mintage of 41,000 pieces. This AU-level coin displays bold detail and some remaining mint luster. A mark on Liberty's neck is the only detracting abrasion. Rim filing is visible primarily below the date.

- 4875** 1846-O XF45 PCGS. CAC. Variety 1. This 1846-O half eagle displays exceptional sharpness for the grade and retains some luster in the protected portions of the fields. Some coppery discolorations at the upper-left obverse border attest to the originality of the patina. No major abrasions are present. CAC-endorsed in an old green label holder. Population: 22 in 45, 48 finer. CAC: 5 in 45, 12 finer (7/17). NGC ID# 25TK, PCGS# 8230

- 4876** 1849 AU55 PCGS. A Choice AU specimen of this elusive issue, with traces of prooflike reflectivity in sheltered areas around the devices. Just a touch of friction shows on the high points, like the eagle's head and Liberty's curls. Population: 10 in 55, 21 finer (8/17). NGC ID# C5XC, PCGS# 8240

- 4877** 1853-D VF35 PCGS. Variety 34-Y. The 1853-D half eagle is popular among collectors seeking a single, affordable coin from the Dahlonega Mint. The present example is sharp, partially lustrous, and lightly abraded as normal. The original straw-gold coloration is appealing. Housed in an old green label holder. NGC ID# 25UF, PCGS# 8255

**1857-C Five Dollar, AU50  
Fewer Than 300 Coins Extant**

- 4878 1857-C AU50 PCGS. Variety 1.** Per Doug Winter, "The 1857-C is one of the more available Charlotte half eagles both in terms of overall and high grade rarity." Most examples are reasonably well-struck for the facility. This AU50 half eagle is no different with strong upper stars, curls, feathers, and olive leaves. Medium yellow-gold color graces moderately abraded surfaces. Perhaps 60 to 78 examples survive in About Uncirculated condition, with 225 to 275 pieces in all.  
*From The Morgan Hill Collection.* NGC ID# 25V3, PCGS# 8272

- 4879 1859-D Medium D — Improperly Cleaned — NGC Details. AU. Variety 44-HH.** Only 10,366 pieces were struck of the 1859-D and yet it is more frequently encountered, especially in higher grades, than one might expect. This is a well-defined example with bright yellow-gold surfaces that show minimal evidence of cleaning. There are, however, two surface defects that need to be noted. One appears to be a planchet lamination that is placed diagonally below the ear of Liberty; the other is a scrape on the reverse through the olive leaves below the I in UNITED.
- 4880 1861 MS60 NGC.** Sharp stars, feathers, leaves, and talons define this lustrous 1861 half eagle. Each side displays deeper khaki-gold color. Peppered marks limit the grade for this mint condition No Motto type. NGC ID# 25VK, PCGS# 8288
- 4881 1861 MS61 NGC. CAC.** The year 1861 is popular in the historical sense, but it is also popular among collectors looking for affordable, high-end gold coins. This Mint State Liberty Head five is just such a coin, with original luster and medium yellow-gold coloration. Boldly impressed with minor ticks on the obverse. CAC: 9 in 61, 33 finer (7/17). NGC ID# 25VK, PCGS# 8288
- 4882 1880-CC AU50 NGC. Variety 1-A.** A satiny yellow-gold piece with some reflectivity in the fields. The design elements show strong detail, and there are no major abrasions. The rarity of the 1880-CC half eagle in Mint State drives such pieces out of reach for the average collector. This AU coin is a more collectible but still high-grade option. NGC ID# 25XB, PCGS# 8352

**1881-CC Five Dollar, XF45  
Seldom-Seen Smooth Surfaces**

- 4883 1881-CC XF45 NGC. Variety 1-A.** The Carson City Mint coined only 13,886 half eagles in 1881, a production down from more than 51,000 pieces the year before. The 1881-CC five circulated extensively and is scarce today in all grades. Uncirculated examples are prohibitively rare. This Choice XF representative displays smooth surfaces and pleasing olive-gold patina with coppery accents in the protected regions. Light wear is most easily seen on the eagle's neck feathers. Census: 15 in 45, 43 finer (7/17). NGC ID# 25XE, PCGS# 8356

- 4884 1882-CC AU53 NGC. Variety 1-A.** Warm honey-gold surfaces display luster in the protected areas. Well-impressed design features and a limited number of contact marks further complement the eye appeal. A collectible, high-grade Carson City type coin.  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 6971.* NGC ID# 25XH, PCGS# 8359
- 4885 1885-S MS65 PCGS.** An exquisite Gem that is rarely seen so fine, this piece is sharply defined and exhibits brilliant and frosty yellow-gold luster with excellent eye appeal. Few survivors from the 1.2 million coin mintage are equal to this representative. Population: 67 in 65 (1 in 65+), 6 finer (8/17). NGC ID# 2Y7X, PCGS# 8368
- 4886 1890-CC AU58 PCGS. CAC. Variety 1-A.** A trace of grade-limiting friction is barely apparent over nearly fully rendered devices. Copious luster emanates from minimally abraded yellow-gold surfaces, generating fantastic visual appeal. An elusive CC issue with a mintage of 53,800 coins. NGC ID# C5XF, PCGS# 8376
- 4887 1891-CC AU55 ANACS. Variety 1-A.** Partially lustrous and sharp, this Choice AU 1891-CC half eagle shows no loss of detail from wear and has only slight friction and chatter in the open areas of the fields. A high-end coin for the grade and highly appealing. Housed in an old white ANACS holder. NGC ID# 25Y5, PCGS# 8378

**1891-CC Five Dollar, MS62  
Frosty Carson City Type Coin**

- 4888 1891-CC MS62 PCGS. Variety 2-A.** The final 1 in the date is faintly recut at the top on this variety. This Mint State Carson City half eagle shows frosty luster and an excellent strike. Scattered light abrasions limit the grade but pose little distraction. The 1891-CC five is usually available in Mint State for a price, but demand for such coins is steadily strong. NGC ID# 25Y5, PCGS# 8378
- 4889 1892-CC AU58 NGC. Variety 1-A.** A die crack connects the bases of the letters in AMERICA on this piece. Luster remains in the protected areas of the fields, and the orange-gold coloration is original. The coin is sharp with relatively smooth surfaces. NGC ID# 25Y7, PCGS# 8380
- 4890 1892-CC AU58 NGC. Variety 1-A.** Sharp details show only a brush of high-point friction on this near-Mint 1892-CC half eagle. Original luster remains in the protected portions of the fields, and the warm straw-gold coloration is highly pleasing. Light field chatter accompanies the grade, as usual on this issue. NGC ID# 25Y7, PCGS# 8380
- 4891 1893 MS65+ NGC.** The 1893 half eagle is available through MS64, becoming very scarce in MS65 — a surprise considering its mintage in excess of 1.5 million coins. A few spindly die cracks are seen on peach-gold surfaces that are awash in frosty mint luster. Census: 71 in 65 (6 in 65+), 10 finer (7/17). NGC ID# 25YA, PCGS# 8383
- 4892 1893-CC AU53 NGC. Variety 1-A.** A spike protrudes from a dentil right of star 1. Status as the final-year issue from the Carson City branch mint and a limited mintage of 60,000 coins explain the popularity of the 1893-CC half eagle. This lightly circulated, bright yellow-gold five features crisp stars and feathers. Small, wispy marks and a couple of tiny ticks on the cheek are noted. NGC ID# 25YB, PCGS# 8384

**4893 1893-CC AU55 ANACS. Variety 1-A.** Smooth, luminous surfaces grant this Choice AU 1893-CC five outstanding eye appeal. The design elements are sharply defined with little high-point wear present. A defined cartwheel effect is a hallmark of this piece. NGC ID# 25YB, PCGS# 8384

**4894 1893-CC AU55 PCGS. Variety 1-A,** as usual on this final Carson City issue. The 1893-CC five had a mintage of 60,000 coins, but Mint State examples are scarce. This Choice AU coin displays yellow-gold surfaces with hints of luster near the borders. Light surface chatter appears over the interiors, and trivial strike weakness is discernible on the hair curls around Liberty's face. NGC ID# 25YB, PCGS# 8384

**4895 1897-S MS62 PCGS. CAC.** Uncirculated 1897-S half eagles are scarce and underrated. This CAC-approved example displays sharp detail and original green-gold luster that warms to peach hues at the centers. Light surface chatter on each side limits the grade. Population: 35 in 62, 19 finer. CAC: 4 in 62, 7 finer (8/17). NGC ID# 25YN, PCGS# 8395

**4896 1899 MS65 NGC.** The design elements of this impressive Gem are sharply detailed throughout, and a faint die crack connects stars 5 and 6. The pleasing orange-gold surfaces are lustrous and well-preserved. NGC ID# 25YS, PCGS# 8398

**4897 1906 MS65 PCGS.** This plentiful type-coin issue becomes conditionally scarce in grades finer than MS65. The current Gem offers satiny original luster with warm peach, orange, and mint-gold hues. The strike is sharp and no singular abrasions are discernible on either side.

*From The Morgan Hill Collection.* NGC ID# 25Z9, PCGS# 8413

#### 1908 Half Eagle, MS66 Final Liberty Head Issue

**4898 1908 MS66 PCGS.** The only 1908-dated gold coin bearing the Liberty Head design, this Premium Gem has a bold strike and pristine surfaces with vibrant lemon-yellow luster. While the issue is easily obtained in lower Mint State grades, Gem or finer examples are elusive. Population: 45 in 66, 9 finer (8/17). NGC ID# 25ZE, PCGS# 8418

### INDIAN HALF EAGLES

**4899 1908 MS64 PCGS.** Smooth, satiny yellow-gold luster illuminates well-struck design elements on this near-Gem 1908 Indian half eagle. A few light surface grazes limit the grade but are not severe. A horizontal wire-like strike-through runs through GOD on the reverse. NGC ID# 28DE, PCGS# 8510

**4900 1908-D MS64 PCGS.** Mint-green, lavender, and vivid orange-gold hues give this near-Gem 1908-D Indian Head five exceptional visual appeal for the grade. The strike is sharp, and abrasions are minimal. PCGS reports only a dozen numerically finer examples (8/17). NGC ID# 93KW, PCGS# 8511

**4901 1909 MS64 NGC.** High-grade availability, that is through MS64, explains the popularity of the 1909 among type enthusiasts. Gems are very scarce. Both sides are fully impressed and lustrous with pleasing reddish-gold coloration. Minimally marked. NGC ID# 28DH, PCGS# 8513

**4902 1909-D MS64+ PCGS.** The 1909-D, with its record-high mintage of 3.4 million coins, sees a dramatic decline in the population figures between MS64 and MS65, where the issue becomes very scarce. This rose-gold near-Gem displays a pinpoint impression. A reed mark on the cheek and two more above the eagle barely preclude a higher grade. NGC ID# 28DJ, PCGS# 8514

**4903 1911-S MS62 PCGS. CAC.** A production of 1.4 million coins belies the scarcity of the 1911-S half eagle, especially in grades finer than the one offered here. This warm orange-gold five dollar shimmers with frosty luster. The design elements are sharply struck, save for soft mintmark. Each side is lightly abraded, the most notable impairment traveling through the reverse motto. NGC ID# 25ZM, PCGS# 8522

#### 1911-S Indian Half Eagle, MS63 Underrated Branch Mint Issue

**4904 1911-S MS63 PCGS.** For unknown reasons, the 1911-S Indian half eagle is much more difficult to locate than its mintage of 1.4 million pieces would suggest. This impressive Select example exhibits well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 34 numerically finer examples (7/17). NGC ID# 25ZM, PCGS# 8522

**4905 1913 MS64 PCGS.** This common-date five dollar Indian displays even, rich reddish-gold patina and minimal field marks. Sharply struck and evenly balanced in appearance from side to side. NGC ID# 28DT, PCGS# 8525

#### 1913-S Half Eagle, MS62+ Elusive Condition Rarity

**4906 1913-S MS62+ NGC.** Weak S. David Akers wrote: "In MS-63 or higher grade, this issue is really very rare and gems are almost never available." This MS62+ nearly qualifies for that rarified grade, falling fractionally short. Soft luster emanates from light gold surfaces that show a few grease strike-throughs. As noted on the holder, the S mintmark is incomplete with only the lower loop readily apparent — a typical feature of the 1913-S. The NGC Census lists 40 higher grading events (7/17). NGC ID# 25ZP, PCGS# 8526

**4907 1914 MS63 NGC.** The 1914 is a slightly better date in high grade. This Select example displays sharp design elements and satiny yellow-gold mint luster. Scattered light abrasions account for the grade, but the eye appeal remains pleasing. NGC ID# 28DU, PCGS# 8527

- 4908 1914 MS63 PCGS. CAC.** Bright, even mint luster covers each side and minimal abrasions are seen. This latter point is of special note given the tendency for this reduced relief design to show even slight coin-to-coin contact. NGC ID# 28DU, PCGS# 8527

**1914 Indian Half Eagle, MS64  
Nice Color and Luster**

- 4909 1914 MS64 PCGS.** With a reported mintage of 247,000 pieces, the 1914 Indian half eagle is not difficult to locate in MS64 condition, but finer examples are rare. This attractive Choice specimen offers sharply detailed design elements and lustrous orange-gold surfaces that show few signs of contact. Overall eye appeal is terrific. NGC ID# 28DU, PCGS# 8527

**1914-S Indian Half Eagle, MS62  
Challenging Issue in Higher Grades**

- 4910 1914-S MS62 PCGS. CAC.** From a mintage of 263,000 pieces, the 1914-S Indian half eagle can be located in MS62 condition with some patience, but it is one of the most challenging issues of the series in higher levels of Mint State. This attractive MS62 specimen is sharply detailed in most areas, but the mintmark displays the usual lack of definition. The orange-gold surfaces show slightly muted mint luster, with the expected number of minor contact marks for the grade. PCGS has graded 61 numerically finer examples (7/17). NGC ID# 28DW, PCGS# 8529

**LIBERTY EAGLES**

- 4911 1844-O AU50 PCGS. Variety 1.** The mintmark is lightly recut on the left inside loop, and the upper loop of a misplaced date numeral is barely visible in the dentils beneath the date. This AU 1844-O gold eagle is well-detailed with original olive-gold patina. Moderately abraded surfaces are to be expected for New Orleans gold of this period. Population: 32 in 50, 56 finer (7/17). *From The Morgan Hill Collection.* NGC ID# 554G, PCGS# 8591

**1851-O Ten Dollar, AU58  
Bright and Lustrous Shipwreck Coin**

- 4912 1851-O AU58 NGC. Variety 1.** Ex: *S.S. Republic*. One of 99 pieces recovered from the shipwreck, this 1851-O emerged from the depths with minor abrasions and traces of prooflikeness around the devices. Frosted yellow-gold luster gleams from the bright, sharply defined surfaces. We note a shallow scrape beneath the eye, but it is minor in the context of the assigned grade. This lot comes with a Certificate of Authenticity from Odyssey Marine Exploration, Inc. Census: 109 in 58, 18 finer (8/17). NGC ID# 557V, PCGS# 8607

- 4913 1852 AU58 PCGS. CAC.** The 1852 is an accessible date in the context of No Motto Liberty Head eagles with a high mintage of 263,106 coins. However, Uncirculated coins are very rare, placing pressure on high-end circulated coins. This virtually mint ten dollar retains much luster and strong central definition. The stars lack radials, and marks are peppered throughout. Population: 20 in 58, 25 finer. CAC: 8 in 58, 11 finer (7/17). NGC ID# 263C, PCGS# 8608

**1853-O Eagle, AU58  
Rare in Full Mint State**

- 4914 1853-O AU58 NGC. Variety 1.** The 1853-O is scarce and undervalued in high About Uncirculated grades given the rarity of fully Mint State examples. This is a frosted, bright-yellow representative with ample mint luster at the borders. Traces of prooflike surface still remain around the eagle. Garrett and Guth report 14 pieces were salvaged from the *S.S. Republic* (just one in Uncirculated condition). Possibly this sharply struck near-Mint piece is one of those. *From The Morgan Hill Collection.* NGC ID# 263F, PCGS# 8612

- 4915 1854 AU55 ANACS.** A Choice Au specimen of this popular issue, from a mintage of 54,250 pieces. Light wear shows on the high points of the design elements and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 263G, PCGS# 8613

- 4916 1854-S AU53 PCGS.** Some luster remains in the protected regions of the fields on this bright yellow-gold example. The design elements are well-detailed. Scattered abrasions on each side accompany slight high-point wear. The 1854-S is the debut gold eagle from the San Francisco Mint. NGC ID# 263K, PCGS# 8615

**1854-S Ten Dollar, AU55**  
**Luster Remains in the Fields**

- 4917 1854-S AU55 PCGS.** The debut gold eagle from the San Francisco Mint is usually only available in worn condition, with high-end AU coins being scarce. Uncirculated examples of this date are genuinely rare. This Choice AU coin displays sharp detail and straw-gold color with moderate field luster. Scattered abrasions accompany the grade. Population: 34 in 55, 29 finer (7/17). NGC ID# 263K, PCGS# 8615

- 4918 1856-S AU53 PCGS.** The 1856-S Liberty eagle is a rarity in Mint State and almost uncollectible as such without a number of distracting abrasions. This smooth AU coin may be a more appealing option for the date collector. Well-detailed design elements complement partially lustrous yellow-gold surfaces. Eye appeal is excellent. Population: 30 in 53, 57 finer (7/17). NGC ID# 263S, PCGS# 8621

**1862-S Liberty Eagle, Fine 12**  
**Low-Mintage Wartime Issue**

- 4919 1862-S Fine 12 PCGS. CAC.** The San Francisco Mint struck a small mintage of 12,500 Liberty eagles in 1862, while the output at Philadelphia was even smaller, and the other branch mints were all closed due to the outbreak of the Civil War. This well-worn example retains some interior detail on the major design elements, which are all complete in outline, and the orange-gold surfaces are lightly abraded. Population: 3 in 12, 47 finer. CAC: 2 in 12, 3 finer (7/17). NGC ID# 55H4, PCGS# 8636

- 4920 1871-S VF30 PCGS.** The 1871-S has a lower PCGS population than its Carson City cousin, and also trades at a much lower price. The present yellow-gold representative has a small obverse rim ding at 1 o'clock but is otherwise ideal for the VF30 grade. Population: 5 in 30, 55 finer (8/17).  
*Ex: Dallas Signature (Heritage, 3/2013), lot 4307.* NGC ID# 264Y, PCGS# 8662

- 4921 1880-S MS63 PCGS.** The 1880-S ten is conditionally scarce in MS63 and a major rarity any finer. This piece is frosty and lustrous with orange-gold coloration. Sharp design elements complete the eye appeal. Population: 63 in 63 (2 in 63+), 7 finer (7/17). NGC ID# 265V, PCGS# 8690

- 4922 1881-S MS63 PCGS.** This Select Mint State coin displays original wheat-gold luster and light contact marks, consistent with the grade. There is minor strike softness on the eagle's talons. The 1881-S ten is scarce in this grade and finer pieces are prohibitively rare. Population: 58 in 63 (2 in 63+), 0 finer (7/17). NGC ID# 265Z, PCGS# 8694

**1883-CC Ten Dollar, AU50**  
**Partially Reflective Fields**

- 4923 1883-CC AU50 NGC. Variety 1-B.** Coming from a mintage of only 12,000 coins, the 1883-CC eagle is scarce in AU grades. Only a few Uncirculated examples are known and all are heavily abraded. This collectible AU coin displays a sharp strike and bright yellow-gold patina. The surfaces are moderately abraded, but the fields retain small areas of prooflike mirroring. Census: 22 in 50, 70 finer (7/17). NGC ID# 2667, PCGS# 8700

- 4924 1883-S MS61 NGC.** Despite numerous abrasions, this example has appeal thanks to a full strike and attractive orange-gold color. The fields were at one time semiprooflike before rough transport and handling compromised the surfaces. The 1883-S is conditionally rare above MS61. Census: 21 in 61, 14 finer (7/17). NGC ID# 2669, PCGS# 8702

- 4925 1883-S MS62 PCGS.** Rich orange patina enhances the eye appeal of this highly lustrous yellow-gold Liberty eagle. The 1883-S had a mintage of only 38,000 coins, the second lowest of any S-Mint issue struck from 1878 through the end of the gold eagle era in 1930. This lovely example has a few moderate marks but exhibits lovely pinkish-gold color. Population: 18 in 62, 7 finer (8/17). NGC ID# 2669, PCGS# 8702

- 4926 1891-CC AU58 PCGS. Variety 1-A.** Moderate luster remains in the fields of this near-Mint 1891-CC ten, complementing sharp design elements that have only a trace of high-point friction. Straw-gold coloration is original. Scattered abrasions are not unusual for the grade. NGC ID# 266U, PCGS# 8720

- 4927 1891-CC AU58 PCGS. CAC. Variety 2-B.** This is a somewhat more available Carson City issue, struck to the extent of 103,732 coins. Original examples with CAC approval are quite scarce, though. Remaining luster cartwheels over boldly struck surfaces with minimal marks. Varying shades of straw and khaki-gold provide color. NGC ID# 266U, PCGS# 8720

- 4928 1892-CC Tripled Die Reverse, FS-801, AU55 NGC. Variety 1-A.** The motto on the reverse is die tripled, as always seen on 1892-CC eagles. This particular Choice AU offering remains surprisingly lustrous. Strike detail is well-defined with areas of minor softness, as usual. Each side features scattered marks, but the overall appeal is undeniable. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

**1892-CC Ten Dollar, AU58  
Substantial Luster Remains**

**4929 1892-CC Tripled Die Reverse, FS-801, AU58 NGC. Variety 1-A.** IN GOD WE TRUST is die tripled as always. The 89 in the date are repunched under the upper loops, identifying this obverse variety. The 1892-CC ten is occasionally available in AU grades but is scarce in Mint State. This near-Mint example displays almost full luster and has excellent sharpness. Some light handling marks on Liberty's cheek accompany the grade. NGC has seen 34 finer submissions (7/17). NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

**4930 1893-CC AU50 PCGS. Variety 1-A.** A well-detailed example with bright orange-gold coloration and some luster remaining in the fields. Light surface chatter accompanies the grade. The 1893-CC is the final gold eagle from the Carson City Mint and is in high demand in the upper grade levels. Only 14,000 pieces were struck. NGC ID# 2672, PCGS# 8726

**4931 1894 MS64 PCGS.** This P-mint issue, like its immediate predecessor, was widely exported and repatriated to and from Europe, where many coins were subject to rough handling. Scattered marks over rose-gold surfaces are fewer than typically seen. Well-struck with spidery die cracks around the reverse. A single Gem is finer at PCGS (8/17). NGC ID# 2675, PCGS# 8729

**1899 Ten Dollar, MS65+  
Approaches the Finest Known Coins**

**4932 1899 MS65+ PCGS.** With a production total of 1.2 million coins, the 1899 ranks as one of the more accessible Liberty Head eagles in mint condition. Gems, however, are very scarce, and anything finer is effectively beyond the reach of most collectors. This MS65+ ten dollar gold piece approaches the finest known representatives, with deep reddish-gold surfaces and pinpoint detail throughout. A couple of microscopic ticks and nicks are of no consequence. PCGS records merely six finer submissions (7/17). NGC ID# 267J, PCGS# 8742

**4933 1901 MS65 NGC.** Cartwheel mint luster radiates from the well-preserved orange-gold surfaces of this impressive Gem, with sharply detailed design elements and outstanding eye appeal. NGC has graded 61 numerically finer examples (8/17). NGC ID# 7LHF, PCGS# 8747

**4934 1901-S MS64+ PCGS.** Razor-sharp strike definition and uninhibited, rolling mint frost are hallmarks of this near-Gem eagle. Gorgeous, minimally abraded surfaces are mostly yellow-gold in hue with rose and lilac accents. The 1901-S is a famously available issue from a mintage of 2.8 million coins. NGC ID# 267S, PCGS# 8749

**4935 1901-S MS64+ NGC.** The upper stars are a bit soft, but detail is crisp everywhere else. Frosty luster cartwheels around deep orange-gold surfaces that exhibit few marks for the grade. Lovely type coin. NGC ID# 267S, PCGS# 8749

**4936 1901-S MS65 NGC.** The design elements of this impressive Gem are well-detailed and a faint die crack is evident through the tops of the letters in UNITED and the eagle's wing. The well-preserved orange-gold surfaces radiate vibrant mint luster. NGC ID# 267S, PCGS# 8749

**1901-S Liberty Eagle, MS65+  
Excellent Type Coin**

**4937 1901-S MS65+ PCGS.** The 1901-S Liberty eagle claims a truly large mintage of 2.8 million pieces, making it a plentiful issue and a prime choice of type collectors. This Plus-graded Gem offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is terrific. NGC ID# 267S, PCGS# 8749

**4938 1903-O MS63 NGC. Variety 3.** A relatively common O-mint ten, but one that gets progressively more difficult above MS62. This MS63 shows original surfaces with excellent mint luster. Deep, even reddish-gold color.  
*From The Morgan Hill Collection.* NGC ID# 267W, PCGS# 8753

**1903-S Liberty Eagle, MS65+  
Elusive in High Grades**

**4939 1903-S MS65+ NGC.** A sharply detailed Gem, this San Francisco Mint Liberty eagle is an important condition rarity that is seldom seen in Gem or finer grades. This piece is highly lustrous and sharply defined with pristine light yellow surfaces and minimal copper toning splashes. Only two of the 74 NGC MS65 examples have earned the Plus designation (8/17). NGC ID# 267X, PCGS# 8754

**4940 1904-O MS63 PCGS. Variety 1.** Doug Winter explains that the 1904-O ten dollar "has better eye appeal than most New Orleans eagles of the With Motto type. The typical piece is well struck and lustrous with decent color." This is a lustrous rose-gold example with mostly complete star radials and crisp feathers. Grazes and bagmarks are unimportant. NGC ID# 7LHK, PCGS# 8756

**4941 1905 MS64 PCGS.** This impressive Choice specimen exhibits well-detailed design elements, with slightly subdued mint luster, and pleasing orange-gold surfaces that show a few scattered, minor contact marks. PCGS has graded 31 numerically finer examples (8/17). NGC ID# 7LD3, PCGS# 8757

## INDIAN EAGLES

**4942** 1907 No Motto MS62 NGC. Softness of strike on the hair strands, eagle's shoulder, and talons is typical of the 1907 No Motto ten dollar. Glimmering luster radiates from lightly abraded wheat-gold surfaces. Ideal for type. NGC ID# 28GF, PCGS# 8852

**4943** 1907 No Motto MS62 PCGS. CAC. This No Motto Indian eagle type coin is fully struck and displays original straw-gold luster and a vibrant cartwheel effect. Moderate abrasions on each side limit the grade, although none are individually distracting.  
*From The Morgan Hill Collection.* NGC ID# 28GF, PCGS# 8852

**4944** 1907 No Motto MS63 PCGS. A sharp No Motto type coin with satiny yellow-gold luster and luminous surfaces. Curved abrasions in the left obverse field limit the grade. The reverse alone appears almost a grade point finer. NGC ID# 28GF, PCGS# 8852

**4945** 1908-D No Motto MS61 NGC. The 1908-D No Motto ten is the most elusive of the three regular No Motto issues in high grades. Uncirculated examples are typically in MS61 or MS62. This mint representative is typically struck with peach-gold color and soft, glimmering luster. Marks are far less obtrusive than expected. NGC ID# 28GH, PCGS# 8854

**4946** 1908-S AU55 NGC. All 1908-S tens feature the motto IN GOD WE TRUST. Only 59,850 pieces were struck, and high-end AU coins are highly collectible. This Choice AU example displays good detail and partially lustrous surfaces. Hints of reddish patina appear throughout the olive-gold surfaces. NGC ID# 28GL, PCGS# 8861

**4947** 1910-D MS64 NGC. This sharp near-Gem 1910-D Indian eagle displays remarkably few abrasions and has rich, satiny mint luster over wheat-gold surfaces. A modest cartwheel effect is pleasing to the eye. In MS64, the 1910-D is usually available, but finer coins will be more challenging for the average collector to acquire.  
*From The Morgan Hill Collection.* NGC ID# 28GS, PCGS# 8866

**4948** 1910-S MS62 PCGS. An impressive MS62 example, from a substantial mintage of 811,000 pieces, this coin offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 268D, PCGS# 8867

### 1911-D Ten Dollar, AU58+ Virtually Indiscernible Friction

**4949** 1911-D AU58+ PCGS. CAC. The Denver Mint let Saint-Gaudens eagle output fall to 30,100 coins in 1911. Just like its quarter eagle brother, this ten dollar issue is a respected key in its series. PCGS apparently saw the faintest trace of friction, limiting the grade to AU58+. CAC clearly believed the coin was high-end for that assessment, as do we. Textured orange-gold surfaces are satiny and minimally abraded. A dark spot occurs under the tailfeathers. The coin is impressively well-struck.  
*From The Morgan Hill Collection.* NGC ID# 28GU, PCGS# 8869

**4950** 1913-S AU55 PCGS. A lovely light yellow-gold example of the scarce 1913-S eagle, surviving from a low mintage of only 66,000 coins. This piece shows very slight rub on the high points with trivial marks that are consistent with the grade. NGC ID# 28GZ, PCGS# 8874

### 1913-S Indian Eagle, AU58 Low-Mintage Key

**4951** 1913-S AU58 PCGS. From a small mintage of 66,000 pieces, the 1913-S is one of the most challenging issues of the Indian eagle series. This impressive near-Mint representative shows just a trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces retain traces of original mint luster in sheltered areas. NGC ID# 28GZ, PCGS# 8874

### 1913-S Ten Dollar, AU58 California Mint Semikey

**4952** 1913-S AU58 NGC. Specialists in this series immediately recognize the 1913-S for the key date that it is. Only 66,000 pieces were struck, among the lowest totals behind a handful of other issues. Examples generally saw circulation, and Uncirculated representatives are very scarcely seen. Textured green-gold surfaces are partly lustrous. Liberty's hair is a touch soft, as is the eagle's shoulder tip. Reddish accents appear within the protected areas.  
*From The Morgan Hill Collection.* NGC ID# 28GZ, PCGS# 8874

**4953** 1915 MS64 NGC. Lovely cartwheel luster rolls around the satiny tangerine-gold surfaces of this near-Gem 1915 eagle. The strike is a trifle soft on the eagle's shoulder but sharp elsewhere. Liberty's cheek is free of heavy contact marks. Finer 1915 Indian eagles are scarce. NGC ID# 28H5, PCGS# 8878

### 1915-S Indian Eagle, AU55 Low-Mintage Branch Mint Issue

**4954** 1915-S AU55 PCGS. CAC. With a low mintage of 59,000 pieces, the 1915-S Indian eagle is an elusive issue in high grade. This Choice AU specimen exhibits just a touch of wear on the well-detailed design elements and the pleasing orange-gold surfaces retain much of their original mint luster. An appropriate number of grade-consistent abrasions are evident on both sides. NGC ID# 28H6, PCGS# 8879

**4955 1926 MS64 PCGS.** A frosty, luminous near-Gem with original golden luster and sharp design elements. A loupe reveals only a few tiny marks on Liberty's cheek that limit the grade. The 1926 is one of two late-series issues that are popular with type collectors. NGC ID# 28H9, PCGS# 8882

**4956 1926 MS64 PCGS.** Second most frequently encountered ten dollar Indian, this 1926 has remarkably bright mint luster and attractive yellow-gold and rose-gold coloration. Sharply struck and minimally abraded. NGC ID# 28H9, PCGS# 8882

**4957 1932 MS64 NGC.** The most available issue in the series, this near-Gem displays bright mint frost and strong definition on all the devices. Rich, even orange-gold color.

*From The Morgan Hill Collection.* NGC ID# 28HB, PCGS# 8884

**4958 1932 MS64+ PCGS.** Lovely orange-gold and peach luster adorns the frosty surfaces of this high-end near-Gem Indian eagle type coin. The fields are clean, but a few small marks on the Liberty portrait and the eagle prevent a full MS65 designation. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

### 1850 Double Eagle, XF45 Historic Inaugural Issue

**4959 1850 XF45 PCGS.** The 1850 double eagle appeals even to collectors outside of this series. Its numismatic significance and Gold Rush history are universally appreciated. Thankfully, a decent number of survivors are available to satisfy demand. This Choice XF twenty dollar showcases fairly strong central detail and orange-gold color. Small marks inside star 2 identify this coin. NGC ID# 268F, PCGS# 8902

### 1850 Twenty Dollar, AU50 First-Year Type Coin

**4960 1850 AU50 NGC.** The popular 1850 double eagle, with a mintage of 1.17 million pieces, is the first year of the regular issue for the type and denomination. It is one of the more available dates for the type and is usually seen in VF to AU condition. This AU50 example displays bright yellow-gold surfaces with traces of luster in the recessed areas. Sharp definition is visible on the design elements, though portions of Liberty's hair are soft. The usual marks scattered about are not in the least offensive. A nice piece for a first-year type set.

*Ex: Dallas Signature (Heritage, 4/2007), lot 1932; FUN Signature (Heritage, 1/2008), lot 4557.* NGC ID# 268F, PCGS# 8902

**4961 1850 — Altered Surfaces — PCGS Genuine, AU Details.** This yellow-gold first-year double eagle is boldly detailed with only slight high-point wear visible on the devices. Muted luster on each side suggests abrasive cleaning, saltwater etching, or some other surface impairment, which denies a numeric grade. The fields are fairly smooth.

### 1851 Liberty Double Eagle, AU55 Attractive Type One Specimen

**4962 1851 AU55 NGC.** With an ample supply of bullion from the California gold fields, more than 2 million Liberty double eagles were struck at the Philadelphia Mint in 1851. Most of the coins circulated heavily at the time of issue and few have survived in high grade. This impressive Choice AU specimen displays some light wear on the well-detailed design elements and the pleasing orange-gold surfaces are moderately abraded. NGC ID# 268H, PCGS# 8904

**4963 1854/1854 Small Date AU53 NGC.** VP-001, Breen-7167. An interesting variety with the date obviously repunched. About 5% of survivors show repunching, and Winter adds: "It is scarce in all grades and very rare in AU58 and above. It should command a 10-30% premium depending on the grade of the specific coin." This well-defined peach-gold offering maintains glints of luster and should make a fine addition to any set. NGC ID# 268R, PCGS# 8911

**4964 1856-S AU53 NGC.** Only two years after opening, the San Francisco Mint issued nearly 1.2 million double eagles for local circulation in 1856. Luster illuminates the recesses of this lightly circulated red and khaki-gold twenty. Strongly struck for a No Motto coin. NGC ID# 2692, PCGS# 8919

### 1856-S Double Eagle, AU55 Collectible Type One Issue

**4965 1856-S AU55 NGC.** The 1856-S Liberty double eagle was a rare issue in high grade before more than 1,000 well-preserved examples were recovered from the wreck of the S.S. *Central America*. The present coins an attractive Choice AU specimen with lightly worn, well-detailed design elements and orange-gold surfaces that retain traces of original mint luster in sheltered areas. NGC ID# 2692, PCGS# 8919

**1856-S Twenty Dollar, AU55  
Original-Looking Patina**

- 4966** 1856-S AU55 NGC. The S.S. *Central America* recoveries radically changed the availability of both 1856-S and 1857-S double eagles. Most of the seawater finds are resplendent in their own right, although the present Choice About Uncirculated coin may have been a land-based survivor. Original grayish patina gives the medium-orange surfaces the look of aged gold. Five points of wear on the highest hair curls suggests moderate circulation. The strike is otherwise boldly rendered and mint luster glows from sheltered areas.  
*From The Morgan Hill Collection.* NGC ID# 2692, PCGS# 8919

**1856-S Liberty Twenty, AU58  
Exceptional Type Coin**

- 4967** 1856-S AU58 PCGS. Before the era of modern shipwreck finds, the 1856-S Liberty double eagle was almost always found in circulated grades, but more than a thousand examples were recovered from the wreck of the S.S. *Central America* alone, making the 1856-S one of the most available Type One issues in high grade. This attractive near-Mint specimen offers sharply detailed design elements, with just a trace of wear, and lightly abraded orange-gold surfaces that retain much original mint luster. Population: 71 in 58 (1 in 58+), 54 finer (8/17). NGC ID# 2692, PCGS# 8919
- 4968** 1857-S XF40 NGC. Most 1857-S double eagles encountered in the market are Mint State coins recovered from the S.S. *Central America*, but this reddish-gold example clearly circulated out West. Myriad marks are scattered over surfaces that show good detail and faint hints of luster. NGC ID# 2696, PCGS# 8922

**1858-S Twenty Dollar, AU55  
Scarce Type One S-Mint**

- 4969** 1858-S AU55 NGC. Aside from a few recoveries via the S.S. *Republic* (68 pieces), no large hoard of 1858-S twenties has skewed the population figures and it remains a challenging Type One issue. This example is moderately abraded with a short scrape near Liberty's mouth. Rich, medium-gold color bolsters sharp definition on the devices to earn the Choice AU designation from NGC. NGC ID# 2699, PCGS# 8925

- 4970** 1859-S XF45 PCGS. CAC. Ex: Granite Lady Hoard. From a mintage of 636,445 pieces, the 1859-S is an available issue in circulated grades. This Choice XF specimen is lightly worn and lightly abraded, and the orange-gold surfaces retain traces of original mint luster. NGC ID# 269C, PCGS# 8928

- 4971** 1861 AU53 NGC. A popular type-coin issue, boasting a mintage of nearly 3 million pieces. This 1861 double eagle displays sharp detail and partially lustrous fields. The bronze-gold coloration is original. The obverse is moderately abraded. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, AU58  
Nearly Full Mint Luster Remains**

- 4972** 1861 AU58 NGC. The finely grained surfaces typical of 1861 double eagles retain most of their mint luster despite a trace of wear on the hair bun and scattered light chatter in the fields. By far the highest Type One double eagle mintage (nearly 3 million pieces struck), the 1861 was widely hoarded along with other silver and gold coinage upon the outbreak of the Civil War and the contemporaneous decision to stop paying out gold coinage at par in exchange for paper money.  
*From The Morgan Hill Collection.* NGC ID# 269G, PCGS# 8932

- 4973** 1861-S XF40 ANACS. A smoothly worn, yellow-gold example of this mintmarked Type One twenty, with pleasing orange accents confined mostly to the reverse. We note a rim knock at 3 o'clock on the obverse and numerous light lines and tiny abrasions. Housed in an early generation, small ANACS holder. NGC ID# 269K, PCGS# 8935

- 4974** 1861-S XF45 NGC. The San Francisco Mint struck 75% fewer doubles eagles compared to the Philadelphia Mint in 1861. These coins are considerably scarcer in Choice XF condition and higher. Partial luster and medium orange-gold color are hallmarks. Expected blending appears over the motifs, and small abrasions are plentiful. NGC ID# 269K, PCGS# 8935

- 4975** 1861-S — Cleaned — PCGS Genuine. AU Details. This piece is well-detailed with warm wheat-gold coloration and remarkably smooth surfaces. PCGS notes faint hairlines in the fields that indicate an old, light cleaning, although this coin is highly appealing to the unaided eye.

**1863-S Liberty Double Eagle, AU53**

- 4976** 1863-S AU53 NGC. The 1863-S Liberty double eagle was seldom encountered in high grade before approximately 300 relatively well-preserved examples were recovered from recent shipwreck finds. This impressive AU53 example displays still-lustrous pumpkin-orange surfaces with a moderate number of grade consistent abrasions. Some light wear is evident on the well-detailed design elements. NGC ID# 269R, PCGS# 8940

**1865-S Type One Twenty Dollar, AU55**  
**Ex: Granite Lady Hoard, Partly Lustrous**

- 4977** 1865-S AU55 PCGS. Ex: Granite Lady Hoard. Small S. This green and rose-gold double eagle was salvaged from the Second San Francisco Mint rather than one of the shipwrecks that account for the relative high-grade availability of this formerly elusive issue. Strike detail on the obverse is typically soft, strengthening a touch on the reverse. Abrasions and light friction over the high points fail to distract from this partly lustrous Choice AU survivor. NGC ID# 269V, PCGS# 8944

**1865-S Double Eagle, AU58**  
**Frosty and Lustrous**

- 4978** 1865-S AU58 NGC. This Type One San Francisco issue is somewhat scarcer in high grade than one might expect considering its mintage of more than 1 million pieces. The current example displays a sharp strike and virtually full mint luster with just a trace of high-point friction over the central devices. Scattered abrasions are present, but the only individually mentionable mark is a curved graze in the lower-left reverse field. NGC ID# 269V, PCGS# 8944

**1867-S Double Eagle, Choice AU**

- 4979** 1867-S AU55 PCGS. Large S. Peach-gold color dominates the borders and motifs of this partly lustrous Choice AU Type Two twenty. The strike is consistent, and noticeable marks are limited to Liberty's jaw and the field near the profile. Above-average for the issue. Most survivors are in XF to AU grades, and PCGS has yet to certify any examples above the MS62 level. NGC ID# 26A2, PCGS# 8952

**1869-S Twenty Dollar, AU58**  
**Seldom Offered Finer**

- 4980** 1869-S AU58 PCGS. CAC. Uncirculated 1869-S double eagles are scarce and usually come with unsightly abrasions. This CAC-approved near-Mint coin displays moderate luster and sharp detail at a more affordable grade level. Scattered handling marks are not as obtrusive as the bagmarks seen on many Mint State coins. NGC ID# 26A6, PCGS# 8956

- 4981** 1871-S AU58 NGC. Micro S. A butter-gold near-Mint representative. The reverse exhibits cartwheel luster, and obverse luster fills the curls, legends, and border. Minor marks are scattered throughout. A "dash" between the 87 in the date may be a vestige of a prior date impression. NGC ID# 26ND, PCGS# 8962

**1872 Liberty Double Eagle, AU58**  
**Particularly Vibrant Mint Luster**

- 4982** 1872 AU58 PCGS. An attractive near-Mint specimen from a mintage of 251,880 pieces, this coin exhibits especially vibrant mint luster on both sides and the pleasing orange-gold surfaces are lightly abraded, aside from a series of short marks from star 4 to Liberty's nose. The sharply detailed design elements show just the slightest trace of high-point wear. NGC ID# 26AD, PCGS# 8963

**1872 Double Eagle, AU58**  
**Lustrous and Appealing**

- 4983** 1872 AU58 NGC. CAC. Almost full mint luster remains in the fields of this near-Mint Type Two double eagle, illuminating bold design elements and frosty surfaces. Scattered light handling marks and a brush of friction over Liberty's cheek determine the grade but are not obtrusive. Eye appeal exceeds that of many Mint State coins that we have seen. CAC: 30 in 58, 17 finer (7/17). NGC ID# 26AD, PCGS# 8963

**1872-S Twenty Dollar, MS61**  
**Perfect for an Uncirculated Type Set**

- 4984 1872-S MS61 PCGS.** Micro S. A total of 780,000 double eagles were struck at the West Coast branch mint in 1872. Most of them circulated heavily in that part of the country throughout the latter part of the 19th century. Comparable examples are scarce. This lustrous, khaki-gold twenty is well-struck and sure to fit nicely into a carefully assembled Uncirculated set. Population: 77 in 61, 9 finer (7/17). NGC ID# 26AF, PCGS# 8965

**1873 Liberty Double Eagle, MS62**  
**Attractive Open 3 Specimen**

- 4985 1873 Open 3 MS62 PCGS.** The Closed 3 in the date looked too much like an 8, so the Philadelphia Mint switched to the Open 3 motif for double eagle coinage early in 1873. Accordingly, the Open 3 Philadelphia issue is seen more often than its Closed 3 counterpart. This sharply detailed MS62 example displays lightly marked orange-gold surfaces that retain much of their original mint luster. NGC ID# 26AL, PCGS# 8967

- 4986 1873-S Closed 3 MS60 PCGS.** Small Squat S, one of two mintmark sizes known for this popular Type Two issue. Luster rolls across the nicely struck pumpkin-gold surfaces, and although small marks are distributed, none merit singular discussion. NGC ID# 26AL, PCGS# 8969

**1873-S Liberty Twenty, MS61**  
**Closed 3 Variety**

- 4987 1873-S Closed 3 MS61 NGC.** The 1873-S Liberty double eagle with the Closed 3 in the date is more available than its Open 3 counterpart because the San Francisco Mint received the new Open 3 dies later in the production run (the situation is reversed for Philadelphia Mint issues). This well-detailed Mint State specimen exhibits lustrous orange-gold surfaces with the expected number of grade consistent contact marks. NGC ID# 26AL, PCGS# 8969

**1874 Double Eagle, MS61**  
**Green and Rose-Gold Surfaces**

- 4988 1874 MS61 NGC.** Mint State 1874 double eagles are scarce and usually found no higher than MS61 or MS62. Original shades of rose and green-gold blend with frosty luster. Full radial lines are apparent on the stars, and the eagle's feathers are well-delineated. Myriad abrasions are expected of a Type Two double eagle at this grade level. There are only 26 finer grading events at NGC (7/17). NGC ID# 26AN, PCGS# 8970

**1874-S Liberty Twenty, MS62**  
**Small Squat S Variant**

- 4989 1874-S MS62 PCGS.** Small Squat S. At least three different mintmark styles were used on 1874-S twenties. The Block S and Broad S are approximately equal in scarcity, but the present mintmark size is rare for the issue, and likely from a single holdover reverse die. This apricot-gold double eagle has good luster and the expected number of obverse abrasions. None are noticeable aside from a narrow mark between the first two stars. NGC ID# 26AR, PCGS# 8972

- 4990 1875 MS61 NGC.** Mint 1875 double eagles are likely to be found in MS61 and MS62. This peach-gold example appears finer than the grade suggests, namely because of the frosty luster and relatively strong strike that typify each side. Dappled coppery accents appear throughout, as do minor ticks and grazes. NGC ID# 2547, PCGS# 8973

**1875 Liberty Twenty, MS62**  
**Vivid Color, Vibrant Luster**

- 4991 1875 MS62 PCGS.** The 1875 Liberty double eagle is the only collectible gold issue produced at the Philadelphia Mint that year, with a mintage of 295,740 pieces. This impressive MS62 specimen exhibits sharply detailed design elements throughout, with pleasing orange-gold surfaces that show a moderate number of minor contact marks for the grade. Vibrant mint luster adds to the considerable eye appeal. NGC ID# 2547, PCGS# 8973

**1875-CC Twenty, AU50  
Variety 10-C**

**4992 1875-CC AU50 NGC. Variety 10-C.** Both sides of this pleasing Carson City double eagle exhibit scattered grade-consistent marks, with none that stand out singularly. Faint greenish patina resides on the still-lustrous light yellow-gold surfaces of this survivor from a 111,151-coin mintage. NGC ID# 26AT, PCGS# 8974

**4993 1875-S MS61 NGC.** By far, the majority of Mint State 1875-S double eagles survive in MS60 and MS61. Finer examples in MS62 are very scarce, while only a handful of coins are known in MS63 or better. Expectedly abraded and a touch soft, this representative presents warm green and rose-gold hues that blend with swirling mint frost. NGC ID# 26AU, PCGS# 8975

**1875-S Liberty Double Eagle, MS62  
Lustrous, Colorful Example**

**4994 1875-S MS62 PCGS.** Despite the large mintage of 1.2 million pieces, the 1875-S Liberty double eagle is a rare issue in grades above the MS62 level. This impressive MS62 specimen exhibits well-detailed design elements and lustrous orange-gold surfaces with the expected number of minor contact marks for the grade. An extensive network of die cracks travels through the stars on the left. PCGS has graded 24 numerically finer examples (7/17). NGC ID# 26AU, PCGS# 8975

**1876 Liberty Twenty, MS62  
Final Type Two Issue**

**4995 1876 MS62 PCGS.** The 1876 Liberty double eagle is one of the more available Type Two issues and is especially popular with type collectors. The present coin is an attractive MS62 specimen, with sharply detailed design elements and orange-gold surfaces that show a moderate number of minor contact marks and luster grazes. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26AV, PCGS# 8976

**1876-CC Double Eagle, XF40  
Type Two Carson City Issue**

**4996 1876-CC XF40 PCGS. Variety 7-C.** The 1876-CC, like the 1875-CC before it, is a sought-after date to represent the Carson City type. It has a relatively generous mintage for the facility (138,441 coins), many of which are available on the market. This circulated XF survivor has peach-gold color and scattered ticks, reeding marks, and thin scratches that are all grade-acceptable. A strong strike is evident despite merging. NGC ID# 26AW, PCGS# 8977

**1876-CC Twenty, AU Details**

**4997 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 2-C.** A well-defined example of the centennial Carson City double eagle issue. Lightly worn with uniform yellow-gold luster from a past cleaning, and a pair of reed marks appear on Liberty's lower cheek. Even though cleaned, the fields show remnants of original die polish in the fields.

*Ex: Stamford Coinfest (Heritage, 10/2010), lot 5022.*

**4998 1876-S MS61 NGC.** The Type Two design was replaced in 1877, making this the final year with TWENTY D. as the denomination. Each side is remarkably lustrous with thick mint frost over surfaces that exhibit pale yellow-gold color and glints of rose. A somewhat incomplete strike and peppered abrasions do not diminish the overall appeal. NGC ID# 26AX, PCGS# 8978

**4999 1876-S MS62 NGC.** This West Coast branch mint issue is more available than the two that precede it. Examples are obtainable through MS62 without too much difficulty, though the same cannot be said for finer representatives. This brilliant Type Two twenty showcases vibrant luster over lightly abraded yellow-gold surfaces. Strong stars and feathers. NGC ID# 26AX, PCGS# 8978

**1877-S Liberty Twenty, MS62  
Vibrant Mint Luster Throughout**

**5000 1877-S MS62 PCGS.** Despite a truly large mintage of more than 1.7 million pieces, the 1877-S Liberty double eagle is seldom encountered in grades above the MS62 level. This attractive MS62 specimen offers well-detailed design elements and lustrous apricot-gold surfaces on both sides. Some minor chatter on Liberty's cheek and the left obverse field define the grade. PCGS has graded 35 numerically finer examples (7/17). NGC ID# 254B, PCGS# 8984

**1878 Liberty Double Eagle, MS62  
Attractive Type Three Specimen**

**5001 1878 MS62 NGC.** The 1878 Liberty double eagle is a plentiful Type Three issue in lower grades, but it becomes very scarce above the MS62 level. This impressive MS62 example exhibits sharply detailed design elements and lustrous orange-gold surfaces that show a scattering of grade-consistent contact marks on both sides. NGC has graded 36 numerically finer examples (7/17). NGC ID# 26B3, PCGS# 8985

**5002 1879 MS60 PCGS.** A moderately abraded example but with original olive-gold luster and sharp design elements. The 1879 double eagle is scarce in Mint State, and the present coin is an affordable entry into the unworn grade category. NGC ID# 26B6, PCGS# 8988

**5003 1880 AU55 PCGS.** Wheat-gold and reddish color is rich and blatantly original over still-lustrous, lightly abraded surfaces. Strike detail is good, if slightly incomplete over the high points. The 1880 is exceedingly scarce in Choice AU condition, let alone higher grades. NGC ID# 26BA, PCGS# 8992

**5004 1883-S MS62 PCGS.** The stars are well-raised with bold radial lines. Liberty's curls and the eagle's feathers are similarly strong. Abrasions are seen on each side, but they are slightly more prominent on the reverse of this rose-gold offering with characteristic frosty luster. NGC ID# 26BJ, PCGS# 9000

**1883-S Liberty Twenty, MS62+  
Pleasing Lustrous Surfaces**

**5005 1883-S MS62+ NGC.** The 1883-S Liberty double eagle was produced in large quantities, but the issue circulated heavily in both domestic and foreign trade, and few examples were preserved for numismatic purposes. This Plus-graded MS62 specimen is an attractive survivor, with sharply detailed design elements and lightly marked orange-gold surfaces. Vibrant mint luster enhances the considerable eye appeal. NGC ID# 26BJ, PCGS# 9000

**1884-CC Liberty Double Eagle, AU50  
Pleasing Original Surfaces**

**5006 1884-CC AU50 PCGS.** A lightly worn AU example of this popular branch mint Type Three double eagle, with completely original orange-gold surfaces that show a moderate number of minor abrasions and luster grazes on both sides. The mint luster is somewhat dimmed and there is a minor rim ding at 4 o'clock on the reverse. NGC ID# 26BK, PCGS# 9001

**1884-CC Liberty Double Eagle, AU53**

**5007 1884-CC AU53 NGC. Variety 1-A.** The 1884-CC Liberty double eagle is a reasonably available Type Three issue from a mintage of 81,139 pieces. The present coin is an impressive AU53 specimen, with just a touch of wear on the well-detailed design elements. The completely original orange-gold surfaces are lightly abraded, aside from a couple of scratches in the lower left obverse field. The overall presentation is quite attractive. NGC ID# 26BK, PCGS# 9001

---

**1884-S Liberty Twenty, MS63**  
**Difficult to Locate Any Finer**

- 5008 1884-S MS63 PCGS.** This impressive Select specimen exhibits sharply detailed design elements in most areas, but some incompleteness is evident on the eagle's tail feathers, due to lapping. The orange-gold surfaces show some scattered, minor contact marks and vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 28 numerically finer examples (7/17). NGC ID# 26BL, PCGS# 9002

---

**1887-S Double Eagle, MS62**  
**Above-Average Strike**

- 5009 1887-S MS62 PCGS.** The yellow-gold surfaces display full, frosted mint luster. The design elements are better impressed than ordinarily seen on this issue, especially Liberty's hair strands and the star centers that are often weak. Unobtrusive grazes limit the grade. PCGS has seen fewer than 80 pieces finer (7/17). NGC ID# 26BS, PCGS# 9007

---

**1889 Liberty Double Eagle, MS62**  
**Low-Mintage Philadelphia Issue**

- 5010 1889 MS62 PCGS.** Only 44,070 Liberty double eagles were struck at the Philadelphia Mint in 1889 and the issue is somewhat scarce at the MS62 grade level. This well-detailed MS62 representative offers vivid orange-gold surfaces, with vibrant mint luster and some scattered, minor contact marks on both sides. PCGS has graded 31 numerically finer examples (7/17). NGC ID# 2695, PCGS# 9010

---

**1889-S Liberty Twenty, MS63**  
**Very Scarce in Finer Grades**

- 5011 1889-S MS63 PCGS.** A substantial production of 774,700 Liberty double eagles was accomplished at the San Francisco Mint in 1889, but few specimens were saved for numismatic purposes, making the issue quite elusive in high grade today. This sharply detailed Select example exhibits lustrous orange-gold surfaces with a scattering of minor contact marks on each side. PCGS has graded 84 numerically finer examples (7/17). NGC ID# 26BW, PCGS# 9012

- 5012 1890-CC — Improperly Cleaned — NCS. XF Details. Variety 1-A.** The usual late die state, showing the eagle's tailfeathers partially effaced by die lapping. This collectible Carson City double eagle is sharply detailed for the XF grade level with bright yellow-gold coloration. Scattered hairlines denote an old cleaning. NGC ID# 26BY, PCGS# 9014

---

**1892-CC Liberty Double Eagle, AU55**  
**Attractive CC-Mint Type Coin**

- 5013 1892-CC AU55 PCGS. CAC.** The 1892-CC Liberty double eagle is more available than its mintage of 27,265 pieces would suggest, due to some hoards that surfaced in the late 1990s. This impressive Choice AU specimen shows a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26C6, PCGS# 9020

---

**1892-S Double Eagle, MS63+**  
**Original, Frosty Luster**

- 5014 1892-S MS63+ PCGS.** The 1892-S double eagle is generally available in Mint State, but the population declines rapidly above MS63. This Plus-designated Select example displays original, frosty mint luster with warm peach and rose-gold hues. The design elements are sharply rendered. A few light marks on the cheek are all that limit the grade. NGC ID# 26C7, PCGS# 9021

- 5015 1893 MS63 PCGS.** The 1893 Liberty Head double eagle enjoys a mintage of 344,280 coins and is plentiful though MS63. Near-Gems are far more elusive. This strong Select Uncirculated twenty has fewer marks than expected over frosty peach-gold surfaces. Highly appealing. NGC ID# 26C8, PCGS# 9022

**1894 Liberty Double Eagle, MS64  
Surprisingly Elusive in High Grade**

- 5016 1894 MS64 PCGS.** The Philadelphia Mint achieved a substantial mintage of 1.3 million Liberty double eagles in 1894, but few high-quality examples were saved by contemporary collectors, making the issue a prime condition rarity in grades above the MS64 level. This sharply detailed Choice specimen displays lustrous orange-gold surfaces with a few minor contact marks on Liberty's cheek. PCGS has graded three numerically finer examples (7/17). NGC ID# 26CB, PCGS# 9025

**1894 Liberty Twenty, MS64  
Very Rare in Higher Grades**

- 5017 1894 MS64 NGC.** Despite the large reported mintage of more than 1.3 million pieces, the 1894 Liberty double eagle is an elusive issue at the MS64 grade level, and finer coins are very rare. This sharply detailed Choice representative offers well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC has graded eight numerically finer examples (7/17). NGC ID# 26CB, PCGS# 9025

- 5018 1894-S MS63 PCGS.** Select Uncirculated condition is the highest grade for which the 1894-S remains fairly plentiful. Examples in MS64 are very scarce, and Gems are extremely rare. This orange-gold coin with frosty luster displays crisp detail on the curls, upper stars, and wings. Minor grazes and ticks are noted. NGC ID# 26CC, PCGS# 9026

**1894-S Double Eagle, MS64  
Frosty, Luminous Surfaces  
Only Three Pieces Finer at PCGS**

- 5019 1894-S MS64 PCGS.** The availability of the 1894-S double eagle declines sharply in MS64, and only a handful of finer coins are known. This near-Gem is frosty and original with wheat-gold luster that glows beneath a light and shimmers when rotated. Neither side shows distracting abrasions, although we note some small contact marks around the mintmark on the reverse. PCGS has seen only three numerically finer representatives (7/17). NGC ID# 26CC, PCGS# 9026

**1894-S Liberty Twenty, MS64  
Rarely Seen Finer**

- 5020 1894-S MS64 NGC.** The 1894-S Liberty double eagle claims a substantial mintage of more than 1 million pieces, but the issue is scarce in MS64 condition, and finer examples are very rare. This impressive Choice specimen exhibits sharply detailed design elements and lustrous peach-gold surfaces, with only minor signs of contact. Census: 89 in 64 (2 in 64+), 8 finer (7/17). NGC ID# 26CC, PCGS# 9026

- 5021 1895 MS64 PCGS.** Orange and rose-gold are the dominant colors, but complementary green accents are an added bonus. A nearly complete strike and coruscating luster further the appeal. The Philadelphia Mint was responsible for the production of 1.1 million double eagles in 1895, only five examples of which reside in higher-graded PCGS holders (8/17). NGC ID# 26CD, PCGS# 9027

- 5022 1896 MS62 Prooflike NGC. CAC.** This issue enjoys a smaller mintage than its S-mint counterpart (792,535 coins). Prooflike examples are very rare. Orange-gold colors each side, featuring marked reflectivity that explains the designation. Fully struck with a number of scattered bagmarks. Census: 8 in 62 (1 in 62+) Prooflike, 1 finer (7/17). NGC ID# 26CF, PCGS# 79029

- 5023 1897-S MS64 PCGS.** The 1897-S was produced with great care, as evidenced by the typically bold impression seen here. The issue is offered regularly in MS64, but finer coins are very rare. A blend of rose and sun-gold color graces each side, as does uninhibited mint frost. There are 14 finer submissions at PCGS (8/17). NGC ID# 26CJ, PCGS# 9032

**1901 Double Eagle, MS65**  
**Only Four Finer Coins Certified**

- 5024 1901 MS65 NGC.** Full star radials on each side, and strongly delineated curls and feathers define this Gem Uncirculated twenty dollar gold piece. Frosty luster washes over clean surfaces with accents of reddish color that complement the orange-gold overall hue. The 1901 is scarce in MS65, and there are only four finer examples at both services combined — all of them at PCGS (7/17). NGC ID# 26CS, PCGS# 9039

- 5025 1903 MS64+ PCGS.** Near-Gem examples of the 1903 double eagle are certified by the thousands, but only a small group has earned a Plus designation at that level and few are finer. Medium yellow-gold color and swirling luster over each side produce great eye appeal. Razor-sharp. NGC ID# 26CW, PCGS# 9043

- 5026 1903 MS64+ PCGS. CAC.** The 1904 Liberty Head double eagle is best-suited for type purposes, but the 1903 is not too far behind. Even Gems are available. This high-end near-Gem radiates frosty luster from warm yellow-gold surfaces. Fully struck with minor marks. NGC ID# 26CW, PCGS# 9043

**1903-S Liberty Twenty, MS64**  
**Vivid Color, Vibrant Luster**

- 5027 1903-S MS64 PCGS.** From a mintage of 954,000 pieces, the 1903-S Liberty double eagle can be found in grades up to the MS64 level with a little patience, but finer examples are rare. This impressive Choice specimen exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. PCGS has graded 16 numerically finer examples (7/17). NGC ID# 26CX, PCGS# 9044

- 5028 1904 MS62 Prooflike NGC.** An elusive Prooflike example of this otherwise plentiful Liberty double eagle issue, an outstanding type coin or date candidate. The strike is bold and the fields are deeply reflective. Scattered light marks are relatively minor for the grade, save for a lone reed mark below Liberty's eye. NGC ID# 26CY, PCGS# 79045

**1904-S Double Eagle, MS65**  
**Popular S-Mint Type Issue**

- 5029 1904-S MS65 PCGS.** The double eagles struck in Philadelphia and San Francisco in 1904 had higher mintages than any other issues of the Liberty design struck from 1850 to 1907. For that reason, these double eagles are quintessential type coins. This Gem features a bold strike and satiny light yellow luster with excellent eye appeal. PCGS has only certified seven numerically finer examples (8/17). NGC ID# 26CZ, PCGS# 9046

**1905-S Twenty Dollar, MS64**  
**Dazzling Cartwheel Luster**

- 5030 1905-S MS64 NGC.** Well-struck with dazzling cartwheel luster and rich, subtly variegated rose-gold and mint-green coloration. Small abrasions are noticeable on both sides, but they are entirely in line with the assigned grade level. A red-orange alloy spot is noted adjacent to the N in UNUM. The 1905-S is a scarce issue that was overlooked for many years. NGC shows nine finer submissions (7/17). NGC ID# 26D3, PCGS# 9048

**1906 Liberty Double Eagle, MS62**  
**Underrated Low-Mintage Issue**

- 5031 1906 MS62 PCGS.** The 1906 Liberty double eagle claims a small mintage of 69,500 pieces, making it a better date in the late series. This attractive MS62 example offers sharply detailed design elements and vivid orange-gold surfaces that show a scattering of minor contact marks on both sides. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 26D4, PCGS# 9049

---

**1906-D Liberty Twenty, MS63  
Popular First-Year Issue**

- 5032 1906-D MS63 PCGS.** The Denver Mint began coinage operations in 1906 and a respectable mintage of 620,250 Liberty double eagles was accomplished. This attractive Select specimen displays lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26D5, PCGS# 9050

---

**1907-D Twenty Dollar, Honey-Gold MS63**

- 5033 1907-D MS63 NGC.** The Denver Mint was responsible for the production of 842,250 double eagles in 1907, its second year of operation. This is a splendid Select Uncirculated example with satiny luster over smooth, honey-gold surfaces. Razor-sharp with merely a few microscopic marks on the cheek. NGC ID# 26D8, PCGS# 9053

---

**SAINT-GAUDENS DOUBLE EAGLES**

- 5034 1907 Arabic Numerals MS64 PCGS.** The columns on the Capitol dome are sharp as can be. Strike is just a bit soft on the torch hand and visage. Small scattered marks over yellow-gold surfaces explain the grade for this first-year representative. Radiant luster. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Double Eagle, MS65  
First-Year, Arabic Numerals Issue**

- 5035 1907 Arabic Numerals MS65 PCGS.** The 1907 Saint-Gaudens double eagle represents the first year of this incredibly popular design and the Arabic Numerals issue was the first version seen by the general public. This delightful Gem exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. *From The Morgan Hill Collection.* NGC ID# 26F5, PCGS# 9141

- 5036 1908 No Motto MS66 NGC.** This well-struck Premium Gem No Motto type coin displays vibrant, frosty yellow-gold luster with no distracting abrasions. The fields are particularly clean. The availability of this issue in high grade is largely due to the Wells Fargo Hoard, from which came approximately 19,000 examples, many in remarkable condition. NGC ID# 26F6, PCGS# 9142

- 5037 1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** Ex: Wells Fargo Nevada Gold. Thousands upon thousands of 1908 No Motto double eagles turned up in the mid-1990s as part of the Wells Fargo Hoard. Many of them were in MS66, with a handful reaching as high as MS69. This vibrant Premium Gem is seemingly flawless and razor-sharp everywhere except Liberty's face. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 5038 1908-D No Motto MS64 NGC.** Short Rays Obverse, only seen on No Motto examples of the 1908-D. Detail is strong on the Capitol, sandal, and feathers. Each side has satiny mint luster that rolls over lightly marked peach-gold surfaces. The certified population drops dramatically in higher grades. NGC ID# 26F7, PCGS# 9143

- 5039 1908 Motto MS63+ PCGS.** Scarcer of the two P-mint 1908 issues, the surfaces display bright mint luster and only small abrasions on each side. Attractive color with a slight reddish tint. *From The Morgan Hill Collection.* NGC ID# BNAK, PCGS# 9147

---

**1908-D Saint-Gaudens Twenty, MS64  
First Year With Motto**

- 5040 1908-D Motto MS64 PCGS.** The motto IN GOD WE TRUST was added to the double eagle design in 1908, an important consideration for type purposes. This impressive Choice specimen from the Denver Mint offers sharply detailed design elements and lustrous orange-gold surfaces that show few signs of contact. Housed in a green label holder. NGC ID# 26F9, PCGS# 9148

---

**1908-D With Motto Twenty, MS64+  
Particularly Nice for the Grade**

- 5041 1908-D Motto MS64+ PCGS.** This high-end near-Gem displays the usual satiny yellow-gold luster of the With Motto 1908-D double eagle, with clean fields and boldly struck design elements. Grade-limiting abrasions are remarkably faint for the grade, and this piece might have garnered a full MS65 designation were the luster slightly more vibrant. As it stands, this is one of the finest 1908-D With Motto double eagles that we have seen in grades below MS65. NGC ID# 26F9, PCGS# 9148

---

**1909/8 Saint-Gaudens Twenty, MS62+  
Only Overdate of the Series**

- 5042 1909/8 FS-301 MS62+ PCGS.** The 1909/8 Saint-Gaudens double eagle is the only overdate in this incredibly popular series and is mentioned in both *Cherrypickers* and the *Guide Book*. This Plus-graded MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces with some scattered, minor contact marks on both sides.

**From The Morgan Hill Collection.** NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

- 5043 1910-D MS65 NGC.** Bright, satiny mint luster covers surfaces that are finely granular, as seen on most double eagles from this decade. Sharply struck with rich reddish patina.

**From The Morgan Hill Collection.** NGC ID# 26FG, PCGS# 9155

---

**1910-S Twenty Dollar, MS64+  
Frosty Original Luster**

- 5044 1910-S MS64+ PCGS. CAC.** A better date at the Gem level, the 1910-S Saint-Gaudens double eagle is also collectible in Choice condition. This Plus-graded CAC coin offers a bold strike and frosty green-gold mint luster. Faint grazes here and there limit the grade, but none are noticed by the naked eye. CAC: 82 in 64, 7 finer (7/17). NGC ID# 26FH, PCGS# 9156

- 5045 1911 MS63 NGC.** This attractive Select specimen offers well-detailed design elements and vivid orange-gold surfaces that show a scattering of minor contact marks and vibrant mint luster on both sides. From a mintage of 197,200 pieces. NGC ID# 26FK, PCGS# 9157

- 5046 1911 MS63 NGC.** The lovely patina of this Select Mint State example is composed of peach, mint-green, lavender, and yellow-gold hues. The strike is particularly sharp, and a strong cartwheel effect is easily produced by rotating the coin beneath a light. Scattered abrasions determine the grade.

**From The Morgan Hill Collection.** NGC ID# 26FK, PCGS# 9157

---

**1911 Saint-Gaudens Double Eagle, MS64**

- 5047 1911 MS64 PCGS.** From a mintage of 197,250 pieces, the 1911 Saint-Gaudens double eagle is very scarce in grades above the MS64 level. This attractive Choice example displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster and outstanding eye appeal. PCGS has graded 70 numerically finer examples (7/17). NGC ID# 26FK, PCGS# 9157

- 5048 1911-D MS65+ PCGS.** This is a radiant Denver double eagle with strongly defined facial features, torch hand fingers, and sandals. Close scrutiny fails to yield any singular abrasions, as expected given the high-end Gem assessment. Excellent for type representation. NGC ID# 26FK, PCGS# 9158

---

**1912 Double Eagle, MS64  
Only Issue of the Year**

- 5049 1912 MS64 PCGS.** Only the Philadelphia Mint struck double eagles in 1912, making an example of this issue essential for a complete date set. Choice examples are usually the finest obtainable, as Gems are scarce and expensive. This near-Gem displays a bold strike and satiny wheat-gold luster. A few light marks define the grade. NGC ID# 26FM, PCGS# 9160

---

**1912 Saint-Gaudens Twenty, MS64  
Elusive Issue in Higher Grades**

- 5050 1912 MS64 PCGS.** From a smallish mintage of 149,700 pieces, the 1912 Saint-Gaudens double eagle is a very scarce issue in grades above the MS64 level. This impressive Choice specimen offers sharply detailed design elements and lustrous orange-gold surfaces. Only minor signs of contact are evident. PCGS has graded 51 numerically finer examples (7/17).

**From The Morgan Hill Collection.** NGC ID# 26FM, PCGS# 9160

**5051 1913 MS63 PCGS.** Numerous shades of gold illuminate the satiny surfaces of this Select example, while scattered light abrasions determine the grade from PCGS. Bold design elements are a hallmark of this coin. The 1913 double eagle is a better date in Uncirculated condition, particularly above MS63.  
*From The Morgan Hill Collection.* NGC ID# 26FN, PCGS# 9161

**5052 1913-D MS64 PCGS.** Bright, satiny mint luster and even orange-gold color characterize this near-Gem. Just a bit softly struck.  
*From The Morgan Hill Collection.* NGC ID# 26FP, PCGS# 9162

**5053 1913-D MS64 NGC.** Rich, even reddish patina cover each side of this surprisingly lustrous Choice twenty. The strike details are strong and there are no obvious or detracting marks. NGC ID# 26FP, PCGS# 9162

---

**1915 Double Eagle, MS64  
Conditionally Elusive**

**5054 1915 MS64 PCGS.** The 1915 Saint-Gaudens double eagle is a low-mintage condition rarity that is elusive in higher Mint State grades. PCGS has only certified 53 numerically finer examples (8/17). This Choice Mint State representative has a bold strike and frosty yellow luster with minimally marked surfaces.  
*From The Morgan Hill Collection.* NGC ID# 26FV, PCGS# 9167

---

**1916-S Saint-Gaudens Double Eagle, MS65  
Excellent Branch Mint Type Coin**

**5055 1916-S MS65 NGC.** The 1916-S Saint-Gaudens double eagle was produced in large numbers and the issue surfaced in several hoards in the 1970s and 1980s, making it reasonably available today and a popular branch mint type coin. This impressive Gem offers sharply detailed design elements and the well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 34NJ, PCGS# 9169

---

**1916-S Double Eagle, Lustrous MS65**

**5056 1916-S MS65 PCGS.** Rich orange-gold mint luster gives this Gem 1916-S twenty excellent eye appeal. The strike is sharp on Liberty's fingers and the torch, and no severe abrasions are observed. Finer examples of this issue will be difficult to acquire on a budget.  
*From The Morgan Hill Collection.* NGC ID# 34NJ, PCGS# 9169

---

**1920 Saint-Gaudens Double Eagle, MS64  
Very Rare in Finer Grades**

**5057 1920 MS64 PCGS.** From a mintage of 228,250 pieces, the 1920 Saint-Gaudens double eagle is a prime condition rarity in grades above the MS64 level. This attractive Choice example displays well-detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. PCGS has graded one numerically finer example (7/17).  
*From The Morgan Hill Collection.* NGC ID# 26FY, PCGS# 9170

**5058 1923-D MS66 NGC.** The 1923-D is arguably the best produced issue in the 54 issue series of Saints. The luster on this piece is remarkably bright and satiny with an even reddish hue. Sharply detailed and devoid of any noticeable abrasions. NGC ID# 26G6, PCGS# 9176

---

**1923-D Twenty, MS66 ★  
Only 50 Numerically Finer at NGC**

**5059 1923-D MS66 ★ NGC.** An impressive Premium Gem, this 1923-D represents a plentiful issue from a mintage of 1.7 million double eagles, but few have survived in the top grades. In fact, NGC has only certified 48 in MS66 ★, two in MS66+ ★, and only 50 finer examples from a Census total of nearly 6,000 coins (8/17). The brilliant yellow surfaces of this highly lustrous and sharply detailed piece exhibit wispy bluish overtones. NGC ID# 26G6, PCGS# 9176

- 5060 1925 MS66 PCGS.** Many 1925 double eagles were employed in international transactions. Often, the best-preserved examples are those from South or Central American hoards, where the coins were left untouched in their original bags. Each side is rose-gold with rolling luster. Well-struck. NGC ID# 26GA, PCGS# 9180

**1925 Double Eagle, MS66+  
Exceptional Luster and Preservation**

- 5061 1925 MS66+ NGC.** This high-end 1925 double eagle displays beautiful frosty luster and a bold strike. The preservation is outstanding; only a few light grazes are discernible on the high points of Liberty's figure under magnification. Peach and wheat-gold hues make up the patina, and the eye appeal is outstanding. NGC reports only 25 finer submissions (7/17). NGC ID# 26GA, PCGS# 9180

- 5062 1928 MS65 PCGS.** Bright, flashy mint luster is the hallmark of this common date Saint. The surfaces are yellow-gold with a few tinges of rose interspersed. Sharply defined and showing very few abrasions. NGC ID# 34VK, PCGS# 9189

- 5063 1928 MS66 PCGS.** The 1928 is the last readily collectible double eagle in the Saint-Gaudens series. This Premium Gem type coin displays bold design elements and frosty orange-gold mint luster. A few light marks on Liberty's figure prevent an even finer grade. NGC ID# 34VK, PCGS# 9189

## TERRITORIAL GOLD

- 5064 (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge — Damage — PCGS Genuine. AU Details. K-24, R.3.** Attractive olive-gold coloration complements bold design elements and smooth, satiny surfaces. Numerous shallow kinks in the planchet produce a wavy effect on each side, preventing a numeric grade. Still, a pleasing and collectible A. Bechtler gold dollar.

**(1842-52) A. Bechtler Dollar, Unc Details  
27 G., 21 C., Plain Edge, K-24**

- 5065 (1842-52) A. Bechtler Dollar, 27G., 21C., Plain Edge, K-24, R.3 — Improperly Cleaned — NGC Details. Unc.** August Bechtler took over the family's private coinage business sometime around 1840. The Bechtler gold coinage was widely accepted because of its consistent weight and fineness, and examples could be found in circulation until the Civil War. This sharply detailed gold dollar contained 27 grains of 21 karat gold. The surfaces are lightly marked and no actual wear is evident, but the luster is dimmed by the noted cleaning. Listed on page 393 of the 2018 *Guide Book*.

**1849 Moffat Five Dollar, VF20  
K-4a, Respected Gold Rush Issue**

- 5066 1849 Moffat & Co. Five Dollar VF20 PCGS. K-4a, R.4.** Bavarian goldsmith Albrecht Kuner modeled the Moffat & Co. five dollar gold coins after the federal half eagles of the period, with LIBERTY replaced by MOFFAT & Co. on the coronet and S.M.V. (Standard Mint Value) CALIFORNIA GOLD in place of UNITED STATES OF AMERICA. These coins were an integral circulating medium in the Gold Rush-era West, as evidenced by this well-worn reddish-gold offering. Outlines are bold, but the finer details are mostly indistinct. Listed on page 395 of the 2018 *Guide Book*. NGC ID# ANJ5, PCGS# 10240

**1853 U.S. Assay Office Twenty, AU Details  
900 THOUS., K-18**

- 5067 1853 Assay Office Twenty Dollar, 900 Thous., K-18, R.2 — Obverses Improperly Cleaned — NGC Details. AU.** This variety has the fineness expressed as 900 THOUS. with 900 punched over 880. Remnants of the previous digits are barely visible on this late die state piece. Greenish-gold surfaces exhibit faint hairlines on the obverse from cleaning, but are accented with delicate orange overtones. Listed on page 399 of the 2018 *Guide Book*.

## CALIFORNIA FRACTIONAL GOLD

- 5068 1855/4 Liberty Octagonal 25 Cents, BG-106, R.3, MS66 NGC.** Breen-Gillio Die State II. Portions of Liberty's hair are lapped away, but significant die rust remains. The final 5 in the date is heavily repunched to obscure an underdigit 4. DO in DOLLAR is similarly repunched and joined. A frosted Premium Gem example, among the finest known. NGC ID# 2BGR, PCGS# 10375

- 5069 1855 Liberty Round 50 Cents, BG-406, High R.6, MS61 NGC.** State I. A rare Period One round Liberty half dollar by Frontier, Deviercy & Co. Some duplication in the certified population figures is believed to exist. This MS61 coin displays reflective fields and bold design elements with bright yellow-gold coloration. Faint hairlines in the fields determine the grade. Census: 2 in 61, 5 finer (7/17). NGC ID# 2BJS, PCGS# 10442

**1853 Liberty Octagonal Gold Dollar, MS64  
BG-505, Best Example at PCGS**

**5070** 1853 Liberty Octagonal 1 Dollar, BG-505, R.4, MS64 PCGS. Die State II, with lapping on ORN and GOLD. These Frontier & Deviercy Octagonal gold dollars from Period One saw commercial use, and many survivors are seen in circulated grades. This example ranks among the best-preserved pieces at PCGS. Bright lemon-gold surfaces are noticeable reflective. Typically struck. Population: 2 in 64, 0 finer (8/17). NGC ID# 2BL2, PCGS# 10482

**5071** 1874 Liberty Octagonal 25 Cents, BG-775, High R.6, MS62 NGC. A rare octagonal Liberty Head quarter dollar variety struck by Herman J. Brand of San Francisco. This Uncirculated example is among the finest certified by either NGC or PCGS (8/17). Semireflective surfaces show light handling marks but no major distractions. Olive-gold and peach-orange hues blanket each side. Census: 3 in 62, 0 finer (8/17). NGC ID# 2BPT, PCGS# 10602

**1870 Octagonal 25 Cents, MS66  
BG-789, Goofy Head**

**5072** 1870 Goofy Head Octagonal 25 Cents, BG-789, R.4, MS66 PCGS. Breen-Gillio Die State II. Tied for finest-graded of the distinctive, crudely executed, and anonymous "Goofy Head" octagonal quarter variety. Well-struck, prooflike, and unmarked with original lime-green surfaces. PCGS has certified two representatives in this grade and none finer (8/17). NGC ID# 2BR9, PCGS# 10616

**1870 Octagonal 25 Cents, MS66  
Goofy Head, BG-789**

**5073** 1870 Goofy Head Octagonal 25 Cents, BG-789, R.4, MS66 PCGS. Die State III, with many reverse cracks and a large cud that obliterates much of the upper wreath on the right. This issue is from an unknown maker, probably struck on a drop press. The obverse was struck with the head oriented on a side-to-side axis. The design elements are well-detailed, and the well-preserved orange-gold surfaces are slightly prooflike. Population: 2 in 66, 0 finer (8/17). NGC ID# 2BR9, PCGS# 10616

**5074** 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS63 Deep Prooflike NGC. A fairly plentiful Period Two octagonal quarter dollar struck by Christopher Ferdinand Mohrig of San Francisco. This is the lesser of two Deep Prooflike examples at NGC (8/17). The strike is good, and the yellow-gold fields are deeply mirrored. Both sides display cameo contrast. NGC ID# 2BRB, PCGS# 910618

**5075** 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 PCGS. Although the BG-808 variety is plentiful, Superb Gem examples are elusive, and no finer pieces have been certified by PCGS. This diminutive gold coin has immense eye appeal with brilliant yellow luster. Satiny fields envelop the lustrous devices. NGC ID# 2BSW, PCGS# 10669

**5076** 1872 Washington Round 25 Cents, BG-818, Baker-A504, Musante GW-821, Low R.4, MS64 PCGS. This interesting fractional gold piece is the only round type of any denomination featuring a portrait of Washington. The most recent edition of Musante's reference on *Medallic Washington* lists the issue as rare, rather than very scarce. This is a typically defined yellow-gold example with slight field-device contrast on the obverse. Struck from rotated dies. NGC ID# 2BT9, PCGS# 10679

**5077** 1875 Indian Round 25 Cents, BG-877, High R.5, MS65 NGC. State I. Boldly struck from heavily clashed dies with deeply reflective fields. Straw-gold and peach-orange hues ornately decorate each well-preserved side. BG-877 is a scarce Period Two variety made by Christopher Ferdinand Mohrig of San Francisco. This is numerically the sole finest example graded by NGC (7/17). NGC ID# 2BVC, PCGS# 10738

**1871 Liberty Round Gold Half Dollar  
Rare BG-1042, MS61 Prooflike  
A Leavenworth, Kansas Issue**

**5078** 1871 Liberty Round 50 Cents, BG-1042, High R.7, MS61 Prooflike NGC. An extremely rare Period Two round half dollar by Hershfield & Mitchell of Leavenworth, Kansas. The Breen-Gillio reference records five known examples, and PCGS states: "5 known." NGC and PCGS combined list seven specimens, possibly including resubmissions. This Prooflike coin is one of only two pieces at NGC. The strike is bold and the fields are mirrored with warm straw-gold color. Some stray lines in the fields determine the grade. Census: 2 in 61 Prooflike, 0 finer (7/17). PCGS# 710871

**5079** 1875/3 Indian Round 50 Cents, BG-1058 MS66 Deep Mirror Prooflike NGC. The first feather on the headdress leans forward, and the 5 in the date is large, with the obvious 1875/3 overdate. Denticles touch the 1 and 5. Deep orange-gold surfaces display the profound contrast often found among BG-1058 Round dollars. Struck from rotated dies. NGC ID# 2C29, PCGS# 910887

**COMMEMORATIVE SILVER**

**5080** 1893 Isabella Quarter MS65 PCGS. This is a sharply struck Gem with satiny surfaces and no major abrasions. Champagne-gray, lavender, and sea-green hues decorate each side. The Isabella quarter dollar is a popular classic commemorative type coin in all grades, especially Gem and finer levels. NGC ID# BYJ9, PCGS# 9220

- 5081 1893 Isabella Quarter MS65 PCGS. CAC.** Shades of lavender-gray and greenish-gold toning blanket the surfaces of this impressive Gem, with sharply detailed design elements and vibrant mint luster underneath. The 1893 Isabella quarter is the only commemorative quarter issue in the classic series. NGC ID# BYJ9, PCGS# 9220
- 5082 1893 Isabella Quarter MS66 PCGS.** The Isabella quarter is usually available through MS66, but finer examples are scarce. This well-struck, collectible Premium Gem displays vibrant cartwheel luster shining through rich ocean-blue and lavender toning on each side. A loupe reveals a few tiny marks, none out of line for the grade or particularly distracting. PCGS reports 59 numerically finer submissions (8/17). NGC ID# BYJ9, PCGS# 9220
- 5083 1900 Lafayette Dollar MS64 PCGS. DuVall-2C.** The second S in STATES (on the obverse) is repunched on this available type-coin variety. This Choice example shows a bold strike and luminous luster cast in a light golden-gray hue. There are no distracting abrasions. NGC ID# BYKW, PCGS# 9222
- 5084 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** This near-Gem in enlivened by the underlying mint luster, giving the gray-lilac and rose patina additional "life." A high-end example that is almost abrasion-free. NGC ID# BYKW, PCGS# 9222
- 5085 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 1-B.** The lowest right leaf points between 19. Silver-gray surfaces display traces of tan-orange joined by blushes of cobalt-blue and lavender on the reverse. Strongly defined with glowing luster. A couple of minute marks on Washington's cheek help define the grade. *Ex: Central States Signature (Heritage, 4/2006), lot 4834; ANA Signature (Heritage, 3/2011), lot 4235.* NGC ID# BYKW, PCGS# 9222
- 5086 1921 Alabama 2x2 MS65 PCGS. CAC.** This piece is boldly struck and satiny with a hint of champagne color over the nickel-gray surfaces. Examples of the 2x2 Alabama half dollar variety are usually available in this grade, but seldom are such coins found with CAC endorsement. This piece is outstanding for the grade. NGC ID# BYEZ, PCGS# 9225
- 5087 1935 Boone MS67 PCGS.** Only delicately toned in ice-blue and chestnut-gold aside from a blush of orange-red and apple-green on STATES. A satiny and nearly mark-free high grade example. Lightly die doubled on the final A in AMERICA and the AR in DOLLAR. NGC ID# BYFR, PCGS# 9258
- 5088 1938-S Boone MS67 PCGS. CAC.** The 2,100 coin-mintage for the 1938-S stands as the lowest among all Boone half dollars from 1934 through the end of the series. This Superb Gem nearly ranks among the finest certified representatives, with smooth, untuned surfaces awash in scintillating luster. Population: 46 in 67 (3 in 67+), 3 finer. CAC: 15 in 67, 0 finer (7/17). NGC ID# BYG8, PCGS# 9276
- 5089 1938-S Boone MS67 PCGS. CAC.** This impressive Superb Gem specimen displays unusually sharp definition on all design elements and the impeccably preserved lustrous surfaces are enhanced by shades of lavender and greenish-gold toning. Population: 46 in 67 (3 in 67+), 3 finer. CAC: 15 in 67, 0 finer (8/17). NGC ID# BYG8, PCGS# 9276
- 5090 1936 Bridgeport MS67 PCGS.** A delightful Superb Gem specimen from a distribution of 25,015 pieces, this coin offers well-detailed design elements and satiny mint luster, under subtle shades of golden-tan and lavender-gray toning. NGC ID# BYG9, PCGS# 9279
- 5091 1925-S California MS66+ PCGS. CAC.** Sharp design elements complement satiny, unabraded mint luster on this high-end Premium Gem example. Wisps of gold and amber toning grace each side. Finer California Diamond Jubilee half dollars are scarce. NGC ID# BYGA, PCGS# 9281
- 5092 1922 Grant With Star MS64 PCGS.** A pleasing Choice specimen of the popular With Star variant, with well-detailed design elements and lightly marked, lustrous surfaces that show a few hints of golden-tan toning. NGC ID# BYPP, PCGS# 9307

### 1922 Grant Half Dollar, MS65 With Star Variant

- 5093 1922 Grant With Star MS65 PCGS.** The With Star variant of the Grant commemorative half dollar has a mintage of only 4,256 coins, compared to more than 67,000 of the No Star variety. This satiny Gem has considerable silver brilliance with attractive gold, violet, and blue toning on the obverse, and light gold toning on the reverse. NGC ID# BYPP, PCGS# 9307
- 5094 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** This popular silver commemorative key shows no wear on the sharply detailed design elements and the brilliant surfaces are free of mentionable distractions. The mint luster is hardly dimmed by the noted cleaning.
- 5095 1928 Hawaiian — Improperly Cleaned — NGC Details. Unc.** The Hawaiian Sesquicentennial half dollar is one of the better dates in the classic commemorative series. This unworn example is well-detailed and satiny, but unnaturally bright luster from a light cleaning prevents a numeric grade.
- 5096 1928 Hawaiian MS62 PCGS. CAC.** Both sides of this Mint State Hawaiian half dollar have gold, blue, and iridescent toning with frosty underlying luster. It is a lovely example of the scarce commemorative issue, one of a handful of classic-series types with a mintage of 10,000 or fewer coins. *Ex: Houston Signature (Heritage, 12/2010), lot 4081.* NGC ID# BYGR, PCGS# 9309
- 5097 1928 Hawaiian MS63 NGC.** The Hawaiian half dollar is considered one of the keys to the classic commemorative series. This Select example displays satiny steel-gray luster with the occasional hint of gold. A well-struck example with no major abrasions. NGC ID# BYGR, PCGS# 9309
- 5098 1928 Hawaiian MS63 PCGS.** A handsome Select example of this key silver commemorative, with well-detailed design elements and lustrous, lightly marked surfaces, under delicate shades of golden-tan toning. NGC ID# BYGR, PCGS# 9309

### 1928 Hawaiian Half, MS65 Appealing, Lightly Toned Surfaces

- 5099 1928 Hawaiian MS65 PCGS.** One of the keys to the classic commemorative series, the Hawaiian Sesquicentennial half dollar is one of the true success stories in a series replete with its share of shenanigans, boondoggles, and overly ambitious ventures. Most Hawaiian halves were sold to an appreciative island populace from a conservative mintage of 10,000 pieces. Relatively few Gem or finer coins survive, and lightly toned, sharply struck examples such as the present coin are always in demand. Golden overtones float over the faintly iridescent silver surfaces amid satiny mint luster. The MS65 grade is optimal for most series specialists. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65  
Brilliant Silver Luster**

- 5100 1928 Hawaiian MS65 NGC. CAC.** This lovely Gem Hawaiian half dollar, featuring Captain James Cook on the obverse and a native chief on the reverse, was designed by Honolulu artist Juliette May Fraser. Both sides of this piece exhibit brilliant, untoned silver surfaces and frosty luster with bold details. A highly appealing example of this scarce commemorative issue. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half, Satiny MS65**

- 5101 1928 Hawaiian MS65 PCGS. CAC.** A satiny Gem example of this popular classic commemorative issue, struck to mark the 150th anniversary of Captain James Cook's arrival on the Hawaiian Islands in 1778. This piece is well-struck and lustrous, with much of each side blanketed by the typically seen olive-gold toning. NGC ID# BYGR, PCGS# 9309

- 5102 1935 Hudson MS66 PCGS.** The low mintage Hudson half dollar has been a key to the silver commemorative series since its controversial 1935 release. It was an immediate sellout and could only be obtained at high cost in the secondary market, to the benefit of its distributors. This lustrous and nearly pristine Premium Gem displays consistent honey-gold patina. NGC ID# BYGS, PCGS# 9312

- 5103 1935 Hudson MS66 PCGS. CAC.** An impressive Premium Gem specimen of this popular issue, with well-detailed design elements and vibrant, satiny mint luster on both sides. The well-preserved surfaces show a few hints of greenish-gold toning. NGC ID# BYGS, PCGS# 9312

- 5104 1918 Lincoln MS67 PCGS.** Carefully preserved and intricately struck, this Superb Gem Illinois Centennial half dollar is among the finer-known examples of the issue. PCGS lists only three finer pieces (7/17). The surfaces are silver in color with light olive-gold overtones clustered near the borders. NGC ID# BYGU, PCGS# 9320

- 5105 1921 Missouri MS65 PCGS. Ex: Newman.** This Gem Missouri Centennial half dollar displays bold motifs amid thick, satiny luster. Pale lavender-gray toning deepens to russet and amber around the peripheries. PCGS lists only 52 numerically finer representatives (8/17). NGC ID# BYH2, PCGS# 9330

- 5106 1921 Missouri 2x4 MS65 NGC.** Satiny with luster qualities that are considerably above-average for this more challenging early commemorative. Bits of orange and russet iridescence about the obverse periphery are the only obvious toning, although delicate golden-gray accents can also be detected on the reverse.  
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 4505. NGC ID# 2FE9, PCGS# 9331

- 5107 1921 Missouri 2x4 MS65 PCGS. CAC.** This Gem Missouri Centennial half dollar is well-preserved and satiny, showing peach-gold, olive-gray, and lavender toning across each side. The design elements are boldly struck. PCGS lists 42 finer representatives (8/17). NGC ID# 2FE9, PCGS# 9331

- 5108 1915-S Panama-Pacific MS65 PCGS.** Bright, satiny surfaces are essentially free from color. A few tiny carbon spots are scattered over the obverse. NGC ID# BYHP, PCGS# 9357

- 5109 1915-S Panama-Pacific MS66 PCGS. CAC.** Vivid shades of golden-brown and magenta toning enhance the well-preserved surfaces of this delightful Premium Gem, with well-detailed design elements and vibrant mint luster underneath. NGC ID# BYHP, PCGS# 9357

- 5110 1920 Pilgrim MS67 PCGS.** Mottled olive-green and orange toning blanket otherwise brilliant surfaces with illuminant mint luster. This Superb Gem, celebrating the tercentenary of the landing of the pilgrims at Plymouth, is delicately preserved with no mentionable marks. A trifle weak in the central reverse. PCGS has seen only two numerically finer submissions (8/17). NGC ID# BYHR, PCGS# 9359

**1937 Roanoke Half Dollar, MS68  
None Certified Finer**

- 5111 1937 Roanoke MS68 NGC.** The average certified Roanoke half dollar grades a fraction shy of MS65, but examples remain collectible through MS67. This grade level is where the issue becomes conditionally rare. Largely brilliant, softly frosted surfaces showcase glimpses of pale sky-blue patina with faint gold around the obverse border. The relief elements are fully rendered, and there are no marks to report. Census: 37 in 68 (10 in 68★), 0 finer (7/17). NGC ID# BYHW, PCGS# 9367

- 5112 1936 Robinson MS67 PCGS.** The Arkansas Centennial half dollar was struck from 1935-1937, but the Robinson variety was only issued in 1936 and from the Philadelphia Mint. This Superb Gem example is conditionally scarce. The strike is sharp and the surfaces are pristine. Olive and russet border toning accentuates the champagne-tinted interiors. Population: 86 in 67 (3 in 67+), 2 finer (7/17). NGC ID# BYHX, PCGS# 9369

- 5113 1935 Spanish Trail MS66 NGC.** A satiny Spanish Trail half dollar that is lightly toned in champagne color with no distracting abrasions. El Paso, Texas is weakly struck, but the remainder of the design is bold. Finer examples will be challenging for the budget-conscious collector to acquire. NGC ID# BYJ5, PCGS# 9376

- 5114 1935 Spanish Trail MS67 PCGS.** The Spanish Trail half is scarce in MS67 and anything finer is extremely rare. This piece is boldly struck up, with modestly iridescent, champagne-gold luster. There are only three MS68 coins numerically finer at PCGS (8/17). NGC ID# BYJ5, PCGS# 9376

**1935-D Texas Half Dollar, MS68  
Tied for the Finest Certified**

- 5115 1935-D Texas MS68 NGC.** "Remember the Alamo" is the theme of this Texas Independence Centennial half dollar that was issued from 1934 to 1938. The models were prepared by Italian-born sculptor Pompeo Coppini (1870-1957) who lived much of his life in Texas. This Superb Gem is highly lustrous with satin silver surfaces and delicate peripheral iridescence. Census: 8 in 68 (3 in 68★), 0 finer (8/17). NGC ID# BYJC, PCGS# 9383
- 5116 1935-S Texas MS67+ PCGS. CAC.** The 1935-S Texas commemorative half is only marginally available in MS67, and only a handful of finer pieces are known (two at PCGS) (8/17). This Plus-graded, CAC-approved coin displays bold detail and smooth, satiny mint luster. Warm golden toning accents the undisturbed surfaces. NGC ID# BYJD, PCGS# 9384
- 5117 1937 Texas MS67+ PCGS. CAC.** The preservation is outstanding, and the satiny surfaces yield dusky light golden toning with pale freckles of color throughout. Slight strike softness is seen on the high points of the design, although it is not immediately noticeable. PCGS lists five finer 1937 Texas half dollars (8/17). NGC ID# BYJH, PCGS# 9390
- 5118 1937-S Texas MS65 Prooflike NGC.** Well-struck and appealing with satiny luster that shows slight reflectivity in the fields. Warm golden border toning surrounds nearly brilliant interiors. No contact marks are present. Housed in a prior generation holder. NGC has certified eight Prooflike examples, including four in this grade and one finer (8/17). NGC ID# BYJK, PCGS# 89392
- 5119 1938-S Texas MS67+ PCGS. CAC.** Only 3,814 pieces were struck of the Texas half dollar in 1938, and this is a well-preserved example of this limited issue. The surfaces show bright mint frost and are generally brilliant, except for a light trace of golden peripheral toning. NGC ID# BYJN, PCGS# 9396
- 5120 1946-S Booker T. Washington MS66 Prooflike NGC.** A spectacular Premium Gem, with razor-sharp definition on all design elements and much prooflike reflectivity in the fields. The brilliant surfaces are impeccably preserved and eye appeal is terrific. NGC ID# BYJU, PCGS# 89406
- 5121 1946-PDS Set Booker T. Washington MS67 PCGS. CAC.** A three-coin set, all pieces identically graded. The Philadelphia Mint coin has deep russet, sea-green, and lavender-gray toning, the Denver Mint piece has dappled sea-green and blue-steel toning, and the San Francisco Mint piece has intense russet, sea-green, and iridescent obverse toning with lavender-gray, magenta, and greenish-gold on the reverse. (Total: 3 coins) NGC ID# BYJX, PCGS# 9407
- 5122 1948-S Booker T. Washington MS65 Prooflike NGC.** Ex: Bagne Collection. An attractive Gem representative, from a distribution of 8,005 pieces, this coin exhibits sharply detailed design elements and well-preserved, deeply reflective surfaces on both sides. NGC ID# BYK2, PCGS# 89414

**5123 1949 Booker T. Washington MS67 PCGS. CAC.** With just 6,000 pieces distributed plus four assay coins, the 1949 is one of the more challenging Booker T. Washington halves in high grades. Strong mint luster invigorates this magnificent Superb Gem. Essentially color-free surfaces exhibit sharply-struck design features and impeccable preservation. Virtually all examples show a degree of original planchet roughness on Washington's jaw. Population: 31 in 67, 0 finer. CAC: 22 in 67, 0 finer (8/17). NGC ID# BYK3, PCGS# 9416

**5124 1949 Booker T. Washington MS65 Prooflike NGC.** Ex: Bagne Collection. A spectacular Gem representative from a small distribution of 6,004 pieces, this coin exhibits prooflike reflective surfaces and sharply detailed design elements throughout. NGC ID# BYK3, PCGS# 89416

**5125 1949 Booker T. Washington PDS Set MS67 PCGS. CAC.** Booker T. Washington 1949-PDS Set, MS66+ - MS67 PCGS. CAC. The three coins are individually housed in recent PCGS holders with consecutive serial numbers. The set includes: **1949 MS67**, satiny and well-struck with amber border toning around champagne-tinted interiors; **1949-D MS66+**, essentially brilliant on the obverse with olive-gold rim toning around the reverse; **1949-S MS67**, frosty and sharp with a similar toning pattern to the previous two coins in the set. (Total: 3 coins) PCGS# 9419

**5126 1950 Booker T. Washington MS67 PCGS.** This frosted Superb Gem is tied for the finest certified of this small net distribution of 6,000 pieces. A trace of rim color accentuates the strong eye appeal. Note how clean the face of Booker T. Washington is, showing none of the abrasions usually seen even on Mint State coins. The reverse is similarly nice. Conditional rarities such as this piece are terribly underrated in today's market. Population: 23 in 67, 0 finer (8/17). NGC ID# BYK6, PCGS# 9420

**5127 1950-D Booker T. Washington MS67 NGC.** An impressive Superb Gem from a Denver Mint production of 6,004 pieces, this coin offers sharply detailed design elements and satiny mint luster, under subtle shades of lavender-gray and greenish-gold toning. Census: 19 in 67 (2 in 67+), 0 finer (8/17). NGC ID# BYK7, PCGS# 9421

**1950-S Booker T. Washington Half Dollar  
Unsurpassed Quality, MS67 Prooflike**

**5128 1950-S Booker T. Washington MS67 Prooflike NGC. CAC.** Brilliant surfaces showcase pale accents of powder-blue, but the most visually impressive trait of this Superb Gem Booker T. Washington half dollar is the overt Prooflike reflectivity on each side. A full strike and minimal marks further the allure of this commemorative. CAC endorsed, with unsurpassed technical quality. Census: 2 in 67 Prooflike, 0 finer (8/17). NGC ID# BYK8, PCGS# 89422

**5129 1951-D Booker T. Washington MS67 PCGS. CAC.** The 1951-D Booker T. Washington half is infrequently seen in MS67, and no numerically finer examples are known (8/17). This piece displays a bold strike and frosty, brilliant mint luster. The cheek is particularly clean. Population: 45 in 67 (1 in 67+), 0 finer. CAC: 37 in 67, 0 finer (7/17). NGC ID# BYKA, PCGS# 9425

**1951-D Washington-Carver Half, MS67  
Only One Finer Certified**

- 5130 1951-D Washington-Carver MS67 NGC.** From a limited distribution of 10,004 pieces, this delightful Superb Gem exhibits well-detailed design elements and impeccably preserved brilliant surfaces. Vibrant mint luster radiates from both sides and overall eye appeal is outstanding. This coin should find a home in the finest collection or Registry Set. Census: 5 in 67, 1 finer (7/17). NGC ID# BYKZ, PCGS# 9431

- 5131 1952-D Washington-Carver MS65 Prooflike NGC.** An impressive Gem from a distribution of 8,006 pieces, this coin exhibits sharply detailed design elements and well-preserved surfaces with just a trace of greenish-gold toning. The coin shows a mix of satiny mint luster and slight prooflike reflectivity on the reverse. NGC ID# BYL4, PCGS# 89435

- 5132 1952-S Washington-Carver MS67+ NGC.** A conditionally rare Superb Gem example of the final type in the classic commemorative series. This MS67+ Washington-Carver half dollar displays a bold strike and satiny luster. A few peripheral splashes of olive-gold toning on the obverse complement pale champagne coloration elsewhere on both sides. Census: 16 in 67 (2 in 67+, 3 in 67★), 1 finer (8/17). NGC ID# BYL5, PCGS# 9436

- 5133 1953-S Washington-Carver MS67 NGC.** A spectacular Superb Gem silver commemorative, with well-detailed design elements and well-preserved lustrous surfaces under delicate shades of lavender-gray and greenish-gold toning. Census: 18 in 67 (3 in 67★, 1 in 67+★), 0 finer (8/17). NGC ID# 332B, PCGS# 9440

**1936 Wisconsin Half Dollar, MS68  
Among the Finest Certified**

- 5134 1936 Wisconsin MS68 PCGS.** The Wisconsin commemorative half dollar had a reported distribution of 25,015 coins, and the average example grades a bit better than Gem Uncirculated. This immaculate MS68 offering ranks among the finest coins at both services and has the eye appeal to match. Dappled crimson, forest-green, and fire-orange hues converge around mostly untuned centers. Strong and virtually unmarked. Population: 37 in 68 (6 in 68+), 0 finer (8/17). NGC ID# BYKU, PCGS# 9447

**1936 Wisconsin Half Dollar, MS68  
None Certified Finer**

- 5135 1936 Wisconsin MS68 NGC. CAC.** Peach-gold, cherry-red, emerald-green, and lilac-gray toning blankets this lustrous and fully struck classic silver commemorative. Only a graze beneath the L in TERRITORIAL precludes numismatic perfection. Those in search of a gorgeously toned Wisconsin need look no further. Census: 41 in 68 (7 in 68★, 1 in 68+★), 0 finer. CAC: 20 in 68, 0 finer (7/17). Ex: Long Beach Signature (Heritage, 9/2012), lot 4397. NGC ID# BYKU, PCGS# 9447

**COMMEMORATIVE GOLD**

- 5136 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 NGC. CAC.** A spectacular Premium Gem commemorative gold dollar, with virtually pristine orange-gold surfaces that radiate vibrant mint luster on both sides and sharply detailed design elements throughout. Eye appeal is outstanding. NGC ID# BYLD, PCGS# 7443

- 5137 1903 Louisiana Purchase, McKinley Gold Dollar MS66+ PCGS. CAC.** The borders are strong with the sole exception of the lower reverse. Lemon-gold surfaces appear unmarked with crisp portrait detail and glittering luster. Two tiny alloy spots occur below the F in OF and on the D in DOLLAR. A fantastic example of this early commemorative gold dollar. NGC ID# BYLE, PCGS# 7444

**1903 Louisiana Purchase/McKinley Gold Dollar  
Rare Gem Prooflike Example**

- 5138 1903 Louisiana Purchase, McKinley, MS65 Prooflike NGC.** This spectacular Gem example is one of just 16 Louisiana Purchase McKinley gold dollars awarded a Prooflike designation at NGC, with only three in this grade and one MS66 coin numerically finer (8/17). The strike is sharp and the overall eye appeal is exceptional. Consistent yellow-gold color and lack of noticeable abrasions join the brightly mirrored fields to set this remarkable Gem apart from other high-grade candidates. NGC ID# BYLE, PCGS# 77444

1903 Louisiana Purchase/McKinley Gold Dollar  
MS65 Prooflike

- 5139** 1903 Louisiana Purchase, McKinley, MS65 Prooflike NGC. Captivating prooflike reflectivity enhances the yellow-gold surfaces of this well-preserved Gem. A loupe locates only a couple of minuscule handling marks. This sharply struck and conditionally rare piece would make an excellent addition to a classic commemorative set. Census: 3 in 65 Prooflike, 1 finer (7/17). Ex: Long Beach Signature (Heritage, 9/2009), lot 1279. NGC ID# BYLE, PCGS# 77444

- 5140** 1904 Lewis and Clark Gold Dollar MS64 PCGS. An attractive Choice specimen of this popular gold commemorative, with sharply detailed design elements and well-preserved orange-gold surfaces that show much prooflike reflectivity in the fields. NGC ID# BYLF, PCGS# 7447

- 5141** 1904 Lewis and Clark Gold Dollar MS64+ PCGS. A bright, well-struck yellow-gold example of this classic commemorative type. A loupe reveals trivial lines on each side that limit the grade, but the visual appeal remains pleasing. A budget-friendly type coin option. NGC ID# BYLF, PCGS# 7447

1904 Lewis & Clark Gold Dollar, MS63 Prooflike  
An Unusual Find With Reflective Fields

- 5142** 1904 Lewis & Clark MS63 Prooflike NGC. Obviously mirrored fields confirm the NGC designation, an unusual attribute for this issue. This is a well-struck piece with a few faint field hairlines that are only visible beneath a loupe. The surfaces are bright, even yellow-gold with a few minor (very small) contact marks present. Census: 6 in 63 Prooflike, 8 finer (7/17). NGC ID# BYLF, PCGS# 77447

1905 Lewis and Clark Dollar, MS64 Prooflike  
One of Five at NGC in This Grade

- 5143** 1905 Lewis & Clark MS64 Prooflike NGC. Lewis and Clark dollars of 1904-05 are elusive overall, yet NGC has seen currently 809 of them in near-Gem grade. But only 11 total have been given a Prooflike designation, and a mere five grade MS64 Prooflike with a single MS66 Prooflike finer (7/17). This canary-gold example is well within its rights to be called Prooflike, showing well-contrasted greenish-gold surfaces. It requires a loupe to observe the few tiny hairlines that prevent a finer numeric grade. The eye appeal is excellent. NGC ID# BYLG, PCGS# 77448

- 5144** 1915-S Panama-Pacific Gold Dollar MS65 PCGS. The mintmark is widely repunched on this unlisted variety. This Gem 1915-S Pan-Pac gold dollar displays satiny straw-gold luster and unabraded surfaces. The strike is sharp throughout. NGC ID# BYLH, PCGS# 7449

- 5145** 1915-S Panama-Pacific Gold Dollar MS65 PCGS. Bright luster exudes from the well-preserved peach-gold surfaces, laced with subtle hints of mint-green. Well-struck throughout, and devoid of mentionable signs of contact. NGC ID# BYLH, PCGS# 7449

- 5146** 1915-S Panama-Pacific Gold Dollar MS65 PCGS. The vivid orange-gold surfaces of this attractive Gem display vibrant mint luster on both sides, with only insignificant signs of contact. The design elements are well-detailed and overall visual appeal is quite strong. NGC ID# BYLH, PCGS# 7449

- 5147** 1915-S Panama-Pacific Gold Dollar MS65 PCGS. One of several Gem or better examples being offered in this sale, this appealing, high quality representative is notable for its vibrant luster and well-detailed design elements. Overall eye appeal is outstanding. NGC ID# BYLH, PCGS# 7449

- 5148** 1915-S Panama-Pacific Gold Dollar MS66 PCGS. This high-grade Pan-Pac gold dollar type coin displays luminous, undisturbed mint luster with rich orange-gold hues. A shimmering cartwheel effect is generated when rotated beneath a light. PCGS has seen 69 finer submissions (7/17). NGC ID# BYLH, PCGS# 7449

- 5149** 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Delicate iridescence appears throughout the wheat-gold surfaces of this Premium Gem 1915-S Panama-Pacific gold dollar. The strike is sharp and the surfaces show no abrasions. This issue is usually available in MS66, but finer coins are scarce. NGC ID# BYLH, PCGS# 7449

- 5150** 1915-S Panama-Pacific Gold Dollar MS66 PCGS. The 1915-S Panama-Pacific gold dollar becomes very scarce in grades above the MS66 level. This impressive Premium Gem exhibits well-detailed design elements and well-preserved orange-gold surfaces with ample mint luster throughout. NGC ID# BYLH, PCGS# 7449

- 5151** 1915-S Panama-Pacific Quarter Eagle MS62 PCGS. The devices are well struck and each side displays reddish-gold tinted satiny luster with an accent of lilac over the high points of the design. Only small abrasions that are visible with a loupe account for the grade. NGC ID# BYLP, PCGS# 7450

**5152 1922 Grant Gold Dollar, No Star, MS64 PCGS.** Deep reddish-orange color shows the occasional dab of lilac interspersed on each side. Uncommonly lustrous and prevented from grading even higher by a couple of shallow marks in the right obverse field. NGC ID# BYLN, PCGS# 7458

**5153 1922 Grant Gold Dollar, No Star, MS65 NGC.** This is a sharp Gem with frosty yellow-gold mint luster and a distinct lack of unsightly abrasions. Both variations of the Grant Memorial gold dollar had distributions of 5,016 coins (including assay pieces), but the No Star variant is the slightly scarcer of the two today in the finest grades. NGC ID# BYLN, PCGS# 7458

**5154 1922 Grant Gold Dollar, No Star, MS66 PCGS.** A spectacular Premium Gem representative of the famous No Star variant, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC ID# BYLN, PCGS# 7458

**5155 1922 Grant Gold Dollar, With Star, MS64 PCGS.** A frosty, attractive near-Gem With Star coin that shows a bold strike and luminous yellow-gold surfaces. A finer grade would have been achieved were it not for a few tiny marks below the MER in AMERICA. NGC ID# BYPS, PCGS# 7459

**5156 1922 Grant Gold Dollar, With Star, MS65 NGC.** An impressive Gem example of the popular Grant With Star commemorative gold dollar, with well-detailed design elements and vivid orange-gold surfaces that display vibrant mint luster and few signs of contact. NGC ID# BYPS, PCGS# 7459

**5157 1922 Grant Gold Dollar, With Star, MS66 PCGS.** Grant's hair is impressively well-defined on this With Star classic commemorative type coin, and the softly frosted yellow-gold surfaces display exceptional preservation and luminance. The distribution for this issue was only 5,016 coins, including pieces destroyed in the assay. NGC ID# BYPS, PCGS# 7459

**5158 1922 Grant Gold Dollar, With Star, MS66 PCGS.** This Premium Gem 1922 Grant Star gold dollar is housed in an older generation green-label PCGS holder, and it appears to be remarkable quality for the grade. Grant half dollars and Grant gold dollars were both coined in two varieties, with identical designs (except the denomination) on each.  
*Ex: Long Beach Signature (Heritage, 9/2008), lot 1282. NGC ID# BYPS, PCGS# 7459*

**5159 1922 Grant Gold Dollar, With Star, MS66 PCGS.** Rich orange-gold color dominates each side of this bright Premium Gem. A strongly struck representative of the popular Grant With Star gold dollar that would make an excellent addition to a high-level classic commemorative set. NGC ID# BYPS, PCGS# 7459

**5160 1922 Grant Gold Dollar, With Star, MS66 NGC. CAC.** Both sides of this popular issue are awash with full luster, and draped with peach-gold patina with light green undertones. The design elements are well-detailed and the surfaces are well-preserved. NGC ID# BYPS, PCGS# 7459

#### 1922 Grant Gold Dollar, MS67 Superb With Star Type Coin

**5161 1922 Grant Gold Dollar, With Star, MS67 PCGS.** Striking butter-yellow and sun-gold shadings mingle on each side of this Superb Gem gold commemorative. The fine details stand out on Grant's portrait, a rarity for the issue regardless of variety. While the Grant With Star gold dollar is available for a price in MS67, PCGS has graded only four coins finer (7/17).  
*Ex: Los Angeles Signature (Heritage, 8/2009), lot 2191. NGC ID# BYPS, PCGS# 7459*

## PROOF COMMEMORATIVE GOLD

**5162 1916 McKinley PR63 NGC.** This Select 1916 McKinley gold dollar displays bold motifs set against mirrored straw-gold fields that show prooflike reflectivity throughout. A few stray lines in the reflective surfaces limit the grade as there are no bothersome contact marks. NGC ID# BYLK, PCGS# 7487

## PATTERNS

### 1853 Seated Dollar in Copper Judd-154 Restrike, PR60 Details

**5163 1853 Dollar, Judd-154 Restrike, Pollock-183, High R.7 — Obverse Tooled — ANACS. PR60 Details.** A restrike of the regular dies 1853 Seated dollar. Struck in copper with a reeded edge. These are controversial pieces because there is no known reason for striking a silver dollar in copper. The first piece Saul Teichman was able to trace was in a Haseltine auction in 1876, raising the possibility that these were struck in the late 1860s and early 1870s when James Pollock was Director of the Mint. The tooling referred to seems to be limited to several pinscratches located next to the shin of Liberty. The surfaces are deeply toned in shades of reddish-brown and blue. Moderately reflective. NGC ID# 26VD, PCGS# 11640

### 1858 Indian Cent Pattern in Copper-Nickel Judd-208, Pollock-253, PR64 Low Date, Five-Leaf Clusters

**5164 1858 Indian Cent, Judd-208, Pollock-253, R.7, PR64 NGC.** Snow PT-28. Low Date, Five-Leaf Clusters. Indian head cent as adopted in 1859, struck in copper-nickel with a plain edge. Two obverse and two reverse dies were used to strike these pattern cents. This is the rare variant with a low date and clusters of five leaves. The Judd-208 is common, but only a half dozen pieces are estimated known of this variant, according to USPatterns.com. The blue-gray surfaces have significant reddish patina surrounding the devices on each side. NGC ID# 29BP, PCGS# 11885

**1861 Half Dollar Pattern, PR65+ Cameo  
GOD OUR TRUST, Judd-277, Silver**

- 5165** 1861 Half Dollar, Judd-277, Pollock-326, 328, Low R.7, PR65+ Cameo PCGS. The regular Seated Liberty half dollar design with the addition of a scroll over the eagle bearing the motto GOD OUR TRUST. The obverse die has the shield point over the right edge of the 1 in the date as described for Pollock-326. The other variant shows the shield point over the left edge of the 8 in the date. Struck in silver with a plain edge. The fields are brightly reflective with noticeable contrast between the fields and devices. Just the slightest bit of toning is present on each side. NGC ID# 29DK, PCGS# 535172 Base PCGS# 12100

**1865 Two Cent Piece in Copper-Nickel  
Judd-409, PR63**

- 5166** 1865 Two Cents, Judd-409, Pollock-478, High R.6, PR63 NGC. Termed a "trial piece struck from regular dies" by Judd, this is the standard two cent design, but struck in copper-nickel with a plain edge. Approximately a dozen pieces are known. The surfaces are bright and there is a bit of reddish-coppery patina present also. Several small field marks and planchet irregularities account for the grade. Noticeably contrasted. PCGS# 60588

**1868 Three Cent Nickel Pattern  
Judd-618, PR66 Cameo**

- 5167** 1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR66 Cameo PCGS. CAC. Similar to the regular issue, but the Roman numerals on the reverse are smooth instead of ribbed. Struck in nickel with a plain edge. This is one of the more available and more affordable patterns with dozens of pieces known. Also struck in copper, and a single aluminum piece is known. The fields are deeply reflective and there is just the slightest hint of rose patina present. A splendid, sharply contrasted example. NGC ID# 29NA, PCGS# 860834 Base PCGS# 60834

**1868 Five Cent Pattern in Nickel  
Judd-633, Pollock-705, High Date Variant, PR65**

- 5168** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR65 NGC. The obverse design resembles the adopted three cent nickel, but on a larger planchet, with minor design modifications appropriate to the increased diameter. The reverse features a Roman numeral V in the center, with a wreath encircling, scroll with IN GOD WE TRUST and Maltese cross above. The High Date variant (Pollock-705). Struck in nickel with a plain edge. The surfaces are bright and sharply struck with just the slightest hint of color present. NGC ID# 29NN, PCGS# 60851

**1869 Standard Silver Quarter in Silver  
Judd-733, PR62**

- 5169** 1869 Standard Silver Quarter Dollar, Judd-733, Pollock-814, R.5, PR62 PCGS. The bust of Liberty faces right, wearing a headband with LIBERTY on it. The peripheral legend is UNITED STATES OF AMERICA, with IN GOD WE TRUST on a scroll in exergue. On the reverse, an oak and laurel wreath surrounds 25 CENTS, and with STANDARD SILVER 1869 around the rim. Struck in silver with a reeded edge. The surfaces are bright from cleaning with light golden patina around the margins. NGC ID# 29SH, PCGS# 60960

**1870 Standard Silver Dime in Silver  
Judd-837, PR67**

- 5170** 1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR67 NGC. CAC. This Standard Silver design depicts a small bust of Liberty facing right. Her cap shows three stars. The reverse exhibits a corn and cotton wreath with the denomination and date inside. The remaining statutory legends occupy the obverse margin and upper reverse border. Struck in silver with a reeded edge. This is one of the more frequently encountered variants of this date and design. Examples were also struck in copper and aluminum and are significantly scarcer. The obverse shows a distinctive reddish center that is surrounded by blue at the margin, while the reverse is even blue overall. Nice reflectivity. NGC ID# 94FK, PCGS# 61081

1870 Seated Liberty Design in Silver  
Judd-882, PR55

- 5171** 1870 Quarter Dollar, Judd-882, Pollock-980, High R.7, PR55 PCGS. A William Barber design, the obverse shows a figure of Liberty seated, facing left, her left hand holding an olive branch, right hand resting on a shield. The reverse is of the regular issue quarter design. Struck in silver with a reeded edge. Sold as part of complete silver sets at the time of issue. Examples of this obverse / reverse die pairing also exist in copper and aluminum. This lightly circulated piece is generally brilliant with subdued reflectivity in the fields. Numerous small abrasions are scattered across each side. NGC ID# 2YAU, PCGS# 61126

1879 Goloid Metric Dollar  
Judd-1626, PR62

- 5172** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR62 PCGS. The William Barber Goloid Metric dollar designs combines a capped Liberty Head with a reverse carrying the statutory as well as elemental inscriptions. A circle of stars around the central text breaks the otherwise continuous wording. Purportedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. It is unknown if any of these pieces have undergone metallurgical testing to determine if they are really goloid. Deep golden-russet toning covers each side. NGC ID# 2AHE, PCGS# 62004

1879 Goloid Metric Dollar in Goloid  
Judd-1626, Deeply Mirrored PR63

- 5173** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR63 PCGS. William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Allegedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. The Goloid Metric dollars are one of the more obtainable pattern issues and are quite popular. They combine dollar-sized heft with an unfamiliar design, allegedly struck in an unfamiliar 19th century alloy. This piece has deeply mirrored fields and each side shows just a trace of light toning. NGC ID# 2AHE, PCGS# 62004

1879 Goloid Metric Dollar in Goloid (?)  
Judd-1626, PR64

- 5174** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR64 PCGS. William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Allegedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. Each side has a dusky silver finish with extensive speckled russet patina. The look of this piece is different enough from most examples seen to suggest metallurgical testing to see if it might indeed be a goloid composition. NGC ID# 2AHE, PCGS# 62004

1884 Eastman Johnson Perforated Five Cent in Nickel  
Judd-1724, PR64 Cameo

- 5175** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR64 Cameo NGC. The Eastman Johnson "holey five cent" design. The obverse shows FIVE above and CENTS below an octagonal opening, undoubtedly handcut, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. Like the nickel cents of the same design, these pieces were also struck on thick and thin planchets. This appears to be a thick planchet variant. Examples were also struck in aluminum. Lightly and evenly toned over each side, the patina is not sufficient to subdue the mirrored flash in the fields, and the contrast is readily apparent. A carbon spot is noted by the reverse rim below the C in CENTS. PCGS# 397007 Base PCGS# 62154

## MODERN BULLION COINS

- 5176** 1986 Silver Eagle MS70 PCGS. A radiant, softly frosted example of this first-year one-ounce Silver Eagle issue, with fully struck design elements and creamy, technically perfect surfaces. The 1986 is scarce in PCGS MS70 condition. NGC ID# 26J4, PCGS# 9801
- 5177** 1986 Silver Eagle MS70 PCGS. A scarce MS70 PCGS-graded example of the debut Silver Eagle issue. This piece is fully struck and satiny with perfectly preserved surfaces. Eye appeal is outstanding. Ideal for Registry Set purposes. NGC ID# 26J4, PCGS# 9801
- 5178** 1986 Silver Eagle MS70 PCGS. PCGS is notoriously demanding at the MS70 level for the early date Silver Eagles. This is one of the few coins to pass muster and receive the ultimate grade. Silky-smooth surfaces display vibrant, frost-white luster and needle-sharp motifs. PCGS shows just 150 pieces at this unimprovable level (8/17). NGC ID# 26J4, PCGS# 9801

**5179 1986 Half-Ounce Gold Eagle MS70 PCGS.** A lovely, pristine half-ounce Gold Eagle from the first year of production in 1986. The date appeared in Roman numerals through 1991, following after the original High Relief double eagle of 1907, from which the Gold Eagle's obverse design is derived. This attractive bullion coin is smooth and satiny with yellow-gold mint luster. NGC ID# 28Y8, PCGS# 9805

**5180 1986 Half-Ounce Gold Eagle MS70 NGC.** 1986 was the first year American Gold Eagles were publicly offered, and more Uncirculated half-ounce gold pieces were sold that year than the next ten years combined. This fully struck example exhibits flawless apricot-gold surfaces. NGC ID# 28Y8, PCGS# 9805

**5181 1987 Silver Eagle MS68 PCGS.** Vibrant rainbow toning on the obverse is paired with a frost-white, untuned reverse. Few dramatically toned Silver Eagles find their way into PCGS holders, and those that do frequently fail to approach the MS68 level. This is a rare find for the specialized collector such pieces. NGC ID# 26J6, PCGS# 9808

**5182 1987 Silver Eagle MS70 PCGS.** We seldom see a 1987 Silver Eagle in a PCGS holder with the topmost grade. As expected, the coin is magnificent and frosted with fully struck motifs and pervasive mint luster. Eye appeal is unimprovable. PCGS reports just 50 pieces so-graded (8/17). NGC ID# 26J6, PCGS# 9808

**5183 1987 Silver Eagle MS70 PCGS.** A technically perfect example of this early series bullion issue, with fully struck design elements and completely brilliant surfaces that radiate vibrant mint luster. Greater-than-anticipated demand resulted in a large mintage of over 11 million pieces. NGC ID# 26J6, PCGS# 9808

**5184 1987 Silver Eagle MS70 PCGS.** A technically perfect specimen of this popular bullion issue, with fully struck design elements and vibrant mint luster throughout. From a second-year mintage of 11.4 million pieces. NGC ID# 26J6, PCGS# 9808

**5185 1988 Silver Eagle MS70 PCGS.** PCGS has certified only 50 1988 Silver Eagles as MS70 (8/17), and these are in high demand among Registry Set enthusiasts. This piece is fully struck and brilliant with pristine, satiny mint luster. NGC ID# 26J8, PCGS# 9816

**5186 1989 Silver Eagle MS70 PCGS.** The 1989 Silver Eagle is scarce in MS70 at PCGS, with only 60 such coins reported (8/17). This example is satiny, brilliant and needle-sharp. An outstanding Registry Set coin for the Silver Eagle specialist. NGC ID# 26JA, PCGS# 9826

**5187 1991 Silver Eagle MS70 NGC.** A flawlessly preserved, brilliant 1991 Silver Eagle with satiny surfaces and no distracting strike imperfections. Top-grade examples of this issue are scarce and in high demand among Registry Set collectors. NGC ID# 26JE, PCGS# 9846

**5188 1991 Silver Eagle MS70 NGC.** This fully struck, pristine 1991 Silver Eagle shows not even a single post-mint surface imperfection. The coin is entirely untuned and displays satiny luster. A tiny strike-through behind the eagle's head is a reliable pedigree marker. NGC ID# 26JE, PCGS# 9846

#### 1991 American Eagle, MS70 One-Ounce Silver

**5189 1991 Silver Eagle MS70 PCGS.** This is an exquisite Superb Gem, a perfect Mint State one-ounce silver American Eagle that has brilliant and untuned surfaces with blazing luster and extraordinary eye appeal. Only a few have reached the pinnacle of coin grading. Population: 19 in 70 (8/17). NGC ID# 26JE, PCGS# 9846

#### 1991 Silver Eagle, MS70 Rare PCGS Example

**5190 1991 Silver Eagle MS70 PCGS.** A number of coins have been certified in MS70 at NGC, but the 1991 one-ounce Silver Eagle is seldom encountered in this ultimate grade at PCGS, where only 19 specimens have been so graded (8/17). This delightful specimen exhibits, creamy, technically perfect surfaces and fully struck design elements, with vibrant mint luster on both sides. NGC ID# 26JE, PCGS# 9846

#### 1991 Silver Eagle, MS70 Fully Struck, Flawless Example

**5191 1991 Silver Eagle MS70 PCGS.** From a substantial mintage of 7.1 million pieces, the 1991 one-ounce Silver Eagle is surprisingly elusive in the ultimate grade of MS70. This magnificent specimen exhibits creamy surfaces that are technically flawless, with vibrant mint luster on both sides. The design elements are fully struck and eye appeal is terrific. PCGS has graded only 19 examples in MS70 condition (8/17). NGC ID# 26JE, PCGS# 9846

**5192 1992 Half-Ounce Gold Eagle MS70 NGC.** The 1992 half-ounce Gold Eagle claims a mintage of 54,404 pieces. This technically perfect specimen offers fully struck design elements and vibrant mint luster on both sides, with terrific eye appeal. NGC ID# 26ND, PCGS# 9862

**5193 1993 Silver Eagle MS70 NGC.** This 1993 Silver Eagle is fully struck, untuned, and satiny with outstanding eye appeal. The pristine surfaces are indeed worthy of the MS70 grade. Few examples of this issue have achieved the top possible grade at either certification service. NGC ID# 26JJ, PCGS# 9866

**5194 1993 Half-Ounce Gold Eagle MS70 NGC.** Despite a production of 73,324 coins, the 1993 is quite elusive in this top grade of MS70. Each side is highly lustrous with light butter-gold coloration. A flawless example for the Registry enthusiast. NGC ID# 26NE, PCGS# 9872

**5195 1995-W Silver Eagle PR67 Deep Cameo PCGS.** A blush of light golden toning accentuates the dramatic cameo contrast of this 1995-W Silver Eagle, and the surfaces are nearly pristine. A major attribute of the present coin compared to its peers is the green label holder within which it resides. NGC ID# CFWX, PCGS# 9887

**1995-W 10th Anniversary American Eagle Set  
Five Coins, Original Box, Deep Cameo Contrast**

**5196 1995-W Silver Eagle, 10th Anniversary Proof Set, Deep Cameo Uncertified.** This is a complete 1995-W 10th Anniversary American Eagle five-coin set in its original red box. It includes: Silver Eagle \$1; \$5 Tenth-Ounce Gold; \$10 Quarter-Ounce Gold; \$25 Half-Ounce Gold; and a \$50 One-Ounce Gold. The famous 1995-W Silver Eagle has remained the key to the series for more than 20 years now. Only 30,125 sets were sold, the \$999 price tag seen by many as too high at the time of issue. Each coin is profoundly contrasted and, for all intents and purposes, pristine. (Total: 5 coins) PCGS# 542350 Base PCGS# 9887

**5197 1998 Silver Eagle MS70 PCGS.** A technically perfect specimen, with fully struck design elements and vibrant mint luster throughout. Close inspection with a loupe reveals no surface flaws and eye appeal is tremendous. NGC ID# 26JV, PCGS# 9929

**5198 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS70 NGC.** This 1999-W quarter-ounce Gold eagle was struck from proof dies before the final stage of the proofing process was applied to the faces. This piece offers technically perfect, lustrous surfaces and fully struck design elements. NGC ID# 26MG, PCGS# 99942

**2000 Silver Eagle, MS70  
Low MS70 Survival Rate**

**5199 2000 Silver Eagle MS70 NGC.** From a mintage of nearly 10 million silver eagles at West Point in 2000, this perfect Mint State American Eagle silver piece is one of less than 300 that have received the MS70 grade (8/17). No more than that number of collectors can hope to obtain such a lovely piece. This satin beauty is fully brilliant and untuned with sharp design definition. NGC ID# 26JZ, PCGS# 9949 Base PCGS# 9969

**5200 2001 Silver Eagle MS70 PCGS.** A magnificent one-ounce Silver Eagle, with fully struck design elements and vibrant mint luster on impeccably preserved brilliant surfaces. The 2001 Silver Eagle is seldom encountered in the ultimate grade of MS70 in a PCGS holder. NGC ID# 26K3, PCGS# 9954

**5201 2001 Half-Ounce Gold Eagle MS70 NGC.** A technically perfect specimen of the half-ounce 2001 Gold Eagle, from a mintage of 48,047 pieces. This coin offers lustrous apricot-gold surfaces and fully struck design elements on both sides. NGC ID# 26SV, PCGS# 9957

**5202 2005 Four-Piece Set of Platinum Eagles MS70 NGC.** This uniformly perfect set includes: 2005 Platinum Eagle (\$10), MS70 NGC; 2005 Platinum Eagle (\$25), MS70 NGC; 2005 Platinum Eagle (\$50), MS70; and a 2005 Platinum Eagle (\$100), MS70 NGC. Mintages for each were all low. Only 14,013 pieces were struck of the \$10; 12,013 pieces were produced of the \$25; 9,013 examples were made of the \$50; and 6,310 coins were struck of the \$100. (Total: 4 coins)

**5203 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike, MS69 PCGS.** Struck during the first 30 days of the production run, this technically perfect specimen of the 2009 Ultra High Relief double eagle is fully struck and displays reflective surfaces that are nearly prooflike in their intensity. NGC ID# 2TY2, PCGS# 407405 Base PCGS# 407404

**5204 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike, MS70 PCGS.** A technically perfect specimen of the 2009 Ultra High Relief double eagle, struck during the first 30 days of the offering. This coin is fully struck and shows considerable prooflike reflectivity in the fields. NGC ID# 2TY2, PCGS# 407405 Base PCGS# 407404

**5205 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike, MS70 PCGS.** The First Strike coins were those issued within the first 30 days of production for the 2009 Ultra High Relief twenty dollar bullion issue. This technically perfect example is fully struck and displays an almost prooflike reflectivity in the fields. NGC ID# 2TY2, PCGS# 407405 Base PCGS# 407404

**5206 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** A technically perfect specimen of this iconic one-ounce gold issue, with fully struck design elements and prooflike reflective surfaces. Mint Director Edmund Moy was the driving force behind the production of the 2009 Ultra High Relief double eagle. NGC ID# 26S4, PCGS# 506602

**5207 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** A fully struck, technically perfect example of this one-ounce gold classic, with prooflike surfaces. The 2009 Ultra High Relief one-ounce double eagle was modeled after the Judd-1917 1907 pattern, which featured the regular Ultra High Relief double eagle design on a smaller, eagle-diameter planchet that was twice as thick to accommodate the weight of a double eagle. NGC ID# 26S4, PCGS# 506602

## COINS OF HAWAII

**5208 1883 Hawaii Ten Cents MS64+ NGC.** The 1883 Hawaii ten cent piece has the denomination expressed in two languages as ONE DIME and UNI KENETA. This lovely Choice Mint State representative has bold design features and frosty silver luster with peripheral gold and blue toning. Census: 29 in 64 (1 in 64+), 22 finer (8/17). NGC ID# 2C54, PCGS# 10979

**5209 1883 Hawaii Half Dollar MS63 NGC.** A frosty, champagne-tinted Mint State example of the 1883 Hawaii half dollar, struck at the San Francisco Mint and shipped to the island nation. Scattered light abrasions determine the grade. Finer coins will be difficult to locate on a budget. Census: 43 in 63, 43 finer (7/17). NGC ID# 2C5B, PCGS# 10991

## GSA DOLLARS

**5210 1882 MS62 Deep Mirror Prooflike PCGS.** Ex: GSA Hoard. The sharply detailed, frosty design elements contrast profoundly with the reflective fields of this impressive MS62 specimen. The surfaces show the expected number of minor contact marks for the grade. Housed in plastic packaging together with a plastic GSA disk, all inside a custom holder. NGC ID# 254A, PCGS# 97133

**5211 1883-CC GSA MS66+ NGC.** CAC. A scarce high-end GSA dollar in its original hard plastic holder. The strike is sharp, and the frosty surfaces are pristine with a trace of light golden toning along the upper-left obverse rim. NGC has seen only 40 GSA coins finer (7/17). NGC ID# 254S, PCGS# 518869 Base PCGS# 7144

**5212 1884-CC GSA MS66 NGC. CAC.** In most grades, the 1884-CC is readily available. However, Premium Gems with CAC approval are rarely offered. This Premium Gem dollar is brilliant and sharply impressed, displaying even cleaner surfaces than one might expect. No box or papers accompany this lot. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

**5213 1884-CC GSA MS64 Deep Mirror Prooflike NGC.** A thick coating of mint frost covers the devices, generating stark Deep Mirror Prooflike contrast against glassy, well-preserved fields. This near-Gem Carson City dollar is totally brilliant and a perfect example to represent the facility. No box or papers are included. NGC ID# 254M, PCGS# 518874 Base PCGS# 97153

**5214 1885-CC GSA, Doubled Dash, VAM-4, MS65 NGC.** A Hot 50 Variety. A thick, faintly doubled "dash" beneath the second 8 in the date is the chief attribute of this important VAM variety. This Gem example is well-struck and frosty with brilliant mint luster and no severe abrasions. A hint of reflectivity emerges from the fields when tilted beneath a light. Census: 28 in 65 (2 in 65+, 2 in 65 ★), 7 finer (7/17). NGC ID# 254S, PCGS# 133999 Base PCGS# 7160

## ERRORS

**5215 1957 Lincoln Cent — Struck on a 10 Cent Planchet — MS64 ANACS.** A lovely Choice Mint State example with frosty silver luster and splashes of maize and blue toning. Lincoln's hair is weak due to the thinner planchet, but the wheat ears are boldly detailed.

**5216 1959-D Lincoln Cent — Struck on a 10 Cent Planchet — MS62 ANACS.** Brilliant silver-gray luster exhibits splashes of gold and lilac toning on each side of this Choice Mint State piece that shows the typical weakness due to the thinness of the planchet.

### 1943-P Nickel, Struck on a Zinc-Coated Steel Planchet AU50 — A One-Year Type

**5217 1943-P Nickel — Struck on a Zinc-Coated Steel Planchet — AU50 NGC.** 2.7 grams. Struck on a cent planchet for 1943. This one-year type is an off-denomination striking using a zinc-coated steel planchet. Obviously a one-year type since these planchets were only used in one year at the height of World War II in an effort to save copper that was then used for shell casings. Dusky medium gray patina with evidence of light circulation.

**5218 (2010) Millard Fillmore Dollar — Missing Edge Lettering — MS69 NGC.** A nearly flawlessly preserved example of this popular mint error, showing satiny golden surfaces and a sharp strike. The edge inscription is supposed to have the date, mintmark, and the mottos IN GOD WE TRUST and E PLURIBUS UNUM. The edge lettering is missing on this piece.

## BETTS MEDAL

### 1783 Betts-610 Medal, MS65 Peace of Versailles

**5219 1783 Peace of Versailles, Betts-610, BHM-255, MS65 NGC.** White Metal. A spectacular light gray example of the 1783 Peace of Versailles medal that marked an arrangement of peace between France, Spain, and England at the conclusion of the Revolutionary War. The treaty was signed at the same time as the Treaty of Paris that was signed by England and the United States. This is a highly important historical medal, and the present example ranks among the finest we have seen, with lustrous light gray surfaces and a brilliant copper splasher.

## WASHINGTONIA

**5220 (1790s) Twigg Medal MS61 NGC. Baker-65, Musante GW-38.** White metal, 36 mm, plain edge. A late 18th century Washington medal made by Charles Twigg circa 1790. This piece is boldly struck in high relief with satiny nickel-white surfaces. Scattered handling marks affect the grade but are largely unobtrusive to the naked eye.

**5221 (Circa 1800) Washington Repub Ameri Medal, Baker-69, Musante GW-62, MS62 Brown NGC.** This medal provides the important dates in Washington's life, with his birth and death dates on the obverse (his birth given as Feb. 11, 1732 based on the Julian calendar). The dates of his command of the American Armies and the dates of his Presidency appear on the reverse. Scattered marks appear on the prooflike brown surfaces of this sharply defined and attractive medal.

### 1803 Eulogistic Washington Medal, AU55 Baker-84 — Wisdom, Virtue, Patriotism

**5222 1803 Washington Medal — Wisdom, Virtue, Patriotism — AU55 NGC. Baker-84.** 39 mm. This Eulogistic Inscription medal has a bust of Washington (similar to Baker-79), facing right, on the obverse, while the reverse displays Fame in flight blowing her horn. Probably a product of John Westwood since Baker-79 is by him. The surfaces are glossy brown with a number of small, but individually insignificant abrasions present.

**1800 Hero of Freedom Medal, XF Details  
Baker-79, Very Rare Struck in Silver  
Ex: Norweb Collection**

- 5223** 1800 Baker-79, Musante GW-81, Hero of Freedom Medal — Holed — PCGS Genuine. XF Details. Struck in Silver. Ex: Norweb Collection. Plain Edge. 424.8 grains, 38.6 mm. This early and popular Washington medal is a eulogistic piece that was struck in a number of formats including silver, white metal, bronze, and fire-gilt bronze. Made in England, these pieces are from dies by Obadiah Westwood according to the 2016 Neil Musante reference. The Hero of Freedom medals are struck in coin turn, a Westwood characteristic employed on other medals.

This example is holed at 12 o'clock and has numerous small marks and moderate wear, which suggests that it was worn or carried as a valued memento. Researcher Michael Hodder was aware of only six specimens in silver (including this one) upon its appearance in the 2006 Stack's auction of the Norweb Collection of Washingtonia. This is the only holed piece. Two other silver medals appeared in the Ford sale, where they brought \$14,950 and \$9,775 respectively. In 1998, the LaRiviere piece brought \$7,700.

**SO-CALLED DOLLARS**

**1826 Erie Canal Completion Medal, MS62  
First So-Called Dollar, HK-1000**

- 5224** 1826 Erie Canal Completion Silver Medal, HK-1000, MS62 NGC. The Erie Canal Completion medals were struck in white metal and silver, cataloged as HK-1 and HK-1000 respectively. While white metal examples are encountered from time-to-time, silver examples such as the present piece are extremely rare. This is an extremely important opportunity for the advanced medal collector or history enthusiast. The dies were prepared by the celebrated engraver, Charles Cushing Wright. This lovely example exhibits satin luster under lavender and blue toning with sharply delineated design elements. NGC ID# 2KGW, PCGS# 661050

- 5225** 1876 Nevada Dollar, HK-19, R.5, PR61 PCGS. Silver, 38 mm. Julian CM-36a. This so-called dollar, designed by William Barber, was minted from Nevada-mined silver ore. The total production was 2,256 pieces that were sold for \$1.25 each at the Nevada Building during the Philadelphia Centennial Exposition. This lightly hairlined piece has brilliant, untuned silver surfaces with precise design definition.

**HARD TIMES TOKEN**

- 5226** 1837 S.S.B. AU55 NGC. Low-139, HT-464. Brass, 2.5 gms, 19.6 mm. An elusive R.6 maverick Hard Times-era token. The Rulau reference notes, "It has been suggested, without evidence, that S.S.B. could stand for 'Scovill's Superfine Buttons.' The die work and size seem to clearly indicate some connection with the button-making industry." The date 1837 is quite bold on this example, with a large 8 and the 7 with a prominent cross-stroke. The brass planchet is well-struck and problem-free, and all details are well brought up, even at the interesting, decorative feathered-floral peripheries and in the unusual, intentionally textured background on each side that calls to mind the surface of a modern thimble. Ex: Troy Wiseman Collection (Heritage, 9/2006), lot 5974, which realized \$2,185.

**MISCELLANEOUS MEDALS AND TOKENS**

**1885 Dauphin County Centennial Medal in Silver  
Designed by William Barber  
Struck in the Medal Department**

- 5227** 1885 Dauphin County Pennsylvania Centennial Medal in Silver MS65 Prooflike NGC. Raymond-154. 38 mm. Unlisted in the HK reference on So-Called Dollars. Raymond's unlisted SCDs mentions it and says it is rare in white metal and extremely rare in bronze. The silver version is not listed, and the assumption is it is even rarer in this precious metal. The design is remarkably similar to William Barber's Nevada dollar and Centennial Exposition pieces (HK-19 and 20). William Barber did the models and George Soley made the steel reductions on a reducing lathe. William Barber died in 1879 and Soley died sometime in the 1870s. From the date, this appears to have been the product of Charles Barber's reworking of his father's dies. The Philadelphia Mint commonly struck medals from dies provided by outside sources. The Medal Department charged a per-piece fee in addition to the metal and overhead expenses, and delivered the medals to the organization that placed the order. The fields are brightly reflective and the devices are intricately detailed. Pale rose toning is seen over each side. A Choice AU silver piece sold in a Stack's Bowers auction in March 2016 for \$2,585.

- 5228** 1836 First Steam Coinage, Mar. 23 over Feb. 22, Julian MT-21, SP64 Brown PCGS. Julian identifies the overdated pieces, with Mar. 23 cut over Feb. 22, as originals, while others without the underlying Feb. 22 date are restrikes. This is an example of an original strike with smooth and reflective chocolate-brown surfaces. PCGS# 513243

- 5229** 1871 U.S. Assay Commission, JK-AC-10 SP65 PCGS. There are two variants of the 1871 Assay Commission medal, with or without the Mint Director's name in the obverse exergue. This variety lacks the name of James Pollock. A sensational Gem, this medal is rightfully certified as a Specimen, exhibiting deeply mirrored fields and excellent cameo contrast beneath original gold and iridescent toning.

**MINT SET**

- 5230** 1947 Double Mint Set, MS63-65 Uncertified. This original set has all 28 coins, as issued, in three boards. The coins exhibit the expected "Mint Set toning." The brown envelope is torn on the right (short) side and must be handled with care.

**End of Session Three**

## SESSION FIVE

## PROOF SETS

**8500** Five-Piece 1939 Proof Set, PR64-PR66 PCGS. The set includes: cent PR65 Red and Brown, nickel — Reverse of 1940 — PR66, dime PR65, quarter PR65, and half dollar PR64. The coins are individually holdered. (Total: 5 coins)

**8501** Six-Piece 1942 Proof Set, PR63-PR66 NGC. The set includes: cent PR64 Red, nickel — Type One — PR66, nickel — Type Two — PR66, dime PR63, quarter PR65, and half dollar PR64. The coins are individually holdered with similar shadings of pale champagne toning. (Total: 6 coins)

## WASHINGTONIA

**8502** (1805) Sansom Medal, Baker-71B, Julian PR-1c, Musante GW-71, MS60 NGC. White metal, 41 mm, plain edge.

**8503** 1800 Westwood Medal, Baker-80A, Musante GW-83, XF45 PCGS. Bronze, 41 mm, plain edge.

## U.S. PRESIDENTS & STATESMEN

**8504** 1840 William Henry Harrison Campaign Medal, DeWitt-WHH-1840-4, MS62 NGC. White metal, 43 mm.

## U.S. MINT MEDAL

**8505** (1851) Robert M. Patterson Medal, J-MT-2, SP64 PCGS. Bronzed, 65 mm.

## ASSAY MEDAL

**8506** 1909 U.S. Assay Commission, George B. Cortelyou, JK-AC-53, SP65 PCGS. Bronze.

## SO-CALLED DOLLARS

**8507** 1826 Erie Canal Completion, NY, HK-1, R.6 — Environmental Damage — NGC Details. XF. White metal. Uniformly corroded.

**8508** 1826 Erie Canal Completion, NY, HK-1, R.6 — Improperly Cleaned — NGC Details. AU. White metal.

**8509** 1876 U.S. Centennial Exposition, Art Gallery Building, HK-83A, MS62 NGC. Silver. Lovely iridescent toning on mirrored surfaces.

**8510** 1902 Wells Fargo & Company Semicentennial, HK-296, R.5, AU55 NGC. Silver.

**8511** (1906) San Francisco Earthquake, HK-343, R.6, MS63 Deep Prooflike NGC. Brass.

**8512** 1909 Utah Dollar, HK-359, R.5, MS67 Red NGC. Silver. Alaska-Yukon-Pacific Expo.

**8513** 1915 Pan-Pac Octagonal Dollar, HK-423, R.8 as silver-plated — Environmental Damage — NGC Details. AU. Silver-plated. C.G. Brinker S.F.

**8514** (1861-65) Aaron White Satirical Dollar, HK-829, R.6, MS63 Brown NGC. Copper, 35 mm, plain edge.

**8515** 1775-Dated Continental — Eagle & Heron, HK-865b, DeLorey Dickeson-7, R.7, MS63 Brown PCGS. Copper.

## COUNTERSTAMPS

**8516** (1836) Houck's Panacea Counterstamped on a 1786 Spanish 2 Reales, HT-143, Brunk H-779, Good 6 NGC. An unlisted host coin date in either the Brunk or Rulau references. Jacob Houck was a Baltimore, Maryland dry goods dealer who expanded into the patent medicine business. The loaf-shaped counterstamp on this example is fully struck (not always the case), with even the apostrophe visible in HOUCK'S.

**8517** 1795 2 Leaves — WAGNER Counterstamp — VG10 NGC. O-109, R.4. Brunk W-67, Rulau Mav-52K, R.8 with the counterstamp. The WAGNER mark is circa-1820, per Brunk, and is entered with a single well-made line punch. The host Flowing Hair half dollar is cream-gray and has virtually full legends and some faint adjustment marks in the obverse field.

## EARLY AMERICAN TOKEN

**8518** (1825-29) Richard Trested, New York, NY, Rulau-E-NY-922, R.7, AU55 PCGS. Brass, 24 mm, reeded edge.

## HARD TIMES TOKENS

**8519** (1838) Agriculture & Commerce, Low-66, HT-24, DeWitt-CE-1838-18, R.3, AU55 NGC. Copper. Ex: Eric P. Newman Collection.

**8520** 1838 I Am Not a Woman and a Sister, Low-54, DeWitt-CE-1838-19, HT-81, R.1, MS61 Brown PCGS. Copper, 28.3 mm, plain edge.

**8521** 1838 I Am Not a Woman & a Sister, Low-54, DeWitt-CE-1838-19, HT-81, R.1, MS62 NGC. Copper, 28.3 mm, plain edge.

**8522** (1831-35) William Rutter, Boston, MA, Low-327, HT-170, R.7, XF40 NGC. Copper, 29 mm, plain edge.

**8523** 1837 Feuchtwanger Cent, New York, Low-120, HT-268, Breen 5-G, R.2, MS64 NGC.

**8524** (1844) L.G. Irving & J.S. Pease, Low-257, HT-282, R.6, VF30 NGC. Brass. Ex: John J. Ford, Jr.

## U.S. TRADE TOKEN (1866-1889)

**8525** (Circa 1868) Merchant Token, Cincinnati, Ohio, Sacksteder & Martin, Fuld NC-OH-2 (formerly Fuld OH 165FD-1B, Uniface, MS63 NGC. A non-contemporary token issued by merchants who were in business in 1868 and 1869.

## WESTERN SOUVENIR GOLD

**8688** 1914 Washington Gold One MS65 NGC. WIRD-1, R.6. Die State 1.  
*From the MEHartGold.com Reference Collection.*

**8689** Group Lot of Four Tokens. 1860-Dated California Indian 25C, Round, Head Left — Mount Removed — NGC Details. Unc. CIRQ-4, R.7, Die State 1; 1901-Dated California Indian 25C, Round, Head Left — Soldered — NGC Details. Unc. CIRQ-3, R.7, Die State 2; 1915 California Minerva 50C, Round, Head Left — Cleaned — ANACS. AU58 Details. CMOH-1, R.6, Die State 2; 1904 Washington Gold One — Mount Removed — NGC Details. Unc. WIRD-1, R.6, Die State 2. Hart's Coins of the West.  
*From the MEHartGold.com Reference Collection. (Total: 4 coins)*

**8690** 1914 Washington Gold 50C, Coin Turn, MS64 NGC. WIRH-1, R.7. Die State 1.  
*From the MEHartGold.com Reference Collection.*

**8691** 1914 Washington Gold 50C, Medal Turn, MS65 NGC. WIRH-1, R.8. Die State 1.  
*From the MEHartGold.com Reference Collection.*

**8692** 1914 Washington Gold 25C, MS65 NGC. WIRQ-1, R.6. Die State 1.  
*From the MEHartGold.com Reference Collection.*

**8693** 1904 Farran Zerbe Numismatist Medal MS61 NGC. Hendershott-61-340. 50 mm, housed in an oversized NGC holder. Farran Zerbe's scarce and popular "Coin Values Medal," struck in aluminum for the St. Louis World's Fair and distributed there by Zerbe, the inimitable numismatic promoter. A silver-gray example, semiprooflike, with areas of pale-gray toning and a few deep-gray specks.  
*From the MEHartGold.com Reference Collection.*

**8694** Group Lot of Two Uncertified Tokens. 1849-Dated Arizona Gold One, Ineligible Type by NGC, ZIRD-1, R.8. Indian Head Left, 13 Stars obverse, numeral 1 over ONE reverse within wreath, beneath ARIZONA GOLD, the famous rarity; 1903 Arms of California token, Ineligible Type by NGC. This token is the original use of the reverse die later employed on the rare Louisiana Gold variety LFRQ-4 — a muling paired with the obverse die from LFRQ-3.  
*From the MEHartGold.com Reference Collection.* (Total: 2 coins)

**8695** 1871 California Indian One, Round, Head Left, 14 Stars, Uncertified. CIRD-1, R.8. Die State 1. This is the sole-known example, made into a stickpin — presumably by the issuer. CIRD-1 is the only 1871-dated California Indian Round die marriage.  
*From the MEHartGold.com Reference Collection.*

**8696** Group Lot of Three Tokens. 1909 Alaska 1/4 DWT, Uncertified, AMRQ-7, R.7, Die State 1. Made into a stickpin. Known only in stickpin or ex-stickpin format. 1909 Alaska 1/4 DWT, Uncertified, AMRQ-10, R.7, Die State 1. Looped at the top (all known examples of AMRQ-10 are jewelry or ex-jewelry pieces). 1915-Dated California Minerva 50C, Uncertified, CMRH-11, R.8, Die State 1. Made into a lapel pin, a rare variety.  
*From the MEHartGold.com Reference Collection.* (Total: 3 coins)

**8697** Group Lot of Three Items (Five Tokens). Alaska Indian One, Round, Uncertified as Ineligible Type by NGC. AIRD-3, R.7, Die State 1. A mule of sorts, with an obverse that mimics the AIRD series, but the reverse imitates the AERD Parka Head tokens. 1860-Dated California Indian 25C, Octagonal, Head Left — PVC, Mounted — Uncertified. CIOQ-2, R.6, Die State 2. Looped with extra links at the top. Some old greenish-gray build-up on the obverse. 1909 Alaska 1/4 DWT tokens joined to a pinback, Uncertified. AMRQ-10, R.7, Die State 1. Three examples of this scarce, jewelry-only variety carefully mounted in a row, with the maker's mark stamped on the reverse of the central coin.  
*From the MEHartGold.com Reference Collection.* (Total: 3 items)

**8698** Two Original Boxes for the Alaska Miner Token Set, R.6. Each box is 2 1/8" x 1 5/8". These scarce boxes once held three tokens each (quarter, half dollar, and dollar). The original velvet-lined inserts are included, but no tokens. One of the boxes shows the date 1909 handwritten on the lid. Some edge damage and wear on each box, one more so than the other.  
*From the MEHartGold.com Reference Collection.* (Total: 2 pieces)

**8699** Rare Original M.E. Hart Mailing Envelope, R.7. From the 1915 Panama-Pacific Exposition, or thereabouts. A scarce example of the envelope used to help promote Zerbe's souvenir gold tokens and specialties. Aged paper with slight folds and corner wear. The flap is creased and tucked.  
*From the MEHartGold.com Reference Collection.*

**8700** Original Tatham Stamp & Coin Co. Token Packet and Mailing Insert, R.4. An original envelope packet that once contained an Alaskan TooWah dollar token sold by Springfield, Massachusetts coin importer and dealer Tatham Stamp & Coin Company. Includes a printed insert describing the souvenir Alaskan gold TooWah, which was sold for \$1.00. The coin envelope is worn with minor creases and some splitting at the seams; two folds on the insert.  
*From the MEHartGold.com Reference Collection.*

**8701** Rare Letter from Nathan Joseph, R.8. A rare and historical letter from Nathan Joseph describing the history of California souvenir gold pieces. Printed on metallic gold and black letterhead with illustrated California gold pieces and Alaska, Eureka, and Ringed coins. Remarkable insight into the manufacture and sale of Western Souvenir Gold.  
*From the MEHartGold.com Reference Collection.*

## CALIFORNIA GOLD CHARM

**8702** 1872 George Washington California Gold Charm, Octagonal "1/4" Baker-504A, Musante GW-819, MS64 NGC. Gold, 9 mm, plain edge.

## WORLD MEDAL

**8703** 1838 West Indies Emancipation Medal, Great Britain, BHM-1879, MS62 NGC. White metal.

## MILITARY MEDAL

**8704** 1888 Maryland Commandery No. 1 Veterans Medal, MS64 Brown NGC. Bronze, 38 mm.

## MISCELLANEOUS MEDALS AND TOKENS

**8705** 1849-Dated California Model Half Eagle, MS62 NGC. Brass, 17.5 mm.

**8706** 1857-Dated Old Round House, Le Roy, NY, MS62 NGC. White metal, 34 mm.

**8707** 1885 Dauphin County, PA, Centennial, MS67 Brown NGC. Bronze, 38 mm.

**8708** (1947) Eight-Piece lot of C. Smith So-Called Half Dollars. Includes: Confederate Seal, MS66; R. Byrd Antarctic Expedition, MS66; Daniel Boone - Lexington, 150th Anniversary, MS66; Pony Express Diamond Jubilee, Changing Ponies, MS66; Battle of Lexington 150th, MS66; T. Edison Centennial, MS66 Prooflike, 32 mm; Capt. Charles A. Lindbergh, First Non-Stop Flight New York to Paris, MS66 (misidentified on the holder as Battle of Lexington); Robert E. Lee CSA, MS66. (Total: 8 coins)

**8709** (2014) Paris Mint Libertas Americana Restrike PR70 Ultra Cameo NGC. Silver, 5 ounces.

**8710** (2014) Paris Mint Libertas Americana Restrike PR70 Ultra Cameo NGC. Silver, 5 ounces.

## HOBO NICKELS

**8711** Three Hobo Nickels. These well-made carvings are done in the classic style, but in our opinion do not date from the classic period of original hobo nickels. The 1930s dates on the nickels are further indication of a later vintage. They make an attractive group, and the overall attention to detail and quality of carving are noted. (Total: 3 coins)

## MINT SETS

**8712** 1948 Double Mint Set, Uncertified. The set includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1948 (the San Francisco Mint did not strike half dollars that year). The coins exhibit light to moderate toning and are in original cardboard holders. Includes the original outer kraft envelope. (Total: 28 coins)

**8713** 1949 Double Mint Set, Uncertified. The set includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1949 (the San Francisco Mint did not strike quarter dollars that year). The coins exhibit light to moderate toning and are in original cardboard holders. Includes the original kraft envelope. (Total: 28 coins)

**8714 1951 Double Mint Set, Uncertified.**

The set includes 30 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1951. The coins exhibit light to moderate toning and are in original cardboard holders. Includes the original kraft envelope and the stamped outer mailing envelope. (Total: 30 coins)

**8715 1952 Double Mint Set, Uncertified.**

The set includes 30 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1952. The coins exhibit light to moderate toning and are in original cardboard holders. Includes the original kraft envelope. (Total: 30 coins)

**8716 1953 Double Mint Set, Uncertified.**

The set includes 30 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953. The coins exhibit light to moderate toning and are in original cardboard holders. Includes the original outer kraft mailing envelope. (Total: 30 coins)

**8717 1954 and 1955 Double Mint Sets, Uncertified.**

The sets include 48 coins combined, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1954 and 1955 (the Denver Mint did not strike half dollars in 1955). The 1955 set is missing the San Francisco coins. The coins exhibit light to moderate toning and are in original cardboard holders. Includes a single, torn kraft envelope. (Total: 48 coins)

**8718 1956, 1957, and 1958 Double Mint Sets, Uncertified.**

The sets include 58 coins, two of each denomination struck at the Philadelphia and Denver Mints, in 1956, '57, and '58 (the Denver Mint did not strike half dollars in 1956). The coins exhibit light to moderate toning and are in original cardboard holders. Includes the original outer kraft mailing envelopes of two sets. (Total: 58 coins)

*End of Auction*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

- All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Nineteen and one-half percent (19.5%) on Comic and Movie Poster Auction lots;
- Twenty percent (20%) on Currency, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the net \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

## Auction Venues:

- The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

- Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

- In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

- Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
- Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment
< \$10 .....	\$1
\$10 - \$49 .....	\$2
\$50 - \$99 .....	\$5
\$100 - \$199 .....	\$10
\$200 - \$499 .....	\$20
\$500 - \$999 .....	\$50
\$1,000 - \$1,999 .....	\$100
\$2,000 - \$4,999 .....	\$200
\$5,000 - \$9,999 .....	\$500

Current Bid .....	Bid Increment
\$10,000 - \$19,999 .....	\$1,000
\$20,000 - \$49,999 .....	\$2,000
\$50,000 - \$99,999 .....	\$5,000
\$100,000 - \$199,999 .....	\$10,000
\$200,000 - \$499,999 .....	\$20,000
\$500,000 - \$999,999 .....	\$25,000
\$1,000,000 - \$1,999,999 .....	\$50,000
\$2,000,000 - \$9,999,999 .....	\$100,000
>= \$10,000,000 .....	\$200,000

- If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

- Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any

means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
- Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

- All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
- Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
- Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
- Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
- Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common

# Terms and Conditions of Auction

carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
  33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
  34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
    - a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
    - b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
    - c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
  35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
  - 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.
  - 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
  - 36C. Auctioneer shall not be liable for any loss caused by or resulting from:
    - a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
    - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
  37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.
- ## **Cataloging, Warranties and Disclaimers:**
38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .
  39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
  40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
  41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
  42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.
- ## **Release:**
43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
  44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. **Exclusive Dispute Resolution Process:** All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. **Rules of Construction:** Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016
